

13 January 2025

Geelong Refinery update

Viva Energy Group (**Viva Energy**) advises that a power outage at the Geelong Refinery occurred on 12 January 2025 due to an external interruption in the power supply, coincident with a lightning storm in the area. The outage caused an unscheduled shutdown across all units.

Restart activities are underway. The timeframe to resume normal production is expected to be between one and two weeks. Viva Energy does not expect supply to the market to be disrupted as a result of the incident.

More information will be provided as restart activities progress and the assessment of the units has been completed.
