6 March 2025

Appointment of Chief Executive Officer & Managing Director

333D Limited (ASX:T3D) (**Company**) is pleased to announce that it has entered into a services agreement with existing director Mr John Conidi as the Company's Chief Executive Officer and Managing Director effective 1 March 2025.

Mr Conidi is a substantial shareholder of the Company, is currently a director and has been instrumental in driving the Company's digital asset management strategy. Over the last 12 months the Company has seen a substantial increase in revenue from its medical digital asset strategy.

With Medicare being the focus of the current Federal election and both sides of Government committing an extra \$8 billion to increase GP bulk billing rates – the consequence will be a substantial spike in radiology presentations. This is a boon for T3D and its partners and justifies T3D's current strategy of investing in R&D which automates processes, increasing efficiency and lowering the cost per presentation for its partners.

Pursuant to *ASX Listing Rule 3.16.4*, a summary of the material terms of Mr Conidi's services agreement is provided below:

- The appointment is effect from 1 March 2025 and has no fixed term.
- The appoint may be terminated by Mr Conidi or the Company by giving not less than 90 day written notice.
- Total fixed annual remuneration of \$240,000 per annum. This remuneration may be reviewed annually by the Company.
- Mr Conidi will remain a director of the Company and will continue to receive director fees (currently \$30,000 per annum) in addition to the remuneration as Chief Executive Officer.

- END -

The release of this announcement was **authorised by the Board of Directors** of the Company and is market sensitive.

About 333D Limited

333D Limited is a company that seeks to capitalise upon opportunities in the digital line of business as new technologies are developed from both digital capture and digital creation perspectives, that will lend themselves for use in a myriad of interfaces, both physical (3D printed) and/or across other or additional digital platforms. 333D specialises in the digital capture of a subject matter; digital creation of data files incorporating diagnostic or medical imaging in DICOM format, 2D, 3D and animated digital content including still photography, digital design and motion video; and encoding data files using artificial intelligence such that a digitally created file is generated that is viewable in a 3D format and capable of being printed by a 3D printer. 333D Limited also provides bespoke design and management of digital assets (including 3D print files) and bespoke 3D printing bureau services.
