GREENWING RESOURCES LTD

Investor Presentation APRIL 2025

DISCLAIMER

DISCLAIMER

This document has been prepared by Greenwing Resources Ltd ABN 31109933995 (the "Company"). It should not be considered as an invitation or offer to subscribe for or purchase any securities in the Company or as an inducement to make an invitation or offer with respect to those securities. No agreement to subscribe for securities in the Company will be entered into on the basis of this document. This document is provided on the basis that neither the Company nor its officers, shareholders, related bodies corporate, partners, affiliates, employees, representatives and advisers make any representation or warranty (express or implied) as to the accuracy, reliability, relevance or completeness of the material contained in the document and nothing contained in the document is, or may be relied upon as a promise, representation or warranty, whether as to the past or the future. The Company hereby excludes all warranties that can be excluded by law.

The document may contain forward-looking information and prospective financial material, which is predictive in nature and may be affected by inaccurate assumptions or by known or unknown risks and uncertainties and may differ materially from results ultimately achieved. All references to future production, production targets and resource targets and infrastructure access are subject to the completion of all necessary feasibility studies, permitting, construction, financing arrangements and infrastructure-related agreements. Where such a reference is made, it should be read subject to this paragraph and in conjunction with further information about the Mineral Resources and Exploration Results, as well as the Competent Persons' statements. All persons should consider seeking appropriate professional advice in reviewing the document and all other information with respect to the Company and evaluating the business, financial performance and operations of the Company. Neither the provision of the document nor any information contained in the document or subsequently communicated to any person in connection with the document is, or should be taken as, constituting the giving of investment advice to any person.

FORWARD LOOKING STATEMENTS

This document may contain certain forward-looking statements. Such statements are only predictions, based on certain assumptions and involve known and unknown risks, uncertainties and other factors, many of which are beyond the Company's control. Actual events or results may differ materially from the events or results expected or implied in any forward-looking statement. The inclusion of such statements should not be regarded as a representation, warranty or prediction with respect to the accuracy of the underlying assumptions or that any forward-looking statements will be or are likely to be fulfilled. The Company undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date of this document (subject to securities exchange disclosure requirements). The information in this document does not take into account the objectives, financial situation or particular needs of any person. Nothing contained in this document constitutes investment, legal, tax or other advice.

COMPETENT PERSON STATEMENT

The information in this document that relates to Exploration Results, Exploration Targets and Mineral Resources in relation to the Madagascan Projects is based on information previously released to ASX, particularly noting the information relating to the Graphite Mineral Resources which is extracted from the ASX Announcement dated 12 July 2022 '212% Increase in Graphite Resource at Graphmada Mining Complex'. This information was compiled by Tim McManus, a Competent Person who is a member of the Australasian Institute of Mining and Metallurgy, who was a consultant to the Company. Tim McManus has sufficient experience that is relevant to the style of mineralization and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources or Ore Reserves that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement

The information in this document that relates to Exploration Results at the San Jorge Lithium Project has been prepared by Mr Murray Brooker. Murray Brooker is a geologist and hydrogeologist and is a Member of the Australian Institute of Geoscientists. Mr Brooker is an employee of Hydrominex Geoscience Pty Ltd and is independent of Greenwing. Mr Brooker has sufficient relevant experience to as a competent person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Brooker consents to the inclusion in this presentation of this information in the form and context in which it appears.

The information in this report that relates to Mineral Resources and Exploration Results at the Que River Project is based on information compiled by Mr John Horton who is a Chartered Fellow of the Australian Institute of Mining and Metallurgy and a Member of the Australian Institute of Geoscientists. Mr Horton is a full-time employee of ResEval Pty Ltd and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves.' Mr Horton consents to the inclusion in the presentation of the matters based on his information in the form and context in which it appears.

The information in this report that relates to site conditions and Exploration Results at the Que River Project is based on information compiled by Mr Scott Hall who is a member of the Australian Institute of Mining and Metallurgy. Mr Hall is an independent consultant to the Company and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves.' Mr Hall consents to the inclusion in the presentation of the matters based on his information in the form and context in which it appears.

The Chairman of the Company has authorised the release of this presentation.

GREENWING RESOURCES SUMMARY

Greenwing Resources has a well developed asset portfolio including three separate and distinct Mineral Resources.

Greenwing is currently valued at circa A\$10m offering compelling long term value.

San Jorge Lithium Brine Project (Argentina) - An initial Mineral Resource⁽¹⁾ in excess of 1mt of Lithium Carbonate Equivalent (LCE) along with a consolidated tenure position of over 38,000 Hectares.

Graphmada Graphite Mine (Madagascar) - A 62mt Graphite Mineral Resource⁽²⁾ with all mine infrastructure under mining lease. Graphmada produced and sold all graphite concentrate specifications into key markets USA,EU and Asia.

Que River Project (Tasmania) – A 2.4mt Polymetallic Mineral Resource⁽³⁾, under mining lease and offering considerable resource upside.

Growth projects – Andapa Graphite Project and Millie's Reward Lithium Project.

GREENWING RESOURCES OVERVIEW

- A company deliberately aligned to what it sees as compelling **long term fundamentals in both lithium and graphite markets.**
- A company with a **highly credentialed and experienced management team** with extensive Lithium and Graphite experience.
- A **well developed portfolio of assets** with a considerable endowment of established resources.
- Considerable upside potential to **add value to established projects.**
- **Additional upside** presented across broader asset portfolio with Millie's Reward, Andapa Graphite and the Que River asset.

GREENWING RESOURCES BOARD & MANAGEMENT

HIGHLY CREDENTIALLED TEAM THAT HAS BROUGHT PROJECTS FROM EXPLORATION TO PRODUCTION

RICK ANTHON

Non-Executive Chairman

35 years' experience in commercial law and corporate leadership including +15 years direct lithium experience as Director of Corporate Development and Strategy at lithium producer Alkem (ASX: LTM).

PETER WRIGHT

Executive Director / CEO

25 years' experience in Resource Financial Markets with a focus on lithium and graphite.

JAMES BROWN

Non-Executive Director

35 years of global mining experience and leadership, specialising in exploration, development, and operations. Proven track record of sourcing, developing, and operating major projects, focusing on lithium and battery minerals. Director and former MD/CEO at Sayona Mining (ASX:SYA).

JEFF MARVIN

Non-Executive Director

20 years' experience in project financing and development and an active entrepreneur in energy technology.

ALAN ZENG

Non-Executive Director

More than 20 years' experience in supply chain area of automotive and tech. Senior VP of NIO Inc, EV manufacturer and GW1's strategic partner and shareholder.

ANGUS CRAIG

**Company Secretary/
Chief Financial Officer**

25 years in acquisitions, mergers, equity funding, corporate governance and financial management.

CHRIS GODFREY

Chief Operating Officer

Over 30 years of practical mining experience having held senior operational roles in ASX listed companies, large multinational and small capital ventures including metalliferous, coal open pit and underground operations and processing facilities.

use only

SAN JORGE LITHIUM PROJECT

ARGENTINA

SAN JORGE LITHIUM PROJECT ARGENTINA

- 100% ownership of 15 granted exploration licences covering entire salar and additional 36,000 hectares surrounding delivering significant strategic value in worlds premier lithium jurisdiction⁽⁴⁾
- Comprehensive surface exploration work and maiden drilling program undertaken
- Initial Resource established⁽¹⁾ – refer next slide
- Compelling initial direct lithium extraction (DLE) results⁽⁹⁾
- Recent corporate activity focused on Lithium Triangle (RIO / GLN / Rincon)

SAN JORGE LITHIUM PROJECT MAIDEN MINERAL RESOURCE

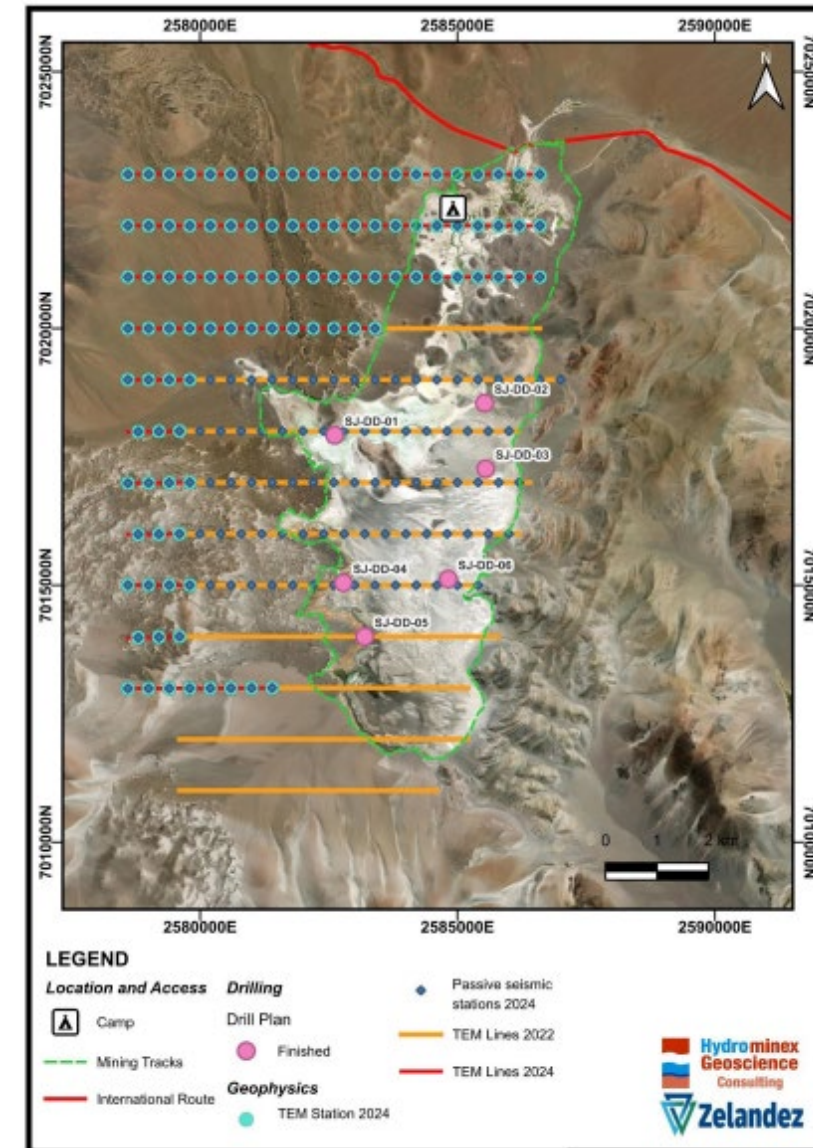

- Maiden Mineral Resource Estimate⁽¹⁾ 1.07Mt of Lithium Carbonate Equivalent (LCE) - 670,000t Indicated (62.7% of resource) 400,000t inferred
- Material discovery from initial 6-hole program - most prospective areas of salar are yet to be drilled, leaving considerable scope to add to both size and grade of resource.
- Resource open to west, north and at depth with SJDD04 and SJDD05 ending in mineralisation at depths of 351m and 402m respectively⁽¹⁾⁽⁷⁾⁽⁸⁾
- Geophysics suggest basin depth up to 600m(+/-200m)⁽⁵⁾

MINERAL RESOURCE ESTIMATE

Area	Sediment Volume m ³	Porosity	Brine volume m ³	Li mg/l	Li Tonnes	Tonnes LCE
Indicated	8,872,840,000	0.074	653,084,441	192	125,700	670,000
Inferred (NW and > 400 m)	5,147,950,000	0.073	377,952,442	200	75,400	400,000
Total	14,020,790,000	0.074	1,031,036,883	195	201,100	1,070,000

Notes:

- Mineral Resource Estimate in the Safra 1 Lik, Safra Lik, San Jorge Oeste 2, 3 and 4 properties.
- Lithium is converted to lithium carbonate (Li₂CO₃) equivalent (LCE) using a conversion factor of 5.323.
- The Competent Person for this MRE is Murray Brooker (MAIG, MIAH).
- Totals may differ due to rounding.
- The resources is reported at a zero Lithium mg/l cut-off grade, on the basis that by its nature as a body of brine it is homogenised and is unlikely to contain areas of internal significantly lower grade material.
- Reported in accordance with the 2012 Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves ('the JORC Code 2012') released to the ASX 27 May 2024 "San Jorge Lithium Brine Project – Maiden Mineral Resource Estimate". The Company confirms that it is not aware of any new information or data that materially affects the information in the relevant ASX releases, and the form and context of the announcement has not materially changed. The Company confirms that the form and context in which the Competent Persons findings are presented have not been materially modified from the original market announcements.

ersonal use only

GRAPHMADA GRAPHITE PROJECT MADAGASCAR

GRAPHMADA GRAPHITE MINING COMPLEX

Graphite Resource with successful production history and expansion potential

- 20 + year mining permits along with current landholder agreements
- Currently on care and maintenance pending expansion
- Processing plant in place with 20 months of premium concentrate production achieved
- Previously established diversified sales channels with concentrates qualified and sold into international markets: EU, USA, India, Japan and China
- Established infrastructure and proximity to deep-water Toamasina Port
- Further augur drilling program planned
- Growing strategic value of ex China production assets

See: <https://source.benchmarkminerals.com/article/china-tightens-graphite-export-controls-to-the-us>

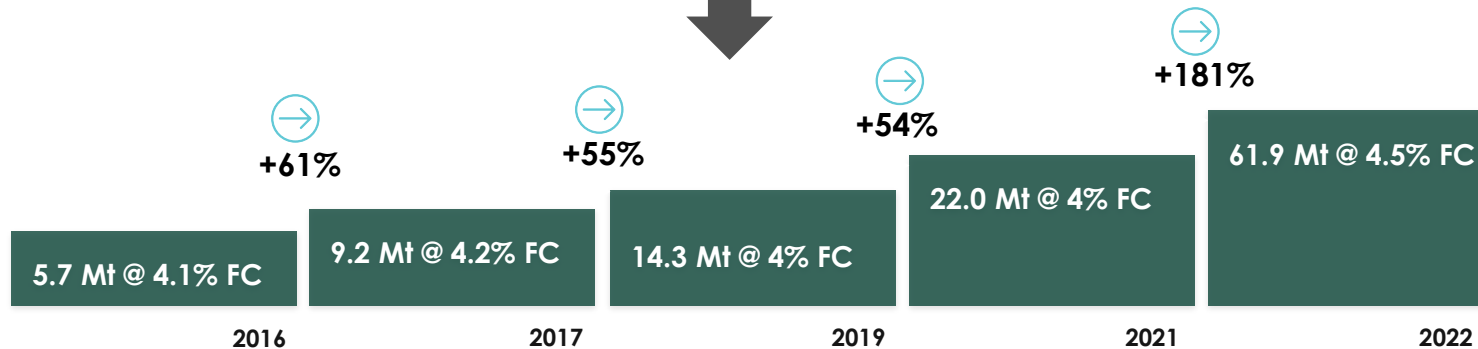

GRAPHMADA GRAPHITE MINING COMPLEX: ESTABLISHED & GROWING RESOURCE

Extensive mineralisation from Lohorano in the north to Ambatofafana in the south, with Mineral Resource of **61.9Mt at 4.5% FC**, total contained graphite of over 2.7 Mt⁽²⁾

	TONNES (MT)	FC%	CONTAINED GRAPHITE (KT)
Measured	18.7	4.9	911
Indicated	12.3	4.7	582
Inferred	30.9	4.2	1,288
Total	61.9	4.5	2,780

Each drill campaign has resulted in a significant resource upgrade.

Reported in accordance with the 2012 Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves ('the JORC Code 2012') released to the ASX 12 July 2022 "Mineral Resource Update 212% increase in Graphite Resource at Graphmada Mining Complex. The Company confirms that it is not aware of any new information or data that materially affects the information in the relevant ASX releases, and the form and context of the announcement has not materially changed. The Company confirms that the form and context in which the Competent Persons findings are presented have not been materially modified from the original market announcements.

QUE RIVER PROJECT

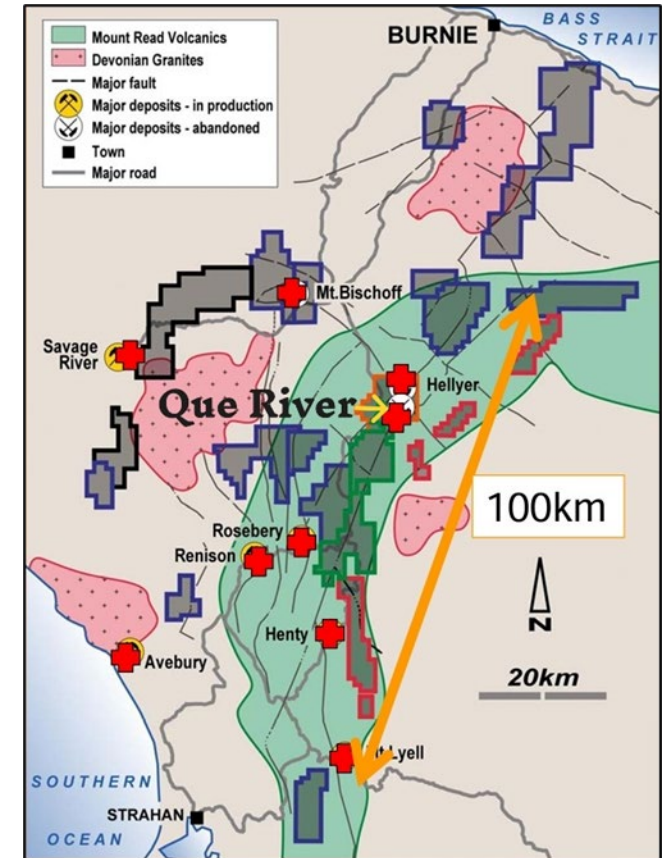

TASMANIA, AUSTRALIA

QUE RIVER PROJECT, TASMANIA

- The Que River deposit is a high grade polymetallic, volcanic hosted massive sulphide (VMS) deposit, located within the middle Cambrian Mount Read Volcanics; host to other western Tasmanian VMS deposits such as Hellyer, Rosebery, Hercules, Henty and Mt Lyell.
- Located immediately adjacent to the operating Hellyer Mine with a private connecting access/haul road. Additionally, it is within 14 km of currently operating processing mills at Roseberry and Renison Bell.
- Previously mined between 1980 and 2010 via underground and open pits
- Updated Mineral Resource (JORC 2012) tabled⁽³⁾– see next slide. The Mineral Resources remaining comprise material remaining in-situ from the previous mining operations that are potentially viable due to the significantly higher current metals prices.
- Exploration upside potential with significant open cut targets and underground potential high grade exploration targets identified.
- Currently assessing several development options.

Chris Godfrey COO:

With high grade ore close to surface, open pitable in the existing PQ Lens south, open along strike and down dip, also from the existing QR32 open pit there remains high grade ore continuing down dip and open at depth. There are numerous underground resources of high grade that have not been recovered and extend down dip and are open at depth. As a result of the recent work conducted by our resource geologist and the JORC Resource there are several new viable Lens identified with high grade intercepts with opportunities to be mined through the existing underground workings.

QUE RIVER PROJECT, TASMANIA MINERAL RESOURCE

SUMMARY MINERAL RESOURCE ESTIMATE⁽³⁾

Resource Location	Classification	kt	Zn %	Pb %	Cu %	Au g/t	Ag g/t	Density t/m ³	ZnEq %
UG underground	Indicated	1,618	2.9	1.4	0.34	0.77	47	3.30	9.0
	Inferred	329	3.6	1.8	0.34	0.69	48	3.33	9.7
	subtotal	1,947	3.0	1.4	0.34	0.76	47	3.31	9.1
Surface Open Pit	Indicated	411	3.7	1.8	0.70	0.79	56	3.37	11.2
	Inferred	35	4.3	2.5	0.16	1.15	60	3.30	12.7
	subtotal	445	3.7	1.8	0.66	0.82	56	3.37	11.3
Total	Indicated	2,028	3.1	1.5	0.42	0.78	49	3.32	9.5
	Inferred	364	3.7	1.8	0.32	0.73	49	3.33	10.0
	Total	2,392	3.1	1.5	0.40	0.77	49	3.32	9.5

The Mineral Resource in above table is reported at a 5% ZnEq cut-off where: $ZnEq = Zn + 0.7 Pb + 2.1 Cu + 0.04 Ag + 3.3 Au$. For more information refer to Appendix 1.

Reported in accordance with the 2012 Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves ('the JORC Code 2012') released to the ASX 25 March 2025. The Company confirms that it is not aware of any new information or data that materially affects the information in the relevant ASX releases, and the form and context of the announcement has not materially changed. The Company confirms that the form and context in which the Competent Persons findings are presented have not been materially modified from the original market announcements.

For complete JORC disclosures please refer to ASX Announcement dated 25 March 2025 'Greenwing tables updated Polymetallic Mineral Resource at Que River'

QUE RIVER, TASMANIA EXPLORATION POTENTIAL

- Greenwing currently working through a comprehensive data set for the Que River Project inclusive of circa 1300 drill holes from within the 1984/68L Mining Lease. Greenwing in addition has historic production figures, metallurgical recoveries and processing data.
- Greenwing has identified two potential resource extensions as announced to the market on 2 April⁽¹⁰⁾ and 8 April⁽¹¹⁾ 2025.

This high-grade intercept on the southernmost margin of the PQ lens is also unmined & undeveloped and never followed up with further drilling⁽¹¹⁾:

- **QR1130** → 8.3m @ 27.8% ZnEq** – 7.0% Zn; 3.06% Pb; 0.06% Cu; 179 g/t Ag & 3.46g/t Au, including 1.8m @ 74.1% ZnEq – 18.3% Zn; 3.7% Pb; 0.12% Cu; 560 g/t Ag & 10.8 g/t Au.

Between this southern most zone and the PQ Pit are also the following (unmined) drill intercepts⁽¹¹⁾:

- **QR0939** → 7.7m @ 28.6% ZnEq** – 7.65% Zn; 3.87% Pb; 0.16% Cu; 172 g/t Ag & 3.35g/t Au, including 5.1m @ 38.1% ZnEq – 10.15% Zn; 4.99% Pb; 0.23% Cu; 242 g/t Ag & 14.32 g/t Au.
- **QR0936** → 7.5m @ 20.3% ZnEq** – 4.28% Zn; 1.79% Pb; 0.19% Cu; 100 g/t Ag & 3.15g/t Au, including 2.0m @ 41.6% ZnEq – 13.66% Zn; 3.14% Pb; 0.26% Cu; 262 g/t Ag & 4.47 g/t Au.
- **QR00928** → 8.1m @ 22.4% ZnEq** – 7.5% Zn; 4.06% Pb; 0.08% Cu; 141 g/t Ag & 1.88g/t Au, including 0.9m @ 75% ZnEq – 22.3 % Zn; 10.6% Pb; 0.22% Cu; 600 g/t Ag & 7.52 g/t Au.

** Refer to Appendix 1 for ZnEq calculation basis.

Personal use only

EQUITY RAISING

GREENWING RESOURCES EQUITY RAISING

Offer structure and size	<p>An equity raising of up to \$3.5m comprising:</p> <ul style="list-style-type: none"> - A placement of up to \$1.1m (tranche 1) - A conditional placement of up to \$1.4m (tranche 2) - A share purchase plan (SPP) to raise up to \$1.0m
Issue price	\$0.03
Discounts	<p>The issue price of \$0.03 per share represents a discount of:</p> <ul style="list-style-type: none"> ▪ 14.3% to the last traded price of \$0.035 on 22 April 2025 ▪ 21.6% to the 15 day volume weighted average price to 22 April 2025
Uses of funds	<p>The proceeds of the equity raising will be used for:</p> <ul style="list-style-type: none"> ▪ San Jorge Project (Lithium Brine) – drilling planning, data analysis and asset maintenance - \$0.4m ▪ Que River Project (Polymetallic) – data analysis/exploration planning, security bonds and asset maintenance - \$1.0m ▪ Graphmada Mining Complex (Graphite) – drilling program and asset maintenance – \$0.5m ▪ Director loan repayments - \$0.4m ▪ General working capital including the payment of creditors & the costs of the offer – up to \$1.2m
Director participation	Directors have committed to subscribe \$0.3m in the tranche 2 placement, subject to shareholder approval
Lead Managers	Prenzler Group and Bizzell Capital Partners

GREENWING RESOURCES EQUITY RAISING

Offer timetable

Trading halt	23 April 2025
Announcement of Equity Raising and lifting of trading halt	28 April 2025
Issue of placement shares – tranche 1	6 May 2025
SPP offer opens	12 May 2025
Close of SPP offer	10 June 2025
Shareholder meeting	12 June 2025
Issue of SPP shares	13 June 2025
Issue of placement shares	18 June 2025

This timetable is indicative and may be subject to change.

Capital Structure

Shares on issue	240.7m
Placement – tranche 1	36.0m
Conditional Placement –tranche 2	47.3m
SPP (up to)	33.3m
Shares on issue post offer (up to)	357.3m

The Company also has on issue a total of 15m options with expiries of June 2025 and December 2025 and exercise prices of \$0.60 and \$0.725.

GREENWING RESOURCES CATALYSTS

Over the coming 6 -12 months the Company is planning to:

Corporate – assessing development, funding and investment options for its three projects with JORC Mineral Resources - San Jorge, Graphmada and Que River - with a view to crystallising value for shareholders.

San Jorge Lithium Brine Project - comprehensive review of all exploration data compiled to date to optimise the planned second drilling program targeting the more prospective mineralisation of the salar.

Graphmada Graphite Mine - further drilling program at Ambatofafana located at the southern part of the project.

Que River Project - further assessment of comprehensive exploration data set, metallurgical data and production data to determine potential further extension updates and potential revised open pit designs at QR32 and PQ South.

Millie's Reward Hard Rock Lithium Project - targeting completion of discussions with the vendors of the Millie's Reward Project regarding updated transaction terms.

GREENWING RESOURCES LOOKING FORWARD

Greenwing holds three declared mineral resources over three different projects in different commodities.

Fundamentals of both lithium and graphite remain strong

Greenwing is well positioned to inevitable recovery in concentrate prices of lithium and graphite

San Francisco Salar (San Jorge Project) is one of just 23 salars in the entire Lithium Triangle, and Greenwing is one of five companies to control an entire salar

Graphite assets and supply ex China of critical importance and high strategic value with developing trade tension and China export controls

Graphmada produced graphite has qualified and sold into all major graphite end markets

Que River presents an additional opportunity with an established resource adjacent to an existing operating mine

APPENDIX 1 QUE RIVER ZINC EQUIVALENT CALCUATIONS

The Mineral Resource outlined on slide 15 is reported at a 5% ZnEq cut-off where: **ZnEq = Zn + 0.7 Pb +2.1 Cu +0.04 Ag + 3.3 Au**

Que River is predominantly considered a zinc-lead mine, however considerable value is associated with gold and silver grades as well as some copper which can combine to be as valuable or more valuable than zinc-lead. Hence a zinc equivalent cut-off is required to ensure value of copper, gold and silver areas are not overlooked.

Rosebery ore processing performs similar to Que River. The published Rosebery combined recovery and payability values (source HKEX:MMG 23 January 2025) provide factors consistent with that expected for a standalone processing Que River operation. High factors of around 6 for Cu and Au grades reflect the relatively high current metal prices for Cu, Au and Ag and generally higher smelter payability. These factors include the data in Table 1 below.

However, toll treatment may not provide the same opportunities as an owner operated processing plant. The combined recovery, concentrate payability and milling cost used by the Company in 2009 for toll treatment at the Rosebery mill were lower as they included processing costs but also flatter payability across the commodities. It is these less optimistic equivalence assumptions and factors that are applied at this stage of the project review are outlined in Table 2 below.

Element	Metal price		Price per ore tonne		Metallurgical and Payability Factors			
	USD	Unit	USD	Unit	Recovery	Payability	Combined	Zn Factor
Zn	2800	t	28.0	10kg	86%	46%	40%	1.0
Pb	2000	t	20.0	10kg	76%	63%	48%	0.9
Cu	9300	t	93.0	10kg	66%	97%	65%	5.4
Au	2800	oz	90.0	g	84%	88%	74%	6.0
Ag	31	oz	1.0	g	81%	90%	73%	0.07

Table 1: published Rosebery combined recovery and payability values

Element	Metal price		Price per ore tonne		Bass Metals Contract	
	USD	Unit	USD	Unit	Payability	Zn Factor
Zn	2800	t	28	10kg	39.5%	1.0
Pb	2000	t	20	10kg	38.5%	0.7
Cu	9300	t	93	10kg	25%	2.1
Au	2800	oz	90	g	40%	3.3
Ag	31	oz	1.0	g	40%	0.04

Table 2: Assumptions applied

The total payability adopted at this stage is based on the most conservative option using combined mill cost, smelter returns & charges and mill recovery factors achieved by the Company under toll treatment contract in 2009 during the last phase of mining at Que River with toll treatment at the Rosebery concentrator.

Metal prices assumed this review include the 3 month LME contract price for base metals or last three month Kitco average price for precious metals.

Based on this information it is the Company's opinion that the elements included in the metal equivalents calculation have a reasonable potential to be recovered and sold.

For complete JORC disclosures please refer to ASX Announcement dated 25 March 2025 'Greenwing tables updated Polymetallic Mineral Resource at Que River'
