

RAIDEN QUARTERLY ACTIVITIES REPORT FOR PERIOD ENDED 31 DECEMBER 2024

Highlights

Andover South Project

- The Company undertook the maiden drilling program over the Andover South project area (7,041m completed in the quarter¹)
- Company reported a significant intercept (>250m wide) zone of pegmatites on Target Area 7, as well as Li₂O mineralised pegmatite intercepts across target Areas 1 and 2^{3,4}

Mt Sholl Ni-Cu-PGE Project

- All regulatory approvals for commencement of drilling on the Mt Sholl Cu-Ni-PGE project were received and drill access preparations commenced⁵
- Drilling program of 10 RC holes for 2,467m was completed with First Quantum Minerals⁶ financing all activities on the project

Arrow Gold Project

- Following receipt of all necessary regulatory approvals and heritage survey approvals, aircore drilling on the Arrow Project⁷ commenced
- The program, for a total of 79 drill holes and 3,007m, was completed by the middle of November 2024⁸, financed by the Company's earn-in JV partner Mallina Co Pty Ltd

Corporate

- Company completed a raising of \$10 million (before fees), from sophisticated, professional and institutional investors⁹ (~\$16.38M cash on hand at end of quarter)

Raiden Resources Limited (ASX: RDN) ("Raiden" or "the Company") is pleased to provide its report on activities and progress made during the December 2024 Quarter.

Exploration Activities in Western Australia

Andover Project (Lithium)

During the quarter the Company initiated the maiden drilling program over the Andover South lithium-bearing pegmatite targets at the Andover South Project area (E47/4061 & E47/4062)¹. The program was executed by multiple diamond drill rigs and >7,000 metres of diamond drilling was completed by the end of the quarter.

The program focused on the highest priority targets, which were defined on the basis of field work executed over the previous year. The initial key targets were Target Areas 1 and 2, which are characterised by outcropping, highly fractionated pegmatites and that yielded high-grade Li₂O rock samples over a multi kilometre trend.

The Company further expanded the drilling program to drill test Target Area 3 with a single drill hole, as well as Target Area 7, where 4 drill holes were completed by the end of the quarter.

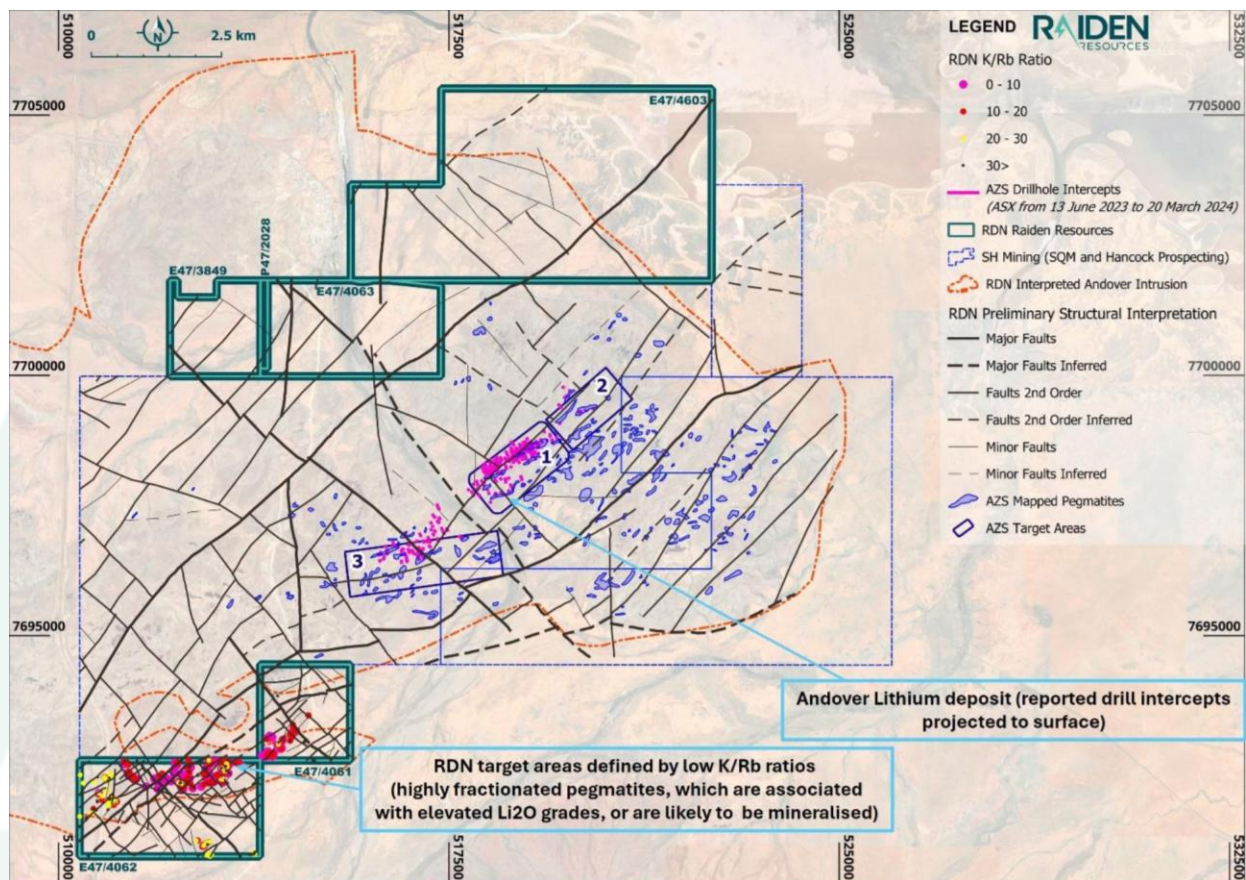

Figure 1: Raiden’s Andover South Project and adjacent SH Mining Pty Ltd’s (previously Azure Minerals Ltd) Andover Lithium project¹⁰

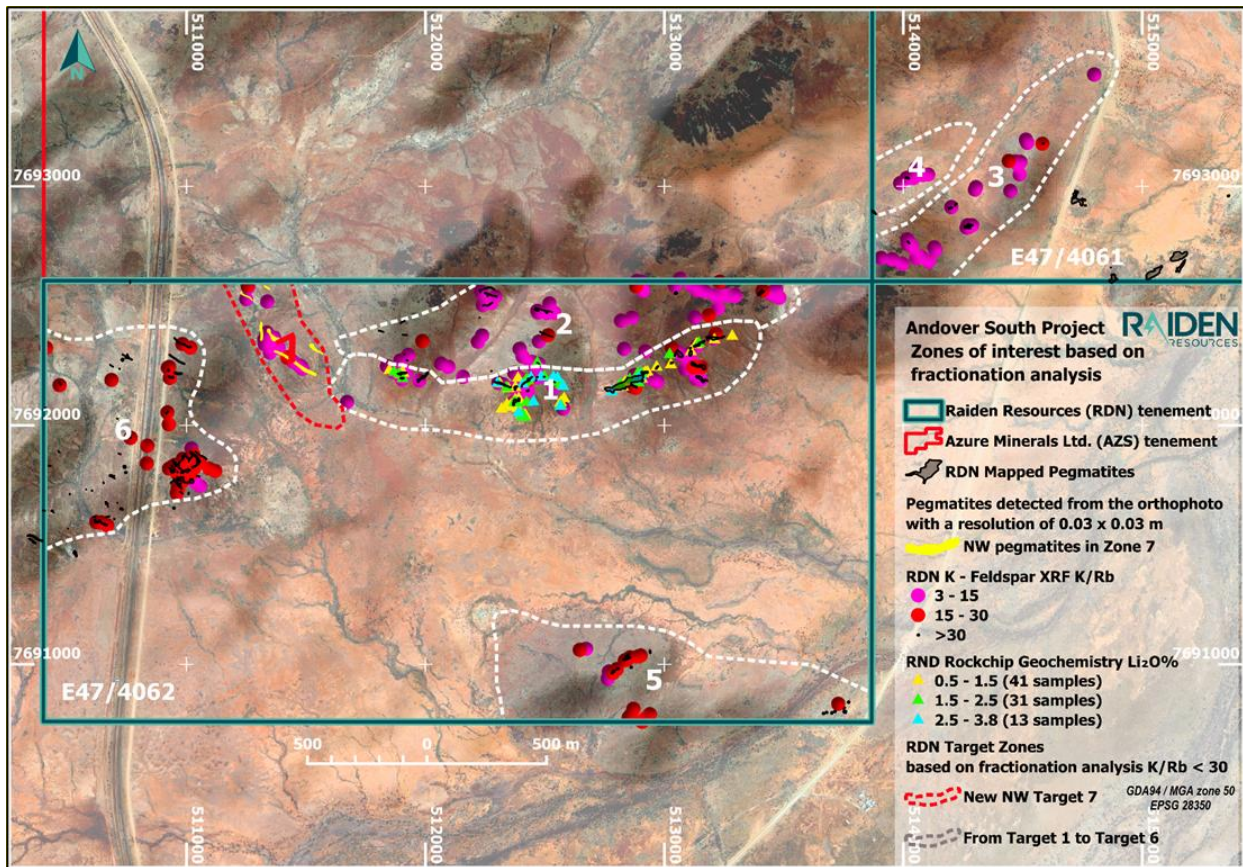

Figure 2: Andover South Project – zones of interest based on fractionation analysis of pegmatites, with recently defined zone 7 highlighted in red¹¹

During the quarter, the Company provided updates in regard to ongoing drilling progress on the project and available results.

Target Area 7

The first diamond drillhole completed in Area 7, ASDD023³, intersected a broad zone of what are interpreted to be a multi-phase pegmatite, hosted by biotite-altered porphyritic dykes and intrusions. Individual pegmatite intersections within the zone are up to 57m thick^A. Management’s current interpretation, is that these pegmatites are hosted within a significant structural corridor, which has accommodated significant pegmatitic intrusions.

^ADownhole width is not equivalent to true thickness. Structural measurement and analysis of drill core is ongoing to establish the true orientation of the pegmatite.

Figure 3: Interpreted cross-section of drill hole ASDD023^{A,3}

^ADownhole width is not equivalent to true thickness. Structural measurement and analysis of drill core is ongoing to establish the true orientation of the pegmatite.

The second hole drilled in Target Area 7, ASDD025⁴, is located approximately 315m along strike to the southeast of ASDD023. ASDD025 has intersected a swarm of pegmatites extending across 250 metres^A downhole. The Company believes that this swarm of pegmatites may represent the strike extension of the pegmatite zone intercepted in ASD0023.

Target Area 1 and 2

During the quarter assays received for the first 12 holes of maiden drill program at Andover South, where Initial drilling concentrated in the centre of tenement E47/4062 in Target Area 1 and 2. Widest intersection reported was **15.3 metres^A @ 0.53% Li₂O and highest individual grade assays above 2% Li₂O³**.

Initial interpretation indicates that the pegmatite system in this area dips at a very shallow angle to the north and is hosted within massive and structurally undisturbed gabbro. This low-angle dip deviated from field observations to date, where steeply dipping pegmatites (that dip to the north and to the south) have been observed. Further pegmatite intersections at greater depths point to a potential stacked system with the potential for repetitions at depth.

On the basis of these observations and the intercept of a major pegmatite-bearing zone within Target Area 7, management believe that the drilling to date conducted at Andover South Target Area 1 and 2 has only tested the upper parts of the system and the main structural targets remain untested and potentially located further south from limits of current drilling.

Mt Sholl Project (Ni-Cu-PGE)

During the quarter, the Company announced receipt of the final heritage report for the Mt Sholl Project from the Ngarluma Aboriginal Corporation (NAC), which indicated that no areas of cultural heritage would impact on the planned drilling program⁵. Furthermore, the PoW for the planned program was approved. First Quantum Minerals commenced the drilling program on the Mt Sholl project, with 2,467 metres of Reverse Circulation drilling completed in 10 holes by the end of the working season in December. The program was designed to test new targets defined by First Quantum Minerals, as well as direct extensions of the mineral resource and the JORC Exploration Target previously defined by the Company. The program was managed and financed by First Quantum Minerals under the MOU in place relating to the Mt Sholl project⁶. The results are expected in February 2025.

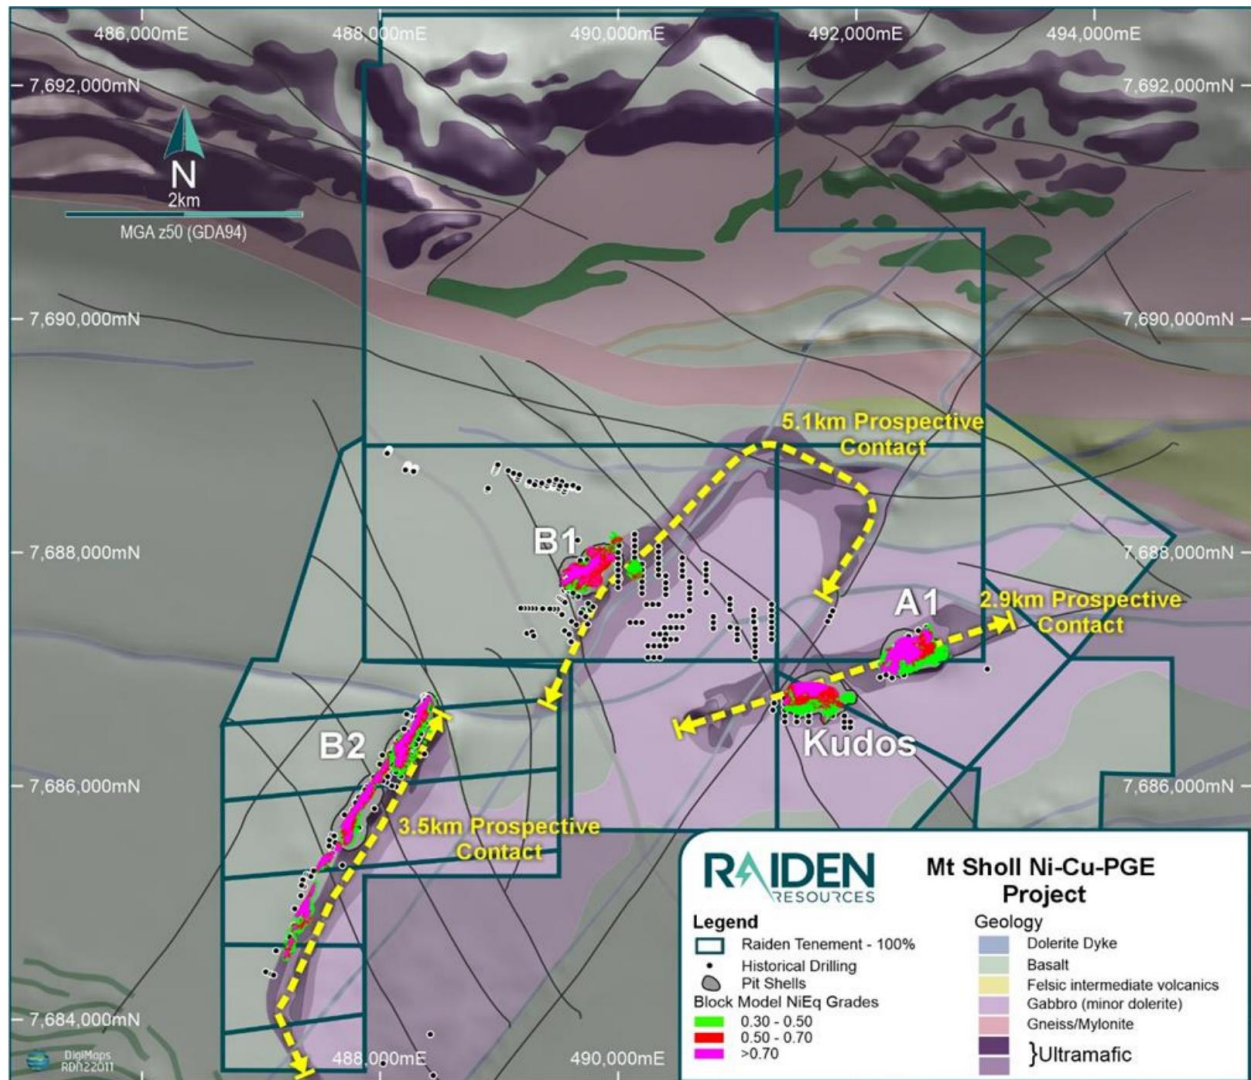

Figure 4: : Mt Sholl project area with JORC (2012) mineral resource of 23.4Mt @ 0.60% Ni_Eq or 1.54%Cu_Eq2 and pit (0.35% Ni_Eq cut-off) locations¹²

Arrow Project (Gold)

During the quarter, the Company announced that it had received all necessary regulatory approvals and heritage survey approvals for the Arrow gold project and that the Joint Venture partner (Mallina Co Pty Ltd)¹³ had commenced with an aircore (“AC”) drilling campaign on the Arrow Gold Project.

The objective of the AC drilling program was to evaluate Hemi-style orogenic gold targets previously identified by Raiden on tenement E47/3476. These targets are associated with felsic magnetic intrusive bodies, shear zones and hydrothermal alteration¹⁴.

For personal use only

The drilling program, was completed during the quarter⁸ and comprised of 79 drill holes for 3,007m, targeting six areas considered prospective for this style of mineralisation, which were previously based on soil sampling programs and magnetic data evaluations. The samples have been dispatched to the laboratory for analysis. The Company will provide an update to the market once the results are available, expected February 2025.

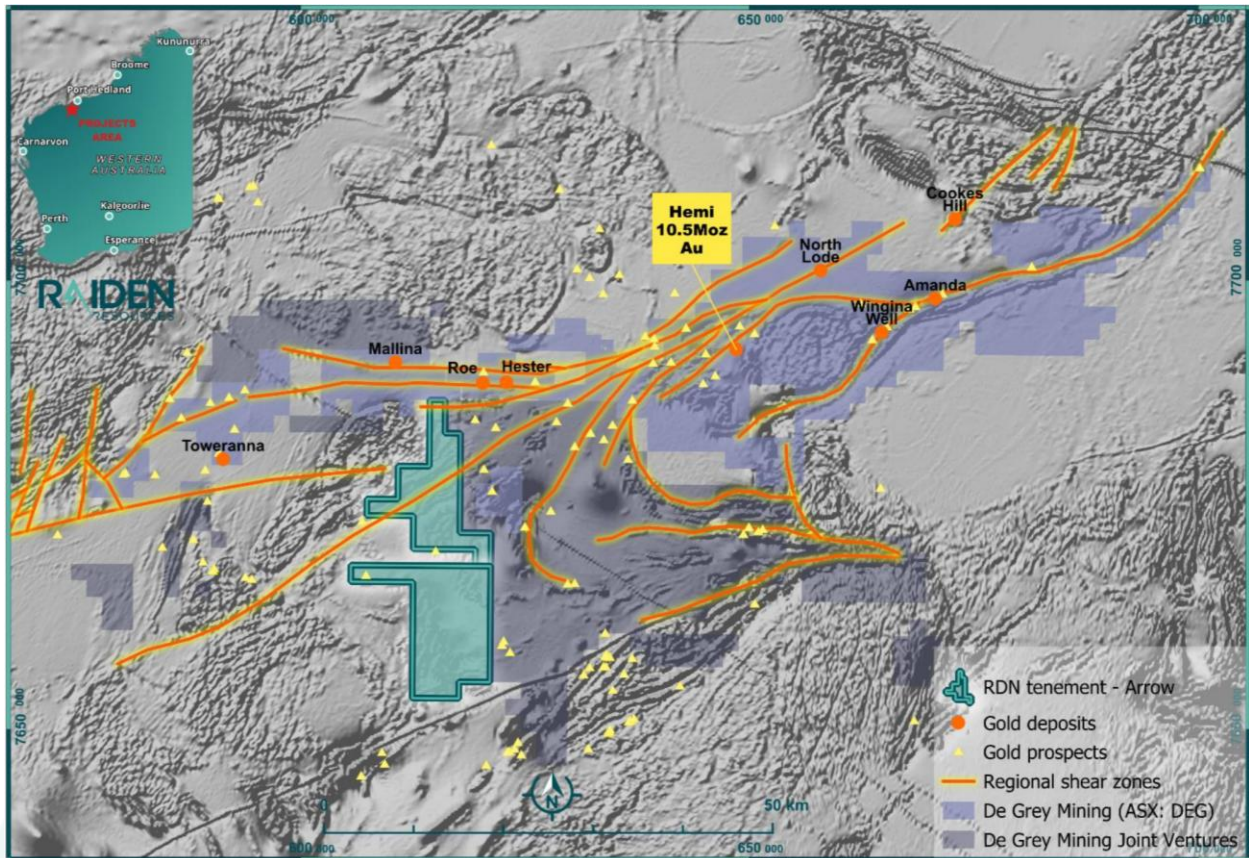

Figure 5: Arrow Gold Project Location in relation to nearby gold prospects¹⁵

Other Australian Projects

Management continued to engage with potential partners regarding the divestment and partnerships regarding non-core assets in Australia.

For personal use only

Exploration Activities in Bulgaria and Serbia

Vuzel (Gold/Silver)

During the quarter, the Company undertook no further field activities on the project. The Company continued planning activities in regard to a drilling program scheduled to commence in Q1'2025. The Company has expanded the planned drilling program on the project for up to 3,000 metres from the initial 1,000 metres planned.

Other Bulgarian Projects

No further activities were undertaken during the quarter.

Donje Nevlje (Copper/Gold)

No activities were undertaken on the project during the quarter.

Corporate

Performance Rights

As at 31 December 2024, the Company had 1,500,000 Performance Rights (issued in 2023).

Options Exercised

During the quarter the Company raised approximately \$5.1m from exercise of 341,002,319 listed RDNOA options at exercise price of \$0.015 with an expiry date of 30 November 2024.

Capital Raising

On the 18th of October, the Company announced⁹ that it raised a total of \$10M through the issue of 312,500,000 fully paid ordinary shares (Shares) at an issue price of 3.2c per share (Placement).

Summary of Expenditure

Of the total expenditure of the Company during the Quarter, \$2.66m of the Company's expenditure was on activities related to the exploration of the current projects as detailed in the Cashflow Report (5B) appended to this report. The Company did not incur any expenditure related to mining, production and development activities during the Quarter. In accordance with ASX Listing Rule 5.3.5 payments totalling approximately \$170k were made to related parties of the Company, comprising \$133k for Managing Director and Non-Executive Director fees and \$37k for accounting and company secretarial fees (section 6.1 of the accompanying 5B).

Competent Person's and Compliance Statement

The information in the referenced announcements 3,4,5,7,8,10,11,12 and 14 footnoted above that relate to Exploration Results have previously been released to the ASX. The Company confirms that it is not aware of any information or data that materially affects the information included in the market announcements, and that all material assumptions and technical parameters underpinning the announcements continue to apply. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Mineral Resources

The Company confirms it is not aware of any new information or data that materially affects the information included in the 3 April 2023 (Maiden Mineral Resource Estimate and JORC Exploration Target) Mineral Resource estimate and all material assumptions and technical parameters underpinning the estimate continue to apply and have not materially changed when referring to its resource announcement made on 3 April 2023. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements

Mt Sholl Mineral Resource Estimate by classification reported above a 0.35% Ni_{Eq} cut-off for open pit resources and at 0.5% Ni_{Eq} for underground resources as reported on 3 April 2023.

Mineral Resources Estimate (as at 30 March 2023)

Classification	Tonnes Mt	Ni %	Cu %	Co ppm	3E ¹ g/t	Ni Metal kt	Cu Metal kt	3E (Pd, Pt, Au) oz
Open Pit								
Indicated	10.5	0.39	0.45	134	0.32	41.0	47.3	108,031
Inferred	9.8	0.29	0.32	78	0.32	28.4	31.3	100,715
Total	20.3	0.34	0.39	107	0.32	69.34	78.6	208,745
Underground								
Inferred	3.1	0.48	0.47	57	0.25	14.9	14.6	24,898

Notes:

- Mineral Resources are reported in accordance with the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (The Joint Ore Reserves Committee Code –JORC 2012 Edition).
- Data is reported to significant figures and differences may occur due to rounding.
- Mineral Resources have been reported above a cut-off grade of 0.35 % Nickel equivalent for open pit resources and above 0.5% Nickel equivalent for underground resources.

For personal use only

- Bulk densities in the Basal unit are 3.06 and in Zone2 are 2.91. These figures represent averages of the values collected in the respective domains from the 2022 drill program.
- The Ni_{Eq} calculation represents total metal value for each metal summed and expressed in equivalent nickel grade and tonnes.

Disclaimer:

Forward-looking statements are statements that are not historical facts. Words such as “expect(s)”, “feel(s)”, “believe(s)”, “will”, “may”, “anticipate(s)”, “potential(s)” and similar expressions are intended to identify forward-looking statements. These statements include, but are not limited to statements regarding future production, resources or reserves and exploration results. All of such statements are subject to certain risks and uncertainties, many of which are difficult to predict and generally beyond the control of the Company, that could cause actual results to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include, but are not limited to: (i) those relating to the interpretation of drill results, the geology, grade and continuity of mineral deposits and conclusions of economic evaluations, (ii) risks relating to possible variations in reserves, grade, planned mining dilution and ore loss, or recovery rates and changes in project parameters as plans continue to be refined, (iii) the potential for delays in exploration or development activities or the completion of feasibility studies, (iv) risks related to commodity price and foreign exchange rate fluctuations, (v) risks related to failure to obtain adequate financing on a timely basis and on acceptable terms or delays in obtaining governmental approvals or in the completion of development or construction activities, and (vi) other risks and uncertainties related to the Company’s prospects, properties and business strategy. Investors are cautioned not to place undue reliance on these forward-looking statements that speak only as of the date hereof, and the Company does not undertake any obligation to revise and disseminate forward-looking statements to reflect events or circumstances after the date hereof, or to reflect the occurrence of or non-occurrence of any events.

About Raiden Resources

Raiden Resources Limited (ASX:RDN / DAX:YM4) is a dual listed transition energy-metal—gold exploration Company focused on exploring and developing the Andover Lithium project, the Mt Sholl Lithium project and the Mt Sholl Ni-Cu-Co-PGE deposit in the Pilbara region of Western Australia. The Company also has a significant portfolio of exploration projects in WA, including the Arrow Lithium and Gold projects, which gold project is located 30km along strike from the Hemi discovery. In the emerging and prolific Western Tethyan metallogenic belt in Eastern Europe, the Company has established a significant exploration footprint in Serbia and Bulgaria. The Directors believe that the Company is well positioned to unlock value from this exploration portfolio and deliver a significant mineral discovery.

8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	16,380
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	5.27
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: N/A	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: N/A	
8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
Answer: N/A	
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>	

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 29 January 2025

Authorised by: the Board of Raiden Resources Limited

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
