

QUARTERLY ACTIVITIES AND CASHFLOW REPORT

Antipa Minerals Ltd (ASX: **AZY**) (**Antipa** or **the Company**) is pleased to report on its activities for the quarter ended 30 June 2025 (the **Quarter**).

During March and April 2025, Antipa reconsolidated its 100%-owned Minyari Dome, Wilki, and Paterson Projects to form the single, belt-scale 4,100km² Minyari Project (the **Project**), which includes its flagship standalone Minyari Dome Gold-Copper Development Project (**Minyari Dome Development**).

An updated Mineral Resource Estimate (**MRE**) was released in May 2025, increasing Antipa's total resource base to 3.0Moz gold equivalent (**AuEq**) at 1.94 g/t AuEq¹.

The Company also commenced its Phase 1 CY2025 drilling programme, which is scheduled to comprise 389 holes for 35,000m of air core, reverse circulation (**RC**), and diamond core drilling. This dual-purpose programme is designed to grow the existing Mineral Resource at Minyari Dome and test high-potential greenfield targets, with the objective of delivering new discoveries across the broader Minyari Project.

The first batch of assay results was received at the end of the Quarter and comprised sixty-six (66) holes. These initial results confirmed a significant new gold-copper discovery south of Fiama and Rizzo, and delivered meaningful extensions to known mineralisation at the GEO-01 Main Zone deposit.

Antipa ended the Quarter with approximately A\$36.5 million in cash and no debt. Subsequent to the end of the Quarter, the Company successfully completed an institutional placement to raise A\$40 million (before costs)². Including proceeds from the Placement, Antipa currently holds a robust cash balance of approximately A\$70.6 million³ (after costs), enabling the Company to expand and accelerate its Minyari Project resource growth and discovery programme alongside advanced project development activities.

Minyari Dome Development Project Highlights

Updated MRE grows Minyari to 2.5Moz

- **Adds approximately 100koz of gold** to the total MRE base.
- **Total MRE: 53.0Mt at 1.48 g/t gold**, 0.18% copper, 0.43 g/t silver and 0.02% cobalt, for:
 - **2.5Moz of gold;**

¹ For full details, including all JORC (2012) tables, refer to ASX release dated 21 May 2025, "Minyari Project Resource Grows by 100 Koz to 2.5 Moz of Gold".

² Refer to ASX release dated 7 July 2025, "Strategic Placement Raises A\$40 Million".

³ Cash at bank at 16 July 2025 (unaudited).

For personal use only

- 84kt of copper;
- 666koz of silver; and
- 13kt of cobalt; or
- **3.0Moz Aueq at 1.94 g/t AuEq⁴**
- **Indicated Resources (66% of total): 32.4Mt at 1.60 g/t gold, 0.20% copper, 0.51 g/t silver and 0.03% cobalt, for:**
 - **1.7Moz of gold;**
 - 64kt tonnes of copper;
 - 533koz of silver; and
 - 10kt of cobalt.
- Reinforces the standalone development potential of the Minyari Development, as confirmed in outcomes from the October 2024 Scoping Study.
- Further highlights the potential for a scalable open pit and underground mining operation, with mineralisation commencing at surface and with several deposits remaining open along strike and down dip.

Ongoing Pre-Feasibility Study Workstream Activities

Antipa continues to progress key workstreams, including metallurgical test work, environmental studies, and permitting activities ahead of the expected completion of a Pre-feasibility Study (PFS) for the Minyari Development by June 2026.

Reconsolidated Paterson Province Position

Antipa completed the final part in reconsolidating its Paterson Province tenements, with IGO electing to withdraw from the region. The combined 100%-owned tenement package now spans 4,100km².

Former Paterson Project

- The Paterson Project farm-in agreement was originally entered into in July 2020, with approximately A\$15 million invested by IGO in exploration activities, primarily targeting new copper discoveries.
- On 9 April 2025, the Company announced that IGO had elected to withdraw from the Paterson Project farm-in agreement. As a result of IGO's withdrawal, Antipa retained 100% ownership and resumed management of the Paterson Project effective 30 April 2025.
- This project area hosts multiple exciting high-potential gold ± copper prospects and greenfield targets now primed for follow-up or initial drill testing.
- Ongoing project-scale interpretation and modelling expected to generate further targets.

⁴ Calculation of the gold equivalent (Aueq) is documented at the end of this announcement.

Phase 1 CY2025 Exploration Programme

Minyari Dome Deposit Growth-Focused Drill Programme

- Targeting expansion of the existing near-surface Minyari Dome MRE, which currently stands at 2.4 Moz of gold, including 1.7Moz at 1.6 g/t gold in the Indicated category⁵.
- Focused on extending resources at Minyari South and across the GEO-01 1km x 700m opportunity footprint, including the Main Zone, Minella, Fiama, and Central deposits, all of which remain open down-dip and, in some cases, along strike.
- This component of the programme is complete, comprising 57 holes for 12,080m (54 RC holes for 10,810m, two diamond core holes for 698m, and one diamond-tailed RC hole for 572m).
- Assay results for approximately 75% of the growth drilling programme are expected by the end of Q3 CY2025.

Broader Minyari Project Discovery-Focused Drill Programme

- Scheduled to comprise 229 holes for approximately 21,218m, including:
 - 188 air core holes (12,200m);
 - 40 RC holes (7,477m);
 - one diamond core hole (1,200m); and
 - one diamond core tail (341m).
- Focused on testing priority gold ± copper greenfield targets and existing prospects proximal to the Minyari Dome deposits, including, but not limited to:
 - GEO-01 and Rizzo air core (2024) southern extensions (approximately 1.0km x 700m);
 - Minyari Depth Repeat target;
 - Minyari East Repeat target;
 - Parklands (approximately 2.6km x 1.4km area);
 - PP GRAV-02 (approximately 1.7km x 1.6km);
 - AL01 (approximately 6.0km x 2.0km area);
 - AL02 (approximately 2.7km x 1.2km area);
 - RPS Trend (approximately 4.5km x 1.0km); and
 - PA-5 (approximately 3.0km x 1.0km).
- The RC component of the discovery programme has been completed and comprised 40 holes for 7,477m, with the air core and diamond core components of this programme ongoing.
- Assay results reported for approximately 30% of the completed component of the discovery drilling programme (22 RC holes and 28 air core holes, excluding the assay results for all air core bottom-of-hole sample intervals which are pending).

⁵ For full details refer to ASX release dated 17 September 2024, "100% Owned Minyari Dome Project Grows by 573,000 oz of Gold".

Initial High-Grade Results Confirm Significant New Copper-Gold Discovery

- Discovery drilling delivered new extensive shallow high-grade gold-copper zones:
 - **21m at 1.8 g/t gold and 0.06% copper** from 44m down hole in 25MYC0715, including:
 - **4m at 8.6 g/t gold, 0.02% copper** and 0.5 g/t silver from 44m down hole
 - **41m at 0.16 g/t gold and 0.15% copper** from 4m down hole in 24MYA0293 (*vertical air core hole*), including:
 - **8m at 0.32 g/t gold and 0.21% copper** from 20m down hole
- **Step-out success achieved across multiple zones through extensional drilling:**
 - **15m at 2.0 g/t gold and 0.04% copper** from 336m down hole in 25MYCD0698
 - **15m at 0.9 g/t gold and 0.12% copper** from 287m down hole in 25MYC0737, including:
 - **5m at 1.5 g/t gold and 0.14% copper** from 292m down hole
 - **44m at 0.4 g/t gold and 0.06% copper** from 82m down hole in 25MYC0745, including:
 - **2m at 2.8 g/t gold and 0.05% copper** from 94m down hole
 - **1m at 1.9 g/t gold and 0.11% copper** from 118m down hole
 - **7m at 1.1 g/t gold and 0.06% copper** from 130m down hole in 25MYC0687, including:
 - **2m at 2.9 g/t gold and 0.17% copper** from 134m down hole
 - **5m at 1.1 g/t gold and 0.07% copper** from 78m down hole in 25MYC0688, including:
 - **1m at 3.6 g/t gold and 0.16% copper** and 0.5 g/t silver from 79m down hole
 - **2m at 2.5 g/t gold and 0.20% copper** and 0.4 g/t silver from 81m down hole in 25MYC0695, including:
 - **1m at 4.2 g/t gold and 0.37% copper** and 0.8 g/t silver from 81m down hole

Corporate Highlights

- Subsequent to the end of the Quarter, Antipa successfully completed a placement to raise A\$40 million (before costs).
- Strongly supported by existing institutional shareholders, long term sophisticated investors and high-quality new global institutions, reflecting confidence in Antipa's strategy and the broader potential of the Minyari Development.
- Combined with existing funds of approximately A\$36.5 million, the Placement sees the Company with a current cash balance of circa A\$70.6 million⁶ (after Placement costs).

⁶ Cash at bank at 16 July 2025 (unaudited).

For personal use only

Activity Detail

Minyari Project (100% Antipa)

In March and April 2025, Antipa reconsolidated its 100%-owned Minyari Dome, Wilki and Paterson Projects, to form the single, belt scale 4,100km² Minyari Project.

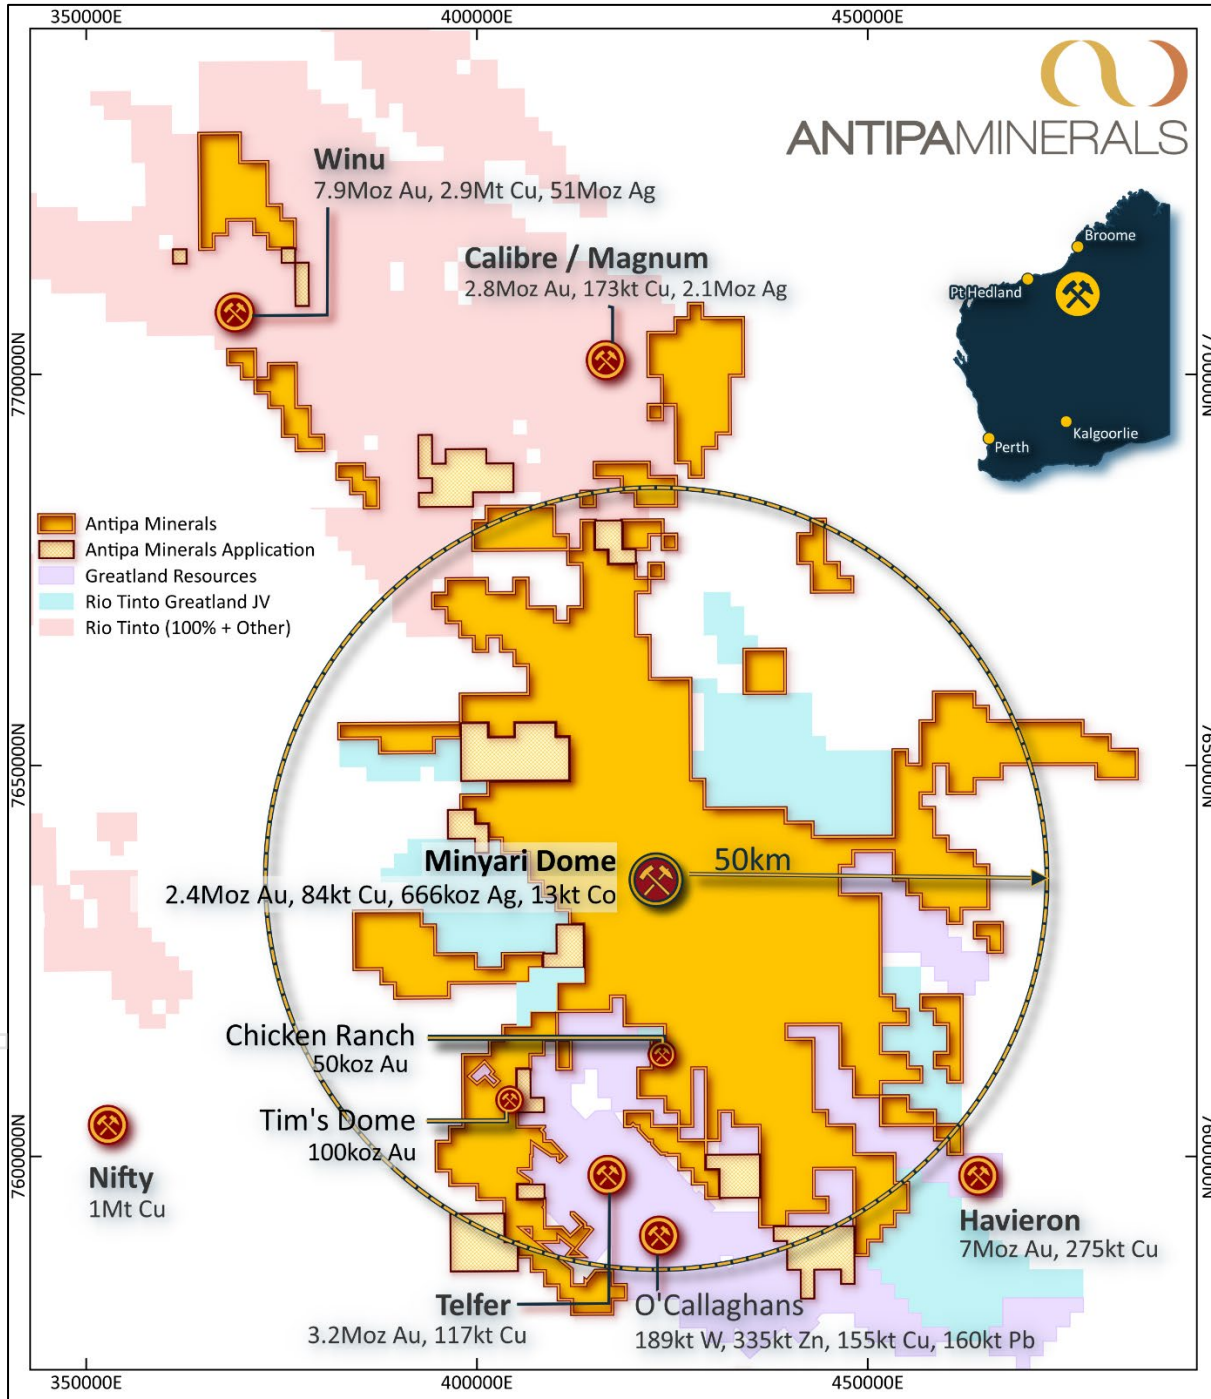

Figure 1: Plan showing location of Antipas 100%-owned, 4,100km² Minyari Project: Plan includes Greatland Resources' Telfer Mine, Havieron development project and O'Callaghans deposit, Rio Tinto-Sumitomo's Winu deposit, Rio Tinto's Calibre-Magnum deposits, and Cyprium's Nifty Mine⁷. Regional GDA2020 / MGA Zone 51 co-ordinates, 50km grid.

⁷ Telfer and Havieron refer to Greatland Gold plc AIM release dated 18 March 2025, "2024 Group Mineral Resource Statement". Winu refer to Rio Tinto Ltd ASX release dated 22 February 2023, "Changes to Ore Reserves and Mineral Resources". O'Callaghans refer to Newmont Corporation ASX release dated 23 February 2024, "PR as issued - 2023 Reserves and Resources". Nifty refer to Cyprium Metals Ltd ASX release dated 14 March 2024, "Updated Nifty MRE Reaches 1M Tonnes Contained Copper". Calibre refer to Antipa release dated 26 August 2024, "Calibre Gold Resource Increases 19% to 2.5 Moz - Citadel JV". Magnum refer to Antipa release dated 23 February 2015, "Calibre and Magnum Deposit Mineral Resource JORC 2012 Updates".

Minyari Dome (100%)

The Minyari Dome Development is situated just 35km from Greatland Resources Ltd's (ASX: GGP) (**Greatland**) Telfer gold copper-silver mine and 22Mtpa processing facility and 54km along strike from Greatland's Havieron gold-copper development project.

Mineral Resource Estimate Update

Antipa's updated MRE, released in May 2025, now totals 2.5 million ounces of gold, representing an increase of 100,000 ounces of gold, and includes 84,000 tonnes of copper, 666,000 ounces of silver, and 13,000 tonnes of cobalt.

The Minyari Project's MRE includes the Minyari Dome, Tim's Dome and Chicken Ranch deposits, which are situated between 10km and 35km from the Telfer gold-copper-silver mine and 22Mtpa gold copper-silver mineral processing facility.

The updated total MRE comprises 53 million tonnes of Indicated and Inferred material at 1.48 g/t gold, 0.18% copper, 0.43 g/t silver, and 0.03% cobalt, for (see Table at the end of this Report):

- **2.52Moz gold;**
- 84kt copper;
- 666koz silver; and
- 13kt cobalt.

The updated MRE includes results from drilling completed after the release of the Minyari Dome September 2024 MRE and the May 2019 MRE for the satellite Tim's Dome and Chicken Ranch deposits.

At Minyari Dome, seven deposits currently contribute to the MRE distributed along a 3.2km long strike corridor. The Minyari, WACA and GEO-01 deposits contain the majority of the MRE contained gold (2.2Moz, or 90%). The GEO-01 and Minyari South deposits, which are within 100m (Minyari South) to 1.3km (GEO-01) of the flagship Minyari deposit, contribute 225koz to the MRE and offer strong resource growth potential.

Following consolidation of the Wilki Farm-in Project in March 2025, the Chicken Ranch and Tim's Dome deposits have been returned unencumbered to Antipa. Both lie within 15km of Telfer's processing facility and are now being assessed as potential satellite production sources for the Minyari Dome Development.

This updated MRE has been prepared by Antipa and reported in accordance with the JORC Code (2012) guidelines and recommendations and is presented using cut-off grades of 0.4 g/t AuEq (open pit) and 1.5 g/t AuEq (underground). Significant changes from previous estimates include:

- **GEO-01:** +20% gold ounces (151koz to 188koz);
- **Minyari South:** +41% gold ounces (22koz to 37koz);
- **Tim's Dome:** +37% gold ounces (63koz to 100koz); and
- **Chicken Ranch:** +19% gold ounces (40koz to 50koz).

Further MRE growth is targeted during CY2025.

For full details, figures and tables, refer to ASX release dated 21 May 2025, "Minyari Project Gold Resource Grows by 100koz to 2.5 Million Oz of Gold".

Phase 1 CY2025 Drilling Programme

The Minyari Dome deposits were the subject of a 2024 Scoping Study, which reaffirmed the technical and financial viability of standalone gold mining and processing operation. While already impressive, the outcomes from the preliminary evaluation would be materially enhanced by any increase in the MRE, to extend the mine life and maximise the operating schedule.

Located just 35km from Greatland's Telfer gold-copper-silver mine and 54km from its Havieron gold-copper development, the Minyari Dome development opportunity also benefits from potential commercialisation synergies, with proximity to major (22Mtpa) processing infrastructure offering optionality (Figure 1).

The Phase 1 CY2025 drilling campaign commenced in April 2025 and is scheduled to comprise 288 holes for 34,000m, incorporating air core, RC and diamond core drilling (including diamond core tails). Antipa's dual-purpose exploration programme has been designed to grow the existing MRE at multiple Minyari Dome deposits and test greenfield targets to deliver new discoveries across the broader tenement package.

At the end of the Quarter, Antipa reported the first batch of assay results, consisting of 66 holes and representing 29% of the current total programme.

Minyari Dome Deposit Growth Drilling Programme

- Targeting expansion of the existing near-surface Minyari Dome MRE.
- The focus was extending the resources at Minyari South and across the GEO-01 combined 1km x 700m opportunity footprint, including at the Main Zone, Minella, Fiama and Central gold deposits, all of which remain open down-dip and in some cases along strike.
- This component of the programme has been completed and comprised 57 holes for 12,080m (54 RC holes for 10,810m, two diamond core holes for 697m and one diamond tailed RC hole for 572m).
- Assay for approximately 25% of the resource growth drilling programme (15 RC holes and the RC component of one diamond-tailed RC hole) have been reported to date.

Broader Minyari Project Discovery Drilling Programme⁸

- Scheduled to comprise 229 holes for approximately 21,218m, including 188 air core holes (12,200m), 40 RC holes (7,477m), one diamond core hole (1,200m) and one diamond core tail (341m).
- The focus was testing priority gold ± copper greenfield targets and existing prospects proximate to the Minyari Dome deposits including, but not limited to:
 - GEO-01 and Rizzo air core (2024) southern extensions (approximately 1.0km x 700m);
 - Minyari Depth Repeat target;
 - Minyari East Repeat target;
 - Parklands (approximately 2.6km x 1.4km area);
 - PP GRAV-02 (approximately 1.7km x 1.6km);
 - AL01 (approximately 6.0km x 2.0km area);

⁸ Exploration programmes are subject to changes which may be made consequent upon results, field conditions and ongoing review.

- AL02 (approximately 2.7km x 1.2km area);
 - RPS Trend (approximately 4.5km x 1.0km); and
 - PA-5 (approximately 3.0km x 1.0km).
- The RC component of the discovery programme has been completed and comprised 40 holes for 7,477m, with the air core and diamond core components of this programme ongoing.
 - Assay for approximately 30% of the completed component of the discovery drilling programme (22 RC holes and 28 air core holes excluding the assay results for all air core bottom-of-hole sample intervals which are pending) have been reported to date.

These results strongly validate Antipa's dual-track exploration strategy, confirming a significant new gold-copper discovery south of Fiama and Rizzo and delivered meaningful extensions to known mineralisation at the GEO-01 Main Zone deposit particularly at depth.

Mineralisation remains open at the GEO-01 Main Zone, GEO-01 Central, Fiama, Minella, and multiple prospects. Assay results from twenty RC holes completed at the Parklands target returned limited low-grade gold ± copper mineralisation. With multiple areas of mineralisation uncovered during the current campaign providing high-priority new targets, any further drilling at Parklands is contingent on further integrated interpretation.

The current programme of drilling is expected to conclude late July 2025, with assay results to be reported in batches as they become available.

With the completion of the RC and diamond core components of the Phase 1 drill programme, the PFS resource definition (**ResDef**) programme has commenced and is currently utilising two diamond core rigs and one RC rig.

A detailed summary of the current programme and the results of this first batch of assays are summarised below. For full details, figures and tables, refer to ASX release dated 30 June 2025 "*Significant New Gold-Copper Discovery at Minyari Dome*".

Minyari Dome Development Project Growth Drilling

GEO-01 Prospect Area

GEO-01 is located approximately 1.3km south of the Minyari deposit and is defined by a large 1km x 500m mineralised footprint. Phase 1 drilling focused on extending resources at multiple deposits, where high-grade gold mineralisation remains open down-dip and in some cases along strike.

Open zones of mineralisation and extensional resource targets tested at GEO-01 include:

- **Main Zone:** Three Phase 1 holes were completed (one RC, one diamond core, and one diamond core tailed RC hole), with results currently reported for the RC hole and RC portion of the tailed hole. The later was designed to test for extensions of the ore zone at depth and **intersected thick high-grade gold ± copper mineralisation highlighting the potential for a significant resource increase** requiring follow-up drilling, including:
 - **15m at 2.0 g/t gold and 0.04% copper** from 336m down hole in 25MYCD0698, including:
 - **1m at 3.4 g/t gold, 0.06% copper** from 336m down hole; and
 - **1m at 3.1 g/t gold, 0.04% copper** from 345m down hole
- **Fiama:** Located approximately 330m southeast of the GEO-01 Main Zone, this zone features shallow gold ± copper mineralisation extending along a 300m of strike length, up to 120m across strike and to a vertical depth of 220m. The gold resource remains open in several

directions. Eighteen (18) Phase 1 RC holes were completed with results for an initial two holes, both intersecting multiple zones of mineralisation, with notable intersections including:

- **15m at 0.9 g/t gold and 0.12% copper** from 287m down hole in 25MYC0737, including:
 - **5m at 1.5 g/t gold and 0.14% copper** from 292m down hole
- **9m at 0.6 g/t gold and 0.06% copper** from 127m down hole in 25MYC0737, including:
 - **1m at 3.6 g/t gold and 0.31% copper** from 134m down hole
- **Minella:** Situated along Fiama's isoclinal fold-hinge, approximately 80m north of its western extent, mineralisation extends along approximately 300m of strike, up to 50m across strike and to a vertical depth of 100m, with the gold resource remaining open in multiple directions. Seven Phase 1 RC holes were completed with results reported for the first hole completed, intersecting:
 - **44m at 0.4 g/t gold and 0.06% copper** from 82m down hole in 25MYC0745, including:
 - **2m at 2.8 g/t gold and 0.05% copper** from 94m down hole
 - **1m at 1.9 g/t gold and 0.11% copper** from 118m down hole
- **GEO-01 Central:** Situated between Main Zone and Minella, fold hinge and contact related gold mineralisation. The gold resource remains open in several directions. Four Phase 1 RC holes were completed, and results are pending.

Air core (late 2024 and recent Phase 1) and Phase 1 RC drilling at the surface geochemical target AL05 extended the Fiama and nearby Rizzo gold ± copper mineralisation trends by approximately 500m. These shallow air core and RC gold-copper intersections highlight the potential to significantly increase the resource in this area. Importantly, Antipa's access to AL05 was previously prevented by the Paterson IGO Farm-in Project boundary and provides an exciting new exploration opportunity.

Additional Resource Growth Targets

Additional resource growth targets to be tested as part of Phase 1 CY2025 drilling included:

- **Minyari South - Beneath and Southwest of Scoping Study Open Pit:** Tested both the depth and strike potential of high-grade gold mineralisation beyond the limits of the current open pit design. Fourteen Phase 1 holes were completed (13 RC and one diamond core), with results for 11 RC holes reported.
- **Minyari Southeast:** Extends southeast from the southeast corner of the Minyari deposit beyond the limits of the current open pit design, with gold mineralisation remaining open down dip. Four Phase 1 RC holes were completed, and results are pending.
- **Minyari Northeast and Southwest - Inside Scoping Study Open Pit:** Focused on historically poorly tested zones within the northeast and southwest regions of the current open pit design. Three Phase 1 RC holes were completed, with results pending.
- **WACA Extension:** Tests the southeast strike potential of high-grade gold mineralisation beyond the limits of the current open pit design. Four Phase 1 RC holes were completed, with results pending.

For personal use only

Minyari Project Discovery Drilling

Following the recent reconsolidation, Antipa now controls a district-scale gold ± copper exploration package with multiple advanced greenfield targets and prospects.

Results have been reported for 22 of the 40 RC holes and 28 of the 122 air core holes completed, with the majority of the RC holes (20) being from Parklands. Assay results for all air core bottom-of-hole sample intervals remain pending.

Discovery Targets

The Phase 1 discovery programme is testing regional gold ± copper targets, existing prospects, and conceptual targets within a 65km corridor which extends approximately 35km northwest and 30km southeast of the Minyari Dome development opportunity. Key areas of focus included:

- **GEO-01 and Rizzo:** Follow up of air core (2024) target for extensions to both GEO-01 and Rizzo covering an area of approximately 1.0km x 700m in this area which Antipa's access to was previously prevented by the Paterson IGO Farm-in Project boundary. Thirty-three Phase 1 holes were completed (18 air core and 15 RC), with results reported for all air core holes and two RC holes. **Phase 1 drilling has discovered shallow gold-copper mineralisation across a large area (800m by 700m) highlighting the potential to materially increase the Minyari Dome MRE.** Significant follow-up RC drilling to investigate the largely untested broader 2km by 800m target area, including magnetic and aerial electromagnetic (**AEM**) conductivity anomalies, is in the planning phase. Notable Phase 1 intersections in this area include:
 - **21m at 1.8 g/t gold and 0.06% copper** from 44m down hole in 25MYC0715, including:
 - **4m at 8.6 g/t gold, 0.02% copper** and 0.5 g/t silver from 44m down hole
 - **32m at 0.13 g/t gold** from 24m down hole in 24MYA0292 (vertical air core hole), including:
 - **12m at 0.21 g/t gold** from 32m down hole
 - **41m at 0.16 g/t gold and 0.15% copper** from 4m down hole in 24MYA0293 (vertical air core hole), including:
 - **8m at 0.32 g/t gold and 0.21% copper** from 20m down hole
- **Parklands:** Parklands is a coherent gold and pathfinder surface geochemical anomaly extending 2.6km by 1.4km, under shallow cover (average 25m). It lies along the Chicken Ranch Triangle gold corridor. Twenty Phase 1 RC holes were completed with all results returning limited low-grade gold ± copper mineralisation predominantly from within metasediment host rocks (maximum downhole intersections of 4m at 0.11 g/t gold and 8m at 0.05% copper). Any further Parklands drilling will be contingent on completion of an integrated interpretation, including litho-geochemical and structural analysis.
- **GP05:** Brownfield air core target, including low-grade gold-copper mineralisation, associated with a magnetic anomaly 250m northeast of the GEO-01 Main Zone deposit. Four Phase 1 RC holes were completed, assays pending.
- **Chicane:** Brownfield RC and air core target, including high-grade gold-copper mineralisation, over a disrupted magnetic anomaly 400m southwest of the Minyari deposit. One Phase 1 RC hole was completed, assays pending.
- **Minyari Depth Repeat and Minyari East Repeat Targets:** Testing of the potential for repetitions of gold-copper mineralisation beyond the limits of the current resource and mine design. One Phase 1 diamond core hole was completed to test the Minyari East Repeat target,

with results pending. Drilling of a single diamond core hole is underway to test the Minyari Depth Repeat target.

- **PP GRAV-02:** Large-scale gold-copper gravity target covering an area of approximately 1.7km x 1.6km and located 10km west-southwest of Minyari. Thirty-one Phase 1 air core holes were completed, with assay results currently reported for 10 holes returning no significant mineralisation.
- **AL01:** Large-scale air core (2022 and 2023) target, including low-grade gold mineralisation, covering an area of approximately 6.0km x 2.0km and located 18km north of Minyari. Forty-two Phase 1 air core holes were completed, with assays pending.
- **AL02:** Large-scale air core / RAB gold-copper target, covering an area of approximately 3.0km x 1.2km and located 9km north of Minyari. Fourteen Phase 1 air core holes were completed, assays pending.
- **Reaper-Poblano-Serrano (RPS) Trend:** Large-scale magnetic and RC gold-copper target, including high-grade gold mineralisation, covering an area of approximately 4.5km x 1.0km and located 30km north of Minyari. Phase 1 air core drilling in progress, 13 of 80 holes completed, assays pending.
- **Kali-WEM:** Aeromagnetic and AEM conductivity target covering an area of approximately 2.0km x 600m located 15km southwest of Minyari. Four Phase 1 air core holes were completed, with assays currently pending.
- **PA-5:** 800m long AEM conductivity target covering an area of approximately 3.0km x 1.0km and located 25km southeast of Minyari. Drilling is scheduled to begin at PA-5 shortly.

Minyari Dome Project PFS Workstreams

Based on the highly positive outcomes of the updated Scoping Study and in conjunction with highly favourable gold-copper market conditions, the Board of Directors has formally approved a PFS for Minyari Dome.

The PFS builds upon the Updated Minyari Dome Scoping Study (October 2024), which reaffirmed the technical and financial viability of a potential standalone gold mining and processing operation at Minyari Dome and the surrounding area. The Minyari Dome Development forms a small part of a much larger and recently consolidated Minyari Project.

Antipa has advised it has materially advanced several critical workstreams, including metallurgical test work, environmental studies, and permitting activities.

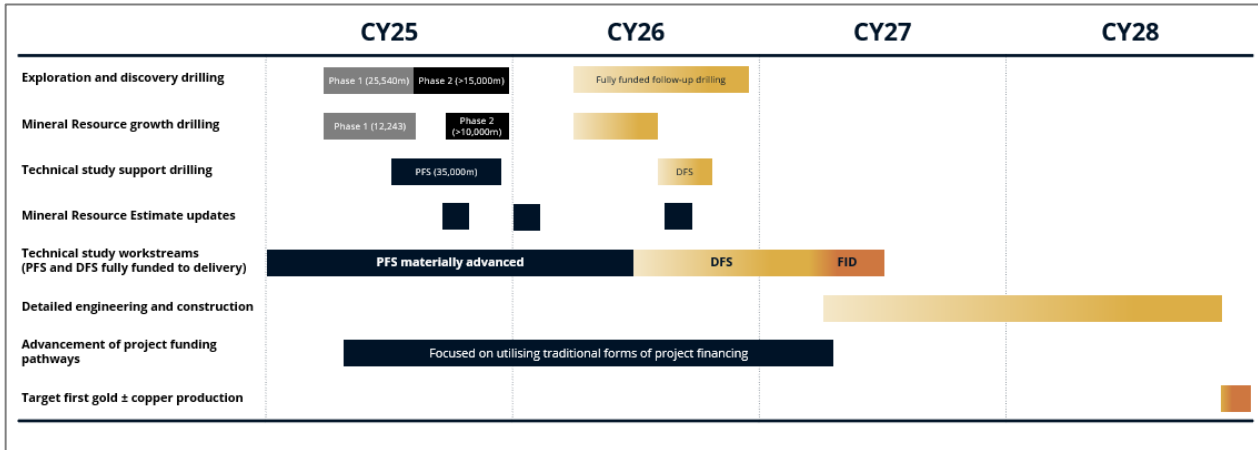

Key Activities:

- Recruitment of highly experienced Study Manager finalised;
- Leading industry consultants engaged across PFS workstreams;
- Metallurgical test work to refine processing flowsheet;
- Environmental and water studies to support permitting;
- Mine planning, process plant engineering, and non-processing infrastructure development;
- Drilling to support delivery of the PFS MRE, as well as mining and infrastructure related geotechnical, sterilisation and hydrogeological drilling;
- Preparation of key approvals and licence applications;

For personal use only

- Ongoing engagement with Native Title stakeholders;
- Human resourcing, including recruitment of project development and geology personnel; and
- Ongoing assessment of funding options, focused on traditional debt and equity.

The PFS ResDef drill programme has commenced and is currently utilising two diamond core rigs and one RC rig.

Minyari Dome Development Project Delivery Schedule: Indicative Project Development Timetable⁹

Former Paterson Project (100% Antipa)¹⁰

The former 1,520km² Paterson Project came to within 22km of Greatland’s Telfer gold-copper-silver mine and 22Mtpa mineral processing facility, 8km from Rio Tinto-Sumitomo’s Winu copper-gold-silver development project. It also surrounded Antipa’s Minyari Dome Project on all four sides.

In July 2020, Antipa entered into a A\$30 million farm-in agreement with IGO. In December 2021, IGO had satisfied its initial A\$4 million minimum exploration expenditure and assumed project management in March 2022.

A further A\$11 million was invested by IGO bringing their total Paterson Project investment to A\$15 million, without earning a joint venture interest.

On 9 April 2025, the Company announced that IGO had elected to withdraw from the Paterson Project farm-in agreement. As a result of IGO’s withdrawal, Antipa retained 100% ownership and resumed management of the Paterson Project effective 30 April 2025.

The Paterson Project remains highly prospective for metasediment- and mafic-intrusive-hosted gold and/or copper deposits. IGO’s funded exploration focused on new copper discoveries, often deprioritising or avoiding gold-dominant prospects and anomalies, many of which are in close proximity to the Minyari Dome Development.

Multiple exciting high-potential gold ± copper prospects and greenfield targets are primed for follow-up or initial drill testing. Additional project scale interpretation and data modelling is also expected to produce further targets.

⁹ This schedule should be regarded as conceptual in nature, as it is subject to future events and risks, including factors beyond the Company’s control that may affect target timelines.

¹⁰ All references to “IGO” in this document are to IGO Newsearch Pty Ltd, a wholly owned subsidiary of IGO Limited.

Corporate

Capital Raising Activities

Subsequent to end of Quarter, Antipa successfully completed a placement to raise A\$40 million (before costs).

Under the terms of the Placement, Antipa issued approximately 66.7 million shares at a price of A\$0.60 per share. This included participation of Antipa's Directors, who subscribed for 208,334 new shares to raise A\$125,000 (on the same terms as the Placement), subject to shareholder approval at a general meeting of the Company's shareholders to be held in September 2025.

The Placement was strongly supported by high-quality investors, including existing institutional shareholders, long term sophisticated investors and high-quality new global institutional investors, reflecting confidence in Antipa's strategy and the broader potential of the Mynyari Development.

Financial Position

Following the successful completion of recent capital raising activities, Antipa currently has the following securities on issue:

- 647,205,218 ordinary shares; and
- 57,520,952 unlisted options, with a weighted average exercise price of \$0.42.

During the Quarter:

- 9.1 million free attaching placement and rights issue options were exercised, with an exercise price of A\$0.20, for total proceeds of approximately A\$1.8 million (before costs);
- 0.1 million Employee Share Option Plan incentive options were exercised, with an exercise price of A\$0.195;
- Approximately 0.5 million shares were issued to drilling and other contractors, for part payment for services received, totalling A\$0.3M; and
- 1.0 million Employee Share Option Plan incentive options were issued, with an exercise price of A\$0.74.

Subsequent to Quarter end:

- 1.0 million free attaching placement and rights issue options were exercised, with an exercise price of A\$0.20, for total proceeds of approximately A\$0.2M (before costs);
- 0.2 million Employee Share Option Plan incentive options were exercised, with an exercise price of A\$0.20; and
- 4.4 million Employee Share Option Plan incentive options were issued, with an exercise price of A\$0.86.

There were no other changes to the capital structure.

At the end of the Quarter, the Company held cash of approximately A\$36.5 million. Following completion of the Placement on 15 July 2025, the Company held cash of approximately A\$70.6 million¹¹.

Expenditure on Exploration Activities

As set out in Section 2 of the attached Appendix 5B, the Company expended approximately A\$4.9M million on exploration activities during the Quarter.

Payments to Related Parties of the Entity and their Associates

Payments set out in Section 6.1 of the attached Appendix 5B are for Company Directors fees and salaries.

About Antipa Minerals Ltd

Antipa Minerals Ltd (ASX: **AZY**) (Antipa or the **Company**) is a leading mineral exploration company with a proven track record of discovering world-class gold-copper deposits in the highly prospective Paterson Province of Western Australia. The Company remains focused on advancing its exploration and development programmes to unlock the full potential of this richly endowed region, which offers substantial opportunities for profitable mining operations. Antipa's tenement holding, known as the **Minyari Project**, covers over 4,100km² and host total 100%-owned Mineral Resources of 2.5 million ounces (**Moz**) of gold, 84,000 tonnes (**t**) of copper, 666 thousand ounces (**koz**) of silver and 13,000 tonnes of cobalt, situated in a region home to Greatland Resources' Telfer mine and 22Mtpa processing facility, as well as recent large gold-copper discoveries including Rio Tinto-Sumitomo's Winu and Greatland's Havieron.

Antipa's exploration success at Minyari includes the discovery of several significant mineral deposits at its flagship Minyari Dome Gold-Copper precinct. Minyari Dome currently hosts a 2.4Moz gold Mineral Resource at 1.5 grams per tonne (**g/t**) plus copper, silver, and cobalt (**2025 MRE**). A 2024 Updated Scoping Study for Minyari Dome indicated the potential for a substantial standalone development opportunity with further upside potential. This year's Minyari Dome drilling programmes are aimed at further rapid and substantial growth of the existing gold-copper resources at Minyari Dome and have been designed to enhance the value of the current development opportunity while also targeting new significant gold-copper discoveries.

At a regional level, Minyari provides access to further tier one gold-copper discovery opportunities. Significant discovery and resource growth drill programmes are envisaged to test a host of exciting high-potential gold ± copper prospects and greenfield targets primed for follow-up or initial drill testing.

Antipa is well-positioned to continue its resource growth and project development trajectory targeting significant value creation for its shareholders through focused exploration and sensible development in one of the world's most promising gold-copper regions.

Forward-Looking Statements: This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning Antipa Mineral Ltd's planned exploration programme and other statements that are not historical facts. When used in this document, words such as "could," "plan," "estimate," "expect," "intend," "may," "potential," "should," and similar expressions are forward-looking statements. Although Antipa Minerals Ltd believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties, and no assurance can be given that actual results will be consistent with these forward-looking statements.

Telfer and Havieron refer to Greatland Gold plc AIM release dated 18 March 2025, "2024 Group Mineral Resource Statement". Winu refer to Rio Tinto Ltd ASX release dated 22 February 2023, "Changes to Ore Reserves and Mineral Resources". O'Callaghans refer to Newmont Corporation ASX release dated 23 February 2024, "PR as issued - 2023 Reserves and Resources". Nifty refer to Cyprum Metals Ltd ASX release dated 14 March 2024, "Updated Nifty MRE Reaches 1M Tonnes Contained Copper". Calibre refer to Antipa release dated 26 August 2024, "Calibre Gold Resource Increases 19% to 2.5 Moz - Citadel JV". Magnum refer to Antipa release dated 23 February 2015, "Calibre and Magnum Deposit Mineral Resource JORC 2012 Updates".

Table: Minyari Project May 2025 Mineral Resource Estimate

Minyari Dome^{2,3}

Notes to Minyari Project MRE Table above:

- Discrepancies in totals may exist due to rounding.
- The Minyari Dome Mineral Resource has been reported at cut-off grades above 0.4 g/t and 1.5 g/t gold equivalent (**Aueq**); the calculation of the metal equivalent is documented below.
- The 0.4 g/t and 1.5 g/t **Aueq** cut-off grades assume open pit and underground mining, respectively.
- The Satellite Deposit Mineral Resource has been reported at a cut-off grade above 0.4 g/t g/t gold (**Au**).
- The 0.4 g/t **Au** cut-off assumes open pit mining.
- The Minyari Project and its Mineral Resource are 100% owned by Antipa Minerals.

Gold Metal Equivalent Information - Minyari Dome Mineral Resource Gold Equivalent reporting cut-off grade:

The 0.4 g/t and 1.5 g/t **Aueq** cut-off grades assume open pit and underground mining, respectively.

A gold equivalent grade (**Aueq**) has been calculated from individual gold, copper, silver, and cobalt grades. This equivalent grade has been calculated and declared in accordance with Clause 50 of the JORC Code (2012) that it is the Company's opinion that all metals included in this metal equivalent calculation have reasonable potential to be recovered and sold, using the following parameters:

- The metal prices used for the calculation are as follows:
 - US\$ 2,030 /oz gold
 - US\$ 4.06 / lb copper

- US\$ 24.50 /oz silver
- US\$ 49,701 per tonne cobalt
- An exchange rate (A\$:US\$) of 0.700 was assumed.
- Metallurgical recoveries for by-product metals, based upon Antipa test-work in 2017 and 2018, are assumed as follows:
 - Gold = 88.0% Copper = 85.0%, Silver = 85%, Cobalt = 68%
- The gold equivalent formula, based upon the above commodity prices, exchange rate and recoveries, is thus:
 - **Aueq** = (Au g/t) + (Ag g/t * 0.012) + (Cu % * 1.32) + (Co % * 5.88)

Competent Persons Statement – Exploration Results: The information in this document that relates to Exploration Results is extracted from previously announced reports (see reference list below), the Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement, all of which are available to view on www.antipaminerals.com.au and www.asx.com.au. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Various information in this report which relates to Exploration Results have been extracted from the following announcements lodged on the ASX, where further details, including JORC Code reporting tables, can also be found:

For personal use only

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Notes:

- (1) **Citadel Joint Venture (JV) Sale Settlement:** A\$17.0 million in cash proceeds received from the sale of Antipa's non-controlling interest in the Citadel JV Project (before costs). Refer ASX Release dated 25 October 2024, "A\$17 Million Citadel Joint Venture Interest Sale Completes".
- (2) Includes refund of surplus contributions to farm-in and JV partners (-A\$299k), capitalised exploration and evaluation expenditure from the Citadel JV (-A\$70k) and payments received in relation to the termination of the Wilki & Paterson Farm-in Agreements (+A\$779k).
- (3) Excludes gross proceeds of \$40.0 million (before costs) from the Placement announced on 7 July 2025. Following completion of the Placement on 15 July 2025, the Company held cash of approximately A\$70.6 million.

5.	Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	Current quarter \$A'000	Previous quarter \$A'000
5.1	Bank balances	171	76
5.2	Call deposits	9,311	5,527
5.3	Bank overdrafts	-	-
5.4	Other (provide details) – Term Deposits	27,000	34,041
5.5	Cash and cash equivalents at end of quarter (should equal item 4.6 above)	36,482	39,644

6.	Payments to related parties of the entity and their associates	Current quarter \$A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	323
6.2	Aggregate amount of payments to related parties and their associates included in item 2	79

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.

7.	Financing facilities Note: the term 'facility' includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
7.1	Loan facilities	-	-
7.2	Credit standby arrangements	-	-
7.3	Other (please specify)	-	-
7.4	Total financing facilities	-	-
7.5	Unused financing facilities available at quarter end		-
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

8.	Estimated cash available for future operating activities	\$A'000
8.1	Net cash from / (used in) operating activities (item 1.9)	(206)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(4,942)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(5,148)
8.4	Cash and cash equivalents at quarter end (item 4.6)	36,482
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	36,482 ⁽¹⁾
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	7.1 ⁽¹⁾
	<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
	Notes:	
	(1) Excludes gross proceeds of \$40.0 million (before costs) from the Placement announced on 7 July 2025. Following completion of the Placement on 15 July 2025, the Company held cash of approximately A\$70.6 million, which would equate to approximately 13.7 estimated quarters of funding available at item 8.7 above.	
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	N/A	
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
	N/A	
8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
	N/A	
	<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>	

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 29 July 2025

Authorised by: *By the Board*

For personal use only

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
