Review of operations

MaxiPARTS revenue of \$136.9m increased by \$25.2m, or 22.6%, over revenue from the prior corresponding period (pcp) of \$111.7m. MaxiPARTS Operations revenue of \$126.9m increased by \$22.0m, or 21.0% and Förch Australia revenues of \$10.5m increased by \$3.5m, or 48.8%, over pcp, which includes the inclusion of the Förch Brisbane acquisition that was completed on 30 November 2023. As previously communicated in the Group's outlook, the group's trading for the half was consistent with H2 FY24 with the east coast market being softer consistent with general economic activity, and a more buoyant west coast market.

MaxiPARTS reported a net profit before tax from continuing operations of \$6.4m for the period, this represented an increase of \$2.1m from \$4.3m in the pcp. When adjusting for significant items in the pcp of (\$0.7m) and an adjusted profit of \$5.1m for the pcp, the Group reported a \$1.4m increase, or 27.2%, in net profit before tax from continuing operations.

The reportable profit for the period, including discontinued operations, was \$3.8m, an increase of \$3.4m from \$0.4m in the pcp. The Group's discontinued operations reported a loss of (\$0.5m) for the period, which included a final impairment of the loan receivable, offset with the release of remaining unused customer warranty and other provisions as a result of the signed settlement deed with ATSG (as announced on 19 November 2024), and legal expenses incurred in relation to the litigation for the period. Furthermore, with the settlement of the legal dispute and end of the supply contract, the Group expects very limited ongoing trading relationship with the Freighter Group, as have been previously disclosed in the outlook for the Group.

Cashflow from operating activities of \$8.3m, or \$12.0m when excluding cashflows attributed to finance interest, taxes and discontinued operations, was generated from an EBITDA of \$13.7m, a cash conversion of 88% (HY24: Operating Cashflow of \$4.8m; EBITDA of \$10.7m, 45% cash conversion). Working capital movements for the half year were reflective of normal trading conditions and active management along with typical seasonality movements, which sees the Group's inventory higher and trade debtors lower at half year-end close than at the

end of financial year.

Cashflow from discontinued operations of \$1.0m is reflective of the \$2.2m funds received from the settlement deed with the Freighter Group, offset with outflows in relation to legal expenses incurred in the period & Queensland Government grant repayment.

The Group reported a closing net debt balance of \$10.4m, a decrease from a net debt of \$15.9m as at year-ended 30 June 2024. This represents a leverage ratio of 0.4 times, which is well within the Group's capital management targets. The Group's total Loan facility at 30 December 2024 is \$28.5m and is drawn to \$25.0m, and the loan facility continues to amortise at \$0.5m per quarter. The facility is sufficient to support the business in its current form.

The Group recognised a \$1.2m Financial Liability (non-cash) for the purchase commitments of minority interest in Förch Australia, representing the estimated value of the remaining 20% ownership stake. The final 20% ownership stake is governed by a put and call option that can be exercised by either party between 2 and 5 years post the completion date of 31 May 2023, and has an agreed valuation methodology, which is detailed further in the notes of these interim accounts.

Significant changes in the state of affairs

There were no significant changes in the state of affairs of the Group during the financial half-year.

Outlook

MaxiPARTS, like many other businesses, finds itself navigating a period of heightened unpredictability as a result of both global events and a weaker domestic economy. This has resulted in the softening of general transport activity across the east coast of Australia and an increase in competitive pricing pressures. The West Coast of Australia has continued to remain strong. At this point in time we expect these trends to continue through the second half of the FY25 financial year.

MaxiPARTS remains focused on:

- Revenue and margin improvement initiatives from the Group's recent acquisitions and organic programs anticipated to grow EBITDA margins into low double digits in the medium term.
- Maintaining balance sheet flexibility to respond to market conditions and having an active capital management plan.
- Finalising integration activities from the recent acquisitions, primarily around IT and business systems.
- Driving revenue and profit growth in the Förch Australia segment following investments made in the sales force and distribution centres in FY24.

The Group believes (as demonstrated in the H1 FY25 results) the delivery of the above will continue to strengthen key financial metrics such as EBITDA / EBIT margins, and improve the return on invested capital.

Dividend

A fully franked FY24 final dividend of 2.57 cents per share was paid during the period on 19 September 2024 totalling \$1.418m.

A fully franked interim dividend of 3.05 cents per share has been proposed by the directors after reporting date with a record date of 27 February 2025 and a payment date of 20 March 2025 (compared to a 2.57 cents per share interim dividend declared for the H1 FY24 dividend). The Group's Dividend Reinvestment Plan ('DRP') will be in operation for the 2025 interim dividend at nil discount to the market price. The financial effect of this dividend has not been brought to account in the financial statements for the half-year ended 31 December 2024 and will be recognised in subsequent financial reports.

Auditor's independence declaration

The independence declaration of our auditor, HLB Mann Judd, in accordance with s.307C of the Corporations Act 2001 is set out on page 5 for the half year ended 31 December 2024 and forms part of the Directors' report.

Opening balance	1,904	1,469

Non-controlling interest profit for the financial year	122	7
Financial liability of minority interest in Förch Australia	(1,243)	-

(b) Financial Liability - Purchase commitments of minority interest

On 31 May 2023, the Group entered into a Share Sale (Purchase) Agreement to acquire 80% ownership stake in the Förch Australia Pty Ltd ("Förch Australia") business. The two previous major shareholders of Förch Australia each retained 10% ownership of Förch Australia and entered into a Shareholders agreement with MaxiPARTS for the earnout period.

The final 20% ownership stake is governed by a put and call option that can be exercised by either party between 2 and 5 years post completion. The put and call option has an agreed valuation methodology of the 3 year annual average adjusted EBITDA (as calculated at the time of exercising the option) multiplied by the remaining life in years of the Förch Germany agreement (which had an original term of 7 years at acquisition date).

As at 31 December 2024, MaxiPARTS has recognised a Financial Liability for \$1.2m for the estimated purchase price of the remaining 20% ownership stake in Förch Australia. The fair value is measured at the present value of the expected redemption price, which is the price that MaxiPARTS expects to pay for the remaining 20%, in the event that the option is triggered at the commencement of the option period. At the time of releasing these accounts, neither party has exercised their option to sell or buy, however it is considered likely that this event will occur inside the next 12 months.

Key Estimates and Judgements:

The value of the liability is determined using the average 3 year adjusted EBITDA results (in accordance with contractual definitions), multiplied by 4.8 year term remaining on the Förch Germany agreement as per the current agreement that is in place (it should be noted that the agreement includes a clause requiring both parties to exercise their best endeavours to renegotiate a full 7 year term before exercising the put and call option). The valuation of the financial liability will change if either one or multiple of the following items change including: the trigger date of the option, the 3 year average EBITDA, or the remaining term of the Förch Germany agreement. In the event that the remaining term of the Förch Germany agreement is extended to a full 7 year term prior to the trigger date of the option, the liability is estimated to be circa \$1.9m.

The financial liability is regarded as a level 3 instrument for fair value disclosure as at the period end. It is the group's only level 3 financial instrument, where unobservable inputs were used to determine its fair value.

	31 Dec 24 \$'000	30 Jun 24 \$'000
Opening balance	-	-
Financial Liability - Purchase commitments of minority interest	1,243	-
Closing balance	1,243	-

Auditor's Responsibility for the Review of the Financial Report

Our responsibility is to express a conclusion on the interim financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that interim financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 31 December 2024 and its performance for the half-year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of an interim financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
