

ASX RELEASE | CLEARVUE TECHNOLOGIES LIMITED | (ASX:CPV | OTCQX:CVUEF)

Collaboration with Decarbonisation Leader, erbas™

HIGHLIGHTS:

- **Two-Year Collaboration:** ClearVue and erbas™, a prominent sustainability engineering and consulting company, will collaborate to advance decarbonising technologies for commercial and institutional buildings.
- **Focus of the Partnership:** Integrating ClearVue solar façade solutions to support carbon neutral and net zero goals in the built environment.

23 July 2025: ClearVue Technologies Limited (ASX:CPV) (ClearVue or the Company) has signed a collaboration agreement with erbas™ to explore green building and efficiency opportunities using ClearVue's solar-integrated technology. The two-year agreement will support joint technical services, case study creation, market development, research and development efforts and co-presenting for industry events and publications between the companies.

ClearVue CEO, Mr. Douglas Hunt, commented on the agreement: "erbas™ has a notable track record for delivering a whole-building, multi-disciplinary approach to building design and operation. The targeted sustainability offering, coupled with the broad experience in optimising mechanical, electrical, hydraulic, fire protection and lifts in sectors including commercial, healthcare, education, hospitality, industrial, retail, sports and public facilities will support ClearVue's growth goals.

"The thermal & energy modelling, building physics analysis and engineering support their subsidiary brand, erbas™ SUSTAIN, offers will provide tangible simulation results which ClearVue solar façade solutions will deliver in a diverse range of environments."

Commenting on the collaborative agreement, erbas™ Executive Director, Mr. Lincoln Merlo said: "At erbas™ | erbas SUSTAIN, we are dedicated to support our clients in reaching their ESG goals with a vision toward realising measurable, academically backed, environmental outcomes. Adding this collaboration with ClearVue to our evidence-based design approach will further support our commitment to sustainable building design. Our team here look forward to working in alignment with the ClearVue team to deliver an ever increasingly decarbonised built environment."

Authorised by the Board of ClearVue Technologies Limited.

ABOUT CLEARVUE TECHNOLOGIES LIMITED

ClearVue Technologies Limited (ASX: CPV; OTCX: CVUEF) is an Australian technology company that integrates solar technology into building façade and rooftop surfaces to provide renewable energy generation and offset the operational carbon footprint of buildings. The Company's advanced, patented glass technology preserves glass transparency maintaining building aesthetics while generating energy.

ClearVue has extended solar energy-generation to vision glass, cladding, spandrel, balustrade, and skylight solutions. These solutions can offset operational energy requirements significantly contributing to the net zero building.

ClearVue's integrated solar façade is revolutionizing the way buildings are designed, constructed, and renovated. Experience how building façades will become a major contributing factor to reducing operational carbon by visiting ClearVue at www.clearvuepv.com.
