2. DETAILS OF THE OFFER

2.1 The Loyalty Options Offer

The Loyalty Options Offer is being made as a non-renounceable pro-rata entitlement offer of 1 New Option for every 3 Shares held by Eligible Shareholders at an issue price of \$0.005 per New Option to raise up to \$193,349.28 (before costs) (**Loyalty Options Offer**).

Where the determination of an Eligible Shareholder's entitlement to New Options under the Loyalty Options Offer results in a fraction, such fraction will be rounded down to the nearest whole New Option.

Based on the capital structure of the Company as at the date of this Prospectus, a maximum total of 38,669,856 New Options will be issued pursuant to the Loyalty Options Offer to raise up to \$193,349.28 (before costs).

The New Options offered under the Loyalty Options Offer will be exercisable at \$0.12 each and will expire on 31 May 2028 and otherwise on the terms and conditions set out in Section 5.2.

All of the Shares issued upon exercise of the New Options will rank equally with the Shares on issue at the date of this Prospectus. Please refer to Section 5.1 for further information regarding the rights and liabilities attaching to the Shares.

2.2 Eligibility to participate in the Offer

Only Shareholders as at 5:00pm WST on the Record Date with a registered address in Australia, New Zealand, Isle of Man and Singapore are eligible to participate in the Loyalty Options Offer (**Eligible Shareholders**).

In accordance with Listing Rule 7.7.1, the Company has determined that it would be unreasonable to extend the Loyalty Options Offer to Ineligible Shareholders, having regard to:

- (a) the small number of Ineligible Shareholders;
- (b) the small number and value of the New Option which would be offered to Ineligible Shareholders if they were Eligible Shareholders; and
- (c) the cost of complying with the legal and regulatory requirements in the respective overseas jurisdictions.

Accordingly, the Loyalty Options Offer is not being extended to any Shareholders outside Australia, New Zealand, Isle of Man and Singapore. The Company will notify all Ineligible Shareholders of the Loyalty Options Offer and advise that the Company is not extending the Loyalty Options Offer to those Shareholders.

This Prospectus does not constitute an offer of New Options in any jurisdiction in which it would be unlawful. The distribution of this Prospectus in jurisdictions outside Australia may be restricted by law and persons who come into possession of this Prospectus should seek advice on and observe any such restrictions. Any failure to comply with such restrictions may constitute a violation of applicable securities laws.

Funds raised from the issue of New Options under the Loyalty Options Offer and the exercise of the New Options under the Offer are intended to be applied towards working capital. The application of funds will depend, in respect of the exercise of the New Options, on when New Options are exercised and the status of the Company's projects and requirements at the relevant time.

The Shortfall Offer is a separate offer that will be made without disclosure outside of this Prospectus. Accordingly, it which will only be made available to institutional and professional investors invited to participate by the Company.

In exercising their discretion to allocate the New Options under the Shortfall Offer, the Board will take into consideration a number of factors, including:

- » the Company's best interests;
- » the Applicant's existing Securities (if any); and ;
- » the optimal composition of the Company's register following the Shortfall Offer and Loyalty Options Offer.

To the extent commercially practicable the Directors will endeavour to allot the Shortfall Securities to a spread of investors, in order to mitigate any control effects which may arise from the issue and exercise of New Options by a single or small number of investors. However, to the extent permitted by law, the Company expressly disclaims any responsibility for monitoring this or ensuring that individual Shareholders do not breach the Corporations Act or the Listing Rules as a result of participation in the Shortfall Offer.

Directors and other related parties of the Company will not be issued any New Options under the Shortfall Offer.

This Prospectus and any other materials relating to the New Options have not been, and will not be, lodged or registered as a prospectus in Singapore with the Monetary Authority of Singapore. Accordingly, this Prospectus and any other document or materials in connection with the offer or sale, or invitation for subscription or purchase, of Loyalty Options, may not be issued, circulated or distributed, nor may the New Options be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore except pursuant to and in accordance with exemptions in Subdivision (4) Division 1, Part 13 of the Securities and Futures Act 2001 of Singapore (the SFA) or another exemption under the SFA.

2.16 Rights and liability attaching to Shares and New Options

The Shares issued on the exercise of the New Options will be on a fully paid basis and will rank equally in all respects with existing Shares. Full details of the rights and liabilities attaching to Shares are set out in the Company's constitution, a copy of which may be downloaded from the Company's website at <https://www.castleminerals.com/governance> or is available for inspection at the Company's registered office during normal business hours.

You may also contact the Company's Share Registry on 1300 288 664 (within Australia) or +61 2 9698 5414 (outside Australia) to request a copy of the Company's constitution. A summary of the important rights attaching to the Shares is contained in Section 5.1 of this Prospectus. The terms and conditions of the New Options are described in Section 5.2.

2.17 Brokerage and Stamp Duty Costs

No brokerage or stamp duty is payable by Eligible Shareholders on the issue of New Options under this Prospectus.

2.18 Minimum and Maximum Subscription

There is no minimum subscription under the Loyalty Options Offer.

Under the Loyalty Options Offer an Eligible Shareholder may not apply for (and the Company will not issue) New Options in excess of that Eligible Shareholder's entitlement to New Options which is 1 New Option for every 3 Shares held by the Eligible Shareholder as at the Record Date.

3. EFFECT OF THE CAPITAL RAISING

3.1 Purpose of the Offer

The Offer is being made in accordance with the Company's announcement on 3 March 2025 to offer 1 Option for every 3 Shares held by Eligible Shareholders. The purpose of the Loyalty Options Offer is to recognise the support the Company has received from its shareholders to date.

3.2 Effect of the Offer on the capital structure of the Company

The principal effect of the Loyalty Options Offer, assuming all New Options offered under this Prospectus are issued, will be to increase the total number of New Options on issue by a maximum of 38,669,856.

The effect of the Offer on the capital structure is set out below (assuming no other Securities are issued and no other existing Securities are exercised):

Shares

Shares	Number
Existing Shares on issue	116,009,570
Total Shares on issue on completion of the Loyalty Options Offer	116,009,570

Options

Options	Number
Existing options on issue	56,737,801 ^A
New Options to be issued under the Loyalty Options Offer	38,669,856
Total Options on issue on completion of the Loyalty Options Offer	95,407,657 ^B

Note:

(A) This includes 3,481,471 unquoted options expiring on 20 July 2026 with an exercise price of \$0.225, 12,699,985 unquoted options expiring on 22 December 2026 with an exercise price of \$0.15, 1,199,998 unquoted options expiring on 30 June 2025 with an exercise price of \$0.90, 1,299,997 unquoted options expiring on 31 October 2026 with an exercise price of \$0.54, 1,948,033 unquoted options expiring on 20 July 2026 with an exercise price of \$0.225 (that are non-transferable) as well as 36,108,317 unquoted options with an exercise price of \$0.12 and an expiry date of 31 May 2028.

(B) This includes 3,481,471 unquoted options expiring on 20 July 2026 with an exercise price of \$0.225, 12,699,985 unquoted options expiring on 22 December 2026 with an exercise price of \$0.15, 1,199,998 unquoted options expiring on 30 June 2025 with an exercise price of \$0.90, 1,299,997 unquoted options expiring on 31 October 2026 with an exercise price of \$0.54, 1,948,033 unquoted options expiring on 20 July 2026 with an exercise price of \$0.225 (that are non-transferable), 36,108,317 unquoted options with an exercise price of \$0.12 and an expiry date of 31 May 2028 as well as 38,669,856 New Options.

3.3 Potential effect on control of the Company

The Company is of the view that the Loyalty Options Offer will not affect the control (as defined by section 50AA of the Corporations Act) of the Company as only New Options are being offered to Eligible Shareholders. As such, no investor or existing Shareholder will have a voting power greater than 20% as a result of the completion of the Loyalty Options Offer.

Where New Options are exercised into Shares, the voting power of the Shareholders who exercise the New Options will increase. The likelihood of New Options being exercised is dependent on the price of the Shares from time to time until the New Options expire.

3.4 Potential dilution to Shareholders

No immediate dilution will occur as a result of the issue of New Options under this Prospectus.

The maximum number of New Options proposed to be issued under the Loyalty Options Offer is 38,669,856 New Options (subject to rounding). If all the New Options are exercised and issued, the Shares issued on exercise will represent approximately 25% of the Shares on issue following the completion of the Loyalty Options Offer (assuming no Shares are issued or convertible securities exercised or converted to Shares prior to the Record Date).

Shareholders should note that if they do not participate in the Loyalty Options Offer, their holding is likely to be diluted if the New Options are issued and subsequently exercised (as compared to their holdings and numbers of Shares on issue as at the date of the Prospectus). Examples of how the dilution from the Loyalty Options Offer, may impact Shareholders are set out in the table below.

Sample Shareholder	Holding at Record Date (Shares) ¹	Voting Power at Record date (%)	Entitlement	Voting power if Entitlement not taken up (and all other offers are taken up and exercised) ²
Shareholder 1	10,000,000	8.62	3,333,333	6.61
Shareholder 2	5,000,000	4.31	1,666,667	3.27
Shareholder 3	1,000,000	0.86	333,333	0.65
Shareholder 4	500,000	0.43	166,667	0.32
Shareholder 5	100,000	0.09	33,333	0.06

Note

(1) This table assumes that no other Shares are issued, or Options exercised.

(2) The dilutionary effect shown in the table is the maximum percentage of dilution on the assumption that the particular Shareholder's Entitlement is not accepted and lapsed in the event all Entitlements are accepted and the New Options are exercised.

3.5 Financial effect of the Offer

The audited consolidated balance sheet as at 30 June 2024 and the unaudited pro-forma balance sheet as at 31 December 2025 shown below have been prepared on the basis of the accounting policies normally adopted by the Company and reflect the changes to its financial position.

The pro forma statement of financial position has been prepared on the basis and assumption that:

- » there have been no material movements in the assets and liabilities of the Company between 31 December 2025 and completion of the Loyalty Options Offer other than:
 - (A) completion of a placement to raise \$3,105,000 on 16 April 2025 with estimate cash costs of \$235,000 (the costs of options issued have not been included);
 - (B) the issue of approximately 38,669,856 New Options under the Loyalty Options Offer, which will raise approximately \$193,349.28 in cash (before costs); and
 - (C) the estimated aggregate costs of \$46,876 under the Loyalty Options Offer (see section 7.7 for further details), which is shown as a deduction against issued capital.
- » all Entitlements are accepted; and
- » no Options are exercised prior to the Record Date.

The pro-forma balance sheet has been prepared to provide investors with information on the assets and liabilities of the Company and pro-forma assets and liabilities of the Company as noted below. The historical and pro-forma financial information is presented in an abbreviated form, insofar as it does not include all of the disclosures required by Australian Accounting Standards applicable to annual financial statements.

4. APPLICATIONS

4.1 What Eligible Shareholders may do

Participation in the Loyalty Options Offer is voluntary for Eligible Shareholders. The number of New Options to which Eligible Shareholders are entitled is shown on the personalised Entitlement and Acceptance Form which accompanies this Prospectus. Please read the instructions on the Entitlement and Acceptance Form carefully.

Eligible Shareholders may do any of the following:

- (d) take up all of their Entitlement under the Loyalty Options Offer by:
 - (i) complying with the instructions on the accompanying Entitlement and Acceptance Form; and
 - (ii) paying the application monies for the amount indicated on your Entitlement and Acceptance Form (in full) by BPAY® or EFT, so that it is received by no later than 5.00pm WST on the Closing Date;
- (e) take up a portion of their Entitlement, and allow the balance to lapse by:
 - (i) complying with the instructions on the accompanying Entitlement and Acceptance Form;
 - (ii) calculating the payment amount for the portion of your Entitlement that you wish to take up; and
 - (iii) paying for that portion of Entitlement by BPAY® or EFT so that is received no later than 5.00pm WST on the Closing Date; or
- (f) do nothing and allow all of your Entitlement to lapse. If you do not apply and you do not pay the issue price by the Closing Date you will not be issued New Options.

Your acceptance must not exceed your Entitlement as shown on that form. If it does, your acceptance will be deemed to be for the maximum Entitlement.

If you are in doubt as to the course of action, you should consult your professional advisor.

4.2 Payment Options

Set out below are the payment options that will be accepted by the Company. Payment by cheque or cash will not be accepted.

It is your responsibility to ensure that your payment of application monies is received by the share registry by no later than 5:00 pm (WST) on the Closing Date. You should be aware that your financial institution may implement earlier cut-off times with regards to electronic payment and you should therefore take this into consideration when making payment. Any application monies received for more than your Entitlement of New Options will be refunded, subject to the refundable value being more than \$5.00. No interest will be paid on any application monies received or refunded.

(a) BPAY®

For payment by BPAY®, please follow the instructions on the Entitlement and Acceptance Form. You can only make a payment via BPAY® if you are the holder of an account with

an Australian financial institution that supports BPAY[®] transactions. Please note that should you choose to pay by BPAY[®]:

- (i) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form; and
- (ii) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of New Options which is covered in full by your application monies.

If you have more than one shareholding of Shares and consequently receive more than one Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those Shareholdings only use the unique customer reference number (**CRN**) specific to that Shareholding as set out in the applicable Entitlement and Acceptance Form. Do not use the same CRN for more than one of your Shareholdings. This can result in your application monies being applied to your Entitlement in respect of only one of your Shareholdings (with the result that any application in respect of your remaining Shareholdings will not be valid).

(b) **Electronic Funds Transfer**

For payment by Electronic Funds Transfer (**EFT**), please follow the instructions on the Entitlement and Acceptance Form. Multiple acceptances must be paid separately. You should be aware of your financial institution's cut-off time and any associated fees with processing an EFT. It is your responsibility to ensure funds are submitted correctly by the Closing Date and time. Please note that should you choose to pay by EFT:

- (i) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form; and
- (ii) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of New Options which is covered in full by your Application monies.

Please ensure you use your unique entitlement reference number located on the Entitlement and Acceptance Form. This will ensure your payment is processed correctly. Failure to do so may result in your funds not being allocated to your application and your Entitlement subsequently not being issued.

4.3 Holding of Application Monies

Application monies will be held in a trust account on behalf of the Company until the New Options are issued.

Any interest earned on application monies will be for the benefit of, and will remain the sole property of, the Company, and will be retained by the Company whether or not the allotment and issue of New Options takes place.

Applications and Application Monies may not be withdrawn once they have been received by the Company.

4.4 Implications of Acceptance

Once BPAY[®] or EFT payment instructions have been given in relation to any Application monies, the application may not be varied or withdrawn except as required by law.

The Directors' decision as to whether to treat the Application as valid and how to construe, amend or complete the Entitlement and Acceptance Form is final.

4.5 Representations you will be taken to have made by accepting the Offer

6. RISKS

A decision to apply for New Options should be regarded as very speculative. The business activities of the Company are subject to risks and there are many risks which may impact on the Company's future performance. Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, but many are outside of the control of the Company and cannot be mitigated.

This section identifies and summarises some of the major risks associated with an investment in the Company however, it is not exhaustive. There may be other risks which the Directors and/or management of the Company are unaware which may impact upon the Company, its operations and/or the value and performance of the New Options and the Company generally. Prospective investors should carefully consider the following factors in addition to the other information presented in this Prospectus.

6.1 Risks associated with the Company

(a) Nature of the New Options

The Company will not seek quotation for the New Options however, the New Options will be transferrable off-market. There is no certainty that Shares will trade above the exercise price and accordingly there is no certainty that Option holders will realise any value from the New Options. In the event that New Options are exercised, this will dilute the holdings of existing Shareholders.

(b) Exploration and development risk

The Company's projects are at various stages of exploration, and potential investors should understand that mineral exploration and development are high-risk undertakings. The future profitability and performance of the Company and the value of its securities is likely to be directly related to the results of exploration on its current and/or future projects, as well as the subsequent extraction of those resources. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited.

Successful development and production of those exploration resources is dependent on obtaining all necessary consents and approvals as well as the successful design, construction and operation of efficient gathering, processing and transportation facilities. No assurance can be given that the Company will be able to obtain all necessary consents and approvals in a timely manner or at all.

The future exploration and development activities of the Company may be affected by a range of factors, including geological conditions, limitations on activities due to seasonal weather patterns, unanticipated operational and technical difficulties, industrial and environmental accidents, native and local title process, changing government regulations and many other factors beyond the control of the Company.

In addition, the construction of any proposed development may exceed the expected timeframe or cost for a variety of reasons out of the Company's control. Any delays to project development could adversely affect the Company's operations and financial results and may require the Company to raise further funds to complete the project development and commence operations.

(c) **Liquidity and future capital requirements**

The Company has no operating revenue and is unlikely to generate any operating revenue in the foreseeable future. Exploration and evaluation costs will continue to use funds from the Company's current cash reserves.

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has in place a planning and budgeting process to help determine the funds required to meet its operating and growth objectives. The Company prepares cash forecasts and maintains cash balances to meet short and long-term cash requirements. The Company's objective is to raise sufficient funds from equity and/or debt to finance its exploration and evaluation activities until its operations become profitable.

The Company's ability to continue its exploration and evaluation activities over time may depend in part on its ability to raise additional funds.

The future capital requirements of the Company will depend on many factors including its ability to develop its projects. The Company believes its available cash will be adequate to fund its business objectives in the short term, however, the Company may require further funding in the future.

In the event further funding is required to maintain operations, any additional equity financing may be dilutive to Shareholders or may be undertaken at lower prices than the then market price.

Although the Directors believe that additional capital can be obtained, no assurances can be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company or at all. If the Company is unable to obtain additional funding as needed, it may be required to reduce the scope of its activities, the Company may also not be able to take advantage of opportunities or respond to competitive pressures. An inability to obtain additional funding could also result in delays or reductions in further exploration and evaluation activities which could have a material adverse effect on the Company's ability to continue as a going concern.

(d) **Regulatory risk**

The Company's exploration activities are dependent upon the maintenance (including renewal) of the tenements/licences in which the Company has or acquires an interest. Maintenance of the Company's tenements/licences is dependent on, among other things, the Company's ability to meet the licence conditions imposed by relevant authorities. Although the Company has no reason to think that the tenements/licences in which it currently has an interest will not be renewed, there is no assurance that such renewals will be given as a matter of course and there is no assurance that new conditions will not be imposed by the relevant authority or that the Company will be able to meet the conditions of renewal on commercially reasonable terms, if at all.

(e) **Government policy**

The availability and rights to explore and mine, as well as industry profitability generally, can be affected by changes in government policy that are beyond the control of the Company. Changing attitudes to environmental, land care, cultural heritage and indigenous land rights' issues, together with the nature of the political process, provide the possibility for future policy changes. There is a risk that such

changes may affect the Company's exploration plans or, indeed, its rights and/or obligations with respect to the tenements/licences (inclusive of applications).

(f) **Failure to satisfy expenditure commitments and licence conditions**

Each tenements/licence is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. Consequently, Castle could lose title to or its interest in the tenements/licences if conditions are not met or if insufficient funds are available to meet expenditure commitments.

(g) **Estimates of Mineral Resources**

The Company has estimated Inferred and Indicated Mineral Resources across its tenements/licences. The Mineral Resources are estimates only and are based on interpretations, knowledge, experience and industry practice which may change when new techniques or information becomes available. Inclusion of material in a Mineral Resource estimate does not require a conclusion that material may be economically extracted at the tonnages indicated, or at all. Estimates that are valid when made may change significantly when new information becomes available. In addition, commodity price fluctuations, as well as increased production costs or reduced throughput and/or recovery rates, may render reserves and resources uneconomic and so may materially affect the estimates.

(h) **Reliance on personnel and operating costs**

The Company is dependent on the experience of its Directors' and management team. Whilst the Board has sought to, and will continue to ensure that the management team and any key employees are appropriately incentivised, their services cannot be guaranteed. The loss of any of the Directors', senior management or key employees' services to the Company may have an adverse effect on the performance of the Company pending replacements being identified and retained by or appointed to the Board of the Company.

There is a high demand in Western Australia for skilled workers from competing operators. Tightening of the labour market due to a shortage of skilled labour, combined with a high industry turnover rate and growing number of competing employers for skilled labour, may adversely impact the Company's or its contractors' ability to identify, retain and employ the skilled personnel required for the Company's operations. The Company may be exposed to increased labour costs in markets where the demand for labour is strong. A shortage of skilled personnel may limit the Company's activities.

(i) **Contractual risk**

The ability of the Company to achieve its objectives will depend on the performance of other parties to contracts which the Company may enter into in the future. If a party defaults in the performance of its obligations it may be necessary for the Company to approach a court to seek legal remedy. Legal action can be costly and there can be no guarantee that a legal remedy will ultimately be granted on appropriate terms.

Further, the Company is unable to predict the risk of insolvency or managerial failure by any of the third party contractors used by the Company in any of its activities or the insolvency or other managerial failure by any of the other service providers used by the Company for any activity. The effects of such failures may have an adverse effect on the Company's activities.

(j) **Title and grant**

Interests in all tenements in Western Australia are governed by state legislation and are evidenced by the granting of licenses or leases. Interests in tenements in Ghana are governed by the mining acts and regulations that are current in Ghana and are evidenced by the granting of licences or leases. Each license or lease is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. Consequently, the Company could be exposed to additional costs, have its ability to explore or mine any tenements reduced or lose title to or its interest in any tenements if license conditions are not met or if insufficient funds are available to meet expenditure commitments.

If in the future, the term of any tenements are not renewed or extended, the Company may suffer damage through loss of the opportunity to discover and/or develop any mineral resources on these tenements.

(k) **Sovereign risk**

Some of the Company's exploration and development activities are to be carried out in Ghana. As a result, the Company will be subject to political, social, economic and other uncertainties including, but not limited to, changes in policies or the personnel administering them, foreign exchange restrictions, changes of law affecting foreign ownership, currency fluctuations, royalties and tax increases in that country.

6.2 Risks relating to the mining industry generally

(a) **Operating risk**

The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration and mining, operational and technical difficulties encountered in mining; difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs; adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

No assurances can be given that the Company will achieve commercial viability through the successful exploration and/or mining of its tenement interests. Unless and until the Company is able to realise value from its projects, it is likely to incur ongoing operating losses.

(b) **Environmental risks**

The operations and proposed activities of the Company are subject to Australian laws and regulations in respect to the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. The Company is committed to complying with all environmental laws.

Mining operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production. The occurrence of any such safety or environmental incident could delay the Company's business activities and increase

costs. Events, such as unpredictable rainfall or bushfires may impact on the Company's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Company for damages, clean up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or noncompliance with environmental laws or regulations.

The disposal of mining and process waste and mine water discharge are under constant legislative scrutiny and regulation. There is a risk that environmental laws and regulations become more onerous making the Company's operations more expensive. Approvals are required for land clearing and for ground disturbing activities. Delays in obtaining such approvals can result in the delay to anticipated exploration programmes or mining activities.

(c) **Landowners and access risk**

Land access is critical for exploration and evaluation to succeed. In all cases the acquisition of prospective tenements/licences is a competitive business, in which propriety knowledge or information is critical and the ability to negotiate satisfactory commercial arrangements with other parties is often essential.

Access to land for mining and exploration purposes can be affected by land ownership including private (freehold) land, native and local title obligations, heritage obligations, pastoral lease and regulatory requirements within the jurisdictions where the Company operates.

The Company will be required to negotiate access arrangements and pay compensation to landowners, local authorities, traditional land users and others who may have an interest in the area covered by a mining tenement. The Company's ability to resolve access and compensation issues will have an impact on the future success and financial performance of the Company's operations. If the Company is unable to resolve such compensation claims on economic terms, this could have a material adverse effect on the business, results or operations and financial condition of the Company and any delays or costs in respect of conflicting third-party rights, obtaining necessary consents, or compensation obligations, may adversely impact the Company's ability to carry out exploration or mining activities within the affected areas. Access to land for exploration purposes can be affected by land ownership, nature reserves and national parks, government regulation and environmental restrictions.

Access is critical for exploration and development to succeed and the ability to be able to negotiate satisfactory commercial arrangements with landowners, farmers and occupiers is often essential. Any delays or costs in respect of conflicting third-party rights (for example, in relation to the assignment of any access agreements or the relocation of existing infrastructure on any existing miscellaneous licences that overlap with a tenement), obtaining necessary consents, or compensation obligations, may adversely impact the Company's ability to carry out exploration or mining activities within the affected areas.

Rights to mineral tenements/licences carry with them various obligations in regard to minimum expenditure levels and responsibilities in respect of third party interests, the environment and safety. Failure to observe these requirements could prejudice the right to maintain the access rights to a given area.

(d) **Native title claims and Aboriginal heritage**

In the future if the existence of native title claims occur over the area covered by any tenements in Western Australia, or a subsequent determination of native title over the area occurs, this will not impact the rights or interests of the holder provided any tenement has been or will be validly granted in accordance with the Native Title Act 1993 (Cth) (**NT Act**).

If any tenements were not validly granted in compliance with the NT Act, this may have an adverse impact on the Company's activities. The Company is not aware of any circumstances to indicate that any of its tenements in Western Australia were not or will not be validly granted in accordance with the NT Act.

The grant of any future tenure to the Company over areas that are covered by registered claims or determinations will likely require engagement with the relevant claimants or native title holders (as relevant) in accordance with the NT Act. The Directors will closely monitor the potential effect of native title claims involving any tenements in which the Company has or may have an interest.

There remains a risk that additional Aboriginal sites may exist on the land the subject of a tenement. The existence of such sites may preclude or limit mining activities in certain areas of the Company's tenements.

(e) **Competition risk**

The industry in which the Company is involved is subject to domestic and global competition, including major mineral exploration and production companies. Although the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operating and financial performance of the Company's projects and business.

The Company's current and future potential competitors may include entities with greater financial and other resources than the Company which, as a result, may be in a better position to compete for future business opportunities. Many of the Company's competitors not only explore for and produce minerals, but also carry out refining operations and other products on a worldwide basis. There can be no assurance that the Company can compete effectively with these entities.

(f) **Climate change**

There are a number of climate-related factors that may affect the Company's business. Climate change or prolonged periods of adverse weather and climatic conditions (including floods, hail, drought, water, scarcity, temperature extremes, frosts, earthquakes and pestilences) may have an adverse effect on the Company's ability to access its projects and therefore the Company's ability to carry out exploration activities.

Changes in policy, technological innovation and consumer or investor preferences could adversely impact the Company's business strategy, particularly in the event of a transition (which may occur in unpredictable ways) to a lower-carbon economy.

(g) **Occupational health and safety**

Site safety and occupational health and safety outcomes are a critical element in the reputation of the Company. While the Company has a strong commitment to

achieving a safe performance on site a serious site safety incident could impact upon the reputation and financial outcomes for the Company.

Failure to comply with applicable regulations or requirements may result in significant liabilities, to suspended operations and increased costs.

Industrial accidents may occur in relation to the performance of the Company's services. Such accidents, particularly where a fatality or serious injury occurs, or a series of such accidents occurs, may have operational and financial implications for the Company which may negatively impact on the financial performance and growth prospects for the Company.

(h) **Insurance**

The Company intends to continue to insure its operations in accordance with industry practice. In certain circumstances, the Company's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company. Insurance against all risks associated with mining exploration and production is not always available and where available the costs can be prohibitive.

(i) **Unforeseen expenses**

The Company's cost estimates and financial forecasts include appropriate provisions for material risks and uncertainties and are considered to be fit for purpose for the proposed activities of the Company. If risks and uncertainties prove to be greater than expected, or if new currently unforeseen material risks and uncertainties arise, the expenditure proposals of the Company are likely to be adversely affected.

6.3 General risks

(a) **General economic climate**

Factors such as inflation, currency fluctuations, interest rates, legislative changes, political decisions, events affecting global financial liquidity, employment rates and industrial disruption have an impact on operating costs. The Company's future income, asset values and share price can be affected by these factors.

General economic conditions may also affect the value of the Company and its market valuation regardless of its actual performance.

Specifically, the conflict between Ukraine and Russia and the Middle East has and continues to impact global macroeconomics and markets generally. The nature and extent of the effect of this conflict on the performance of the Company and the value of its Shares remains unknown. The Share price may be adversely affected in the short to medium term by the economic uncertainty caused by the conflict between Ukraine and Russia and the Middle East, tariffs imposed by the Government of the United States of America, as well as overall impacts on global macroeconomics. Given the situation is continually evolving, the outcomes and consequences are inevitably uncertain.

(b) **Commodity prices**

Commodity prices fluctuate and are affected by numerous factors beyond the control of the Company. These factors include worldwide and regional supply and

demand for the specific commodity, prevailing commodity trading terms, general world economic conditions and the outlook for interest rates, inflation, and other economic factors on both a regional and global basis. These factors may have a positive or negative effect on the Company's exploration, project development and production plans and activities, together with the ability to fund those plans and activities. The Company has tried to mitigate the effect of fluctuating commodity prices by establishing a portfolio of projects across a number of commodities.

However, some products are not traded upon terminal, liquid, commodity exchanges. There is a risk therefore that the Company may not be able to secure an attractive price in the future for commodity products.

(c) **Exchange rate risk**

The Company funds its exploration activities in Ghana using foreign currency. Accordingly, the revenues, earnings, costs, expenses, assets and liabilities of the Company may be exposed adversely to exchange rate fluctuation, which may also be impacted by tariffs imposed by the Government of the United States of America. Further, the future value of the Company's shares may fluctuate in accordance with movements in the exchange rates and interest rates.

(d) **Government and legal risk**

Changes in government, monetary policies, taxation and other laws can have a significant impact on the Company's assets, operations and ultimately the financial performance of the Company and its Shares. Such changes are likely to be beyond the control of the Company and may affect industry profitability as well as the Company's capacity to explore and mine.

The Company is not aware of any reviews or changes that would affect its permits. However, changes in community attitudes on matters such as taxation, competition policy and environmental issues may bring about reviews and possibly changes in government policies. There is a risk that such changes may affect the Company's development plans or its rights and obligations in respect of its permits. Any such government action may also require increased capital or operating expenditures and could prevent or delay certain operations by the Company the future performance of the Company or any return on an investment in the Company.

(e) **Litigation risks**

The Company is exposed to possible litigation risks including native title claims, tenure disputes, environmental claims, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position. As at the date of this Prospectus, there are no material legal proceedings affecting the Company.

(f) **Force majeure**

Force majeure is a term used to refer to an event beyond the control of a party claiming that the event has occurred. Significant catastrophic events – such as war, acts of terrorism, pandemics, loss of power, cyber security breaches or global threats or natural disasters – such as earthquakes, fire or floods could disrupt the Company's operations and interrupt critical functions, or otherwise harm the business. To the extent that such disruptions or uncertainties result in delays or

cancellations of the Company's activities, its business, results of operations and financial condition could be harmed.

(g) **Taxes and royalties**

There is a risk that the Commonwealth, Western Australian or Ghanaian Governments may seek to introduce further, or increase existing, taxes and royalties.

(h) **Unforeseen risk**

There may be other risks which the Directors are unaware of at the time of issuing this Prospectus which may impact on the Company, its operations and/or the valuation and performance of its Shares.

6.4 Concluding Comment

The above list of risk factors ought not to be taken as an exhaustive list of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the New Options or the Shares issued on the exercise of the New Options.

Investment in the Company must be regarded as highly speculative and neither the Company nor any of its Directors or any other party associated with the preparation of this Prospectus guarantee that any specific objectives of the Company will be achieved or that any particular performance of the Company or of the New Options, including those offered by this Prospectus, will be achieved.

If you have received this Prospectus as an Electronic Prospectus, please ensure that you have received the entire Prospectus accompanied by the Entitlement and Acceptance Form. If you have not, please contact the Company's Share Registry on 1300 288 664 (within Australia) or +61 2 9698 5414 (outside Australia) who can send to you, for free, either a hard copy or a further electronic copy of this Prospectus or both.

7.10 Financial Forecasts

The Directors have considered the applicable laws and do not believe that they have a reasonable basis to include forecast future earnings in this Prospectus, on the basis that the operations of the Company are inherently uncertain. The Directors do not consider it appropriate to give Eligible Shareholders advice regarding the taxation consequences of subscribing for New Options.

The Company, its advisers and its officers do not accept any responsibility or liability for any such taxation consequences to Eligible Shareholders . As a result, Eligible Shareholders should consult their professional tax adviser in connection with subscribing for New Options.
