POTENTIAL RISKS

The Company's risk profile remains substantially unchanged from the previous quarter, with Global Brent Oil prices experienced volatility but strengthened towards the end of the Quarter and post Quarter-end. Natural gas prices strengthening as compared to the previous Quarter and further strengthened post Quarter-end. The escalation of instability in the middle east, coupled with the ongoing Ukraine conflict continues to create instability in global oil and gas prices and has the potential to impact the Company's future royalty receipts.

In addition, royalty receipts may be impacted by:

- any interruption to or suspension of production from ExxonMobil & Woodside in the Gippsland Basin with an impact to the Weeks Royalty; and
- changes to the value of royalty receipts as a result of US\$ and A\$ FX movements, oil and gas prices and the proportion of commodity sales that are hedged, unhedged and/or contracted.

CORPORATE

- Fitzroy to seek shareholder approval for a return of capital of 2 cents per share at a general meeting of shareholders to be held on 29 April 2025⁶.

2. Gippsland Basin – Weeks Royalty

During the Quarter, Fitzroy received a royalty payment through its wholly owned subsidiary, Royalco Resources Pty Ltd with respect to the 31 December 2024 Quarter of \$141,370. The royalty with respect to the March 2025 Quarter is expected to be received during June 2025. Total royalty revenue received from the Weeks royalty for the 12 months to 31 March 2025 is \$611,878 (PCP: \$716,906).

Fitzroy holds 1% of a 2.5% royalty (the 2.5% Royalty is known as the Weeks Royalty).

3. Canning Basin & Lennard Shelf Royalties

3.1 Buru Energy Limited (Buru)

Fitzroy did not receive any royalty receipts during the Quarter due to operations remaining suspended during the Quarter, nor did it receive any royalty revenue from the L20 Royalty for the 12 months to 31 March 2025. (PCP: \$93,266).

In its Quarterly Report released on 15 April 2025¹, Buru outlined the following:

- Buru is focused on generating an increase in shareholder value through the establishment of a Kimberley based gas and liquids business to deliver long term annual cashflow from late 2027 that is in excess of Buru's current market capitalisation.
- Execution of a Strategic Development Agreement (**SDA**) with Clean Energy Fuels Australia (**CEFA**) for the Rafael Gas Project - materially derisking project development and a pathway to a Final Investment Decision in late 2025, and cashflow in 2H 2027.
- Under the SDA, CEFA to finance, build, own and operate Rafael LNG and condensate infrastructure, limiting Buru's financial exposure to upstream gas production.
- The agreement with CEFA provides a pathway for Buru to co-develop the Rafael Gas Project with the objective to generate material cashflow from the second half of 2027.
- Next steps - retest the Rafael 1 well to support independent reserves certification and recomplete the well as a long-term producing well. Field work planned for 3Q 2025.

In the Quarterly Report¹, Buru also outlined that it is working with third parties to explore opportunities which would allow for production operations to recommence from the Ungani Oilfield. The restart of Ungani production requires the renegotiation of certain commercial terms pursuant to the existing Ungani Native Title agreements and requisite field management regulatory approvals.

Full details of Buru's activities and announcements during the Quarter can be found at: www.buruenergy.com.

Fitzroy holds a 2% net well head royalty over the tenements in the Canning Basin Royalty Deed, and a 3% net well head royalty over the tenements in the Lennard Shelf Royalty Deed. (See items 9.2 and 9.3 below).

4. Bowden's Silver Project

The Bowdens Silver Project (**Bowdens**) is located in New South Wales, approximately 26kms east of Mudgee. Bowdens is the largest undeveloped silver deposit in Australia, with substantial resources and a considerable body of high-quality technical work already completed. Bowden's Silver is owned and is being developed by Silver Mines Limited (ASX: SVL). Bowdens hosts a JORC 2012 Mineral Reserve of 32.8Mt at 68.0g/t silver, 0.38% zinc and 0.29% lead for 71.7 million ounces of silver, 123 kilo-tonnes of zinc and 96 kilo-tonnes of lead in contained metal⁷.

On 16 April 2025⁸, subsequent to the end of the Quarter, SVL announced the following:

- pursuant to the amended EPA Act, it has submitted an application for determination with the New South Wales Department of Planning, Housing and Infrastructure (**DPHI**). Pursuant to this application, and pursuant to the EPA Act, Silver Mines has requested that the Planning Secretary determine whether or not the transmission line to power the Bowdens Project will form part of a single proposed development.
- The outcome of this determination by the Planning Secretary will then allow Silver Mines to progress its application for re-determination of the Development Application (**DA**) for the Bowdens Project. This is a critical step to having the development consent for the Bowdens Silver Project reinstated by the New South Wales Independent Planning Commission (**IPC**), and as previously reported to the market, Silver Mines has obtained advice that the Bowdens DA remains on foot and has not been finally determined by the IPC.

Fitzroy has a 2% Net Smelter Return reducing to 1% after the receipt of US\$5m, generated from the sale of any silver or other ores, concentrates or other primary, intermediate product or any other mineral substances (**product**) produced from within EL5920.

5. Snowy River Gold Project - Snowy River Mine

The Snowy River Gold Project (formerly the Blackwater Gold Project) (**Project**) is located near Reefton, on the West Coast of the South Island of New Zealand and is being developed by Federation Mining Pty Ltd (**Federation**), who holds 100% of the Project. The Project hosts a Mineral Resource of 785koz of gold grading 24g/t Au⁹.

In its various announcements released during the Quarter, Federation confirmed the following:

- Progressed preparation and administrative aspects for a planned IPO later in 2025³;
- AUD\$3 million equity investment by Development West Coast (DWC) to support ongoing development of the Project¹⁰;
- AUD\$20 million equity placement transacted with Australian Super, with Australian Super becoming the majority shareholder of Federation^{Error! Bookmark not defined.}
- Project Feasibility Study is planned to be finalised during April 2025³.

Full details of Federation's activities and announcements can be found at www.federationmining.com.au

Fitzroy has a variable 1-3% Over Riding Return royalty over the Project. Federation (via its wholly owned subsidiary Tasman Mining Limited (**Tasman**)) holds an option to buy-out the Fitzroy royalty. The option to buy-out the royalty is exercisable at any time until a decision to mine for the sum of A\$11.6 million indexed from 31 March 2024¹¹ (**Buyout Price**). The current value of the Buyout Price (based on published CPI data¹²) is approximately A\$11.8 million.

A decision to mine the Snowy River Project is defined as being a date which is 20 business days after the date on which Federation:

1. has access to sufficient funds to complete the development of the Snowy River Project (including construction of the Plant) and to proceed to commercial production; and
