Emyria Opens Second Empax Clinic to Meet Growing Demand and Payer Requirements

Key Highlights:

- New Empax Centre now open within Perth Clinic, licensed day hospital, expanding capacity by 50%
- First two patients to commence treatment on April 14
- Embedded within licensed facility to meet requirements of payers set to fund Empax treatment
- Emyria now delivering programs for both PTSD and treatment-resistant depression
- Longer-term follow-up data indicates durable, clinically meaningful outcomes
- Further Empax Centres planned for the East Coast
- Expansion aligns with rising national demand and growing payer interest in next-generation mental health care

Emyria Limited (ASX: EMD) ("Emyria", or the "Company"), specialising in the development and delivery of innovative treatments for mental health and select neurological conditions, is pleased to announce the official opening of its second Empax Centre, located within Perth Clinic, one of Western Australia's leading licensed private mental health hospitals.

This expansion, which will increase treatment capacity by 50%, is designed to comply with the requirements of major healthcare funders seeking to cover evidence-based mental health therapies within licensed healthcare environments.

The first two fully funded patients will commence treatment on April 14, marking the activation of the site and the start of a broader rollout strategy that reflects both rising clinical demand and structural changes in mental health care funding.

*"We are responding to growing patient demand and the expectations of major health funders," said **Greg Hutchinson, Executive Chair**. "Our expansion into licensed hospital settings demonstrates Emyria's capacity to deliver scalable, evidence-based mental health care treatments."*

Strategic Growth & Durability of Outcomes

The new site comes as Emyria formally launches its second advanced care program—this time for treatment-resistant depression—in addition to its established PTSD offering.

Clinical demand continues to accelerate, and early long-term follow-up suggests that treatment benefits are durable¹, reinforcing the potential for lasting patient impact and broader system adoption.

¹ See ASX release 04 February 2025

Executive Director and Chief Scientific Officer, Dr. Winlo, commented: “We are particularly encouraged by the sustained outcomes we’re seeing in patients at our primary Empax Centre. As we continue to follow patients longer term, we’re building valuable real-world data assets in this emerging field — helping us improve our treatments, inform national care models, and support broader system adoption.”

Positioned for Payer-Backed Growth

The decision to embed Empax Centres within licensed hospital environments reflects a broader strategy to position Emyria to meet the funding criteria of private insurers and major payers now preparing to support innovative care models for conditions like PTSD and treatment-resistant depression.

National Expansion Discussions Underway

Emyria is currently in active discussions with multiple East Coast hospital partners and clinicians, and is aiming to announce further site openings in 2025.²

This expansion reflects Emyria’s broader goal: to build a national network of Empax Centres capable of delivering novel mental health care at scale—supported by payers, guided by evidence, and focused on lasting impact.

This release has been approved by the Board of Emyria.

About Perth Clinic:

Perth Clinic is a private psychiatric hospital renowned for providing quality in-patient and day-patient psychiatric care. As a nationally recognised centre of excellence, the 100-bed hospital provides specialist clinical services within a heritage setting.

Perth Clinic believes that by creating an atmosphere of care, trust, and respect for its patients, and by offering innovative, effective, and outcome-driven programs, it can better meet the individual needs of patients. This patient-centred approach ensures that patients receive relevant, timely, and high-quality services during their treatment and throughout their stay.

The staff at Perth Clinic comprise a specialised team of health professionals dedicated to providing high-quality, evidence-based care for all patients. By maintaining services of excellence, Perth Clinic continues to lead in the fields of assessment, treatment, evaluation, and research for a wide range of mental health issues. Perth Clinic recognises the importance of each patient's journey to recovery, and its staff are committed to providing the support and care needed to help patients achieve their health goals.

² At present, no definitive agreements are in place and there are no guarantees that Emyria will be able to secure further sites.

emyria
