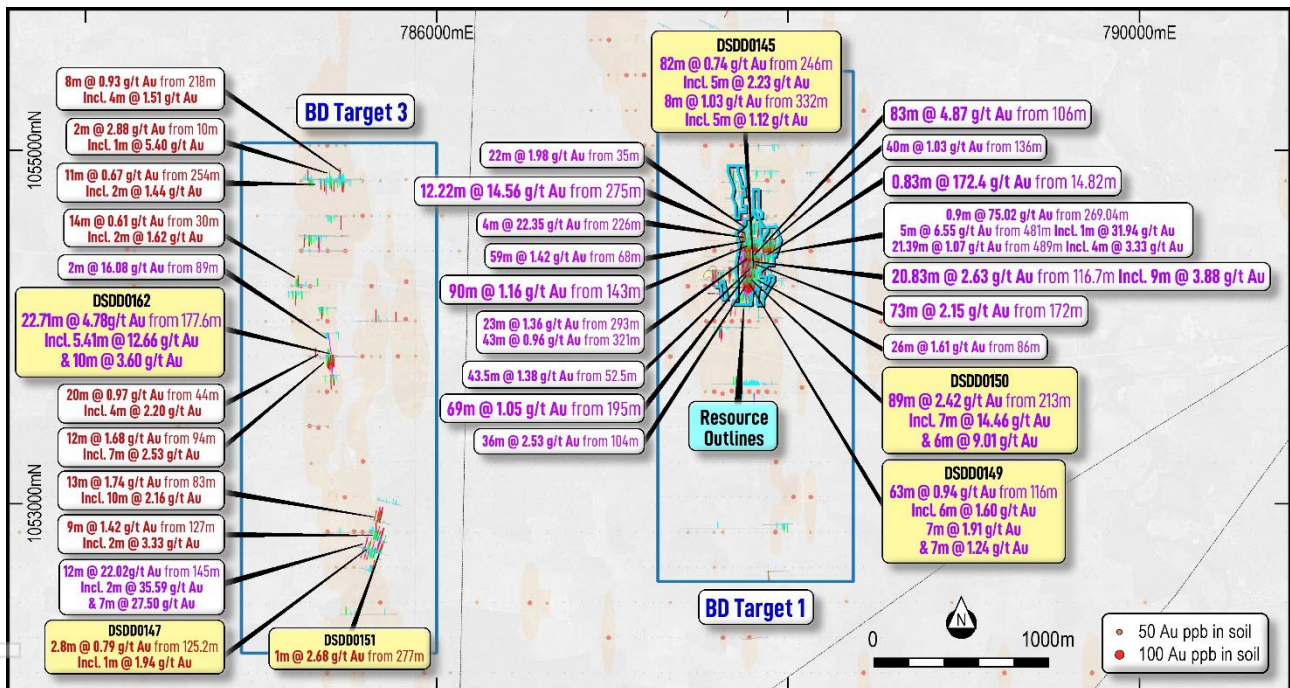

Figure 3: BD tenement plan view showing new significant drilling results at BD Target 1 and 3

DSDD0148 (drilled at BDT1) represents a **tenement and project best** to date, as measured on a gold gram x metres basis (eg: 83m x 4.87g/t Au = 404 gold gram metres).

BDT1 gold deposit and **BDT3** gold prospect are located within a 13km by 3km gold mineralised corridor which remains underexplored, and more drilling (and planned) to systematically test this prospective corridor. Drilling is ongoing at both **BDT1** and **BDT3** with more assays pending. True widths for these shallow wide and high-grade gold intercepts are estimated at about 70% - 80% of reported downhole lengths.

Aurum's extensive 100,000m diamond drilling program aims to:

- Increase the size and confidence of current resources at BST, BD, and BM (40,000m),
- Advance known prospects (30,000m) for incorporation into two planned MRE updates in 2025.

- Target new prospects identified through soil anomalies and geological mapping to drive resource growth into 2026 (30,000m).

Subsequent to quarter end, Aurum reported gold mineralisation intercepts on 16 April which included:

- o DSDD0150 (BDT1)
 - **89m @ 2.42 g/t Au** from 213 m inc. **7m @ 14.46 g/t Au** & **6m @ 9.01 g/t Au**

Acquisition of Boundiali South tenement completed, and drilling commenced

Post quarter end, on 8 April, Aurum announced it had completed 100% acquisition of the Boundiali South Tenement (BST) from Turaco Gold Limited (“Turaco”) after a protocol agreement for operating in classified forest was approved by Côte d’Ivoire’s Ministry of Forest and Water, and Ministry of Mines, Petroleum and Energy.

This followed a term sheet Aurum signed with Turaco Gold, CDI Holdings (Guernsey) Ltd (a wholly-owned subsidiary of Many Peaks Minerals Limited (ASX: MPK)), Predictive Discovery Côte d’Ivoire SARL (a wholly-owned subsidiary of CDI Holding (Guernsey) Ltd) in March 2024.

Aurum has worked closely with the Côte d’Ivoire Government to enable the resumption of exploration activities on this prospective gold asset. Following the execution of a protocol agreement and the submission of the mining exploitation licence, Aurum confirmed the absence of any impediments to exploration or future mining rights. Consequently, in late March 2025, Aurum formally notified Turaco that all Conditions Precedent for the acquisition of 100% of the tenement (or its replacement) had been met or waived.

Accordingly, it issued 3,492,535 Aurum shares valued at A\$1.2 million (\$0.343/share) using a 20-day VWAP prior to 1 April 2025 to Turaco (3,108,356 shares) and Predictive Discovery (384,179) to complete the 100% sale of BST to Aurum, at Turaco’s election.

BST hosts a maiden JORC (2012) resource of 360koz @ 1.0g/t Au, which was included in Aurum’s maiden Boundiali MRE announced in December 2024.

Aurum has recently restarted diamond drilling at BST, initially targeting the well-defined northern extension of the Nyangboue gold deposit using two of its own diamond drill rigs as part of a planned 100,000m CY2025 program, which aims to grow resources across the 1.59Moz Boundiali Project.

BST Background

Previous exploration drilling at BST has returned impressive results⁵:

- **20m @ 10.45g/t gold** from 38m (BRC0004S BIS)
- **30m @ 8.30g/t gold** from 39m (NDC007)
- **28m @ 4.04g/t gold** from 3m and **6m @ 3.29g/t gold** from 47m (BRC003)
- **9m @ 7.90g/t gold** from 99m (BRC006)
- **27m @ 2.42g/t gold** from 27m (BRC175)
- **20m @ 1.29g/t gold** from 211m (NDC016)
- **2m @ 13.57g/t gold** from 130m (NDC017).

Boundiali PFS

MoU with SANY Heavy Equipment Co

Aurum announced (24 January 2025) it had signed a non-binding Memorandum of Understanding ("MoU") with Sany Heavy Equipment Co., Ltd ("SANY"), a leading global manufacturer of construction and mining equipment that would:

- Non-binding MoU with SANY to provide framework for potential strategic cooperation
- MoU to focus on mining equipment procurement and financing

Aurum noted that the MoU still allows for all development options remain open for Aurum as it looks to deliver a PFS for its Boundiali Gold Project by end CY2025.

Environmental consultant appointed

On 31 March, Aurum announced it had engaged Côte d'Ivoire-based environmental and social specialist, Envitech CI Sarl (Envitech), to undertake an Environmental and Social Impact Assessment (in Côte d'Ivoire referred to as an "EIES" - Etude d'impact environmental et social) at its Boundiali Gold Project in north-west Côte d'Ivoire for the purpose of potential open pit gold mining and gold ore processing.

Envitech's EIES will cover six gold deposits/prospects and a central processing facility within three of the four exploration tenements comprising the Boundiali Gold Project:

- BDT1 deposit (on BD tenement)
- BDT2 deposit (on BD tenement)
- BDT3 prospect (on BD tenement)
- BM1 deposit (on BM tenement)
- BM3 deposit (on BM tenement)
- Nyangboue deposit (on BST tenement)
- Central processing facility (location to be selected as part of the ongoing technical feasibility study).

Aurum's management team has a track record of working with Envitech, having delivered a successful EIES for Tietto Minerals Limited's Abujar Gold Project in Côte d'Ivoire in 2020. The environmental permit at the Abujar Gold Project was granted on the basis of that EIES, which in turn provided for the grant of the mining exploitation licence.

Envitech commenced EIES field investigations for Boundiali in April 2025. Utilising Envitech further strengthens Aurum's team of highly regarded specialist consulting firms engaged to deliver Boundiali's Pre-Feasibility Study, due for completion by end of CY2025.

Boundiali Project - Next Steps:

- **Aggressive cost-effective exploration at Boundiali:** Aurum is committed to a large-scale exploration program at Boundiali. This includes:
 - **100,000m diamond drilling:** Up to eight diamond drill rigs will complete 100,000m of drilling at Boundiali in CY2025.
 - **Resource expansion:** Drilling aims to expand the known resources at the BST, BD, and BM deposits.
 - **New discoveries:** Exploration and scout drilling is planned on BD, BM and BST tenements to test new targets and create a pipeline of new discoveries to flow into resource growth.
- **Resource updates:** Aurum plans to deliver two MRE updates for Boundiali in CY2025.
- **Pre-Feasibility Study:** Aurum is working towards completing a PFS for the Boundiali Gold Project by the end of CY2025. This will provide an evaluation of the project's economics and technical feasibility.

Napié Project, Côte d'Ivoire

With the completion of Aurum's takeover of Mako Gold (ASX: MKG) (see Corporate section), Aurum restated relevant information for the purposes of Chapter 5 of the ASX Listing Rules with respect to Exploration Results and MRE, confirming there had been no material change to Mako Exploration Results or the MRE first reported "Mako Delivers 868koz Maiden Resource to Provide Strong Growth Platform at Napié" on 14 June 2022.

Aurum is planning a 30,000m diamond drilling program for the Napié project in CY2025 to expand the existing 0.87Moz resource. An updated MRE for Napié is expected by year-end.

Aurum is currently building a small bridge with four concrete pipes of 1.5m diameter each over the river that separates Napié's two existing gold deposits, Tchaga and Gogbala.
