

QUARTERLY ACTIVITIES REPORT

QUARTER ENDED 31 December 2024

Horseshoe Metals Limited (ASX: HOR) (**Horseshoe, HOR or Company**) is pleased to present its Quarterly Activities Report for the period ending 31 December 2024.

HIGHLIGHTS

- **Horseshoe continued to advance its Horseshoe Lights ('HSL') Copper-Gold Project in Western Australia**
- **Project area expanded in November via the grant of E52/4372**
- **Initial review of historic regional exploration data has been completed**
- **Historic RAB assisted geochemical sampling east and southeast of HSL identified bedrock anomalies up to 2588ppm Cu requiring infill and extension**
- **Rock chip values up to 1480 ppm Cu also require follow up**
- **High-grade rock chip assay values up to 1.42g/t Au and 7.10 g/t Au (Fiddlers South)**
- **Significant historic gold only intercepts include:**
 - **2m @ 8.00 g/t Au from 47m**
 - **2m @ 19.8 g/t Au from 110m**
 - **2m@ 22.6 g/t Au from 68m**
- **Site evaluation of gold targets also completed during December**
- **Post-quarter end, strategic Option granted to Melody Gold for the right to process gold surface materials at HSL**
- **Horseshoe retains full rights to copper and mixed Cu/Au surface materials, as well as all subsurface copper and gold**
- **Horseshoe continues to pursue significant early cash flow opportunity from DSO sales of existing high-grade copper stockpiles**
- **Discussions ongoing with several well-known potential copper concentrate offtake partners**
- **Horseshoe has identified several new areas of oxide and sulphide copper targets within 200km radius of Horseshoe Lights**

Commenting on Horseshoe's copper and gold potential and near-term plans, Director Kate Stoney said: "The Horseshoe Lights Copper-Gold Project is the original Cu/Au VMS discovery in the Bryah Basin, and activities continue to scale up across the business as we work to take advantage of the significant copper and gold inventory at our disposal.

The Option agreement signed with Melody Gold post quarter end signals our intention to accelerate our commercial/development plans for the asset and we look forward to reporting news on our copper offtake/development strategy in the near-term."

Exploration & Development Summary

Western Australia

Horseshoe Lights Copper-Gold Project, Western Australia (HOR: 100%)

Project Summary

The Horseshoe Lights Copper-Gold Project is the original Cu/Au VMS discovery in the Bryah Basin and is located approx. 60 km west of DeGrussa Copper Mine owned by Sandfire Resources (ASX: SFR).

Past production from Horseshoe Lights includes around **316,000 oz Au & 55 kt Cu metal** in two phases of mining and the deposit contains a current in situ resource **128 kt Cu metal @ 1.0% (0.5% cut-off) and 36,000 oz Au** (refer Table 1).

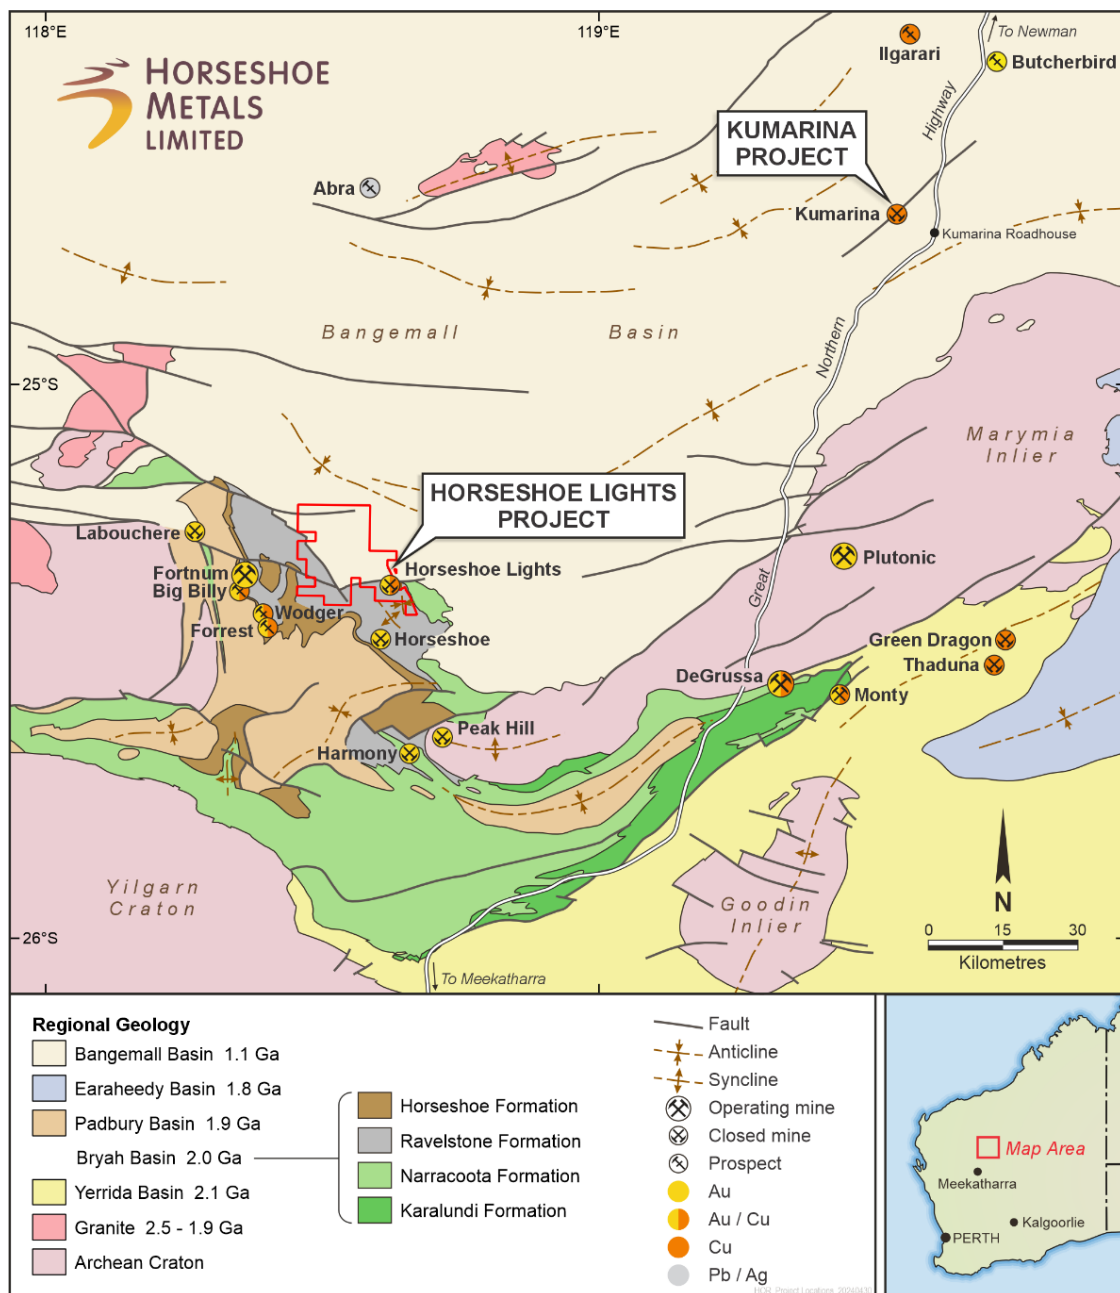

Figure 1: Location of Horseshoe Lights and Kumarina Projects, WA

December quarter activity update

During the December quarter, Horseshoe made important progress towards the re-commencement of development activities at the Horseshoe Lights ('HSL') copper-gold system in WA. A summary of the key activities completed during the quarter and subsequent to the period end have been outlined below.

Strategic Ground Acquisition Adds New Targets and Expands HSL Exploration Footprint

During the quarter, Horseshoe reported the project area at HSL had been expanded with the grant of E52/4372 (57 km²) to a total of **340 km²**. Prospects added by the tenement grant include **Fiddlers** (Cu), **Fiddlers East** and **Fiddlers South** (Au), while existing regional copper prospects in the vicinity include **Titan** and **Tethys** (refer Figure 2).

Further details on the new ground including an overview of historical exploration campaigns can be found in the ASX announcement dated 28 November 2024.

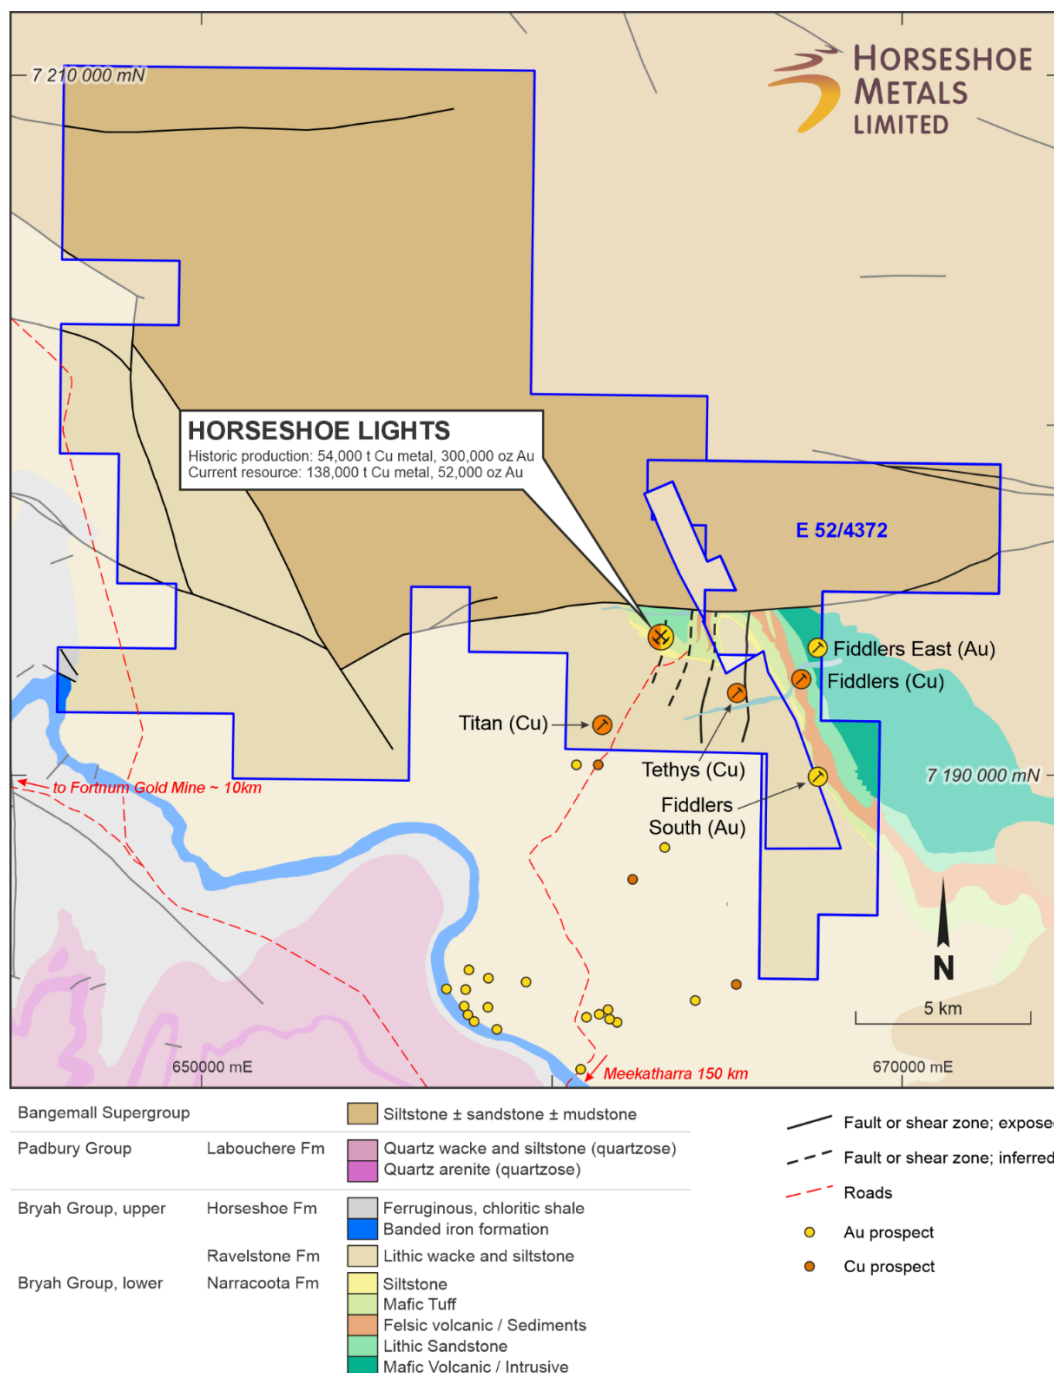

Figure 2: HSL copper-gold project regional geology and mineralisation, including new prospects

Gold Surface Materials – Commercial agreement signed post-quarter end

Post-quarter end, the Company announced that its wholly owned subsidiary Murchison Copper Mines Pty Ltd ("MCM") had entered into a Gold Surface Materials Rights Agreement (**Agreement**) with Melody Gold Pty Ltd ("Melody") for the right to process gold surface materials at Horseshoe Lights (refer ASX release 20 January 2025).

The Agreement covers designated gold surface materials adjacent to the historic open pit at HSL, including four subgrade stockpiles: the rehandle stockpile; the gold leach vats and perimeter; the gold ROM stockpile; and gold and flotation tailings (**Gold Surface Materials**) (refer Figure 3).

Significant gold surface materials remain on site at Horseshoe Lights with the potential for future retreatment to recover gold (refer ASX releases dated 11 August 2022, 18 March 2022 and 26 November 2021).

Melody has advised it intends to treat up to **500,000 tonnes per annum** in its proposed retreatment of the gold surface material utilising gravity recovery to produce a gold-copper-silver concentrate.

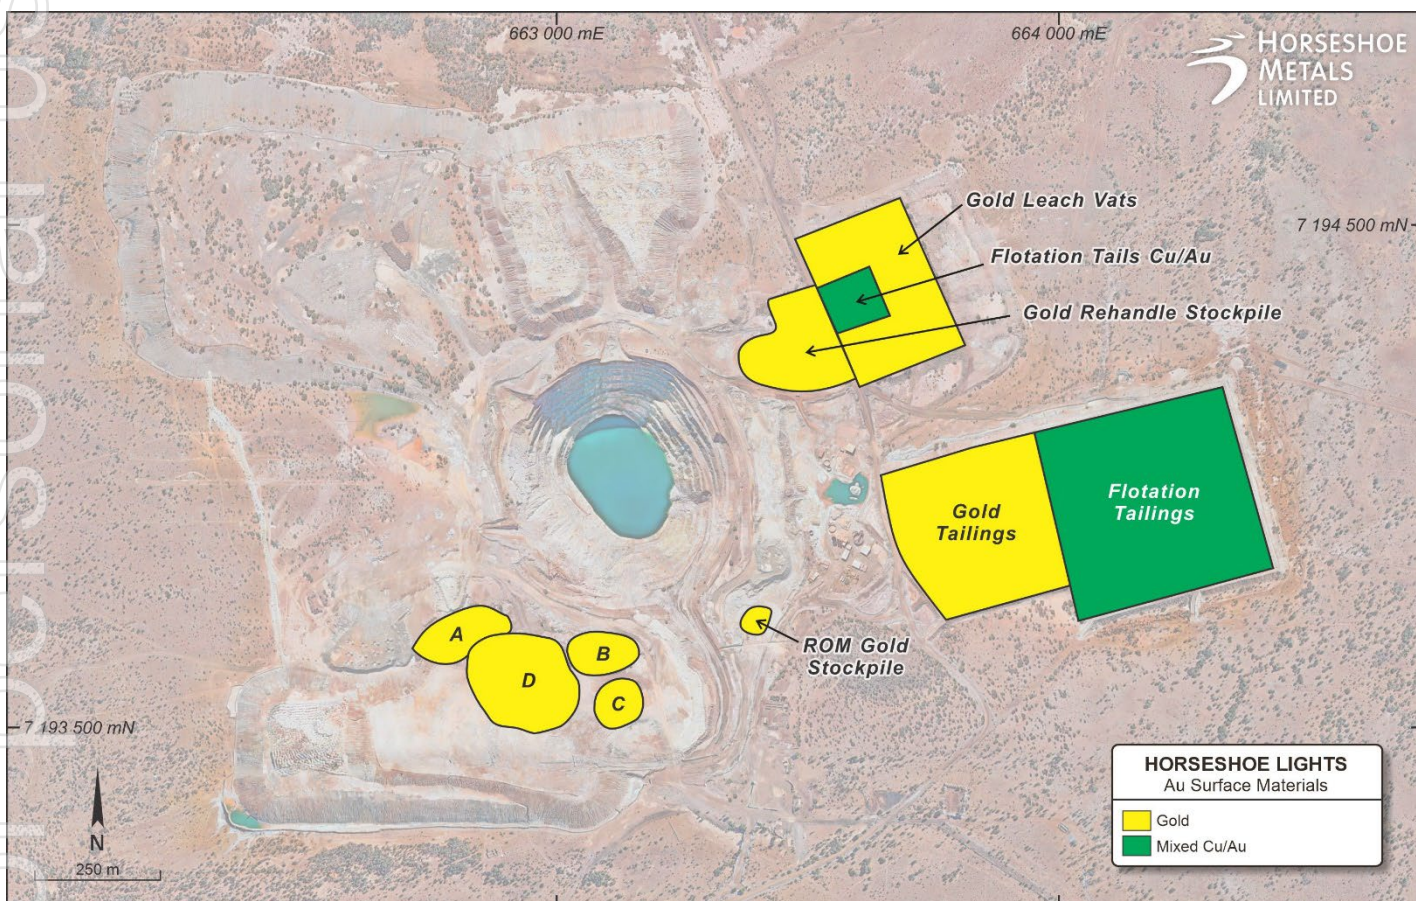

Figure 3: Gold Surface Materials covered by the Agreement (coloured in yellow and green)

Further details on the Option Agreement entered with Melody Gold can be found in the ASX announcement dated 20 January 2025.

Update on Copper Offtake and Funding Discussions

During the quarter, Horseshoe continued to hold positive discussions with several well-known groups that have expressed interest in offtake of the DSO and potential future concentrates, including copper cement and/or concentrate produced at HSL. A data room is being prepared for detailed assessment and will be made available following execution of confidentiality agreements.

In addition, non-dilutive staged offtake funding is being considered to provide capital for the proposed development sequence including:

1. *Scavenging of remnant coarse DSO material, bagging and transport*
2. *Heavy Media Separation of fine DSO material from select stockpiles*
3. *Small Scale Heap/Vat Leach of surface oxide material followed by cementation*
4. *Large Scale Heap/Vat leach of surface oxide material followed by cementation*

Significantly the copper phase of mining included early DSO copper production that has left subgrade and rehandle DSO material around the site. Areas identified and assessed as having future DSO potential include, M15, Subgrade and C20 stockpiles along with rehandle and surface pimple dumps located on the North Waste dump, Gold tailings and Southern low-grade stockpile (see release dated 31 October 2023).

HSL Development Strategy: Next steps

The following activities are planned to further investigate the surface materials:

- *Additional RC and/or auger drilling of the North Dump, gold stockpiles, copper Low-grade oxide and Low-grade sulphide stockpile stockpiles*
- *Further assessment of the auriferous quartz veins hosted in siltstone immediately west of the HSL copper deposit*
- *Rock chip sampling of outcropping quartz veins and jasperoids*
- *Auger assisted soil geochemical sampling (Cu and Au) in areas of historic RAB drilling and extending into previously untested adjacent areas*
- *RC drill testing of several priority targets*
- *Acquisition of open file magnetic data to aid delineation of additional targets in the project area*
- *Further detailed review of historic drill data to assist in building a copper and gold mineralisation model*

Updates on the above activities will be provided over the coming weeks as on-ground activities increase.

Kumarina Copper Project, Western Australia

(HOR: 100%)

The Kumarina Project consists of a mining lease and mining lease application covering approximately 3.2 km². The Project is located 95 km north of Sandfire Resources NL's DeGrussa copper-gold mine in the Gascoyne region of Western Australia. The Company has applied for a mining lease (MLA52/1078) to cover the Rinaldi resource, contiguous with M52/27. The Company continues to progress a Project Agreement as part of the application process with the Native Title Party and its lawyers.

No active field work was undertaken during the December quarter.

South Australia

Glenloth Gold Project, South Australia

(EL6301)

The Glenloth Project is located in the Central Gawler Craton of South Australia. The project consists of a single exploration licence, EL 6301, which comprises two areas totalling 107 km². The larger eastern block *Glenloth* covers 81 km² and includes the Glenloth Goldfield and part of the Harris Greenstone Belt. The smaller western block *Old Well* takes in the northern trend of the 1.5M oz Tunkillia gold deposit located 6 km to the south, under development by Barton Gold Holdings Ltd (ASX:BGD).

At Glenloth gold occurrences typically consist of relatively thin (ca. 1 m width), high-grade mineralised quartz veins, hosted by sheared and fractured Archaean to Paleoproterozoic Glenloth Granite, and contacts with dolerite dykes. A shallow Hiltaba Suite batholith has been proposed as the source of mineralisation. Six kilometres south of Old Well, the Tunkillia deposits (Areas 223, 191, 51) are characterised by a large hydrothermal system associated with the Yarlbrinda Shear Zone, which passes into the Old Well tenure.

During the quarter, the Company executed a Native Title Mining Agreement (NTMA) with the Gawler Ranges Aboriginal Corporation (GRAC) which has been registered with South Australia's Department for Energy and Mining. The NTMA signed with the Gawler Ranges People, as represented by the GRAC Registered Native Title Body Corporate, covers the entirety of the Company's Glenloth Gold Project, allowing for expanded access for future exploration activities.

Corporate

Listing Rule 5.3.5 disclosures

No payments were made to related parties and their associates during the quarter. Payments to directors and related parties have been deferred to later quarters.

The Board of Directors of HOR has authorised this announcement to be given to the ASX.

About Horseshoe Metals Limited

Horseshoe Metals Limited (ASX:HOR) is a copper and gold-focused company with a package of tenements covering approximately 500 km² in the highly prospective Peak Hill Mineral Field, located north of Meekatharra in Western Australian and mineral interests in South Australia. The Company manages the Horseshoe Lights Project and the Kumarina Project in Western Australia, and the Glenloth Gold Project in South Australia.

About the Horseshoe Lights Project

The Horseshoe Lights Project includes the historic open pit of the Horseshoe Lights copper-gold mine which operated up until 1994, producing over 300,000 ounces of gold and 54,000 tonnes of contained copper including over 110,000 tonnes of Direct Shipping Ore (DSO) which graded between 20-30% copper.

The Horseshoe Lights ore body is interpreted as a deformed Volcanogenic Hosted Massive Sulphide (VMS) deposit that has undergone supergene alteration to generate the gold-enriched and copper-depleted cap that was the target of initial mining. The deposit is hosted by quartz-sericite and quartz-chlorite schists of the Lower Proterozoic Narracoota Formation.

Past mining was focused on the Main Zone, a series of lensoid ore zones, which passed with depth from a gold-rich oxide zone through zones of high-grade chalcocite mineralisation into massive pyrite-chalcopyrite. To the west and east of the Main Zone, copper mineralisation in the Northwest Stringer Zone and Motters Zone consists of veins and disseminations of chalcopyrite and pyrite and their upper oxide copper extensions. The table below summarises the total Mineral Resources for the Horseshoe Lights Project at the reporting date.

Location	Category	Tonnes (Mt)	Cu (%)	Au (g/t)	Ag (g/t)	Cu metal (tonnes)	Au metal (oz)	Ag metal (k oz)	
In-situ Deposit (0.5% Cu cut-off grade)	<i>Measured</i>	1.73	1.04	0.0	0.5	18,000	1,900	28.8	
	<i>Indicated</i>	2.43	0.95	0.0	0.7	23,200	3,400	52.2	
	<i>Inferred</i>	8.69	1.01	0.1	2.6	87,400	30,700	712.4	
	Total	12.85	1.00	0.1	1.9	128,600	36,000	793.4	
Flotation Tailings	Inferred	1.421	0.48	0.34	6.5	6,800	15,300	294.8	
M15 Stockpiles	Inferred	0.243	1.10	0.17	4.7	2,650	1,300	36.7	
Note: At 0% Cu cut-off grade unless otherwise stated						TOTAL	138,050	52,600	1,124.9

The above Mineral Resource Estimates all meet the reporting requirements of the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves".

About the Kumarina Project

The copper deposits at the Kumarina Project were discovered in 1913 and worked intermittently until 1973. The workings extend over nearly 5km as a series of pits, shafts and shallow open cuts. At the main Kumarina Copper Mine, the workings are entirely underground with drives from the main shaft extending for some 200 m in the upper levels and for about 100 m in the lower levels at a depth of 49m below surface.

Incomplete records post-1960s make it difficult to estimate the total copper production from the workings. However, indications are that the Kumarina Copper Mine was the second largest producer in the Bangemall Basin group of copper mines. Recorded production to the late 1960s is 481 t of copper ore at a high-grade of 37.0% Cu and 2,340 t at a grade of 17.51% Cu. An initial Mineral Resource Estimate for the Rinaldi deposit was completed by the Company in 2013 (see 30 June 2013 Quarterly Report announced on 31 July 2013). The total Measured, Indicated and Inferred Mineral Resource Estimate at the reporting date is shown in the table below.

TABLE 2
KUMARINA PROJECT
SUMMARY OF MINERAL RESOURCES
as at 31 December 2024

Location	Category	Tonnes (t)	Cu (%)	Cu metal (tonnes)
Rinaldi Prospect (0.5% Cu cut-off)	<i>Measured</i>	<i>415,000</i>	<i>1.46</i>	<i>6,100</i>
	<i>Indicated</i>	<i>307,000</i>	<i>1.16</i>	<i>3,500</i>
	<i>Inferred</i>	<i>114,000</i>	<i>0.9</i>	<i>1,000</i>
	Total	835,000	1.3	10,600

The Mineral Resource Estimate meets the reporting requirements of the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserve

Forward Looking Statements

Horseshoe Metals Limited has prepared this announcement based on information available to it. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this announcement. To the maximum extent permitted by law, none of Horseshoe Metals Limited, its directors, employees or agents, advisers, nor any other person accepts any liability, including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of this announcement or its contents or otherwise arising in connection with it. This announcement is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any security, and neither this announcement nor anything in it shall form the basis of any contract or commitment whatsoever. This announcement may contain forward-looking statements that are subject to risk factors associated with gold exploration, mining and production businesses. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially, including but not limited to price fluctuations, actual demand, currency fluctuations, drilling and production results, reserve estimations, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory changes, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimates.

Competent Persons Statement

The information in this report that relates to the Exploration Results and Mineral Resources at the Horseshoe Lights and Kumarina Projects is based on information reviewed by Mr Michael Fotios, who is a member of the Australian Institute of Geoscientists. Mr Fotios is a consultant to Horseshoe Metals Limited and has sufficient experience which is relevant to the style of mineralisation and types of deposit under consideration and to the activity he is undertaking to qualify as Competent Persons as defined in the 2012 Edition of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code 2012)’. Mr Fotios consents to the inclusion of the data in the form and context in which it appears.

The information in this report that relates to the Horseshoe Lights Project In-situ Mineral Resources is based on information originally compiled by Mr Dmitry Pertel, an employee of CSA Global Pty Ltd, and reviewed by Mr Fotios. This information was originally issued in the Company’s ASX announcement “40% increase in Copper Resource at Horseshoe Lights Copper/Gold Project”, released to the ASX on 5 June 2013, and first disclosed under the JORC Code 2004. This information was subsequently disclosed under the JORC Code 2012 in the Company’s ASX release “Quarterly Report Period Ended 30 June 2013”, released on 31 July 2013. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the findings are presented have not materially modified from the original market announcements.

The information in this report that relates to the Horseshoe Lights Project surface stockpile Mineral Resources is based on information compiled by a previous employee of Horseshoe Metals Limited and reviewed by Mr Fotios. The information was previously issued in announcements released to the ASX on 26 February 2015 and 9 March 2015. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the findings are presented have not materially modified from the original market announcements.

The information in this report that relates to the Kumarina Project (Rinaldi Prospect) Mineral Resources is based on information compiled by or under the supervision of Mr Robert Spiers, an independent consultant to Horseshoe Metals Limited and a then full-time employee and Director of H&S Consultants Pty Ltd (formerly Hellman & Schofield Pty Ltd), and reviewed by Mr Fotios. The information was originally issued in the Company’s ASX announcement “Horseshoe releases Maiden Mineral Resource Estimate for Kumarina”, released to the ASX on 4 March 2013, and first disclosed under the JORC Code 2004. This information was subsequently disclosed under the JORC Code 2012 in the Company’s ASX release “Quarterly Report Period Ended 30 June 2013”, released on 31 July 2013. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the findings are presented have not materially modified from the original market announcements.

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
