## March 2025 QUARTERLY ACTIVITIES REPORT

### HIGHLIGHTS

#### MT ISA EAST CU-AU & OORINDI PROJECT, QLD

- Exploration activities during the quarter focused on a technical review with newly appointed geological consultants to assess drill targets at Mt Isa East and Oorindi Projects
- The Company continues to advance plans for a 2025 field program to further assess and advance the key target areas

#### GOOROO GOLD PROJECT WA

- The Gooroo Project continues to show significant promise
- The Company remains committed to advancing this project in 2025 and is working with the department and stakeholders to obtain the necessary regulatory approvals

#### CORPORATE

- Post quarter end, Cooper Metals engaged Maverick Geo Pty Ltd to assist the Company with reviewing project datasets, advance drill targets and to assess new project opportunities
- The Board has assessed many exploration and development opportunities both locally and abroad and remains committed to securing strong project(s) to augment the current portfolio
- Administration and operational overheads continue to remain light. At Quarter end, the Company had \$2 million in cash reserves

#### Cooper Metals Non Exec Director Tim Armstrong, commented:

“The market continues to be challenging for junior explorers, both here and abroad. The silver lining of this environment is that we are seeing more and more projects become available and the calibre of these projects appear to be lifting. Cooper Metals is in an enviable position with a reasonably strong cash balance and a supportive shareholder base. We continue to thank our shareholders for their patience as we navigate this period.”

## PROJECT PORTFOLIO

Cooper Metals Limited (**ASX: CPM**) (“Cooper” or the “Company”), is a junior explorer focusing on copper and gold in proven mineralised provinces, which are underexplored and close to infrastructure, thereby presenting significant value opportunities for the Company and its shareholders.

### Mt Isa East Cu-Au Project

Cooper Metals’ Mt Isa East Cu-Au Project covers around 1,637 sq.km of tenure with numerous Cu-Au targets generated by a significant exploration effort over the last three years.

Cooper has delivered numerous ore grade intersections over the various drill campaigns, confirming the prospective nature of the exploration ground, however, to date the project has not been able to deliver meaningful scale.

There are 4 priority areas (Figure 2) which the company has flagged for follow up. These targets are based on the large database of geochemical, geophysical, and geological data that indicate targets with potential to host significant Cu-Au mineralisation, including iron sulphide copper gold (ISCG), iron oxide copper gold (IOCG) and shear hosted Cu-Au mineralisation.

With the assistance of our consulting geologists, the Company has taken the opportunity to review the data sets to prioritise targets for drill testing.

### Oorindi Cu-Au Project

The Oorindi Cu-Au Project is located in the Eastern Province of the prospective Mt Isa Inlier, which hosts several copper-gold deposits including the Eloise mine (ASX: A1M), located just 13km to the southeast and has produced over 13.5Mt of ore grading 2.8% Cu and 0.8g/t Au<sub>1</sub> since the mid 1990's (Figure 3).

The primary style of mineralisation to be targeted in the area is iron oxide copper gold (IOCG), iron sulphide copper gold (ISCG) and shear-hosted and fracture-controlled Cu (+/- Au) systems within the Proterozoic rocks of the Eastern Province.

No exploration activities were conducted during the reporting period.

However, the Company is working on defining drill targets at Oorindi with the view of potentially launching a maiden drilling program. We will look to secure some co-funding for a program once field work and targeting is complete.

### Gooroo Copper-Gold Project WA

The Gooroo Cu-Au Project is located approximately 413km northeast of Perth, WA. Nearby projects include Red 5 Limited (ASX: RED) Deflector mine. Cooper is targeting Orogenic gold and Cu-Au mineralisation (Deflector style) in the highly prospective Gullewa Greenstone Belt in the Murchison Province of the Yilgarn Craton.

No field work was completed during the period. The Company was notified that part of Cooper's tenure is within proposed nature reserves, which requires an extended approval process with the Department of Biodiversity, Conservation and Attractions. Given the pending change of status of this area, the approval process timeframes are uncertain, and drilling will commence after the necessary regulatory approvals are received. There are several highly prospective targets at Gooroo, which are completely untested given the 26km of Greenstone lithology within the tenure was only identified in 2020, well after the Conservation Park was proposed. Drill targets include the Foxglove prospect, which earlier fieldwork by the Company, identified a strong geochemistry anomaly and rock chip results of up to 48.3g/t.

## Corporate

- At the end of the Quarter the Company had **\$2 million cash reserves**.

## Appendix 5B disclosures

CPM's accompanying Appendix 5B (quarterly Cashflow Report) includes an amount in items 6.1 & 6.2 which constitutes directors' fees and statutory superannuation paid for the quarter.

During the period, the Company spent approx. \$4,000 on exploration activities, including direct costs associated with tenement costs for the Mt Isa East Cu-Au Project.

The Board of Cooper Metals Limited has approved this announcement and authorised its release on the ASX.

***While the Company is confident of the quality of its existing project portfolio, it continues to review third party opportunities that will further strengthen its portfolio. We're working hard on this and look forward to updating the market on progress.***

## COMPETENT PERSON'S STATEMENT:

*The information in this report that relates to Geological Interpretation and Exploration Results is based on information compiled by Dr Christopher Reed, a Competent Person who is a Member of The Australasian Institute of Geoscientists (AIG). Dr Reed provides services to Cooper Metals Limited through Maverick Geo Pty Ltd. Dr Reed has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr Reed consents to the inclusion in the report of the matters based on his information and the form and context in which it appears.*

### About Cooper Metals Limited

Cooper Metals Ltd (ASX: CPM) is an ASX-listed explorer with a focus on copper and gold exploration. CPM aims to build shareholder wealth through discovery of mineral deposits. The Company has two current projects all in proven mineralised terrains with access to infrastructure. The Projects are detailed briefly below:

#### Mt Isa East and Oorindi Project (Qld)

Cooper Metal's Mt Isa East Cu-Au and Oorindi Projects cover ~1300 sq.km of tenure with numerous historical Cu-Au workings and prospects already identified for immediate follow up exploration. The Mt Isa Inlier is highly prospective for iron oxide copper gold (IOCG), iron sulphide copper gold (ISCG) and shear hosted Cu +/- Au deposits.

#### Gooroo Project (WA)

The Gooroo Cu and or Au Project covers newly identified greenstone belt ~20 km from Silver Lakes (ASX: SLR) Deflector mine. The 26 km expanse of covered greenstone belt has had almost no exploration and was only added to government geology maps in 2020 after reinterpretation of geophysical data.
