Nanosonics launches next generation trophon[®]3 and trophon2 *Plus* software upgrade

- Nanosonics launches **trophon3**, its latest, industry leading innovation in Ultrasound High Level Disinfection (HLD) with a faster cycle, greater digital integration and the broadest traceability capabilities.
- Also launching **trophon2 *Plus*** a new software upgrade opportunity for existing trophon2 customers that brings all the key new trophon3 features to their existing system.
- Initial launch in Europe, United Kingdom, Australia and New Zealand, with the United States Food and Drug Administration (FDA) application submitted and under review.

Nanosonics Limited (ASX: NAN), a leader in infection prevention, launches **trophon3** and **trophon2 *Plus***, a software upgrade package, in Europe, the United Kingdom, Australia and New Zealand. A regulatory application has also been submitted to the US FDA and is currently under review.

trophon3 delivers a range of new customer benefits while maintaining the highest standard in clinical efficacy for patient safety. The new innovation is over 40% faster than previous generations. It has expanded digital integration capabilities and offers the widest traceability capabilities in the ultrasound reprocessing market including new digital traceability through customer's DICOM imaging database systems, the international standard for medical imaging data.

Fully programmable and adaptable, trophon3 can be customised to suit a range of customer workflows enhancing efficiency while delivering consistent, reliable disinfection in a safe, effective, and environmentally friendly way.

trophon3 is expected to further strengthen the Company's leadership position, while supporting continued expansion of the installed base and driving the upgrade of customers from the first generation trophon EPR units to the latest platform.

To extend the value of this innovation to its total customer base, Nanosonics is also launching **trophon2 *Plus***, a new software upgrade package that makes all the key new trophon3 features available to existing trophon2 users for upgrade.

"**trophon3** and **trophon2 *Plus*** set a new benchmark in automated high-level disinfection for ultrasound transducers, upholding the trophon technology's market leadership position. These launches reflect our commitment to innovation, customer support and ongoing expansion in this important area of infection prevention", said Michael Kavanagh, CEO and President.
