# MARKET REVIEW & FY25 PRODUCTION GUIDANCE

## FeSi & SiMn Market Review

- FeSi prices faces continued near term pressure, adjusting in response to declining coke prices. YoY FeSi prices declined by 11.5%
- Normalization expected for both Mn ore and Mn alloys after brief spike catalyzed by manganese ore.

FeSi Production Volume (kmt)

Mn Alloy Production Volume<sup>(1)</sup> (kmt)

(1) FY2019 - FY2021 OMQ + OM Sarawak production volume.  
 FY2022 onwards purely OM Sarawak production volume.

## Exploration and Mining (Mn Ore)

- Mine remains under care and maintenance with rehabilitation works progressed as planned, with a focus on repairing damaged landforms caused by higher-than-expected rainfall.
- Planned trial production progressing well, with a second trial planned in early Q1 2025 to achieve desired feed throughputs and grades following further optimization works.

## Smelting (FeSi and Mn Alloy)

- Average 15 out of 16 furnaces in operation in FY2024. Achieved record production levels surpassing 500,000 tonnes of alloys in both output and sales
- Preliminary FY25 production guidance of 440-490 ktpa.
- Both silicon metal furnaces strategically switched to produce FeSi for optimal returns and maximize furnace utilization.

# RECORDED US\$76.0M EBITDA IN FY2024

## FY2024 Revenue and Gross Profit Margin

- Revenue increased by 11%, primarily attributed to higher volumes of alloys traded in FY2024
- This helped in cushioning the impact of declining alloy prices, which squeezed margins, particularly in 2H 2024

## Segment Breakdown

- Lower contribution from smelting segment despite higher revenue due to margin compression in 2H 2024
- Stable contribution from trading segment despite market volatility
- Mining segment remained under care and maintenance since end Jan 2022

## Prudent Cash Management

- US\$83.3 million net cash generated from operating activities
- Minimal cash flow from investing activities in line with minimal capex spending in the near term
