

29 April 2025

March 2025**Summary****Wiluna Iron ore royalty - \$2.53 Million cash received:**

- To the end of February 2025 GWR has earned a Royalty of \$2.53 million in respect of all iron ore won from the Wiluna Iron Ore Project, with all amounts received.
- GWR and Gold Valley agreed to amend Wiluna Iron Ore Project Royalty rates to reflect market conditions (Refer to ASX announcement 1st April 2025).

Prospect Ridge Magnesium Project:

- Exploration and development of this Project continues following completion of the phase two diamond drilling program at the Arthur River deposit.
- Assay results from the phase two diamond drilling program are pending, once results are available, they will be released to market.
- The approval of the third phase of drilling is dependent on drilling results review from the phase two program.
- Work continued in association with the University of Tasmania and CODES.

ASX listed securities and cash held total \$55.6 Million, including:

- Cash held \$39.6 million.
- Tungsten Mining NL (ASX:TGN) - 177.5 million shares held with a market value of \$15.98 million at \$0.09 per share (31 March 2025).

Chinese export restricted critical mineral investment:

- GWR maintains a strong view on the tungsten price noting the recently announced Chinese export restrictions on this critical mineral.
- Shareholding in tungsten critical mineral focussed Tungsten Mining NL continues.

Due diligence on projects:

- Continuing to appraise and undertake due diligence on potential acquisitions. Committed to executing disciplined transactions.
- Submitted non-binding indicative offers and conducting extensive due diligence on a potential transaction.

About GWR Group

GWR Group Limited ("GWR") is an independent, Australian resource house, focused on creating shareholder wealth through the development of high-quality mineral exploration and development projects.

GWR Group has a portfolio of mineral commodity projects that includes projects held in its own right, in joint ventures and indirectly through investment in other listed entities. We aim to create value through operational excellence and innovation in exploration and project development. We will collaborate with our stakeholders to build a sustainable mining business and the respect of our peers.

GWR Chairman, Mr Gary Lyons commented:

"GWR is focused on strategic growth that delivers long-term shareholder value. We continue to thoroughly investigate opportunities that meet a strict criteria. Our due diligence on a major Western Australian opportunity highlights our proactive approach. With a strong balance sheet, we're well-positioned to secure high-quality assets offering near-term cash flow and exploration upside."

Overview of Assets

GWR has a portfolio of resources projects that includes projects held directly, in its own right, or indirectly through investment in other listed entities. These include:

- **Magnesite** - Prospect Ridge Project with 25 million tonne inferred Mineral Resource Estimate at 42.4% MgO;
- **Tungsten** – Investments in Tungsten Mining NL (ASX:TGN);
- Cornerstone and **Equity Investments** - eMetals Ltd (ASX:EMT); and
- A **Royalty** interest in the Wiluna West Iron Ore assets.
- A **Royalty** interest in the Wiluna West Gold assets.
- Significant **Cash reserves**

Prospect Ridge Magnesite Project

GWR holds a 70% interest in the advanced Prospect Ridge Magnesite project located in northwest Tasmania with Dynamic Metals Limited (ASX: DYM) holding 30%. The Project is an advanced asset where a substantial amount of work has previously been undertaken, including diamond drilling, metallurgical test work, hydrological test work, resource modelling and feasibility studies.

The Prospect Ridge Magnesite project area is located in northwest Tasmania, 40 km southwest of the Port of Burnie. It sits upon a granted Exploration Licence (EL5/2016), it is 11 km long and 51 km² in area and contains two magnesite deposits, the Arthur River and Lyons River deposits containing the third largest Magnesite inventory in Australia.

The Arthur River prospect is a large high grade magnesium deposit where previous exploration has identified an Inferred Mineral Resource estimate of 25.1Mt @ 42.4% MgO (Table 1) (refer to ASX announcement dated 27th January 2022). The Prospect Ridge Magnesite Project with GWR as an industry partner is part of Federal government funded Regional Research Collaboration Grant (RRC), being undertaken at the University of Tasmania ("UTAS") Centre for Ore Deposit and Earth Sciences University of Tasmania ("CODES").

Table 1
Arthur River Inferred Mineral Resource Estimate

Cut-Off (MgO (%))	Tonnes	MgO (%)	SiO ₂ (%)	Fe ₂ O ₃ (%)	CaO (%)
36	36,820,000	41.1	5.9	1.7	2.9
38	32,090,000	41.7	5.4	1.6	2.8
40	25,120,000	42.4	4.8	1.4	2.6
42	15,280,000	43.3	4.2	1.3	2.2
44	3,040,000	44.5	3.0	1.0	1.9

(Refer ASX Announcement 27th January 2022).

GWR completed the second phase of a diamond drilling program at the Arthur River deposit consisting of six HQ diamond drill holes for 741.9 m (refer to ASX announcement dated 21st June 2024).

Assay results from the Phase 2 drilling program are pending and will update the market once results are complete. This will provide additional metallurgical samples, assist with Mineral Resource estimation and domaining of mineralisation types.

GWR is investigating the implementation of a third phase (“Phase 3”) drilling program at Arthur River that may include an additional 21 holes for 3,150m and the possibility of undertaking this by RC drilling. The Phase 3 drilling program will assist in increasing the confidence in the current JORC resource at the Arthur River deposit. The Phase 3 drilling program will assist in increasing the confidence in the current JORC resource at the Arthur River deposit. The approval of the third phase of drilling is pending the drilling results review from the phase two program.

Significant progress has been made in respect to the Metallurgy in respect to the removal of deleterious elements such as silica (SiO₂) in conjunction with the University of Tasmania (UTAS) / CODES and it is intended to update the market once results become available. An assessment of the Lyons River magnesite deposit is also being undertaken, which is located to the south of the Arthur River deposit.

About Magnesium and Its Market

Magnesite is the principal ore for Magnesium which is the lightest structural metal known to man being two thirds lighter than aluminium. The Australian government has classified Magnesium as a critical mineral as are lithium and nickel.

The principal uses for Magnesium are as follows:

- Magnesium metal and its alloys are used extensively in automotive and aerospace industries in light weight bodies, engines, and other parts indispensable in modern vehicles (including EV’s).
- Magnesium oxides are used in production of refractory linings necessary for production of steel, cement, and glass.
- Magnesium-ion batteries have the potential to improve on lithium-ion batteries in every phase of the lifecycle. In addition to increased energy capacities, magnesium-ion batteries have numerous other advantages. Magnesium does not tend to form dendrites, resolving the safety issues associated with lithium-ion batteries. As such, a magnesium-ion battery can last substantially longer than a lithium-ion battery. Additionally, magnesium-ion batteries can be charged faster since lithium-ion batteries charge times are constrained to avoid dendrite formation. Magnesium is also reported to be the eighth most abundant element on earth’s crust alleviating depletion risk and potentially providing a cheaper product.

In September 2021, the Australian Federal Government announced that it will establish a \$2 billion fund to finance critical minerals production in Australia, it was stated that “Critical minerals include resources that are used in technologies such as mobile phones, computer monitors, electric cars and solar panels, such as lithium, **magnesium** and nickel.

Wiluna West Iron Ore Project Royalty

GWR holds a \$2.00 per dry metric tonne royalty (Royalty) in respect of all iron ore won from the Wiluna West Iron Ore Project (excluding M53/1018) and exported or otherwise sold. This royalty was pursuant to binding sale agreement with Gold Valley West Wiluna Pty Ltd (Gold Valley). Refer to ASX announcement 21st December 2023 titled “*Sale of Wiluna West Iron Ore Project*”.

Gold Valley has been selling iron ore from the project since completion of the Sale Agreement. As a result of those activities to the end of February 2025 GWR has earned a Royalty of \$2.53 million, with all amounts received.

Project royalty terms amended

In recognition of the lower prices in the market for iron ore since the Sale Agreement was executed, on 31st March 2025 GWR and Gold Valley agreed to amend the Sales Agreement (Variation). The key terms of the Variation are as follows:

With effect from 1st April 2025 and ending on 31st March 2027 (Revised Royalty Period), a revised royalty will be payable by Gold Valley at a rate of (Revised Royalty):

- if the IODEX (Iron Ore Platts 62%) is at or below USD99.99, no amount is payable;
- if the IODEX (Iron Ore Platts 62%) is between USD100 and USD109.99, A\$1.00 per dry metric tonne;
- if the IODEX (Iron Ore Platts 62%) is between USD110 and USD114.99, A\$1.50 per dry metric tonne; and
- if the IODEX (Iron Ore Platts 62%) is above USD115, A\$2.00 per dry metric tonne,

The Revised Royalty will be payable until the end of the Revised Royalty Period, subject to Gold Valley's continued compliance with certain key terms of the Transaction Agreement, including Gold Valley paying the Revised Royalty in accordance with applicable payment terms. At the end of the Revised Royalty Period the royalty payable will revert back to the original Royalty.

Status of the Project tenements

The registration of the transfer of the Project tenements from GWR to Gold Valley has yet to be processed by the Department of Energy, Mines, Industry Regulation and Safety. Gold Valley has advised GWR that registration has yet to occur due to RevenueWA having requested Gold Valley provide a valuation in relation to the Transaction Agreement to assist RevenueWA making their assessment of the dutiable value of the transaction. Gold Valley has advised GWR that it has taken steps to procure that valuation and GWR has requested (but has yet to receive) evidence that it has done so.

Whilst GWR remains the registered holder of those tenements, as a matter of law GWR is liable to the State of Western Australia for the payment of State royalties. However, under the Sale Agreement, Gold Valley assumed liability and is responsible for payment of these State royalties. Since the Sale Agreement completed in March 2024, Gold Valley has paid all State royalty amounts due and payable.

Refer to ASX announcement 1st April 2025 titled “*Wiluna Royalty Terms Amended*”.

Wiluna West Gold Project Royalty

GWR holds a royalty on gold recovered from M53/1016-1, M 53/1017-1 and M53/1018-1 on the Gold Duke Project owned by Western Gold Resources Ltd (ASX:WGR). The gold royalty held is \$10 per troy ounce of gold until a total of 50,000 troy ounces of gold have been recovered; and thereafter \$5 per troy ounce of gold.

Refer to ASX announcement 7th March 2024 “*GWR Completes Settlement – Sale of Wiluna West to GV*”.

Project Due Diligence

GWR has undertaken a rigorous review of numerous potential transactions. The Board, in collaboration with its corporate advisors, has cast a wide net, assessing projects of significance that could be transformational for the company.

GWR has evaluated opportunities across multiple global jurisdictions, including Australia, North America, Africa, and Europe and the focus remains on advanced-stage projects with existing resources and reserves, strong cash flow potential, and significant exploration upside. Commodities of interest include gold, copper, silver, antimony, rare earth elements (REE), iron ore, bauxite, niobium, coal, lithium, and tantalum.

As part of this strategy, GWR has submitted a non-binding indicative offer for a significant transaction in Western Australia. Due diligence is currently underway.

- The potential acquisition aligns with the company's broader objective of securing projects with strong fundamentals, existing infrastructure, and near-term cash flow potential.
- Western Australia remains a premier mining jurisdiction, with established export markets and robust pricing dynamics.

As GWR continues to progress its Prospect Ridge Magnesite Project, the company remains steadfast in identifying and executing strategic transactions that can deliver transformational value to shareholders.

- The company will keep the market informed on the progress of its due diligence on the Western Australian transaction.
- Ongoing efforts to secure advanced-stage projects across key commodities will remain a core priority.
- Financial strength and capital discipline remain fundamental pillars of GWR's corporate strategy.
- Committed to executing disciplined transactions.

Refer to ASX announcement 17th February 2025 titled "GWR Corporate Update".

ASX Listed Investments – Critical Minerals

ASX Listed Securities Portfolio

At the end of the quarter GWR held the following ASX listed securities:

- Tungsten Mining NL (ASX:TGN) - 177.5 million shares held with a market value of \$15.98 million at \$0.09 per share.
- EMetals Limited (ASX: EMT) – 30.8 million shares at \$0.003 per share, with a market value of \$92,365.

Tungsten Market View and Strategic Holdings in Tungsten Mining (ASX:TGN)

GWR reiterates its strong conviction in the tungsten market. Recent Chinese export restrictions on tungsten have further bolstered the positive outlook for the commodity.

- China accounts for the majority of global tungsten supply, and recent restrictions are expected to tighten the market, leading to potential upward price pressure.
- Tungsten is a critical mineral with strong demand fundamentals, driven by its application in industrial, military, and high-tech industries.
- GWR remains confident in the long-term strategic value of its TGN holding, particularly given the tightening supply-demand balance.

Corporate

Cash Position

At the end of the quarter GWR held cash reserves of \$39.6 million.

Shares issued

On 9 April 2025 the Company issued 2,390,000 new fully paid ordinary shares in the Company (Shares) to holders of unlisted Performance Rights upon the Board determining that the holder had successfully met the applicable Performance Criteria and Vesting Conditions. These Performance Rights were established under the Employee Incentive Plan dated 29 November 2023 that was approved by Shareholders at the 2023 Annual General Meeting.

These shares included those issued to the following related parties:

- Gary Lyons – 600,000 shares
- Teck Wong – 500,000 shares
- Wai Ho Law – 500,000 shares

Under this Employee Incentive Plan 1,150,000 Performance Rights lapsed and a further 550,000 were issued after quarter end.

Listing Rule 5.3 disclosures

In accordance with the reporting requirements of ASX Listing Rule 5.3 the Company advises the following expenditure incurred during the quarter. Expenditure spent on exploration and evaluation activities of \$197k during the quarter predominantly related to:

- Exploration work program and drilling;
- Metallurgical drilling and scoping study; and
- Attributable administration costs associated with the Company's exploration activities.

There were no mining development or production activities conducted during the quarter.

During the quarter GWR made payments to related parties of 78k and this comprised of \$59k Directors Remuneration and \$19k to Tungsten Mining NL for property lease and admin expenses.

Tenement Interests

A schedule of the Company's interest in mining tenements as at 31 March 2025 is appended at Appendix 1.

Previously Reported Results

GWR Group Limited any confirms that it is not aware of any new information or data that materially affects the information included in the ASX announcements and that all material assumptions and technical parameters underpinning the estimates, of Mineral Resources and Ore Reserves, in original ASX announcements continue to apply and have not materially changed. GWR Group Limited confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original ASX announcements.

Cautionary Statement

This announcement and information, opinions or conclusions expressed in the course of this announcement contains forecasts and forward-looking information. Such forecasts, projections and information are not a guarantee of future performance, involve unknown risks and uncertainties. Actual results and developments will almost certainly differ materially from those expressed or implied. There are a number of risks, both specific to GWR Group Limited, and of a general nature which may affect the future operating and financial performance of GWR Group Limited, and the value of an investment in GWR Group Limited including and not limited to title risk, renewal risk, economic conditions, stock market fluctuations, commodity demand and price movements, timing of access to infrastructure, timing of environmental approvals, regulatory risks, operational risks, reliance on key personnel, reserve estimations, native title risks, cultural heritage risks, foreign currency fluctuations, and mining development, construction and commissioning risk.

Appendix 1 - Schedule of interests in mining tenements

(a) Tenements held at 31 March 2025

Location	Tenement	Percentage held	Notes
Western Australia			
Wiluna			
Refer ASX Release dated 21 Dec 2023, 22 Dec 2023, 11 January 2024 and 7 March 2024.			
Tasmania			
Prospect Ridge			
Prospect Ridge	EL5/2016	70%	

* Excludes tenement applications.

(b) Tenements acquired and disposed of during the quarter

The Company did not dispose or acquire any tenements during the quarter.

(c) The beneficial percentage interests held in farm-in or farm-out agreements as the end of the quarter

The Company also holds a 70% interest in the Prospect Ridge project, containing a granted exploration licence (EL5/2016) in Tasmania.

(d) The beneficial percentage interests in farm-in or farm-out agreements acquired or disposed of during the quarter

The Company did not dispose or acquire any tenements during the quarter.

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
