HIGHLIGHTS

- Firm commitments received from sophisticated and professional investors for a A\$4.5m placement, bringing several new strategic family offices and institutions to the register

- The funding from ARENA is a significant catalyst and was secured following an extensive due-diligence process, including independent technical assessment
- Funds raised from the placement will be used for general working capital including progressing the Australian LFP Demonstration Plant, increasing LIB² collections for recycling and to repay the outstanding Lind facility
- Leading Melbourne-boutique, Peak Asset Management led the placement process

Livium Ltd (ASX: LIT) ("**Livium**" or the "**Company**") is pleased to announce it has received firm commitments from existing shareholders, alongside new institutional and sophisticated investors, to raise gross proceeds of A\$4.5m ("**Placement**").

The Company is excited by its recent announcement that its wholly owned subsidiary, VSPC Pty Ltd ("**VSPC**"), has taken a big step towards its goal of establishing an Australian lithium ferro phosphate (LFP) demonstration plant, by securing a grant of A\$30m from the Australian Renewable Energy Agency ("**ARENA**").

VSPC is a developer of the critical material LFP and has executed a binding agreement with ARENA for the grant, which will be put towards the construction and working operations of the plant. The LFP demonstration plant will be operated for two years and in this time, the Company expects to secure binding LFP and/or LMFP offtake contracts.

Drawing of the grant is conditional on securing full funding for the Australian LFP demonstration plant, which is expected to be achieved via strategic investment into VSPC.

Comment from Livium CEO and Managing Director, Simon Linge

"We are delighted by the strong support received for this capital raising. The mix of existing shareholders and new institutional investors demonstrates the growing awareness and support of our revenue-generating recycling business and patented technologies.

The grant from ARENA represents a significant step forward for our battery materials commercialisation with funds raised from the placement to be used towards advancing the pathways for the Australian LFP Demonstration Plant and to grow battery recycling volumes.

I would like to thank Peak and their clients for supporting the raise and look forward to working with them to grow the Company for the benefit of all shareholders."
