~1,446

Employees and contractors worldwide

Austin designs and manufactures customised dump truck bodies, buckets, water tanks, tyre handlers, and other ancillary products used in the mining industry.

Austin's products deliver high returns on investment to customers through performance enhancement compared with OEM products.

Austin is the largest global producer of customised truck bodies and is developing strong growth in the mining buckets sector that delivers similar performance improvements.

Revenue up 18% - Growth strategy continues to deliver..

CAGR calculated over 3 years from end FY22 to FY25(F). FY25 data in this chart is based on forecast given on 11 June 2025

EBIT – Bold strategy has delivered significant earnings benefit..

EBIT \$m (continuing, underlying)

FY25 data in this chart is based on forecast given on 11 June 2025

Order book - has been growing at 44% CAGR and continues to support further growth..

CAGR is calculated year end FY21 to year end FY24 as no forecast for end FY25 has been given.

Sector Analysis

David Singleton, Chief Executive Officer
and Managing Director

Sector Analysis Chile

- Production for major new customer underway but volume growth has been challenging and also affected existing customer throughput.
- Operational leadership supporting but will take time to establish facility at higher production tempo.
- Opportunity to utilise capacity in other locations to support during the transition to higher output.
- Steel stocks elevated against lower production output.
- Market conditions in Chile and Peru appear very strong with copper investment elevated.

*FY23 EBITDA numbers are normalised

Sector Analysis Asia Pacific

- Market demand remains moderate with significant opportunities ahead.
- Truck tray builds strong but now with significant reserve capacity for growth as efficiency improves
- Bucket new build and rebuild market remains challenging in Australia.
- AustBuy successful leveraging downward pressure on input costs.
- Steel stocks in Batam will be at target by year end but remain higher in Australia.

*FY23 EBITDA numbers are normalised, FY24 statutory.

Sector Analysis North America

- USA order book goes from strength to strength – strong ‘local’ tailwinds.
- New customers added which gives confidence that installed base increase will continue sales momentum.
- Investing in further market growth – significant opportunities remain.
- New facility commissioned and in production end April and now being optimised. Upgrades to existing plant also operational.
- Increased costs through the expansion phase have affected margins but focus now is to progressively get back to target margin.
- Tariff disruption is not affecting the business and is not expected to given changes to supply chain completed.
- North America has ~1700 truck Austin trays in service hauling ~28 million tonnes per day. High installed base infers a strong replacement market over many years.

*FY23 EBITDA numbers are normalised

North America – insulated against tariff risk, with strong macroeconomic tailwinds for mining growth

- **Tariff insulation provides improved competitiveness¹**
- Austin has made a significant investment to build domestic production capacity in both the USA and Canada.

In the US, Austin has a manufacturing facility in Casper, Wyoming

- All US steel is sourced domestically; no reliance on imported steel
- In late 2024, Austin ceased importation of sub-assembly trays from Mexico to the US, and is now fully vertically integrated in the US
- **Accordingly, Austin is not subject to any tariffs on provision of trays to US customers**

In Canada, Austin has developed a new truck tray sub-assembly supply chain route using Canadian contractors for sub-assembly builds

- These supplier and partnership arrangements are sufficient to **service Austin's customer orders and demand in Canada without any tariff implications**

North America – strong macroeconomic tailwinds for mining growth

Trump Administration policies driving secular growth in mining

FAST-41 Mining Projects

(April 2025)

Multiple major projects have received fast-tracked permitting initiative for mining and associated infrastructure projects.

 = existing Austin client

- **Trump Executive Orders (Jan-Apr 2025)**
 - Expedite domestic mineral production by declaring a national emergency
 - Directs Federal Agencies to prioritise permitting and give financial support
 - Established the National Energy Dominance Council to oversee implementation
- **Revitalising the US Coal Industry (Apr-25)**
 - Designated coal as a 'mineral'
 - Directed Federal Agencies to prioritise Federal coal leasing and permitting
