

ASX Announcement – 31 January 2025

QUARTERLY REPORT

Period Ended 31 December 2024

Greenwing Resources Ltd ('Greenwing' or the 'Company')(ASX:GW1) is pleased to provide an update on its activities and progress for the quarter ended 31 December 2024.

Greenwing holds a portfolio of assets targeting the compelling fundamentals for both Lithium and Graphite located in known mining jurisdictions.

HIGHLIGHTS

SAN JORGE LITHIUM PROJECT, ARGENTINA

- The San Jorge Project covers the 2600-hectare San Francisco Salar, and surrounding 36,000 hectare package, delivering Greenwing the entire Salar and all surrounding prospective ground.
- A maiden Mineral Resource Estimate¹ defined for the project in May 2024, contains 1.07 Mt of Lithium Carbonate Equivalent (LCE), consisting of 0.67 Mt of Indicated Resources and 0.4 Mt of Inferred Resources, at an initial grade of 195 mg/L Li.
- Greenwing completed additional surface exploration programs over the quarter, which confirms the host brine mineralisation extending materially to the west and north of the salar and continuing to the limit of the surveys.
- Additionally, the resource remains open at depth. The Company having only drilled a portion of the project sees considerable scope to add value at San Jorge.
- Initial Brine processing test work completed with IBC Advanced Technologies (IBC) recovered >99% Li into a concentrated (7200 mg/L Li) solution².
- Additional testing from Xstralit DLE Lithium also provided encouraging results².

GRAPHMADA GRAPHITE MINING COMPLEX & MILLIE'S REWARD LITHIUM PROJECT, MADAGASCAR

- The Company continued to progress its portfolio of assets in Madagascar, in a changing regulatory framework seeking to attract additional mining investment and provide further support for existing industry participants.
- Greenwing has an established presence in Madagascar and has a considerable portfolio of interests in country covering both Graphite and Lithium.
- With the changing regulatory environment, the Company is in the process of updating its agreement with the vendors of the Millie's Reward Hard Rock Lithium project.
- The Company completed assays of all samples taken during the recent augur drilling program at Andapa the results are currently being independently reviewed ahead of an ASX announcement.

¹ ASX Announcement dated 27 May 2024 'San Jorge Lithium Project – Maiden Mineral Resource Estimate'.

² ASX Announcement dated 29 October 2024 'San Jorge Project – Brine Processing Update'.

San Jorge Project, Argentina

The Company has established a robust platform at San Jorge and is well placed to capitalise on the progress it has made to date. This continued progress has been the focus of the Company's activities over the quarter.

Greenwing holds a broad tenement package at San Jorge of 38,600 hectares inclusive of the San Francisco Salar covering some 2600 hectares. Greenwing is one of only a few companies in the Lithium Triangle to have a 100% interest in a salar and surrounding tenure.

In May 2024 the Company established a Maiden Resource Estimate from an initial six hole program targeting the peripheries of the Salar, with the maiden resource declared of 1.07 Mt of Lithium Carbonate Equivalent (LCE). This consists of 0.67 Mt of Indicated Resources and 0.4 Mt of Inferred Resources at an initial grade of 195 mg/L Li.

The Company sees considerable scope to add to both the grade and size of the resource and over the quarter completed both Magnetotelluric (MT) and Transient Electromagnetic (TEM) survey to better define the extent of the brine.

The results of the additional programs, as outlined in an ASX announced dated 15 January 2025, confirm the Company's view that the lithium bearing brines present at San Jorge extend extensively to the West and the North of the visible salar, in addition to remaining open at depths below 400m.

The completed surveys confirmed material extensions to the brine body of 4kms to the west of the salar and 5kms to the North of the salar with brine extending to the limit of testing in both directions. These results deliver a substantial increase to the scope of the project.

In parallel, the Company continued to assess competing processing pathways and over the quarter published initial results of this testing from leading processing providers IBC Advanced Technologies (IBC) and Xtralit DLE (Xtralit).

The IBC test work utilizing the company's proprietary IBC DLP process demonstrated that >99% Li can be selectively recovered using Molecular Recognition Technology (MRT), delivering a concentrated (7200/Mg/L Li) solution which can be made directly into battery grade lithium hydroxide monohydrate (LHM) without an intermediate step.

These results from two leading providers of DLE processing technologies, IBC and Xtralit, in addition to other test work completed, confirm that the San Jorge Brine is highly amenable to DLE processing.

MINERAL RESOURCE ESTIMATE³

Area	Sediment Volume m ³	Porosity	Brine volume m ³	Li mg/l	Li Tonnes	Tonnes LCE
Indicated	8,872,840,000	0.074	653,084,441	192	125,700	670,000
Inferred (NW and > 400 m)	5,147,950,000	0.073	377,952,442	200	75,400	400,000
Total	14,020,790,000	0.074	1,031,036,883	195	201,100	1,070,000

Table 1: Resource estimate classification May 2024

Notes:

- a) Mineral Resource Estimate in the Safra 1 Lik, Safra Lik, San Jorge Oeste 2, 3 and 4 properties.
- b) Lithium is converted to lithium carbonate (Li₂CO₃) equivalent (LCE) using a conversion factor of 5.323.
- c) JORC Code definitions were followed for Mineral Resources.
- d) The Competent Person for this MRE is Murray Brooker (MAIG, MIAH).
- e) Totals may differ due to rounding.
- f) The resources is reported at a zero Lithium mg/l cut-off grade, on the basis that by its nature as a body of brine it is homogenised and is unlikely to contain areas of internal significantly lower grade material.
- g) For further information please refer the ASX Announcement dated 27 May 2024 'San Jorge Lithium Project – Maiden Mineral Resource Estimate'

The Company continues to be pleased with its progress at San Jorge, in addition to establishing a broad and strategic tenement package that gives it control of an entire salar and surrounding area in the Lithium triangle. The Company has established an initial resource from its maiden program with potential for significant expansion.

Follow up geophysical studies have confirmed the lithium bearing brine mineralization extends materially to the West and North along with at depth. The brine was identified at the extent of surveys to both the West and North of the salar. As per previous announcements, the resource remains open at depth.

Whilst acknowledging the current state of the Lithium market the company remains of the view that the long-term fundamentals of the Lithium market remain intact and sees likely enduring dislocations between growing supply and demand in the coming years. The Company is encouraged by the recent return of interest to the asset market for Lithium projects including Rio Tinto Ltd bid for Arcadium, the recent sale of the Arizaro salar assets of Lithium Chile and Central Puertos purchase of the nearby Tres Cruces Asset.

EXPLORATION TARGET

Sediment Volume m ³	Porosity	Brine volume m ³	Li mg/l	Li Tonnes	Tonnes LCE
Exploration Target Upside Case					
9,936,500,000	0.100	993,650,000	195	194,000	1,030,000
Exploration Target Downside Case					
9,936,500,000	0.050	496,825,000	140	70,000	370,000

Table 2: Exploration target tonnage May 2024

Notes:

- a) This Exploration Target encompasses the San Jorge Oeste 1 to 4, Gruta San Francisco and San Jorge Norte 2 properties.
- b) Lithium is converted to lithium carbonate (Li₂CO₃) equivalent (LCE) using a conversion factor of 5.323.
- c) The Competent Person for this Exploration Target is Murray Brooker (MAIG, MIAH).
- d) Totals may differ due to rounding.
- e) The Exploration Target is based on extensive geophysics, calibrated against the six drill holes completed to date.
- f) New diamond drilling is planned this calendar year to evaluate the area where the geophysics has been completed, and to determine whether this can be incorporated into an updated resource estimate (subject to the comments below). The target is based on actual exploration data (geophysics).
- g) For further information please refer the ASX Announcement dated 27 May 2024 'San Jorge Lithium Project – Maiden Mineral Resource Estimate'

Note that the potential quantity and grade of the exploration target is conceptual in nature, and there has been insufficient exploration to estimate a Mineral Resource, other than indirect geophysical methods that indicate the presence of an extensive, highly conductive brine body. **It is uncertain if further exploration will result in the estimation of a Mineral Resource in the volumes defined as exploration targets.** Future exploration drilling aims to continue to convert part of the exploration target volume to resources. **Note that insufficient exploration has been conducted to conclude with any certainty that the exploration target could be converted to resources.**

Madagascar

Overview

The Company retains significant interests in Madagascar including:

- Graphmada Mining Complex
- Andapa Exploration Asset
- Millie's Reward Hard Rock Lithium project

Greenwing has an established presence in Madagascar having been operational in the country since 2016 with the initial acquisition of the Graphmada Graphite project which is currently on care and maintenance.

Greenwing has found Madagascar a good jurisdiction to operate in and sees considerable potential in both the country and its peoples. Greenwing was able to reconstruct and operate the Graphmada Graphite mine over the period from 2016 through to 2020 under the existing legislation.

The Company is encouraged and supportive of the current overhaul of the country's mining legislation and sees the introduction of a new mining code as beneficial for the Company and its operations in Madagascar.

Figure 3 - Locations of Greenwing's projects in Madagascar

Graphmada Graphite Mining Complex

Graphmada Mining Complex and its infrastructure remain in excellent condition, and the existing Mineral Resource of 61.9 Mt @ 4.5% Fixed Carbon (FC) (refer Table 1) is deemed capable of sustaining substantially higher production volumes than the mine operated at in the past.

The Graphite export market is currently dominated by China which supplies the overwhelming majority of the current export market. Over the last 18 months China has to varying degrees imposed restrictions on the export of Graphite and threatened to impose total bans⁴.

The European Union, The USA United States and Japan have all classified Graphite as a critical mineral and hold the development of ex-China sources of supply as a strategic imperative.

Greenwing, with an advanced graphite project outside of China, continues to see emerging strategic value in its Graphmada asset.

Graphmada has an existing resource that has produced all commercial concentrates in the graphite complex, with qualification into both the United States and the European Union. Additionally, Graphmada has long-life mining leases and considerable infrastructure in place, with the project located just 3 kilometers off the national highway and approximately 120 kilometers from the port of Tamatave (Figure 3).

Greenwing is continuing a process to attract strategic investment and achieve value for its stakeholders for the Graphmada asset given its advanced status.

During the quarter, care and maintenance activities continued on site.

Table 1: June 2022 Graphmada Mining Complex Mineral Resources^{5, 6, 7}

	Tonnes (Mt)	FC%	Contained Graphite (kt)
Measured	18.7	4.9	911
Indicated	12.3	4.7	582
Inferred	30.9	4.2	1,288
Total	61.9	4.5	2,780

Important Notes:

An Exploration Target is a statement or estimate of the exploration potential of a mineral deposit in a defined geological setting where the statement or estimate, quoted as a range of tonnes and a range of grade, relates to mineralization for which there has been insufficient exploration to estimate a Mineral Resource. The potential quantity and grade of the Exploration Target is conceptual in nature, there has been insufficient exploration to estimate an additional Mineral Resource and it is uncertain if further exploration will result in the estimation of an additional Mineral Resource.

The Company confirms that it is not aware of any new information or data that materially affects the information in the relevant ASX releases, and the form and context of the announcement has not materially changed. The Company confirms that the form and context in which the Competent Persons findings are presented have not been materially modified from the original market announcements.

⁵ Refer ASX Announcement '212% Increase in Graphite Resource at Graphmada Mining Complex' released 12 July 2022.

⁶ Reported in accordance with the 2012 Australasian Code for Reporting of Exploration Results, Mineral Resources and Reserves ('the JORC Code 2012') at a >3% cut-off.

⁷ Figures are subject to rounding

Andapa Graphite Project, Madagascar

Greenwing continues with its exploration on its Andapa prospect. Andapa is a separate property located a further 60klms towards the country's main deep-water port from Graphmada at Tamatave, Madagascar's second largest city. The Andapa Project is currently under mining lease.

During the quarter the Company completed a further 32 holes for 261m drilled, bringing the 2024 augur drilling program to a close with a total of 388 holes correlating to 3,262m. The Company is working through an independent review of the results and will be updating the market during the March 2025 quarter.

Millie's Reward Lithium Project, Madagascar

Over the December quarter, Greenwing advanced discussions with the vendors of the three permits comprising Millie's Reward project with a view to completing the transfer of these permits to the Company. In parallel with developments with the new Mining Code in Madagascar the Company is seeking to finalise the transfer of tenure and resume exploration activities. The revised mining code in Madagascar aims to ensure timely processing of all mining permit applications.

The Company intends to undertake further exploration at the Millie's Reward project following the transfers occurring. This exploration program will focus on completing the soil sampling program over lithium bearing pegmatites, commencing pitting and trenching followed by geophysics to identify potential sub-surface pegmatites.

Millies Reward is an exciting project characterized by an outstanding surface signature which has identified a large number of pegmatite outcrops along a significant strike length⁸. Additionally, the project has previously returned a weighted average intersection of 3.72% Lithium Oxide over a 31m channel sample⁹.

Previous field programs have identified numerous encouraging rock chip samples up to 7.08% Li₂O and supported by additional samples returning 6.93% and 6.91% Li₂O¹⁰ and numerous samples between 5-5.7% Li₂O¹¹.

Que River - Tasmania

As noted previously, the Company remains in discussions about the potential sale of this asset. The Company continues with care and maintenance activities during the quarter and has been engaging with the regulators regarding the status and future of this project.

Corporate Activities

On 16 October the Company released its Notice of Annual General Meeting and on 25 November held the meeting with all resolutions being passed.

ASX listing rule 5.3 disclosures

For the quarter ending 31 December 2024, the Company had net cash outflows of \$201k in expensed and capitalised exploration and evaluation activities.

In addition, exploration and evaluation expenditure activities were undertaken by Andes Lítico SA which is not included in the above amount. As noted in the audited annual financial report for the year ended 30 June 2023¹², as a result of the strategic funding transaction with NIO, the Company is considered to have lost sole control of Andes Lítico SA (Andes Lítico) and even though the Group retains 100% of the shares and voting rights, joint control exists as decisions about the relevant activities of the San Jorge Project require unanimous consent of the parties. Accordingly, the Company's interest in Andes Lítico is recognised as an interest in a jointly controlled entity and is accounted for under the equity accounting method.

Under this accounting treatment, any funds provided to, or expenditure incurred by the Company in relation to, Andes Lítico are reported as an increase in the investment in Andes Lítico in the cash flow statement. For the December 2024 quarter this amount was \$171k (previous quarter \$355k) reflecting the exploration activities undertaken during the quarter.

Also, any cash held by Andes Lítico is not recognised as cash on hand for Greenwing at the end of the period in the cash flow statement. As of 31 December 2024, a further \$25k is held by Andes Lítico, which will be utilised for in-country exploration and associated expenses.

The total amount paid to directors of the entity and their associates in the period (item 6.1 of Appendix 5B) was \$65k relating to prior quarters, with an amount of \$59k accrued for the quarter.

ASX Announcements released during the quarter:

ABOUT GREENWING RESOURCES

Greenwing Resources Ltd (ASX:GW1) is an Australian-based critical minerals exploration and development company committed to sourcing metals and minerals required for a cleaner future.

With lithium and graphite projects across Madagascar and Argentina, Greenwing plans to supply electrification markets, while researching and developing advanced materials and products.

Disclaimer

This document has been prepared by Greenwing Resources Ltd (the 'Company'). It should not be considered as an invitation or offer to subscribe for or purchase any securities in the Company or as an inducement to make an invitation or offer with respect to those securities. No agreement to subscribe for securities in the Company will be entered into based on this document. This document is provided on the basis that neither the Company nor its officers, shareholders, related bodies corporate, partners, affiliates, employees, representatives, and advisers make any representation or warranty (express or implied) as to the accuracy, reliability, relevance, or completeness of the material contained in the document and nothing contained in the document is or may be relied upon as a promise, representation or warranty, whether as to the past or the future. The Company hereby excludes all warranties that can be excluded by law.

Forward-Looking Statements

This announcement contains certain 'forward-looking statements' within the meaning of the securities laws of applicable jurisdictions. Forward-looking statements can generally be identified using forward-looking words such as 'may,' 'should,' 'expect,' 'anticipate,' 'estimate,' 'scheduled' or 'continue' or the negative version of them or comparable terminology. Any forecasts or other forward-looking statements contained in this announcement are subject to known and unknown risks and uncertainties and may involve significant elements of subjective judgment and assumptions as to future events which may or may not be correct. There are usually differences between forecast and actual results because events and actual circumstances frequently do not occur as forecast and these differences may be material. Greenwing Resources does not give any representation, assurance, or guarantee that the occurrence of the events expressed or implied in any forward-looking statements in this announcement will occur and you are cautioned not to place undue reliance on forward-looking statements. The information in this document does not consider the objectives, financial situation, or particular needs of any person. Nothing contained in this document constitutes investment, legal, tax, or other advice.

Important information

This announcement does not constitute an offer to sell, or a solicitation of an offer to buy, securities in the United States, or in any other jurisdiction in which such an offer would be illegal. The securities referred to in this document have not been and will not be registered under the United States Securities Act of 1933 (the 'US Securities Act'), or under the securities laws of any state or other jurisdiction of the United States and may not be offered or sold, directly or indirectly, within the United States, unless the securities have been registered under the US Securities Act or an exemption from the registration requirements of the US Securities Act is available. This document may not be distributed or released in the United States.

Competent Person Statement

The information in this document that relates to Exploration Results, Exploration Targets and Mineral Resources in relation to the Madagascan Projects is based on information previously released to ASX and as footnoted in the report, particularly noting the information relating to the Graphite Mineral Resources which is extracted from the ASX Announcement dated 12 July 2022 '212% Increase in Graphite Resource at Graphmada Mining Complex'. This information was compiled by Tim McManus, a Competent Person who is a member of the Australasian Institute of Mining and Metallurgy, who was a consultant to the Company. Tim McManus has sufficient experience that is relevant to the style of mineralization and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources or Ore Reserves that all material assumptions and technical

parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

The information in this document that relates to Exploration Results, Mineral Resource Estimate and Exploration Target in relation to the Argentinean Project, San Jorge, has been prepared by Mr Murray Brooker, BSc (Geology, Hons, Victoria University), MSc (Geology, James Cook university), MSc (Hydrogeology, UTS, Sydney) (AIG #3503; RPGE0 # 10,086). Murray Brooker is a geologist and hydrogeologist and is an employee of Hydrominex Geoscience Pty Ltd and is independent of Greenwing. Mr Brooker has sufficient experience to qualify as a competent person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Brooker consents to the inclusion of the information in this document in the form and context in which it appears.

Tenement & Permit Holding

The Company's interests in mining and exploration tenements and permits are as follows:

5.5	Cash and cash equivalents at end of quarter (should equal item 4.6 above)^(b)	531	1,134

Note: (b) In addition to the cash noted above, a further \$25k is held by the Group's equity accounted investment, Andes Litio located in Argentina which will be utilised for in-country exploration and associated costs.

6. Payments to related parties of the entity and their associates

6.1	Aggregate amount of payments to related parties and their associates included in item 1	65
6.2	Aggregate amount of payments to related parties and their associates included in item 2	-

Current quarter \$A'000

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments

Payment of directors' fees relating to prior and current quarters, with a further \$59k outstanding relating to the current quarter.

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7. Financing facilities

Note: the term "facility" includes all forms of financing arrangements available to the entity.

Add notes as necessary for an understanding of the sources of finance available to the entity.

	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
7.1 Loan facilities	1,000	-
7.2 Credit standby arrangements	-	-
7.3 Other (please specify)	-	-
7.4 Total financing facilities	1,000	-

7.5 **Unused financing facilities available at quarter end** 585

7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.

As announced on 24 July 2023, the Company has entered into an unsecured loan facility with the Company's Chairman, Rick Anthon for \$1m, which has been extended and now matures on 30 April 2025 at an interest rate of 14% p.a. on funds drawn up to 30 June 2024, and an interest rate of 20% p.a. from 1 July 2024.

The Company also has a 4 year \$8 million At-the-Market Facility (ATM) Agreement with Alpha Investment Partners as announced on 31 January 2024 which is currently undrawn.

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (Item 1.9)	(344)
8.2 Capitalised exploration & evaluation (Item 2.1(d))	(201)
8.3 Total relevant outgoings (Item 8.1 + Item 8.2)	(545)
8.4 Cash and cash equivalents at quarter end (Item 4.6)	531
8.5 Unused finance facilities available at quarter end (Item 7.5)	585
8.6 Total available funding (Item 8.4 + Item 8.5)	1,116
8.7 Estimated quarters of funding available (Item 8.6 divided by Item 8.3) (refer note below)	2.0

Notes:

The amount of cash and cash equivalents held at quarter end at item 8.4 includes \$97k which may be used only for expenditure related to the San Jorge Lithium Project.

If this amount is deducted from the total available funding, the amount of funding available for outgoings other than the San Jorge Project is \$1,116k at the end of the quarter, including the \$585k undrawn loan facility.

This equates to approximately 2 quarters of funding available for expenditure outside of the San Jorge project using the calculation in 8.7 above as at 31 December 2024.

As previously announced, the Company has secured an \$8m funding facility (refer ASX announcement dated 31 January 2024) which when included in cash available to fund operations other than the San Jorge Project equates to approximately 16 quarters of funding available.

8.8 If Item 8.7 is less than 2 quarters, please provide answers to the following questions:

- Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: N/A

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

2. Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: N/A

3. Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer N/A

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 31 January 2025

Authorised by: the Board of Directors

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
