Melbourne, Australia, April 10, 2025: Immuron Limited (ASX: IMC; NASDAQ: IMRN), an Australian based and globally integrated biopharmaceutical company is pleased to announce continued sales growth (unaudited) of Travelan<sup>®</sup>, an over-the-counter immune supplement that targets pathogenic bacteria and the toxins they produce in the gastrointestinal (GI) tract.

Global Year to Date Net Sales (\$AUD)

Flavio Palumbo, Chief Commercial Officer said “For the first time, Immuron has exceeded A\$5 million in sales - our highest fiscal year sales ever! That is with a quarter to come. This is a fantastic result, with record sales quarter in December for Australia on the back of our travel activation program and importantly our North American business continues to produce record results ahead of the key spring summer travel period. Overall year to date sales globally is up 46% on last year. The December quarter was a record with Australian pharmacy wholesalers stocking up on the back of Immuron’s expanded pharmacy banner group agreements and ahead of the peak Christmas, New Year holiday period.

Wholesaler stocking impacted Australia quarterly sales to wholesalers. It did not impact ex-Wholesaler sales to pharmacies which continue to be strong. We continue to strengthen our consumer and trade program that has seen Travelan® ranked #1 by market share change, #2 by SKU and #3 by brand in the Anti-diarrheal category (IQVIA Australian Pharmacy Scan – 4 weeks to March 2025). We are on track for another record year in Australia. We have achieved record sales in both USA and Canada. The USA we continue to break record sales via our redefined direct to consumer marketing approach. In Canada we have also achieved record sales with step one of our re-launch - achieving listings in major retailers. With strong sales anticipated over the Easter, ANZAC holiday periods and spring, summer break in North America, we have great momentum to build further on this record-breaking year.”

This release has been authorised by the directors of Immuron Limited.

**About Travelan®**

Travelan® is an orally administered passive immunotherapy that prophylactically reduces the likelihood of contracting travelers’ diarrhea, a digestive tract disorder that is commonly caused by pathogenic bacteria and the toxins they produce. Travelan® is a purified tablet preparation of hyper-immune bovine antibodies and other factors, which when taken with meals bind to diarrhea-causing bacteria and prevent colonization and the pathology associated with traveler’s diarrhea. In Australia, Travelan® is a listed medicine on the Australian Register for Therapeutic Goods (AUST L 106709) and is indicated to reduce the risk of Traveler’s Diarrhea, reduce the risk of minor gastro-intestinal disorders and is antimicrobial. In Canada, Travelan® is a licensed natural health product (NPN 80046016) and is indicated to reduce the risk of Traveler’s Diarrhea. In the U.S., Travelan® is sold as a dietary supplement for digestive tract protection.

**About Traveler’s diarrhea**

Traveler’s Diarrhea is a gastrointestinal infection with symptoms that include loose, watery (and occasionally bloody) stools, abdominal cramping, bloating, and fever, Enteropathogenic bacteria are responsible for most cases, with enterotoxigenic *Escherichia coli* (ETEC) playing a dominant causative role.

**About Immuron**

Immuron Limited (ASX: IMC, NASDAQ: IMRN), is an Australian biopharmaceutical company focused on developing and commercializing orally delivered targeted polyclonal antibodies for the treatment of inflammatory mediated and infectious diseases.
