

## ASX ANNOUNCEMENT

14 July 2025

### June 2025 Quarterly Activities Report

#### HIGHLIGHTS

- **Secured strategic footing in the highly prospective Pilbara mineral field** – Exploration Licence E45/6863 granted, securing 21 highly prospective blocks in Western Australia’s renowned Pilbara lithium province.
- **Strategic growth initiatives** – The Company is actively assessing additional projects and commodities that will enhance and complement its existing assets.
- **Non-Dilutive Funding Boost** – \$335,000 R&D Tax Incentive rebate received in June 2025.

**Great Dirt Resources Limited (ASX:GR8) ("the Company" or "Great Dirt")** is pleased to present its Quarterly Activities Report and accompanying Appendix 5B for the period ended 30<sup>th</sup> June 2025 ("the Quarter").

#### Exploration Summary

##### **Strategic Pilbara Exploration Licence Grant (15<sup>th</sup> April 2025)<sup>1</sup>**

Great Dirt was officially granted Exploration Licence E45/6863 by the Department of Energy, Mines, Industry Regulation and Safety.

The granted licence spans 21 contiguous blocks (67 km<sup>2</sup>) in the heart of the Pilbara lithium province, just 43 km northeast of Pilbara Minerals’ (ASX: PLS) world-class Pilgangoora Lithium Project. The tenement sits directly alongside key players in the lithium space, including Wildcat Resources (ASX:WC8) and Sayona Mining (ASX:SYA), placing Great Dirt at the centre of one of Australia’s most sought-after exploration corridors.

The licence area completed its native title advertising period, which concluded on February 4, 2025, without objections. In alignment with this progress, Great Dirt has executed an Access Agreement with the pastoralist. With all approvals in place, the Company is fully permitted to commence on ground exploration.

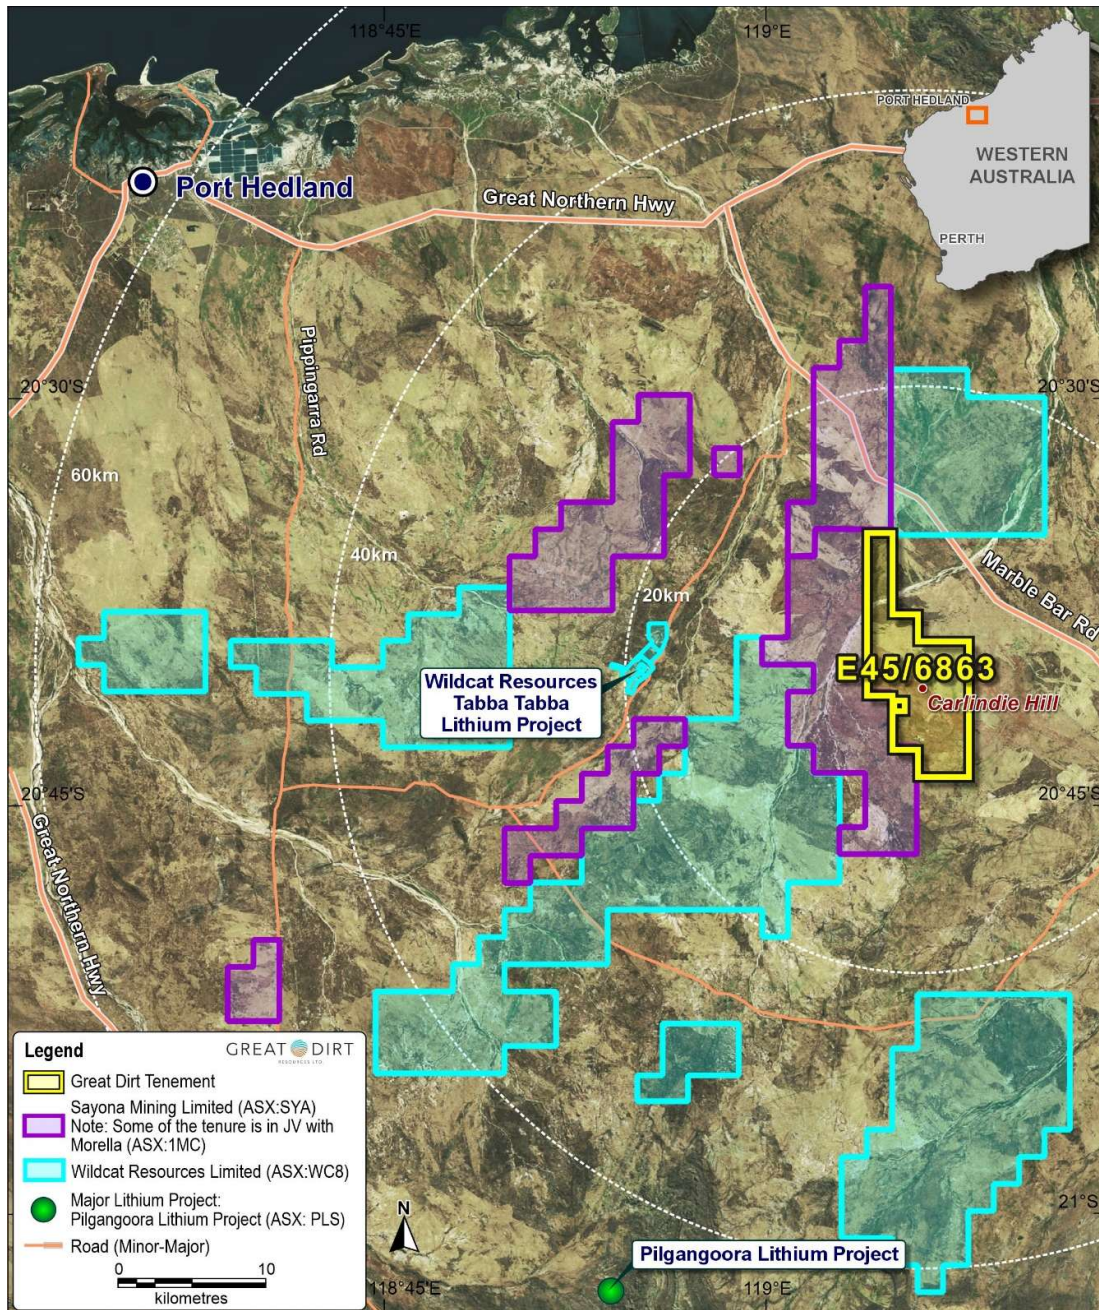

Figure 1: Location of Great Dirt Tenement E45/6863

E45/6863 is situated east of the Tappa Tappa Greenstone Belt and extends over the Carlindie Batholith complex, which consists of granitic formations from the Tambina, Callina, and Split Rock Supersuites—a geological setting consistent with lithium pegmatite potential. There has been no dedicated lithium exploration over the area and it has remained largely untested.

## Pending Exploration Licences

### Nullagine Manganese Project – Access Secured

Objection 706373 relating to EL45/351 has been withdrawn. An access deed has been executed, clearing the way for exploration to proceed.

Aboriginal Heritage Protection Agreement for E45/6950 was signed in Q3 2024.

The tenement lies approximately 50km northeast of Consolidated Mineral's Woodie Woodie mine, a significant manganese producer. Field work is planned for the coming quarter.

## Research and Development

### Research and Development Tax Incentive rebate (5<sup>th</sup> June 2025)<sup>2</sup>

In June 2025, Great Dirt received approximately \$335,000 under the R&D Tax Incentive scheme, relating to eligible R&D activities conducted during FY23–24.

The rebate primarily supports the Company's innovative geological and mineral system modelling programs across the Company's project portfolio.

This non-dilutive funding further strengthens Great Dirt's cash position and supports the Company's commitment in advancing its exploration strategy through technical innovation.

### Other Exploration Activities

In June, the Company completed its initial soil sampling program across Exploration Licence E45/6863 (67km<sup>2</sup>), located in the Pilbara region of Western Australia. The licence was recently granted following a successful ballot application and is strategically positioned adjacent to tenure held by Wildcat Resources (ASX: WC8) and Sayona Mining (ASX: SYA).

The objective of the program was to identify potential geochemical anomalies to inform future exploration activities, including the delineation of potential drilling targets. All collected samples have been submitted for laboratory analysis, with assay results currently pending.

E45/6863 lies within one of the most prominent lithium regions in Australia and globally, situated approximately 43km from Pilbara Minerals' (ASX: PLS) world-class Pilgangoora Lithium Project.

## Corporate

The Company's Quarterly Cashflow Report (Appendix 5B) follows this activities report. The Company had \$2.67 million in cash at 30<sup>th</sup> June 2025. Cash outflows for the Quarter were in line with management expectations. Great Dirt is adequately funded to continue its current activities and will continue to demonstrate appropriate fiscal management.

## Guidance Note 23 Disclosures

### Details of mining exploration activities

Details of exploration activities during the quarter are set out above.

### Details of mining production and development activities

No production and development activities were undertaken during the quarter.

### Details of tenement activities

The tenement schedule included below shows all holdings and any change for the Company and its subsidiaries.

### Details of related party payments

The aggregate amount of payments to related parties and their associates included in the current quarter cash flows from operating activities was \$92,000, comprising director fees and remuneration (inclusive of superannuation).

## About Great Dirt Resources Ltd

Great Dirt's **Doherty and Basin Projects** are contained within EL 9527, located near the Barraba township, in northern NSW. These projects are prospective for high-grade manganese, with both projects having produced metallurgical and battery grade manganese historically. The Doherty Project comprises the old Doherty and Junior Mines, plus other workings and occurrences of manganese. The Basin Project contains several smaller manganese workings.

From 1941, for two decades, mines of the Doherty Project produced around 9,000 tonnes of battery and metallurgical grade manganese, both from opencut and underground operations. The battery grade ore was delivered to Eveready in Sydney for use in dry cell batteries, the metallurgical grade ore was purchased by BHP for use in steel production.

Great Dirt believes that historical work, while having discovered manganese, is unlikely to have located all sources in the area. Floaters, large rock fragments in the soil profile, of high-grade manganese ore reported outside known mine areas are a direct indication of unidentified manganese mineralisation. Additionally, notes on the mineral occurrences of the area refer to extensions and deposits along strike that were not mined.

A program of modern, systematic, geochemical and geophysical surveys will test known targets and their extents and could locate previously unrecognised blind deposits. Subsurface geophysical methods and drilling is likely to yield further targets that could be developed into projects to produce metallurgical and battery grade manganese.

Great Dirt has significantly expanded its manganese exploration portfolio following the acquisition of two tenements (E45/6949 and E45/6950 – the '**Nullagine Project**'), ~ 50km northeast of Consolidated Minerals Woodie Woodie manganese mine, in the Shire of East Pilbara, Western Australia.

Following a successful ballot application and exploration licence grant, Great Dirt has expanded its WA portfolio to include a position in one of the most prominent lithium regions in Western Australia and worldwide. Tenement E45/6863 – '**Pilbara Project**' is located approximately 43km from Pilbara Minerals (ASX:PLS), Pilgangoora Lithium Project, one of the largest hard-rock lithium deposits in the world.

## Competent Person's Statement

Information in this announcement that relates to exploration results is based on and fairly represents information and supporting documentation prepared and compiled by Mr Michael Leu, who is a Member of the Australian Institute of Geoscientists and a Member of the Australasian Institute of Mining and Metallurgy. Mr Leu is the geological consultant for Great Dirt Resources Ltd. Mr Michael Leu has sufficient experience, which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person, as defined in the 2012 Edition of the Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves. Mr Michael Leu consents to the inclusion in the announcement of the matters based on this information in the form and context in which it appears.

## No New Information

Except where explicitly stated, this announcement contains references to prior exploration results, all of which have been cross-referenced to previous market announcements made by the Company. The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements.

## Forward Looking Statement

This report contains forward looking statements concerning the projects owned by Great Dirt Resources Ltd. If applicable, statements concerning mining reserves and resources may also be deemed to be forward looking statements in that they involve estimates based on specific assumptions. Forward-looking statements are not statements of historical fact and actual events and results may differ materially from those described in the forward-looking statements as a result of a variety of risks, uncertainties and other factors. Forward looking statements are based on management's beliefs, opinions and estimates as of the dates the forward looking statements are made and no obligation is assumed to update forward looking statements if these beliefs, opinions, and estimates should change or to reflect other future developments.

## Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.== == == == ==
