

Quarterly Activities Report – March 2025

Battery, base and precious metals exploration company Lykos Metals Limited (**ASX: LYK**) (**Lykos** or the **Company**) is pleased to provide its activities report for the quarter ended 31 March 2025.

Highlights:

- **Extension of the Jezero project exploration permit until 4 March 2028**
- **Successful Placement completed to use towards exploration and development of the Company's existing projects and evaluation of new opportunities**

Sockovac (Petrovo) Project

As per the Company's ASX announcement on 29 January 2025, the legal deadlines for the Government of Bosnia and Herzegovina (the "Government") to respond to our application concerning the Sockovac (Petrovo) project have now passed. During the period, following consultations between the Company and the Government, the Company agreed to the Government's proposal to reduce the tenement application size from 44km² to 10km². This revised application area covers the Company's primary drill targets and will still allow the Company to focus its activities on the most prospective areas of the ground moving forward. The Company is optimistic about a favourable outcome and are in ongoing discussions with our advisors at the Ministry of Energy and Mining.

Jezero Licence

The Ministry of Energy and Mining has extended the exploration permit for the Jezero project until 4 March 2028. Jezero is prospective for epithermal gold and polymetallic mineralisation, with trenching revealing surface mineralisation, including an interval of 61 meters at 1.5 g/t gold (refer Figure 1). The Company is currently considering its future activities in respect of the Jezero project.

Due to the winter weather conditions during the reporting period, activities were limited to field visits, community relations and cabinet work.
