Commentary on results for the period (key performance drivers)

Revenue:

Key volume drivers included:

- Growth in the Middle East markets, supported by new product introductions and effective Ramadan campaign execution;
- Ample rice supply in the Northern Hemisphere, which supported significant growth in United States export volumes relative to FY24;
- International expansion of the customer base for Rice Flour products and enhanced ranging and distribution for Rice Cakes through Australian retail channels;
- Continued strength from the Toscano product range within Australia's bakery sector; and
- Growth in Australia's branded pet food market supported by the SavourLife acquisition completed in August 2024.

Key volume challenges included:

- Increased competition across our key Pacific markets and US distribution channels;
- Cost of living pressures impacting the Food Service sector and consumer spending patterns in Australia, particularly in the Microwave Rice, Premium Biscuit, Pickled Vegetables and Equine categories;
- A contracting dairy feed sector in both Australia and New Zealand; and
- Low wholegrain mill-out rates of the CY24 crop, which impacted our ability to place product in some markets.

Profitability

- Despite some challenges affecting revenue, the Group improved its overall profitability in FY25, primarily through an enhanced product mix, innovation and cost savings across various parts of the supply chain, including procurement, logistics and distribution.
- Profit margin growth was further supported by a range of factors, including manufacturing efficiencies across operations, particularly in Rice Foods and CopRice, raw material usage optimisation in the Rice Foods segment, and the non-repeat of FY24 costs related to increased working capital risks in specific markets; and
- The Group continued to implement appropriate pricing strategies where possible to help absorb inflationary headwinds, including global rice fluctuations resulting from India's export ban on non-Basmati rice varieties during 1H FY25, the ongoing sharp depreciation of the PGK against USD denominated rice imports in PNG, and the depreciation of the AUD against the USD and EUR, which particularly impacted the portfolio of imported products.

About SunRice's structure

The structure of Ricegrowers Limited (SunRice) contains non-standard elements including its dual class share structure comprising A Class Shares and B Class Shares.

A Class Shares confer on their holders the right to vote at general meetings but no right to dividends. A Class Shares are not quoted on the ASX and may only be held by rice growers who meet the production quotas prescribed by the SunRice Constitution. No person may hold more than five A Class Shares. In practical terms the voting rights held by A Class shareholders give those shareholders the right to control the election of directors and any changes to SunRice's Constitution.

B Class Shares are quoted on the ASX and confer on their holders the right to receive dividends, as determined by the directors from time to time. Holders of B Class Shares do not generally have the right to vote at general meetings of SunRice. This means that B Class shareholders have no right to vote on the election of directors of SunRice. No person may hold more than 10% of the total number of B Class Shares on issue.
