Sorby Hills Project

Progress toward a Final Investment Decision

Recent achievements provide Boab with **significant momentum heading into 2025**

2022 - 2023

- ✓ Completion of the Sorby Hills **Definitive Feasibility Study** (“DFS”)¹.
- ✓ Heads of Agreement to source **power from the Ord-River Hydroelectric Plant** executed with Horizon Power².
- ✓ **Port Access Agreement** executed with port operators Cambridge Gulf³.
- ✓ 178-person **Accommodation Facility acquired and relocated to site**⁴.

1. ASX Release 19 January 2023
2. ASX Release 22 April 2022
3. ASX Release 31 March 2022
4. ASX Release 15 September 2022

2024

- ✓ Completion of a **Front-End Engineering & Design Study** (“FEED Study”) delivering improved project economics¹.
- ✓ **Agreement to acquire 100% Sorby Hills** upon Final Investment Decision².
- ✓ Execution of **Binding Offtake** and US\$30 Million **Prepayment Facility** with **Trafigura**³.
- ✓ Identified opportunity to acquire **DeGrussa Process Plant** and **reduce project Capex**⁴.
- ✓ **EPA Part IV Amendments** received⁵.

Sorby Hills Project

A near term producer of Lead & Silver

Investment Highlights

- Located **50km northeast of Kununurra**, Western Australia and 150km by **sealed roads to Wyndham Port**
- **High quality 47.3Mt Mineral Resource at 4.3% PbEq (or 123g/t AgEq)¹**
- **Resource includes 53Moz contained Silver**
- **Initial Production Target of 18.3Mt** (39% of Resource) underpinned by **83% Reserves**
- Significant near pit **mine life extension opportunities**
- **Conventional open pit mining and flotation process plant** producing a high-grade Lead-Silver concentrate
- **FEED Study Complete – NPV₈ A\$411M, IRR 37%**
- **Concentrate Offtake awarded**
- **Binding US\$30M Prepayment Term Sheet executed**
- Engagement with additional debt Financiers ongoing
- **Targeting a Final Investment Decision H2 2025**

Sorby Hills Project Development Ready

Figure: 3D Model of the Sorby Hills Process Plant produce by GRES during FEED.

Conventional Crush-Mill-Flotation circuit to produce Lead-Silver concentrate.

High metallurgical recoveries (92% Lead, 82% Silver) based on extensive testwork.

Front End Engineering & Design (“FEED”) has been completed by GR Engineering Services (“GRES”).

FEED EPC pricing consistent with pricing adopted in the DFS.

Options to further reduce costs have been identified by GRES.

Sorby Hills Project

Confirmed Low-Cost producer

Independently confirmed as a 1st Quartile Project on the Global Lead cost curve

ersonal use only

2027 Lead Cost Curve (ex-works basis)

Low risk open cut mining and high process plant throughput drives **low operating cost relative to global peers.**

CRU, Independent Market Consultant Report for Boab Metals' Sorby Hills Pb-Ag Project (Sept 2023).

Sorby Hills Project

Robust project economics

Profitable throughout a 10-year commodities cycle

* Based on an average Mine plan grades of 31.5 oz of paid silver per tonne of payable Lead

- Base on an average pre-Silver credit C1 Cost Operating Cost of US\$0.74/lb (A\$2,388/t) (per Sorby Hills FEED Study).
- **The Sorby Hills Project would have generated an average margin per t PbEq of 36% over the previous 10-year metal price and FX cycle.**
- The Project would have been largely cashflow positive based on Lead revenue alone.

Sorby Hills Project Cost Reduction Initiatives

Company is assessing two material opportunities to further reduce the capital and operating costs for Sorby Hills.

Second Hand Process Plant

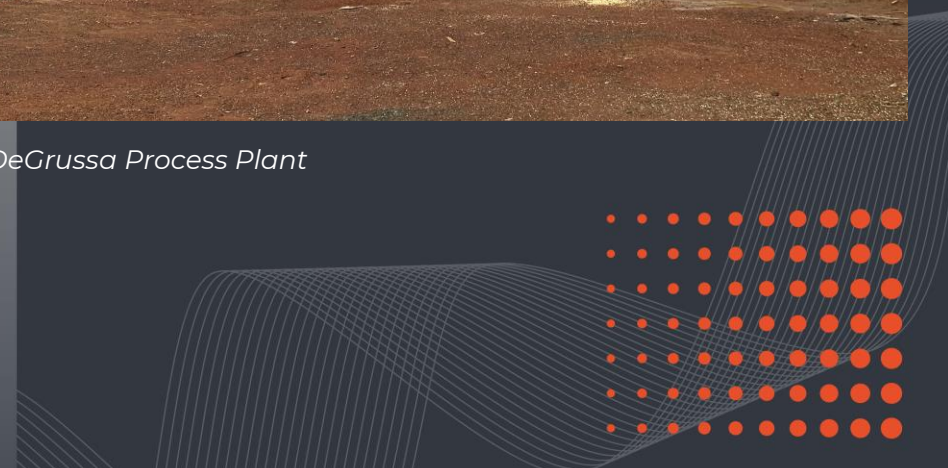

- Sandfire Resources' **DeGrussa Process Plant** has been identified as highly prospective and **fit-for-purpose opportunity** to **reduce project capital costs**.
- Currently located 900km northeast of Perth.
- The plant was part of the world-class DeGrussa Copper mine that was built and operated by Sandfire between 2011-2023.
- Boab is working with GRES to undertake a thorough review of the plant and assess the technical and economic benefit of its incorporation into the Sorby Hills Project.

100% Clean Energy from the Ord River Hydroelectric Plant

- FEED Study included provision of a full-scale diesel generator back up on-site (in addition to grid power).
- The Company is exploring the **opportunity to reduce the size of, or remove the need for, back-up diesel generators** and further increase to percentage of green, grid power from the hydroelectric plant beyond the current ~90%.

Figure: DeGrussa Process Plant

Sorby Hills Project

Agreement to acquire 100% Interest

Terms of the Agreement

12-month option for Boab to acquire remaining 25% interest in Sorby Hills existing JV partner.

Full control over joint venture budgets and work programs during the Option Period.

Should the Option be exercised, Boab will pay:

- **Tranche 1: A\$12.5M** upon reaching a Final Investment Decision at Sorby Hills;
- **Tranche 2: A\$5.5M** payable within 12 months following first concentrate production; and
- **Tranche 3: A\$5.0M** payable within 18 months following first concentrate production.

Importantly, the option agreement requires no immediate payment and provides a new basis on which to engage potential Financiers.

+A\$103M NPV

based on the Sorby Hills FEED Study - ASX
Release 6 June 2024

Sorby Hills Project Offtake and Prepayment Agreement

Terms of the Agreement with Trafigura

Binding Prepayment Term Sheet

- US\$30M for the development and construction of Sorby Hills.
- 5 Year Term, 18 Month Repayment Grace Period.
- Interest Rate of Term SOFR + 5%.
- Repaid via monthly instalments following the Grace Period.

Binding Offtake Agreement

- 75% of the lead-silver Concentrate produced at Sorby Hills.
- Minimum Quantity of 531kt (~7 years based on the FEED Study).
- Market standard metal pricing and metal payabilities.
- Ability for Boab to scale back Offtake Percentage and Minimum Quantity should the Prepayment Facility not proceed or Boab's sources alternative financing.

**Attractive and flexible
offtake terms** from
global commodities
trader **Trafigura**

US\$30M Prepayment
represents a
cornerstone element of
targeted financing plan
for Sorby Hills.

ersonal use only

Sorby Hills Project High Quality Concentrate

Wyndham Port located just 150km from Sorby Hills by existing sealed road.

Port Access Agreement executed with port operators Cambridge Gulf

Concentrate to be transported from site to Wyndham in sealed containers.

873kt of Concentrate shipped at an average 103kt per annum.

- **Average 65.8% Lead.**
- **Average 664 g/t Silver.**

Highly competitive process including global traders and smelters has **demonstrated the attractiveness of the Sorby Hills concentrate product.**

Figure: Loading at Wyndham Port

Sorby Hills Project

Upcoming Share Price Catalysts

- **Q1 2025:**
 - Complete assessment of the technical and economic benefit of the potential acquisition of Sandfire's **DeGrussa Process plant** and its incorporation into the Sorby Hills.
- **H1 2025:**
 - Secure **additional non-dilutive debt finance** to support funding of the Sorby Hills Project; and
 - **Finalise regulatory approvals** required to commence construction at Sorby Hills.
- **H2 2025:**
 - **Final Investment Decision**
 - Sorby Hills Mine life extensional and infill drilling
 - Growth project exploration

Board and Technical Team

Board and Management with a **proven track record** in exploration and development

Gary Comb
Chairman

Engineer with over 30 years' experience in the Australian mining industry, with a strong track record in successfully commissioning and operating base metal mines.

Simon Noon
Managing Director and CEO

Experienced mining executive with a strong background in management, capital raising and operating JV's with mid to top tier miners in a variety of commodities.

Richard Monti
Non-Exec. Director

Geologist with over 30 years' experience in technical, commercial, marketing and finance within the exploration and mining industry.

Andrew Parker
Non-Exec. Director

Lawyer with significant experience in the exploration and mining industry. Wealth of expertise in corporate advisory, strategic consultancy and raising capital.

Bill Darcey – Project Manager

Mining professional with over 40 years of experience and a proven track record of successfully managing, optimising, and developing mining operations. Bill was previously Operations Manager at the Mt Garnet Cu-Pb-Zn operation, where he oversaw the successful start-up and management of an 800,000 TPA zinc-lead operation in China. Bill holds degrees in both mining engineering and metallurgy.

Simon Dorling - Exploration Manager

Geologist with more than 26 years' experience in exploration, development and the mining of base metals, precious metals, energy minerals and industrial minerals.

Technical Team

Sorby Hills Project

Strategic Growth Opportunities

Vision to establish a long-life presence in the east Kimberley Region

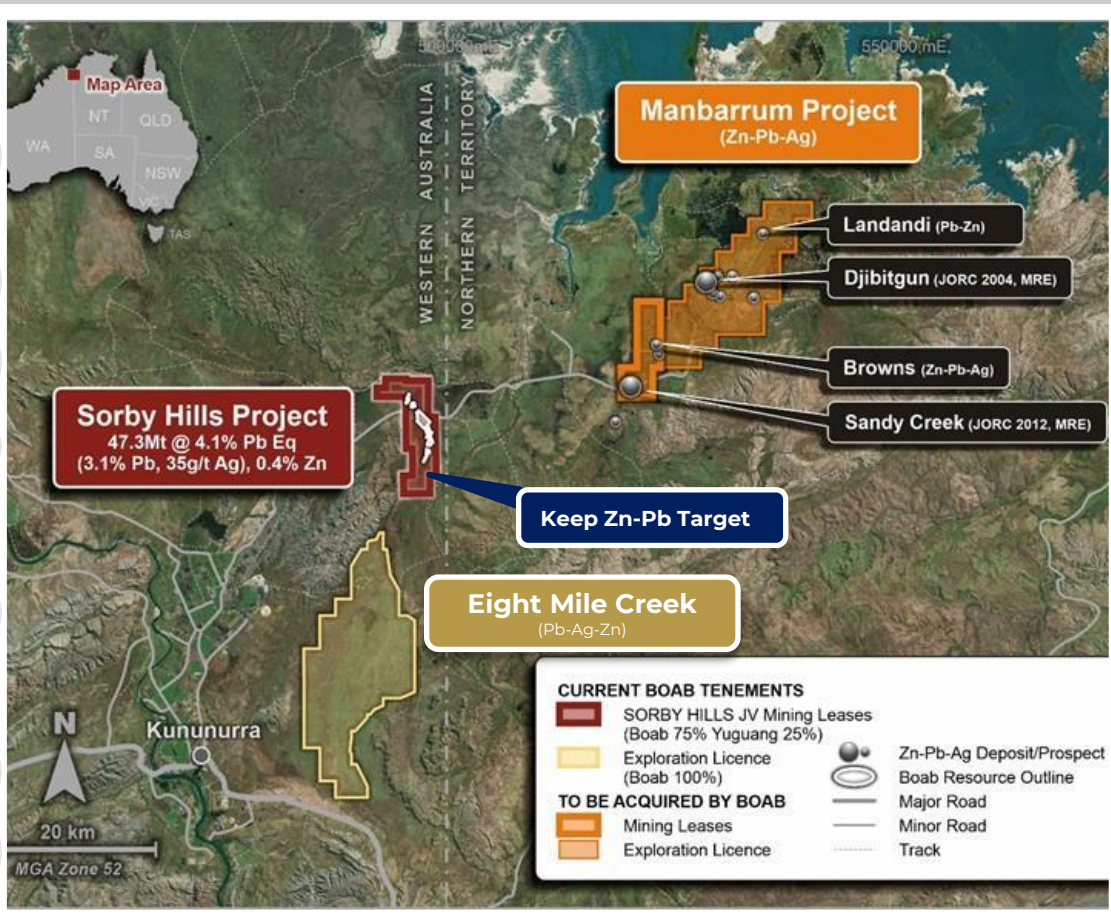

Figure:
Location of the Manbarrum Project, Eight Mile Creek Project and Keep n-Pb Target relative to Sorby Hills.

Manbarrum Zn-Pb-Ag Project

- located 25km east of the Sorby Hills Project.
- 175km² of prospective tenements (including two granted mining leases) covering **geology related to that found at Sorby Hills.**
- Mineral Resources declared at two prospects which are zinc and silver dominated.**
- Conceptual open pit mining studies completed by CSA Global in 2018.**

Keep Zinc Lead Target

- New Zinc-Lead mineralisation recently discovered via greenfield exploration within the existing Sorby Hills mining leases
- Ore grade intercepts include:
 - SHSD_185: 9.55 m @ 5.10% PbEq (2.59% Pb & 2.26% Zn) and 17.6 g/t Ag from 242.55 m
 - SHSD_189: 2.00 m @ 7.73% PbEq (1.23% Pb & 5.86% Zn) and 36.7 g/t Ag from 303.0 m

Eight Mile Creek Project

- 30km of along-strike geology, **highly prospective for deposits similar to Sorby Hills.**
- The exploration **success based on seismic data at the Keep Zinc-Lead Target** has opened the door for more bold exploration at Eight Mile Creek.

Boab Metals

Establishing Deep Roots within the Local Community

Boab is extremely proud to be the Naming Rights Sponsor of the Ord Valley Muster

- Sense of community plays a key role in economic and social well-being of stakeholders across the east Kimberley Region.
- The Ord Valley Muster has been a highlight of the Kimberley community calendar for 20 years.

Boab is an enthusiastic supporter and active contributor to the Teach Learn Grow program.

- Boab Metals has been partnering with Teach Learn Grow (TLG) since 2021 in the delivery of their Rural Program which supports one-on-one tutoring and mentorship to students in East Kimberley schools.

Sorby Hills FEED Study

Capital Cost Breakdown

Total upfront capital cost of A\$264M including A\$22.7M contingency.

~66% of capital costs underpinned by tendered pricing, including an updated Process Plant EPC pricing following the completion of Front-End Engineering & Design by GRES.

A\$32M Owner Costs including operational readiness items such as critical spares and owner's team.

Opportunities being explored to further reduce upfront capital costs and project implementation risk.

Item	Pre-Production (A\$M)	Sustaining (A\$M)	Total (A\$M)
EPC Contract	134.9	-	134.9
Site Est / Bulk Earthworks	31.9	4.9	36.9
Water Management	8.1	11.7	19.8
Accommodation Village	11.5	-	11.5
Other Infrastructure	8.5	0.6	9.1
Owners Costs	32.0	-	32.0
Contingency	22.7	-	22.7
Pre-Production Opex	15.0	-	15.0
Closure Costs	-	9.3	9.3
Total Capital Costs	264.5	26.5	290.9

Sorby Hills FEED Study

Operating Cost Breakdown

Competitive **C1 cash cost of US\$0.36/lb payable Pb** (including Silver Credits).

~80% of Mining Costs underpinned by tendered pricing.

Opportunity to reduce Process costs through the optimisation of back-up power requirements.

Item	Total (A\$M)	Unit Costs	
		A\$/t ore	US\$/lb payable Pb
Logistics	117	6.4	0.07
Mining	547	30.0	0.31
Processing	388	21.3	0.22
G & A	88	4.8	0.05
Lead Treatment	160	8.8	0.09
C1 Costs (ex-Credits)	1,300	71.2	0.74
Net Silver Credits	(661)	(36.2)	(0.37)
C1 Costs	639	35.0	0.36
Royalties	95	5.2	0.05
Sustaining Capital	26	1.4	0.01
AISC	760	41.6	0.43

Unit Operating Costs based on 18.3Mt of Ore, 546kt of Payable Lead, average exchange rate of AUD:USD 0.68 and average Silver price of US\$27.4/oz.

Sorby Hills Project

Continuing to Delivering Silver Exposure to Investors

Rolling 30-day average daily % changes in USD Silver price & BML share price since June 2018

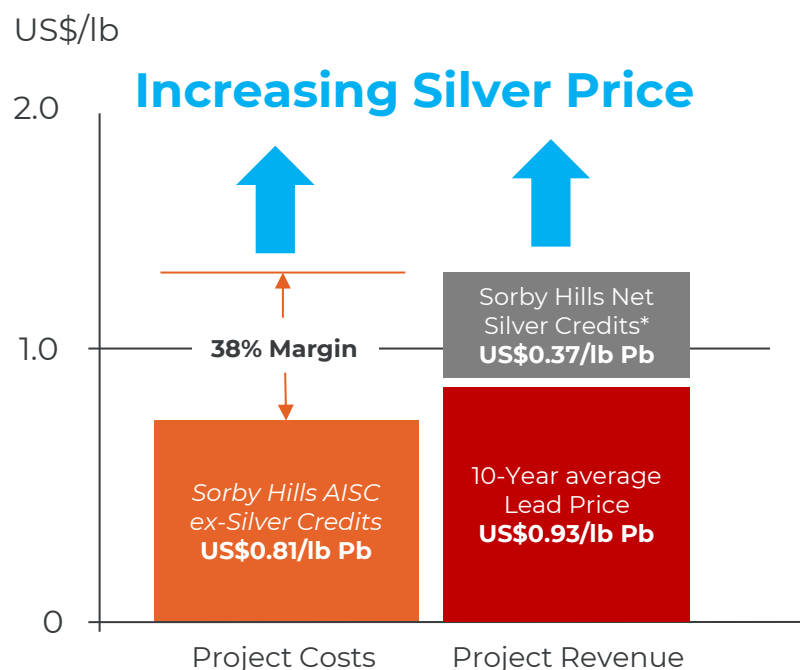

- Since the acquisition of the Sorby Hills Project in June 2018, Boab's share price has exhibited a strong correlation with movements in the price of Silver.
- Significant positive movements in Silver price correspond to significant positive movements in the Boab share price

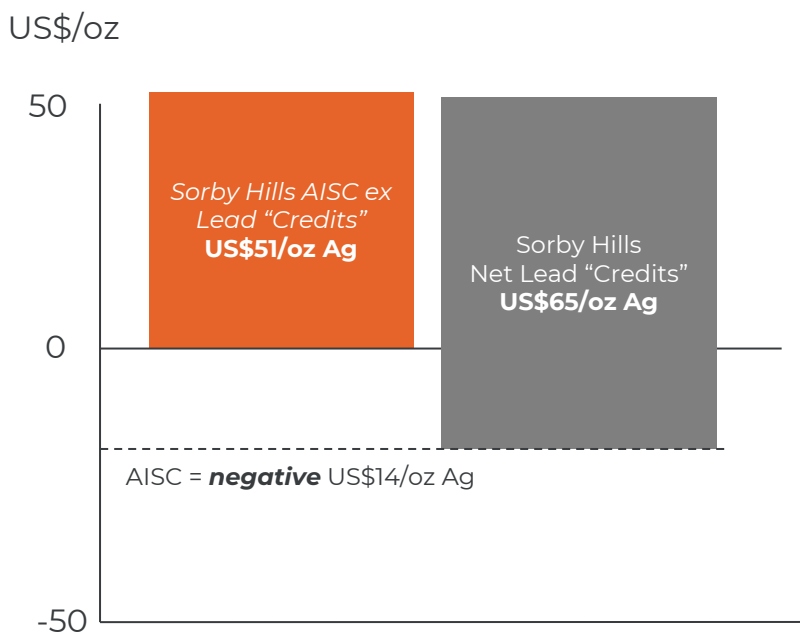

Sorby Hills Project

Exposure to Silver Price

Operating Costs covered by a historically non-volatile Lead Price leaves the Operating margin fully leveraged to Silver price movements.

Sorby Hills Project Costs are more than covered by the 10-year average¹ Lead Price

Sorby Hills – A low-cost Silver Producer?

Viewed differently, the Sorby Hills Project may be considered a low-cost silver producer

AISC = negative US\$14/oz Ag

*Based on FEED Study Price of US\$27/oz Ag

Metal Equivalent Calculations

The contained metal equivalence formula is based on the Sorby Hills FEED Study including:

- Lead Price US\$2,253/t; and
- Silver Price US\$27.4/oz.

Pb Lead Equivalent Calculations

- Silver recovery of 82% (weighted average of oxide and fresh Ag recoveries); and
- Silver Payability rate of 95%.

Ag Silver Equivalent Calculations

- Lead recovery of 91% (weighted average of oxide and fresh Pb recoveries); and
- Lead Payability rate of 95%.

It is Boab's opinion that all elements included in the metal equivalent calculation have a reasonable potential to be recovered and sold. The formula used to calculate lead equivalent grade is:

$$\text{Metal Eq (percent)} = G_{pri} + (G_{pri} \times [\sum_i R_i S_i V_i G_i] / (R_{pri} S_{pri} V_{pri} G_{pri}))$$

where **R** is the respective metallurgical metal recovery rate, **S** is the respective smelter return rate, **V** is metal price/tonne or ounce, and **G** is the metal commodity grade for the suite of potentially recoverable commodities (**i**) relative to the primary metal (**pri**).

Metal equivalents are highly dependent on the metal prices used to derive the formula. Boab notes that the metal equivalence method used above is a simplified approach. The metal prices are based on the DFS values adopted and do not reflect the metal prices that a smelter would pay for concentrate nor are any smelter penalties or charges included in the calculation.

Owing to limited metallurgical data, zinc grades are not included at this stage in the lead equivalent grade calculation.

Feed Study Macroeconomic Assumptions

Assumption	Unit	2025	2026	2027	2028	2029+
Lead Price	US\$/t	2,259	2,268	2,269	2,254	2,251
Silver Price	US\$/oz	24.8	25.8	26.4	27.3	27.5
Exchange Rate	A\$:US\$	0.70	0.70	0.70	0.69	0.68
