

MONS PROJECT, WA

Release Date: 20 June 2025

Block 3 Gallium Discovery, WA

Nimy set for maiden Resource, with drilling campaign finished and further assays pending

Nimy Resources (ASX:NIM) is pleased to announce that it has completed the **Phase 2 and Phase 3 RC drilling programs** at its Block 3 Gallium Prospect in WA.

- This drill campaign comprised 25 holes (25NRRC0134 to 25NRRC0158) for 5,944 metres and was designed to infill and extend the **JORC exploration target** defined in January 2025 (Gallium Exploration Target Defined ASX:NIM 28/01/2025).
- Assays have been received and results released for four holes of Phase 2 (**High grade Gallium in first assays** ASX:NIM 16/06/2025) with assays pending from a further 21 holes in Phase 2 and 3.
- The completion of the drilling programs puts **Nimy on track for a maiden resource in the December quarter, 2025.**

Nimy Managing Director Luke Hampson said:

“The successful completion of the Block 3 drilling campaign is another major milestone in our strategy to establish a substantial high-grade gallium deposit and capitalise on global demand for this critical metal.

“We expect a steady stream of assays over coming weeks, ensuring we have strong newsflow in the lead up to the calculation of a maiden resource.

“Given the high grade results from the first 4 holes of Phase 2, we are very optimistic about our ability to unlock the full potential of Block 3”.

Competent Person's Statement

The information contained in this report that pertains to the Block 3 Exploration Target, is based upon information compiled by Mr. Fergus Jockel, a full-time employee of Fergus Jockel Geological Services Pty Ltd. Mr. Jockel is a Member of the Australasian Institute of Mining and Metallurgy (1987) and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the December 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (the JORC Code).

Mr Jockel consents to the inclusion in the report of the matters based upon his information in the form and context in which it appears.

Forward Looking Statement

This report contains forward looking statements concerning the projects owned by Nimy Resources Limited. Statements concerning mining reserves and resources may also be deemed to be forward looking statements in that they involve estimates based on specific assumptions. Forward-looking statements are not statements of historical fact and actual events, and results may differ materially from those described in the forward-looking statements as a result of a variety of risks, uncertainties and other factors. Forward looking statements are based on management's beliefs, opinions and estimates as of the dates the forward-looking statements are made and no obligation is assumed to update forward looking statements if these beliefs, opinions and estimates should change or to reflect other future developments.

About Nimy Resources and the Mons Project

Nimy Resources is a Western Australian exploration company that has prioritised the development of its recently discovered Mons Belt, situated 370km north-east of Perth and 140km north-northwest of Southern Cross a Tier 1 jurisdiction in Western Australia.

The Mons Belt represents a district scale discovery, spanning ~80km x 30km over 17 tenements with a north/south strike of some 80km of mafic and ultramafic sequences covering ~3004km² north of the Forrestania greenstone belt.

The Mons Belt provides a new and exciting frontier in base metal and gold exploration in Western Australia, the company is currently working with the CSIRO to advance the lithology and mineralisation types within one of Australia's newest greenstone belt discoveries in the Yilgarn Craton, a region with significant untapped potential.

Nimy Resources believes the Mons Belt offers multi commodity potential with the initial discovery of Masson (Cu, Ni, Co, Au & PGE's) in addition to Block 3 east prospect with high-grade gallium (Ga) discovered in the northern tenements.

In addition to these discoveries, the southern tenements have significant fertile komatiite sequences like those found in the Kambalda region of WA.

Nimy Resources is always mindful of its shareholders and the need to continue efforts in creating shareholder value through a methodical and science based approach.
