

## Muchea Mining Lease Granted

Carbine Resources Limited (ASX: CRB) (Carbine, or the Company) is pleased to advise, further to its projects update dated 9 May 2025, that it has been granted a mining lease at the Muchea West Silica Sand Project by the Western Australian Department of Energy, Mines, Industry, Regulation and Safety (DEMIRS).

The area of the newly granted mining lease (M70/1433) is shown in Figure 1, which covers a portion of the current Muchea West Silica Sand Project resource of 110Mt at 99.65% SiO<sub>2</sub><sup>1</sup> (refer Figure 2). The balance of the Muchea West Silica Sand Project resources are located on granted exploration licence E70/4905 (refer Figures 1 & 2). M70/1433 has been granted for an initial term of 21 years.

While the grant of the Muchea West Silica Sand Project mining lease is considered a significant milestone for the Company, the mining lease does not allow for commencement of mining activities at the project, which remains subject to statutory approvals and consents, including environmental approvals and consents relating to the Muchea Air Weapons Range.

The Company has been working closely with key project stakeholders, including DEMIRS and the Department of Defence, for a considerable period to progress towards securing a mining lease and will look to build on these relationships through the next approvals phase. Further updates will be provided to shareholders in due course.

In order to allow the grant of M70/1433, the Company withdrew its previous mining lease application M70/1422 and exploration licence application E70/6625 which encroached on M70/1433.
