June 2025 Quarterly Activities Report

WA Kaolin Ltd (“**WA Kaolin**” or the “**Company**”) (**ASX: WAK**) is pleased to provide an update on its activities for the June 2025 quarter.

Highlights

Overall

- **With major increases in confirmed offtakes, the Company is very pleased that operations were upgraded with the two new classifiers in anticipation of strong sales growth.**
- **Production rates of up to 20 tonnes per hour (tph) are being achieved per classifier (including 5tph of a new technical grade kaolin called Kaosil).**
- **With the ability now to produce at higher rates with improved yield, and finer & engineered ceramics products, the company is in a good position to deliver into growing orders.**

Sales and Marketing

- **Sales for the June quarter were 9,876 tonnes for revenue of \$2.14m (an average of A\$223 per tonne).**
- **Forward orders for FY26 Q1 stand at 14,219 tonnes with a value of circa \$3.1m¹**
- **Sales growth has been achieved in Australia and our export markets across a range of end use applications. This diversity builds upon the strong demand in the Fibreglass market that the Company is delivering into.**
- **The Company is in the final stages of the development cycle for WAK’s new paper market kaolin products and anticipate that trials with customers will commence in the next quarter.**

Finance

- **The Company’s cash position stood at \$3.58m as of 30 June 2025.**

¹ Estimate based on a selling price of \$223 per t

Operations

- The Company has trained additional plant operators to allow for 24-hrs/6-days production operating one classifier and will respond with additional shifts as required.
- The two new classifiers have both now individually achieved production rates of up to 20 tonnes per hour, including 5 tph of Kaosil. Optimising the plant systems both before and after the classifiers has commenced with low-cost improvements engineered and ordered, and expected to be completed by September.
- Therefore, when both classifiers are deployed and the systems feeding them are fine-tuned and/or modified to match the capacity of the classifiers, the first train of the plant will significantly exceed the 25tph nameplate capacity (25tph implies 200,000 tonnes per year at full 24/7 operation).
- The next mining campaign is well underway to bring sufficient ore to the plant ahead of winter rains.

Figure 1 - Mining Operations at Wickepin

- WAK has built its in house mining capability which aids quality control and reduced the extraction costs circa 10%.
- The Company remains committed to and focussed on continuous improvement of safety awareness and working conditions, and is pleased to report another accident free quarter.

Research & Development (R&D)

- Follow up activities continue in the rollout of the new engineered clay grades for the ceramics market. The provisional specifications for EC-SAN (sanitary ware) and EC-PLA (tableware and plasticity) are gaining recognition and acceptance, and sales are growing.
- R&D continues to support the development of finer grades for the paper and paint markets.
- Additional efforts will take place in August to confirm the suitability of Company's kaolin for geopolymer concrete applications ('green cement').

Sales

WA Kaolin's sales for the June quarter were 9,876 tonnes for revenue of A\$2.14m at an average of A\$223 per tonne. The forward order book for FY2026 Q1 currently stands at 14,219 tonnes.

During the quarter we developed a new kaolin grade for a ceramics customer in China. The new grade has low iron and titanium impurity levels and represents the highest quality product in our K99 range. Post quarter we received our first trial order for this new premium grade.

We visited two major paper market customers in China during the quarter, and we received strong interest from both customers who have ordered sample quantities of our K99 grades for further analysis and development.

The Company is in the final stages of the development cycle for WAK's new paper market kaolin products. With samples of the new paper products being introduced to customers in July/August, WAK anticipates that in the coming quarter it can secure its first customer orders into this important segment of the kaolin market.

In Australia, we have recommenced supplying kaolin to a plasterboard customer based in Western Australia. The customer was previously using a fly ash product, and we have successfully substituted that product with our kaolin and we expect regular monthly orders starting in the next quarter and onwards.
