ASX ANNOUNCEMENT

25 July 2025

QUARTERLY ACTIVITIES REPORT FOR THE PERIOD ENDED 30 JUNE 2025

Oceana Lithium Limited (ASX:OCN) (Oceana or the Company) is pleased to present its activities report for the June 2025 quarter.

OPERATIONS

Napperby Project, Northern Territory

The Napperby Project consists of a granted exploration licence (EL32836) covering an area of ~650km² and an exploration licence application (ELA32841) covering an area of more than 512km². The project area is located within the Northern Arunta pegmatite province near the settlement of Ti Tree, approximately 250km northwest of Alice Springs and 250km south of Tennant Creek along the Stuart Highway in the Northern Territory, close to Central Australian Railway with access to Darwin Port (**Figure 1**).

Figure 1: Napperby Project location (EL32836 and ELA32841), Northern Territory

The project is located within the highly prospective Arunta Province, which is endowed with some of the most prospective rocks for lithium, Rare Earth Elements (REEs) and uranium mineralisation in the Northern Territory.

The Paleoproterozoic Wangala and Ennugan Mountains granites have long been recognised as “Hot Granites”, and known to be anomalously enriched in a range of elements including U, Th, P, F and REEs.

As shown in **Figure 2**, both granite plutons exhibit outstanding uranium/thorium ratios and are almost fully encapsulated within Oceana’s Napperby Project leases EL32836 and ELA32841 (under application).

Further to the south in the Ngalia Basin there are several mineral occurrences and deposits recorded including the Napperby Uranium Deposit, with a JORC 2012 Inferred Mineral Resource of 9.54Mt at 382ppm U₃O₈ (refer to Core Exploration Ltd’s ASX Announcement dated 12/10/2018) and the Cappers Deposit where air-core drill-hole NAC122 intercepted 2.2m @ 211ppm U₃O₈ from 3.55m (refer to Energy Metals’s ASX Announcement dated 17/09/2009).

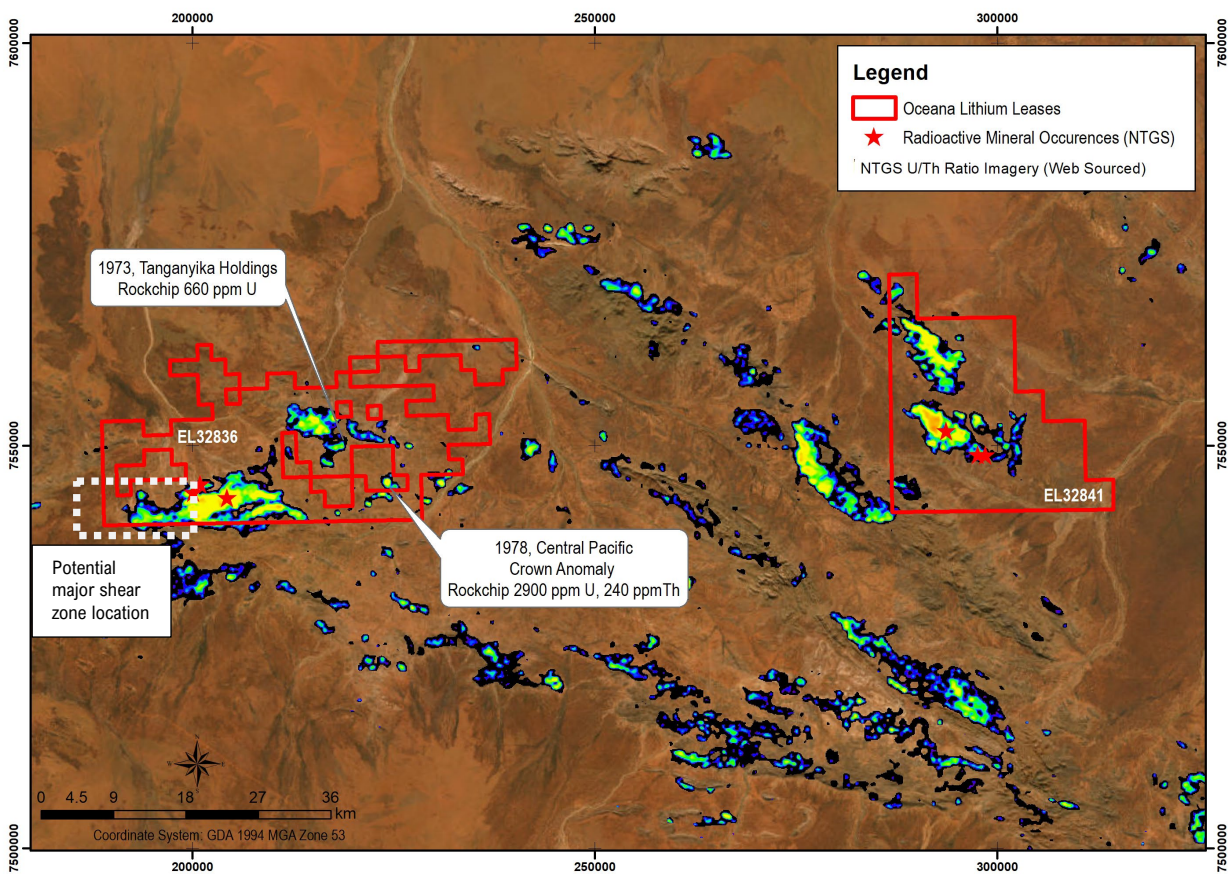

Figure 2: Map showing location of potential major shear zone, U/Th ratios and known uranium, thorium and REE mineral occurrences at Napperby Project

Due to the extensive work conducted by previous explorers and Oceana’s geologists, a comprehensive data review was completed in the June 2024 quarter, along with fieldwork activities targeting granite and unconformity related uranium mineralisation in the areas of younger sediments over fertile granite, such as potential calcsilicate roof pendants in this area.

Additional geological interpretation of the untested southwest corner of EL32836 also suggests the presence of a major shear zone in the area which has the potential to host uranium enrichment.

For tenement EL 32841, Oceana received Consent to Negotiate an Agreement in 2021; however, the Central Land Council could not provide dates for an in-country meeting with the Traditional Owners. It has been proposed that this meeting will take place during 2025, but no further communication has been received.

Bangemall Base Metals Project, Western Australia

The Mesoproterozoic Bangemall Basin, located between the Yilgarn and Pilbara Cratons, overlies the tectonic units of the Paleoproterozoic Capricorn Orogen. The basin unconformably overlies the Ashburton and Bresnahan Basins along its northern boundary, the Gascoyne Complex to the west and southwest, and the Bryah, Padbury, and Earahedy Basins to the south and southeast. To the east, units of the Greater Officer Basin unconformably overlie the Bangemall Basin (**Figure 3**).

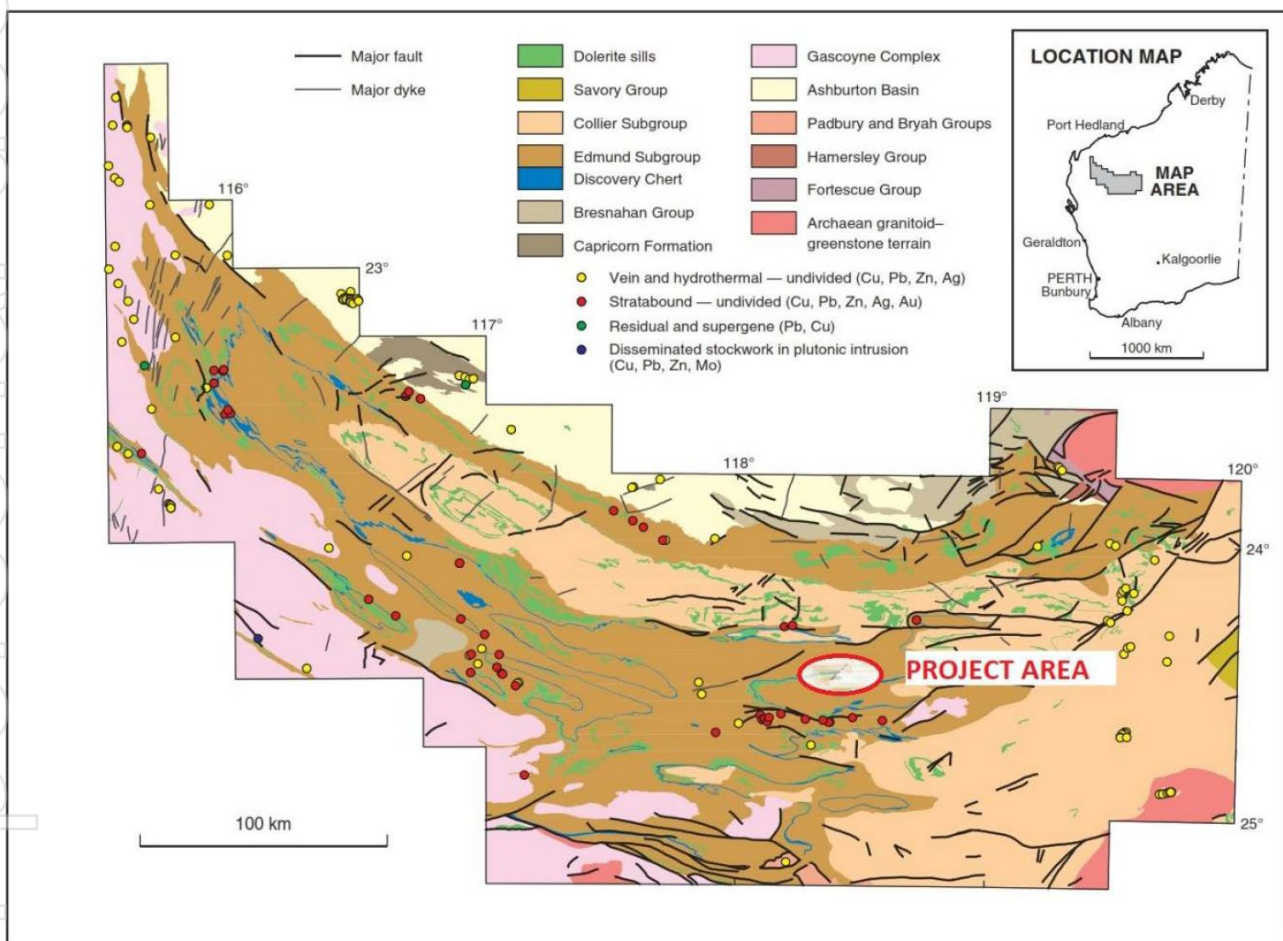

Figure 3: Project location map and potential mineralisation types in this region (GSWA Report 64)

Exploration Licence

The exploration licence E52/4393 covers 93.54km². The area has undergone significant faulting events with evidence suggesting the presence of a major fault in the basement parallel to the Tangadee lineament, an ideal plumbing system for delivering mineralising fluids. The Abra mine is located to the northwest of the Tangadee lineament.

Previous explorers of the project area include Rio Tinto Exploration Pty Ltd ("RTZ") to 2000 and later BHP (only for iron ore). RTZ generated base metal stream sediment anomalies and drilled two RC holes into the

carbonaceous and dolomitic shales. The RC holes intersected anomalous base metal mineralisation up to 15m @ 0.2% Zn.

The Company has conducted a comprehensive desktop review of all historical data, including geochemical data, geophysical data, and satellite imagery, to identify and define target areas for potential base metal mineralisation. A secondary review completed in March 2025 by a consultant geologist has highlighted the need to review and potentially remodel an airborne electromagnetic (“AEM”) anomaly with medium-strong conductivity responses, as it potentially indicates base metal sulphide mineralisation, yet wasn’t adequately tested previously by the two historic RC holes. The Company will engage third party geophysical consultants to undertake the review and potentially remodel the AEM anomaly this quarter, with further field work to be decided pending the outcomes of the review.

Solonópole Project, Ceará State, Brazil

The Solonópole Project area is located in the state of Ceará, north-eastern Brazil and consists of seven exploration permits covering approximately 124km² (**Figure 4**), owned by Oceana’s subsidiary Ceará Litio. The project is approximately three to four hours by road from the state capital Fortaleza and deep-water port of Pecém, and is well serviced by sealed highways and high voltage electricity.

During 2024, a reduction in project area occurred via tenement expiries, as part of strategic review of the lithium prospectivity and associated exploration costs. Oceana determined that the lithium prospectivity of three of the four exploration licences is quite low and hence would allow these tenements to expire. However, the fourth licence, 800241/2016, contains prospective areas such as the Nira Prospect, which the Company has been unable to access due to delays in environmental permits and landowner access agreements. As a result, the Company has engaged with the Brazilian Mines Department (Agência Nacional de Mineração (ANM)) in Brasilia to request an extension for this exploration licence. During the reporting period the Company continued to engage with ANM, confirming exploration work completed on licence 800241/2016.

Environmental Licences for drilling and trenching at targets within tenements 800306/2020 (Bom Jesus de Baixo) and 800475/2016 (Lapinha and Urubu) have been granted by SEMACE (“Superintendência Estadual do Meio Ambiente - Estado do Ceara”, the environmental agency of Ceara State). The permits are valid until 24 June 2026.

The integration and interpretation of soil sample results, combined with data from geophysics, geological mapping (138 line-km), trenching and RC drilling (~2,000m) have confirmed prospectivity of priority targets Bom Jesus de Baixo, Lapinha and Urubu for both lithium and tantalum.

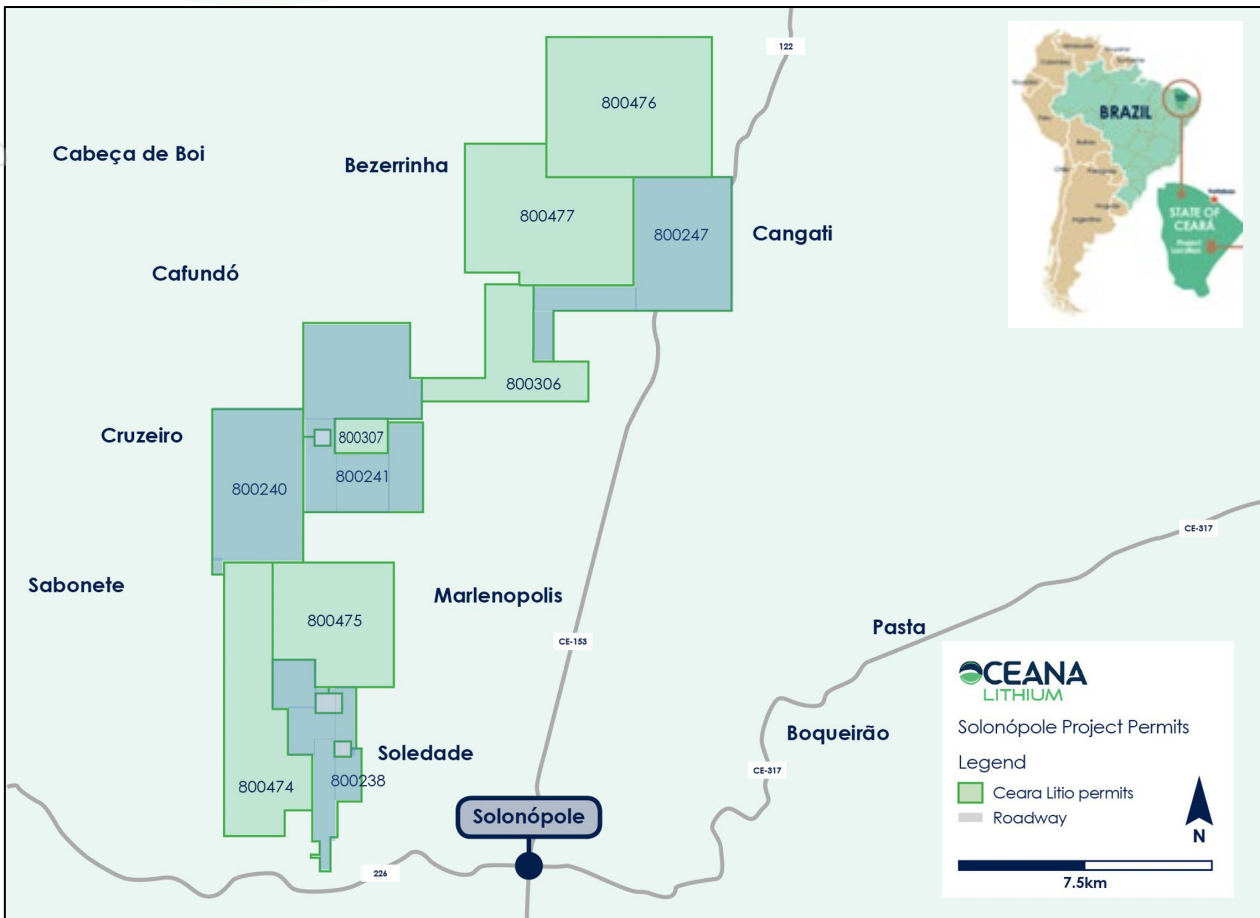

Figure 4: Solonópole Lithium Project – Tenement Map and Status (Blue = Expiring Licences)

New Project Opportunities

In addition to advancing its existing exploration projects, the Board of Oceana continues to assess new project opportunities within Australia and overseas which are complementary to the Company’s existing assets.

CORPORATE

Placement

During the quarter, Oceana announced a share placement to new and existing sophisticated and professional investors, through the issue of 29 million shares at 2.3c each to raise \$667,000 (before costs). A total of 28,530,435 shares were issued on 5 June 2025, with an additional 469,565 shares to be issued to Non-Executive Chair Martin Helean (or his nominees) subject to shareholder approval being sought at the general meeting to be held on 13 August 2025. The Company is also seeking shareholder approval to issue 5 million options with an exercise price of 5c and a 3-year expiry to Westar Capital (or its nominees) for acting as Lead Manager to the Placement, and 8 million options on the same terms to consultants who will assist the Company with its future initiatives.

Proceeds from the Placement will be used towards progressing the Company’s projects in Australia and Brazil, for working capital purposes, and to identify and assess new complimentary project opportunities.

Board and Management Changes

Subsequent to the end of the reporting period, on 1 July 2025 Mr Daniel Smith resigned as Non-Executive Director and Company Secretary to pursue other interests. Mr Russell Curtin, a former partner at Ernst & Young with over 30 years of experience in the resources sector, was appointed Non-Executive Director of the Company. Ms Maddison Cramer, co-founder and managing director of boutique corporate services business Belltree Corporate with over 10 years' experience as a corporate lawyer and company secretary to ASX-listed companies, has been appointed as Company Secretary.

Change of address and phone number

On 1 July 2025, the Company's registered office and principal place of business changed to Level 2, 8 Richardson Street, West Perth WA 6005. Oceana's telephone number also changed to +61 (8) 6370 3139.

Cash Position

At 30 June 2025 the Company had cash on hand of approximately \$3.1 million.

Summary of Exploration Expenditure

In accordance with Listing Rule 5.3.1, the Company reports that there was \$31,000 of exploration expenditure incurred during the June 2025 quarter.

Note 6 to Appendix 5B

Payments to related parties of the entity and their associates during the June 2025 quarter: \$54,000 was paid to Directors and associates for director, company secretarial, accounting and consulting fees.

Compliance Statement

The exploration results contained in this report were first reported by the Company in its ASX announcements made on 28 November 2023, 30 April 2024, 15 May 2024, 18 June 2024, and 26 September 2024. The Company confirms that it is not aware of any new information or data that materially affects the information included in these announcements. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original announcements.

6.1	Aggregate amount of payments to related parties and their associates included in item 1	54
6.2	Aggregate amount of payments to related parties and their associates included in item 2	-

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments

Consulting fees, directors' fees and related-party fees	\$ 41,879
Related party payments – accounting and bookkeeping service	\$ 12,000

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7. Financing facilities	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
<i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>		
7.1 Loan facilities	-	-
7.2 Credit standby arrangements	-	-
7.3 Other (please specify)	-	-
7.4 Total financing facilities	-	-
7.5 Unused financing facilities available at quarter end		-
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (Item 1.9)	(145)
8.2 Capitalised exploration & evaluation (Item 2.1(d))	(31)
8.3 Total relevant outgoings (Item 8.1 + Item 8.2)	(176)
8.4 Cash and cash equivalents at quarter end (Item 4.6)	3,085
8.5 Unused finance facilities available at quarter end (Item 7.5)	-
8.6 Total available funding (Item 8.4 + Item 8.5)	3,085
8.7 Estimated quarters of funding available (Item 8.6 divided by Item 8.3)	17.53
8.8 If Item 8.7 is less than 2 quarters, please provide answers to the following questions:	
1. Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: N/A	
2. Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: N/A	
3. Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
Answer: N/A	

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
