Mineral Resource & Ore Reserve Notes

As at 31 December 2024

Mineral Resource Notes:

- OP = Open Pit and UG = Underground
- All Mineral Resources are completed in accordance with the JORC Code 2012 Edition. All figures are rounded to reflect appropriate levels of confidence. Apparent differences may occur due to rounding. Mineral Resources are inclusive of Ore Reserves and depleted for mining. Gruyere Measured category includes Surface Stockpiles (2.91 Mt at 0.87 g/t Au for 0.08 Moz)
- All Mineral Resources are constrained by optimised shapes to determine the portion of the total mineralised inventory within the resource model that has a reasonable prospect of eventual economic extraction. Open pits have no allowance for ramps, dilution or mining recovery. Undergrounds include a minimum mining width and are reported as diluted tonnage and grade with no allowance for pillars or mining recovery. Cut-off grades allow for mining, haulage and processing costs and metallurgical recovery based on operational, FS, PFS and/or benchmark study data
- Underground Mineral Resources are reported with diluted tonnages and grades based on minimum stope widths.
