

Fire at St Marys' Liquids and Technical Services site

Cleanaway Waste Management (ASX:CWY) advises that there has been a significant fire at its liquid waste processing facility at St Marys, New South Wales. All Cleanaway employees and contractors are safe, and none of them are injured as a result of the fire.

The fire has resulted in the closure of the site and is still under the control of emergency authorities. Once control has been handed back, Cleanaway will commence an investigation into the cause of the fire and assess the extent of damage at the site. Cleanaway is already working with regulatory authorities in relation to clean up activities following the fire and working with affected customers to find alternative processing facilities for materials that would have otherwise been received at the site.

Cleanaway will provide an update in relation to its response to the fire at its St Marys' site and the potential financial impact of the fire at its H1 FY25 results on 19 February 2025.

This announcement has been approved by the CEO of Cleanaway.
