Fourth Quarter FY25 Business Update

Asset Management AUM of ~A\$226.8 billion, up 2.5%**Continued growth in FUA¹ in Corporate Trust and Wealth Management**

Perpetual Limited (Perpetual) (ASX:PPT) today released its fourth quarter business update for the period ending 30 June 2025.

Chief Executive Officer and Managing Director, Bernard Reilly said Perpetual delivered growth across all three of its businesses.

“In Corporate Trust, we delivered another quarter of growth in funds under administration, driven by a robust non-bank securitisation market and growth in custody services,” he said.

“In Asset Management, after a turbulent quarter in global equity markets, we are pleased to report a 2.5% uplift in our assets under management for the quarter, largely supported by a rebound in markets through June. In the US, Barrow Hanley had a strong quarter, benefiting from a large institutional mandate in its global equities capability and wins in its US equities strategies. In the UK, our J O Hambro boutique experienced further outflows and as a result, we are accelerating our plans to reinvigorate the boutique which, as communicated at our half year results, includes product rationalisation and identifying new capabilities to support future growth. In Australia, our Pental and Perpetual boutiques continue to deliver solid long-term investment performance² for their clients, despite recent market dynamics being more challenging for ‘value-style’ managers such as Perpetual. We have also progressed product innovation initiatives, with an example in this quarter being the letter of intent signed by Perpetual and Partners Group to explore opportunities for new investment products combining both public and private assets.

“Our Wealth Management business also grew, reporting a 2% increase in funds under advice due to a rise in equity markets.”

Asset Management

Total Assets Under Management (AUM)³ was A\$226.8 billion as at 30 June 2025, an increase of 2.5% from A\$221.2 billion at 31 March 2025. The increase was primarily driven by favourable market movements of A\$14.6 billion marginally offset by net outflows of A\$3.9 billion and negative currency movements of A\$5.1 billion. Average AUM was lower at A\$222.1 billion, due to market volatility, compared to A\$229.2 billion in the March quarter.

- **Barrow Hanley's** AUM was A\$84.2 billion, up 2.8% on the March quarter. The increase in AUM was driven by positive market movements of A\$4.7 billion and net inflows of A\$0.9 billion, partially offset by negative currency movements of A\$3.3 billion. Net inflows were predominantly in the
