

ASX Announcement

Race Online Investor Briefing Invitation

14 March 2025 – Race Oncology Limited (“Race”) is pleased to invite shareholders and potential investors to attend a special online investor briefing to discuss the upcoming Phase 1 clinical trial of RC220.

This investor briefing follows today’s announcement that Race has received approval from the Bellberry Human Research Ethics Committee (HREC) to initiate a Phase 1 clinical trial of RC220, which will assess the safety, tolerability, pharmacokinetics, maximum tolerated combined dose (MTCD) in combination with doxorubicin, and the effects on a range of cardiac and clinical biomarkers including m⁶A RNA.

During the briefing, Dr Pete Smith, Executive Chair and Dr Daniel Tillett, Managing Director and Chief Executive Officer will provide further detail on the trial, before opening to an interactive investor Q+A session.

Briefing details

Date: Monday, 17 March, 2025
Time: 6pm-7pm (AEDT)
Format: Online webinar

Registration link: https://us02web.zoom.us/webinar/register/WN_tpllopKIRbe8hOKKJSHSnw

Once the registration form is completed, investors will receive a confirmation email detailing how to access the briefing session online.

About Race Oncology (ASX: RAC)

Race Oncology (ASX: RAC) is an ASX-listed clinical stage biopharmaceutical company with a dedicated mission to be at the heart of cancer care.

Race's lead asset, bisantrene, is a small molecule chemotherapeutic. Bisantrene has a rich and unique clinical history with demonstrated therapeutic benefits in both adult and paediatric patients, a well characterised safety profile, and compelling clinical data demonstrating an anticancer effect with less cardiotoxicity compared to anthracyclines such as doxorubicin.

Race is advancing a reformulated bisantrene (RC220) to address the high unmet needs of patients across multiple oncology indications, with a clinical focus on anthracycline combinations, where we hope to deliver cardioprotection and enhanced anticancer activity in solid tumours. Race is also exploring RC220 as a low intensity treatment for acute myeloid leukaemia.

Race is investigating the effect of bisantrene on the m⁶A RNA pathway, following independent research published by the City of Hope identifying bisantrene as a potent inhibitor of FTO (Fat mass and obesity-associated protein). Dysregulation of the m⁶A RNA pathway has been described in numerous peer reviewed studies as a driver of a diverse range of cancers.

Race Oncology has collaborated with Astex, City of Hope, MD Anderson, Sheba City of Health, UNC School of Medicine, University of Wollongong and University of Newcastle, and is actively exploring partnerships, licence agreements or a commercial merger and acquisition to accelerate access to bisantrene for patients with cancer across the world.
