

ASX ANNOUNCEMENT

11 APRIL 2025

RRS Gather Round Conference Adelaide Presentation- Amended

Kingsland Minerals Limited (ASX:KNG) ("KNG" or the Company) refers to the Presentation announced to the ASX dated 9 April 2025.

An amended presentation is attached. Slide 18 contains the reference for the Benchmark graphite price graph and slide 24 includes the Competent Person statement for the Exploration Target.

Authorised for release by the Company Secretary.

Disclaimers

Nature of this document: The purpose of this presentation is to provide general information about Kingsland Minerals (ACN 647 904 014) (the 'Company'). Unless otherwise stated herein, the information in this presentation is based on the Company's own information and estimates as of the date of this presentation. In attending this presentation or viewing this document you agree to be bound by the following terms and conditions.

Not an offer or advertisement: This presentation is for information purposes and does not constitute or form any part of any offer or invitation to sell or issue, or any solicitation of any offer to purchase or subscribe for, any securities in the Company in any jurisdiction. This presentation and its contents must not be distributed, transmitted or viewed by a person in any jurisdiction where the distribution, transmission or viewing of this document would be unlawful under the securities or other laws of that or any jurisdiction. In particular, this presentation may not be distributed or released, directly or indirectly, in the United States. This presentation does not constitute an advertisement for an offer or proposed offer of shares. Neither this presentation nor anything contained in it forms the basis of any contract or commitment and it is not intended to induce or solicit any person to enter into, or refrain from entering into, any contract or commitment.

Not financial product advice: This presentation does not take into account the individual investment objectives, financial situation and particular needs of each of the Company's shareholders or potential investors. You may wish to seek independent financial and taxation advice before making any decisions with respect to this presentation. Neither the Company nor any of its related bodies corporate are licensed to provide financial advice in respect of the Company's securities or any other financial products.

Forward-looking statements: Certain statements in the presentation are or may be perceived as "forward-looking statements" and represent the Company's intentions, projections, expectations or beliefs concerning, among other things, future operating and exploration results or the Company's future performance. You are cautioned not to place undue reliance on any forward-looking statement. These forward-looking statements are based on current expectations at the date of this publication. The projections, estimates and beliefs contained in such forward-looking statements necessarily involve known and unknown risks and uncertainties and are necessarily based on assumptions, which may cause the Company's actual performance and results in future periods to differ materially from any express or implied estimates or projections.

Disclaimer: No representation or warranty, express or implied, is made by the Company that the material contained in this presentation will be achieved or prove to be correct. Except for statutory liability which cannot be excluded, each of the Company, its directors, officers, employees, advisers, agents and contractors expressly disclaims any responsibility for the accuracy, fairness, sufficiency or completeness of the material contained in this presentation, or any opinions or beliefs contained in this presentation, and excludes all liability whatsoever (including negligence) for any loss or damage which may be suffered by any persons as a consequence of any information in this presentation or any error or omission therefrom. The Company is under no obligation to update or keep current the information contained in this presentation or to correct any inaccuracy or omission which may become apparent or to furnish any person with any further information. Any opinions expressed in the presentation are subject to change without notice.

Unverified information: This presentation may contain information (including information derived from publicly available sources) that has not been independently verified by the Company.

Why invest in Kingsland Minerals?

Kingsland 100% owns the Leliyn Graphite Project in the NT which hosts **Large graphite deposit at 192.5Mt @ 7.3% TGC**

Leliyn Exploration Target of 700Mt – 1,100Mt @ 7-8% TGC highlights globally significant scale of the 20km graphitic schist

Successful metallurgical testwork delivered **graphite flake concentrate >94% TGC**

Mineral Resource is near surface and amenable to very efficient and productive **open pit mining techniques with a very low strip ratio**

250km from Darwin port with rail/road access is an **ideal location to export product to Asia Pacific trade partners** (Japan, South Korea, etc.)

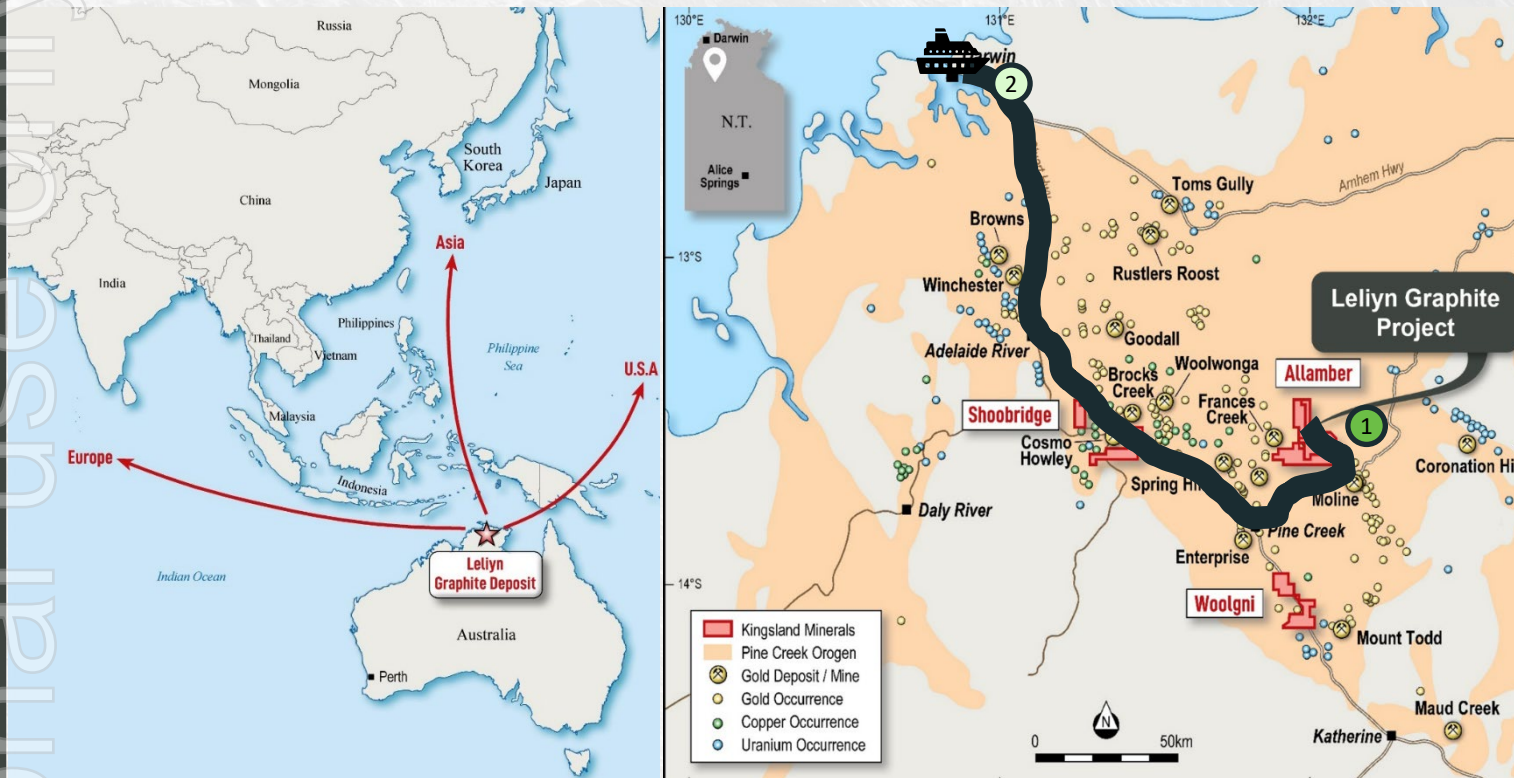

Strategic partnership with Quinbrook Infrastructure Partners to develop downstream processing capability in Darwin

Globally significant graphite project in a tier one mining jurisdiction

Australian Graphite Deposits

Leliyn is ideally located **with access to Darwin and International markets**

Excellent location in the Pine Creek mining district

250km from Darwin Port with rail/road access

Existing infrastructure with a long history of mining and exploration

Leliyn is ideally placed to export graphite products to Asian, North American and European markets

Kingsland will investigate access to government funding (NAIF, CMDP, etc)

STAGE 1

Production of flake graphite concentrate at Leliyn

Deliver flake graphite concentrate to Darwin at as low a price as possible with targeted superior ESG credentials

STAGE 2

Production of refined graphite products in Darwin

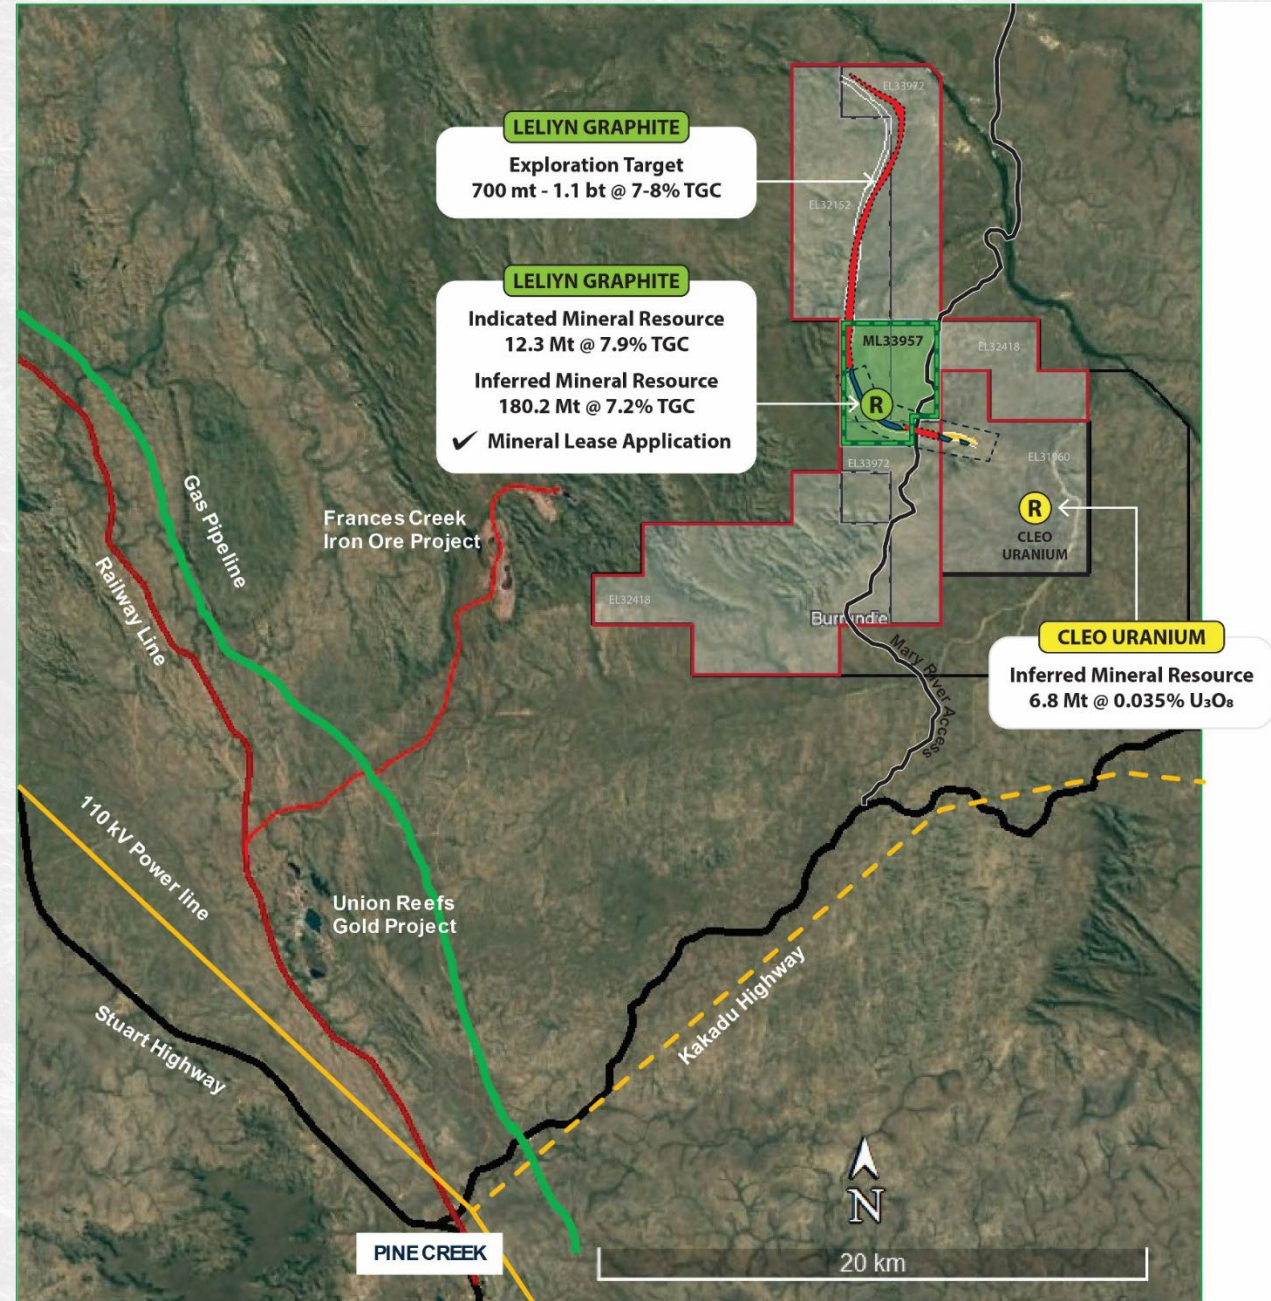

Downstream processing in Darwin to produce refined graphite products for consumption in Australia and/or overseas

Infrastructure in Place

Existing Infrastructure

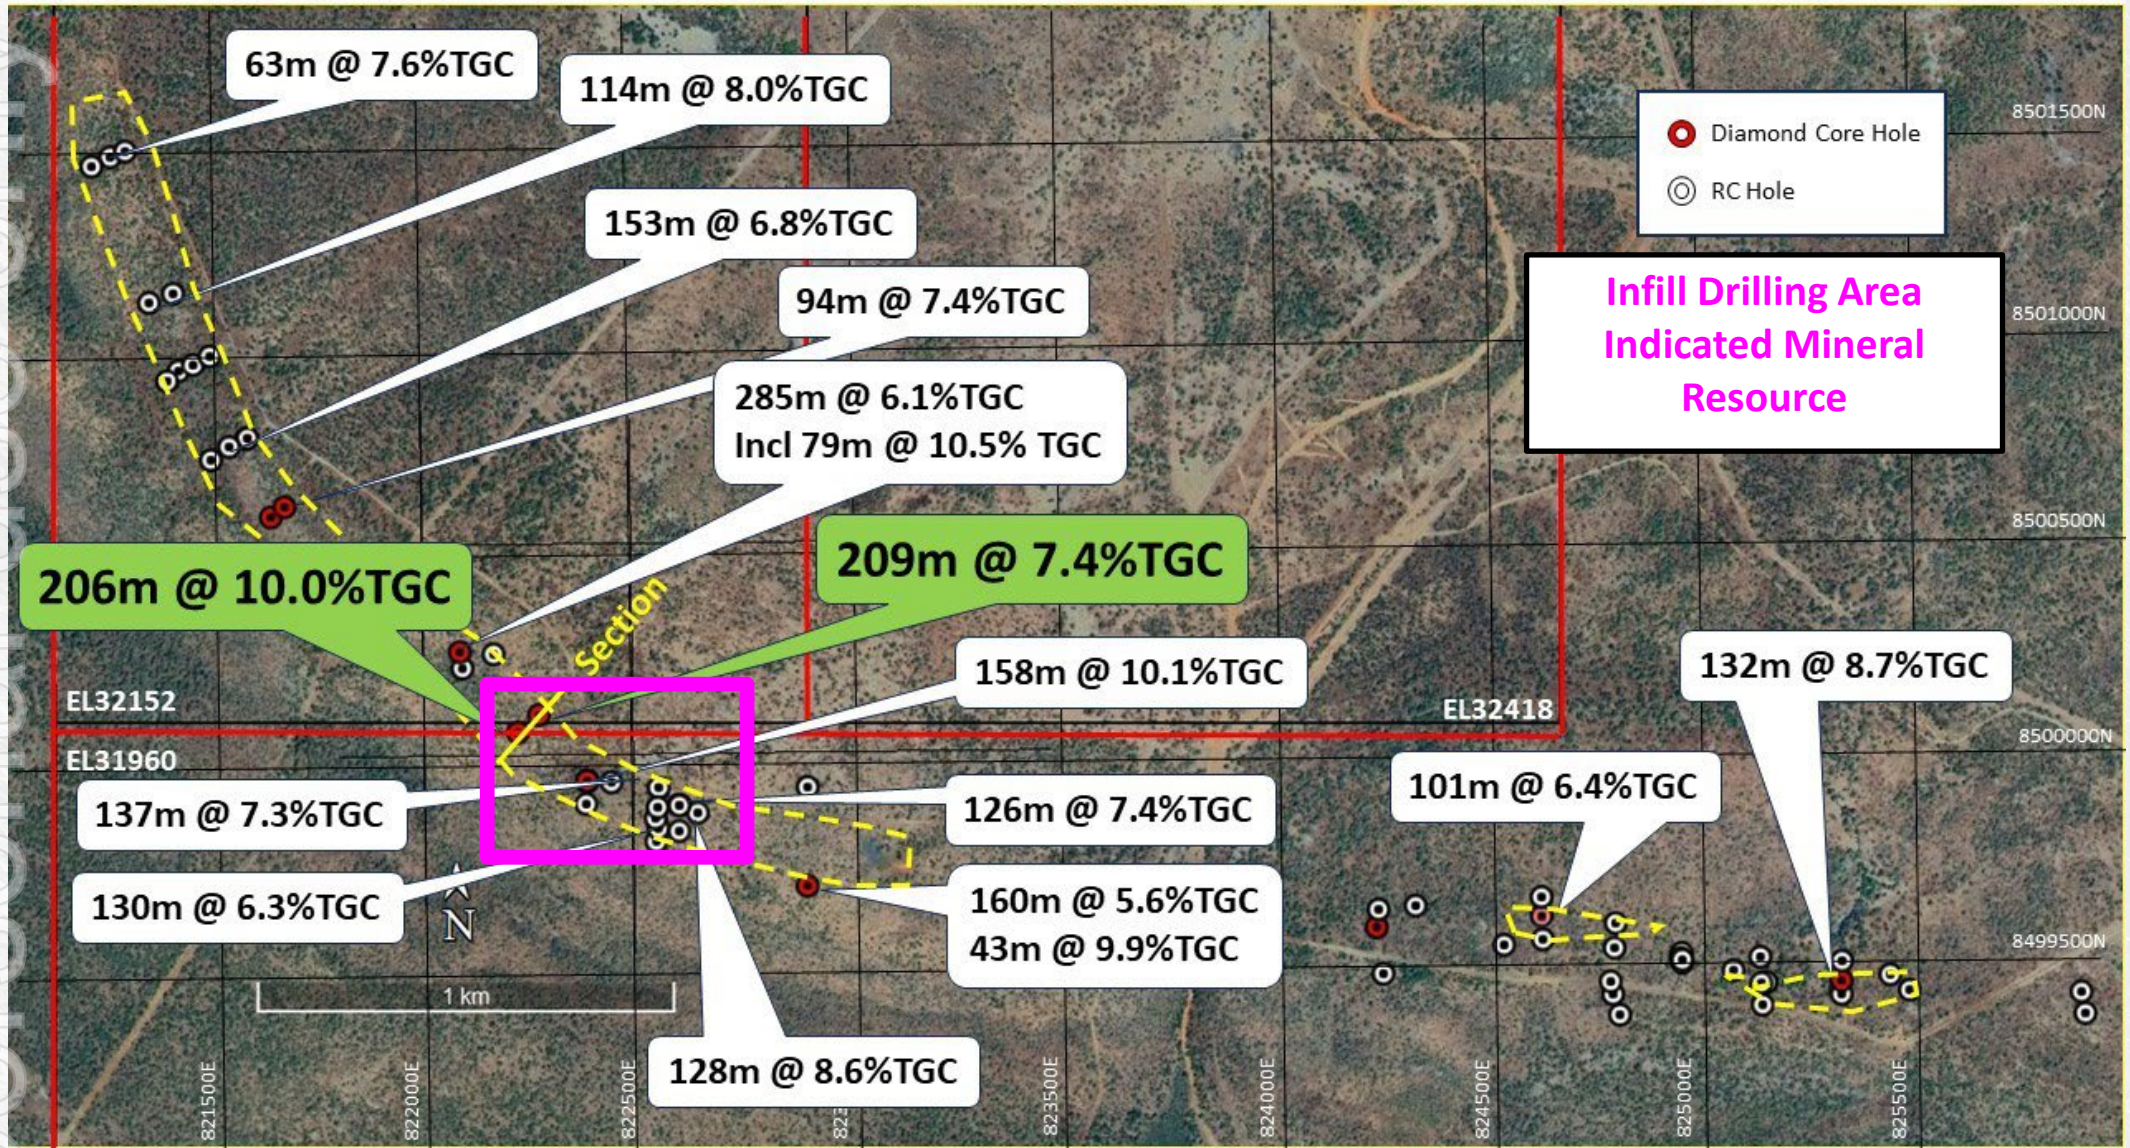

- ✓ Rail loading area used for Frances Creek Iron Ore Mine in 1970's
- ✓ Haulage road from Frances Creek to rail loading area.
- ✓ Sealed Kakadu and Stuart Highways
- ✓ 110 kV power line
- ✓ Gas pipeline
- ✓ Pine Creek, accommodation, fuel etc

Frances Creek Iron Ore Mine, Union Reefs Gold Project are not assets of Kingsland Minerals Ltd.

Leliyn Graphite Project

Mineral Resource Area with drilling to date and location of cross-section

Maiden Mineral Resource Estimate

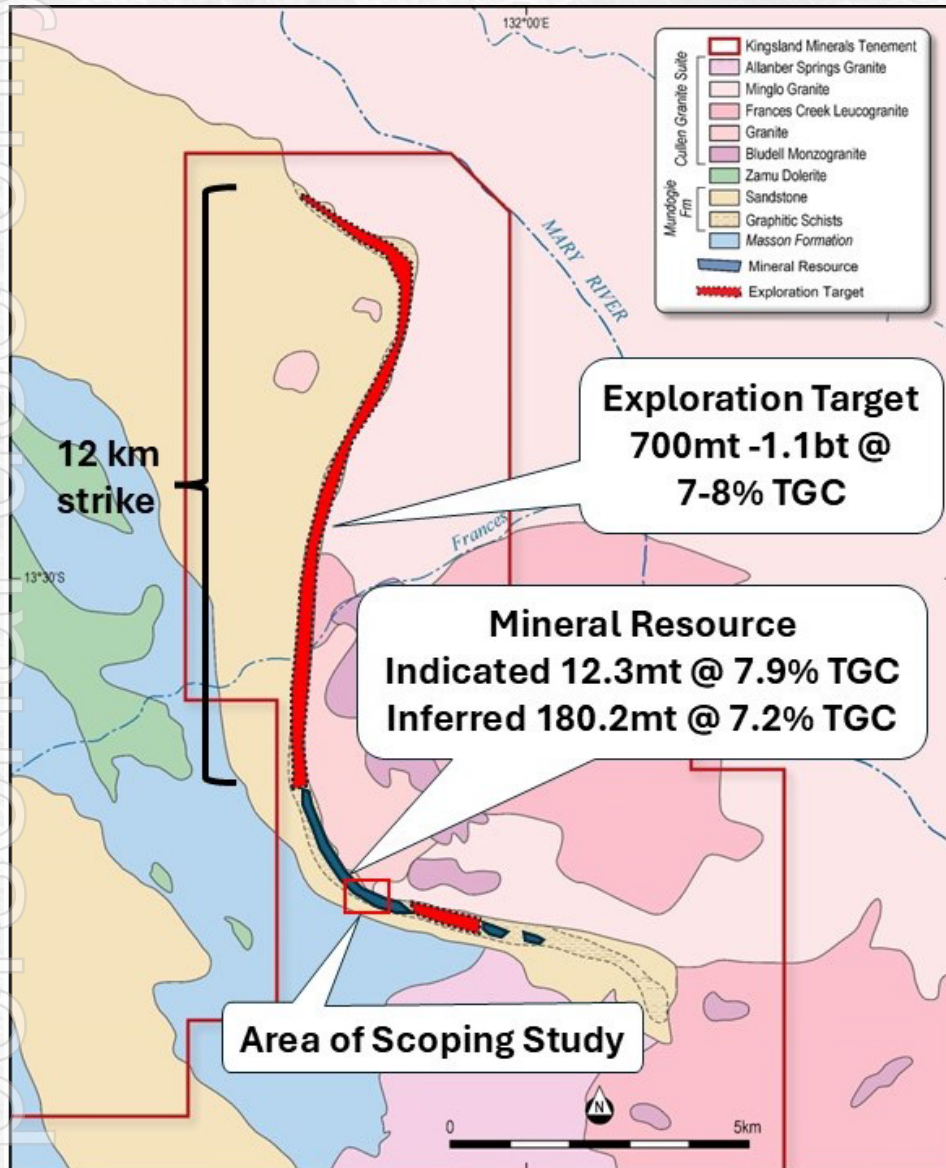

Leliyn is Australia's largest graphite deposit – **with exceptional upside**

- Updated Mineral Resource of 192.5mt @ 7.3% TGC containing 14.0Mt graphitic carbon released in April 2025
- Massive upside along remaining 16km of strike for additional resources
- Outcropping mineralisation up to >100m wide on surface
- Amenable to very efficient and productive open pit mining techniques with a very low strip ratio
- Mineralisation is continuous along strike and at depth
- Leliyn delivered some of the best graphite intercepts globally during its CY2023 drill program
 - ✓ 206m @ 10.0% TGC from 0m
 Incl. 46m @ 12.2% TGC from 31m and 73m @ 11.2% TGC from 67m
 - ✓ 209m @ 7.4% TGC from 154m
 Incl. 31m @ 10.9% from 237m and 38m @ 11.2% TGC from 314m

Updated Exploration Target

Leliyn is a globally significant graphite deposit – **ability to optimise resource**

- Updated Exploration Target of 700 – 1,110Mt @ 7-8% TGC for 50-90Mt of contained graphitic carbon released in June 2024
- Only 25% (4.7km) of total graphitic schist unit has been drilled, identifying the largest graphite resource in Australia
- 75% (13.5km) remains untested demonstrating considerable upside to significantly increase mineral resource tonnage
- Given the potential significance of the MRE, testing work is prioritised to strategically de-risk the project before increasing the scale
- Ability to optimise flake characteristics within remaining ~14km of strike

Leliyn Graphite Project Exploration Target

Tonnes (t)	Grade (% TGC)	Contained Graphite (t)
700 million -1.1 billion	7% - 8%	50 million – 90 million

The quantity and grade of the Exploration Target for the Leliyn Graphite Project is conceptual in nature, there has been insufficient exploration to estimate a Mineral Resource and it is uncertain if further exploration will result in the estimation of a Mineral Resource.

Leliyn Graphite Metallurgical Test-work

Flotation test-work has produced a commercial grade concentrate >94% TGC.

Important milestone as metallurgical testwork proves that Leliyn can produce a marketable product.

Test-work ongoing to optimise flotation flowsheet.

Bulk concentrate sample sent to Germany for further test-work for production of purified, spherical graphite.

Leliyn is predominantly fine flake, more suitable for battery applications.

STAGE 1

Production of flake graphite concentrate at Leliyn

Deliver flake graphite concentrate to Darwin at as low a price as possible with targeted superior ESG credentials

Met Testwork

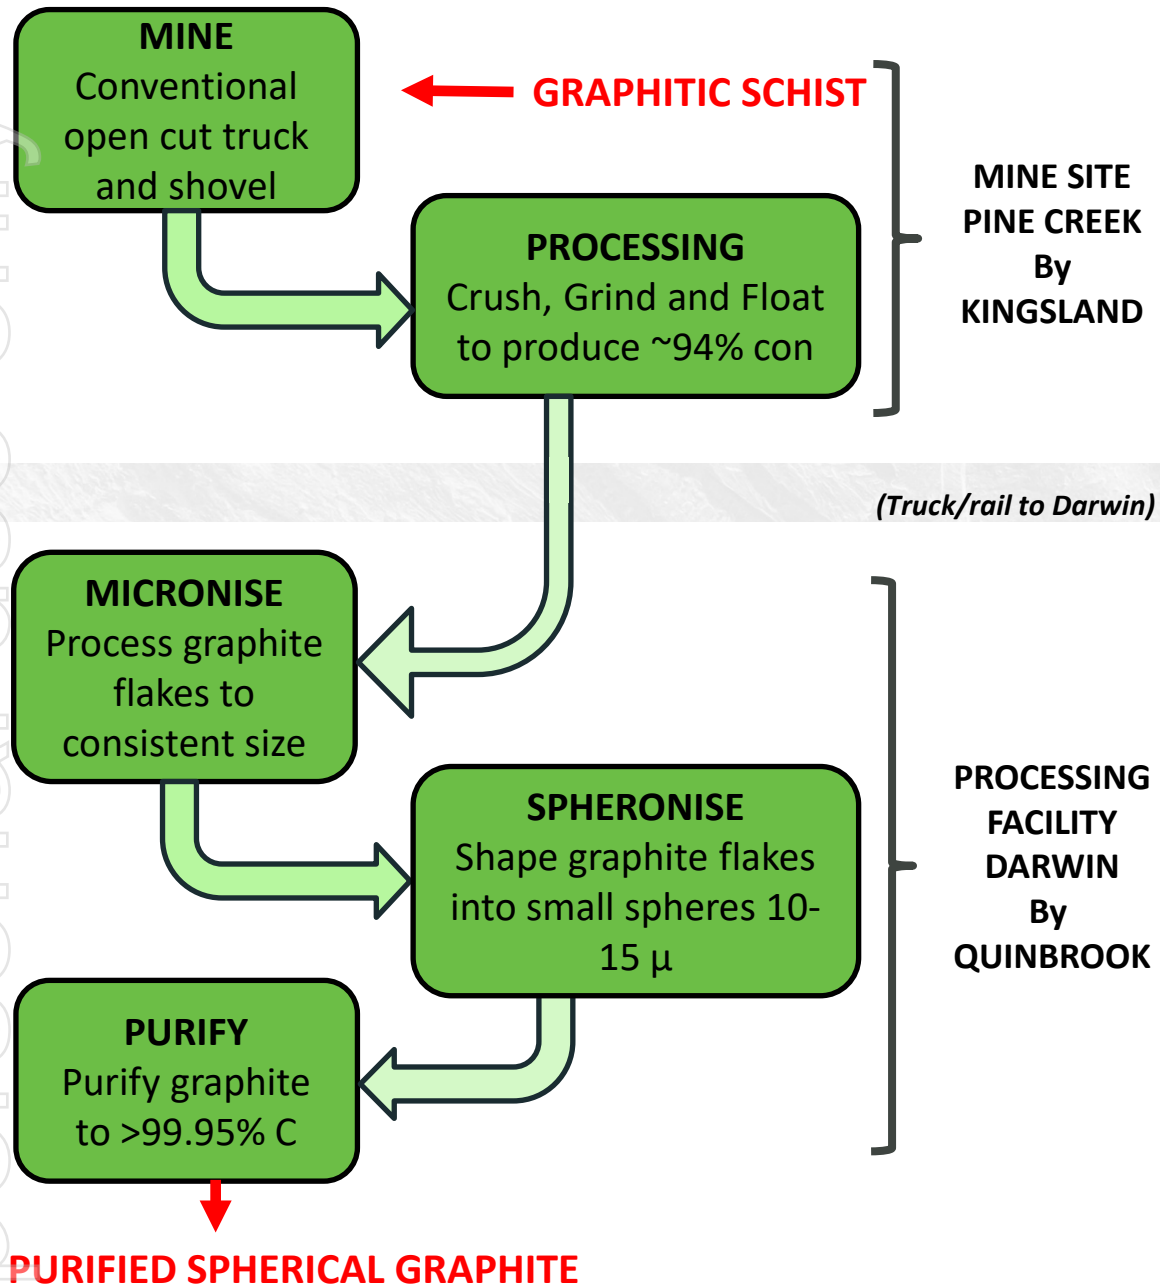

STAGE 2

Production of refined graphite products in Darwin

Downstream processing in Darwin to produce refined graphite products for consumption in Australia and/or overseas

Leliyn Graphite Processing

Graphite Demand driven by Electric Vehicles and Battery Energy Storage Systems

EU, UK, China ban ICE by 2035 | **nearly 10% of new car sales in Aust are EV's or PHEV's¹**

Increasing EV car sales will drive increasing graphite demand

Source: Rho Motion | Reuters, Jan. 13, 2025 | By Sumanta Sen

Typical EV battery contains:

Source: www.elements.visualcapitalist.com

- 1. 91,292 EV (7.4% of total new car sales)
- 23,193 Plug-in hybrid (1.8% of new car sales)

RACV 14 January 2025

[Australia's best-selling cars, utes and SUVs for 2024 | RACV](#)

There is more graphite than anything else

Graphite demand will be driven by EV battery use and Battery Energy Storage Systems (BESS). Internal combustion engines (ICE) phased out by 2035 in EU, China and UK.

Graphite Demand driven by Electric Vehicles

EV's driving demand growth – demand to outstrip supply

Benchmark Mineral Intelligence Q1-2025

Battery market to grow from current ~55% of total graphite demand to 70% in 2030 and 85% in 2040.

Increased demand combined with supply limitations will lead to increased prices for flake graphite.

Graphite Demand driven by Large Scale Storage

BESS driving demand growth – demand to outstrip supply

Quinbrook looks to build world's first 'genuine' eight-hour battery storage system

The manager has unveiled a \$3.5bn plan to deploy more than 3GW of long-duration battery storage across Australia.

Tom Taylor - 6 March 2025

Infrastructure Investor

Quinbrook plots \$3.5b investment in giant batteries

Angela Macdonald-Smith *Senior resources writer*

Mar 6, 2025 - 7.00am

The junior partner in Mike Cannon-Brookes' \$40 billion Sun Cable venture has unveiled a \$3.5 billion investment in eight-hour batteries, a plan it says will slash the cost of round-the-clock clean power for heavy industry and data centres.

The 3 gigawatts of batteries – with about 24 gigawatt-hours of storage – are to be installed by Quinbrook Infrastructure Partners, kicking off with an expansion of the firm's Supernode data storage project in Brisbane targeted for the end of next year.

Australian Financial Review

▶ **Large Scale Battery Energy Storage Systems to provide grid stability.**

▶ **Power for large Data Storage centres.**

▶ **Quinbrook leading the way for these facilities in Australia.**

Graphite Supply

Public policy driving procurement of graphite supply outside of China

China leads in critical mineral processing

Share of top mineral processing countries in world total for selected minerals

Source: UN Trade and Development (UNCTAD), based on OECD (2023a). Strengthening Clean Energy Supply Chains for Decarbonisation and Economic Security: OECD Report for the Group of Seven Finance Ministers and Central Bank Governors.

Public Policy & Initiatives

United States

Transition rules in place for graphite sourcing

- No graphite from FEOC (inc. China) from 2027
- OEMs must demonstrate how they will source compliant graphite from 2027 to qualify for IRA rebates

25% tariff on Chinese graphite

EU Critical Raw Materials Act

Not more than 65% of EU critical mineral demand to be sourced from a single non-EU country by 2030

Market now diversifying and seek ex-China natural and processed graphite sources

China introduced export controls for graphite products on 1 December 2023

Strategic Partner – Quinbrook Infrastructure Partners (QIP)

Who are Quinbrook?

Quinbrook Infrastructure Partners is a specialist investment manager focused exclusively on the infrastructure needed to drive the energy transition in the UK, US, and Australia

What do Quinbrook do?

Quinbrook is led and managed by a senior team of power industry professionals who have collectively invested c. USD 5.6 billion of equity capital in 43.3 GW of energy infrastructure assets representing a total transaction value of USD 48.3 billion. Quinbrook is the development partner for the SunCable Project.

SunCable to Provide Renewable Energy to the Northern Territory

SunCable proposes to develop the world's largest renewable energy generation and battery storage precinct in the heart of the Northern Territory, and a 5,000km high voltage direct current (HVDC) system, to deliver up to 6GW of 24/7 green electricity to industrial customers in Darwin (stage 1) and Singapore (stage 2).

Exploring Downstream Processing Facilities in Darwin

SunCable is planned to provide renewable energy to power the Middle Arm Sustainable Development Precinct at Darwin. This is the planned location of the spherical graphite processing facility.

► Strategic Partner – Quinbrook Infrastructure Partners (QIP)

Rationale of investment

- Establishment of a domestic, integrated mining, processing and downstream processing stream
- Minimise jurisdictional risk: mining and downstream processing are both located in the Northern Territory
- Reduction of capital burden on Kingsland: KNG funds mine (flake graphite), Quinbrook funds downstream processing facility (purified, spherical graphite PSG)
- Provision of clean, efficient power through SunCable
- Agreements in place for off-take of flake graphite
- Agreements in place for provision of renewable energy sources

Transformational agreement to establish integrated mining, processing and advanced downstream processing facilities in the Northern Territory

Graphite Price

Graphite demand and supply constraints: **graphite price will respond**

Source: Benchmark Mineral Intelligence: Graphite Price Assessment

Kingsland Minerals – Going Forward

- ☑ **Indicated Mineral Resources Estimate Leliyn**
 - Infill drilling upgraded to Indicated classification

- ☑ **Marketable concentrate >94%**
 - Commercial grade concentrate at 80% recovery

COMMENCED
Due mid 2025

- ☐ **Advanced graphite metallurgy test-work**
 - Assess optimal end-use for graphite concentrate, suitability for EV battery use

COMMENCED
Ongoing 2025

- ☐ **Mining studies**
 - Pit optimization and design
 - Mining lease application
 - Plant flowsheet design

❖ **SCOPING STUDY - SECOND HALF 2025**

❖ **FEASIBILITY STUDY TO TIE IN WITH QUINBROOK DARWIN PROCESSING FACILITY**

▶ Leliyn Graphite

Globally significant graphite deposit, tier one project in a tier one location

Leliyn has scale, MRE Ind. and Inf. of 192.5mt @ 7.3% TGC

Leliyn has location, NT Australia is ideal for export to Asia

Strategic Partnership with a healthy balance sheet

Board of Directors

Richard Maddocks

Managing Director, MSc (Mineral Economics), BAppSc (Geology), Grad Dip (Finance & Investment), FAusIMM, GAICD

- Geologist with 30+ years of mining, development and exploration experience
- Geology Manager of large gold and nickel mines
- Experienced in business development, asset identification and resource estimation.

Bruno Seneque

Director, CFO, Company Secretary B Bus, CPA

- Corporate finance professional with 25+ years of experience
- Focused career of 23 years in the minerals industry
- Previously director of ASX listed Kairos Minerals operating in Pilbara of WA
- Significant experience as CFO of ASX listed explorers & mineral producers.

Nick Revell

Technical Director, BAppSc (Geology) MAIG

- Geologist with 30+ years mining and geology experience
- Significant experience in production and exploration of gold, base metals and uranium.
- Former director of several ASX listed companies.

Robert Johansen

Non-executive Director – Quinbrook nominee

- Qualified in mining engineering, commerce and law and has over 30 years' experience in the Australian and African minerals industry
- Rob has been Senior Director – Minerals for Quinbrook affiliate Private Energy Partners since April 2023 and is responsible for the formulation and execution of Quinbrook's Critical Resources Strategy.

Competent Persons Statement

Information regarding the Mineral Resource Estimate for the Leliyn Graphite Deposit is extracted from the report 'Leliyn Delivers Indicated Resource' created on 8 April 2025. This report is available to view on www.kingslandminerals.com.au or on the ASX website www.asx.com.au under ticker code KNG. The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

The information in this report that relates to Exploration Results and Exploration Targets is based on information compiled by Richard Maddocks, a Competent Person who is a Fellow of The Australasian Institute of Mining and Metallurgy. Richard Maddocks has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Richard Maddocks consents to the inclusion in the report of the matters based on his information in the form and context in which it appears. Richard Maddocks is a full-time employee of Kingsland Minerals Ltd and holds securities in the company.

Information regarding drilling and exploration at the Leliyn Graphite Project is extracted from the reports 'Graphite Exploration Target Update' created on 19 June 2024, 'Graphite Exploration Target' created on 21 March 2023, 'Outstanding start to maiden drilling program with first holes intersecting 150m of graphitic schist' created on 25 May 2023, 'First assays reveal extensive high-grade graphite' created on 15 June 2023, 'Latest assays reveal more extremely wide intersections with high grades' created on 24 July 2023, 'First diamond core assays confirm high grades over big widths' created on 22 August 2023, 'Bonanza intersection of 206m at 10% graphite confirms Leliyn's world-class potential' created on 5 September 2023, 'Testwork confirms favourable flake size for lithium batteries' created on 7 September 2023, 'More Wide, High Grade Graphite Intercepts at Leliyn Graphite' created on 25 October 2023, 'Thickest intercept to date of 285m @ 6.1% TGC at Leliyn' created on 13 November 2023 and 'Further Thick and High Grade Graphite Intercepts at Leliyn' created on 18 December 2023. These reports are available to view on www.kingslandminerals.com.au or on the ASX website www.asx.com.au under ticker code KNG. The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.
