

QUARTERLY ACTIVITIES REPORT FOR THE PERIOD ENDED 30 JUNE 2025

Culpeo Minerals Limited (**Culpeo** or the **Company**) (ASX:CPO, OTCQB:CPORF) is pleased to report on its activities for the quarter ended 30 June 2025 (the **Quarter**).

ACTIVITY HIGHLIGHTS

LANA CORINA PROJECT

- A well-defined 250m by 250m copper porphyry target was confirmed at the **Vista Montana Prospect**, where surface sampling results returned up to 2.62% copper, 2.07g/t gold, 11.2g/t silver, 749ppm antimony and 117.5ppm bismuth¹.
- A drilling program is scheduled to commence on completion of drilling at the Fortuna Project.
- The program has been designed to test the potential to link the Lana Corina and Vista Montana Prospect areas and **confirm a 3km continuous, copper trend**¹⁵.

FORTUNA PROJECT

- Multiple new Iron Ore Copper Gold (IOCG) and porphyry-style copper-gold targets have been identified at the **La Florida Prospect**, exhibiting well-defined alteration and geochemical zonation associated with copper mineralisation².
- The most recent round of surface sampling has revealed multiple zones of high-grade copper mineralisation, defining a **highly prospective corridor over 1.7km in length and 500m in width, with assays returning up to 2.70% copper**⁴.
- Trenching and surface sampling at La Florida to date includes:
 - 21.00m @ 1.10% Cu (FLO1);
 - 6.00m @ 2.31% Cu (FLO26);
 - 10.00m @ 2.70% Cu (FLO67); and
 - 30.00m @ 1.00% Cu (FLO70).
- **Diamond drilling at La Florida is underway, with** a four-hole (1,400m) program targeting porphyry-style mineralisation across multiple target zones.
- **Assay results are expected in Q3 2025**⁴.

For personal use only

JUPITER PROJECT

- An agreement was entered into for the acquisition of **up to 100% of the highly prospective Jupiter Copper Project**, covering approximately 4,000ha in the Antofagasta region of Chile (refer Figure 5).
- Due diligence surface exploration (Culpeo 2024) identified two large zones of anomalous copper mineralisation with grab samples returning grades of **up to 4.33% copper and 3.24g/t gold**.
- This acquisition **represents a strategic addition to Culpeo's portfolio, further solidifying its position as a leading copper explorer in Chile's** low-altitude, **prolific** Coastal Cordillera.

CORPORATE

- **A favourable amendment to the earn-in schedule was secured for the acquisition of the Lana Corina Project**, with Culpeo retaining the option to increase its ownership in Lana Corina up to 80%.
- Negotiation for a new long-term access agreement with the local Soruco community to **support drilling activities at Lana Corina** commenced.
- **A strongly supported equity placement raised A\$3.02 million** (before costs) was completed, with proceeds to be directed towards:
 - **Lana Corina Project** - up to 4,000m of maiden drilling at Vista Montana prospect and follow up drilling at the Lana Corina Prospect;
 - **Fortuna Project** - exploration drilling targeting a porphyry copper-gold system at the La Florida Prospect; and
 - **Jupiter Project** - initial exploration activities across priority areas including two copper geochemical anomalies measuring up to 5km by 3km (footprint).
- Ms Michaela Stanton-Cook was **appointed Joint Company Secretary of the Company** on 3 July 2025, with Ms Sue Wong to continue in her role as Joint Company Secretary.
- Culpeo held its Annual General Meeting during the Quarter, on 1 May 2025 at which all resolutions put forward were passed.

At Quarter end, the Company had A\$0.159 million in cash and cash equivalents and zero debt.

Post quarter end the Company receipted approximately A\$2.49 million before costs being Tranche 2 of a **A\$3.02 million raise**.

ACTIVITY DETAIL

LANA CORINA PROJECT

The Lana Corina Project is located in the coastal belt of Chile, approximately 350km north of Santiago. Lana Corina is situated within a northeast-southwest structural corridor extending over more than 3km of strike¹⁵. High-grade copper mineralisation is associated with outcropping breccia pipes, which occur in the upper levels of a large copper-bearing porphyry-hosted mineralised system.

3km north of Lana Corina, Culpeo has delineated the high priority Vista Montana target which is believed to be part of the same mineralised system as Lana Corina.

Lana Corina Prospect

In 2024, Culpeo announced a significant, near-surface, high-grade copper discovery at the Lana Corina Prospect, with a standout intercept of **454m @ 0.93% CuEq (refer Figure 1)**. This intersection included three zones of notable copper and molybdenum mineralisation:^{5,6}

- 78m @ 1.24% CuEq from 200m;
- 68m @ 1.14% CuEq from 320m; and
- 40m @ 1.20% CuEq from 394m.

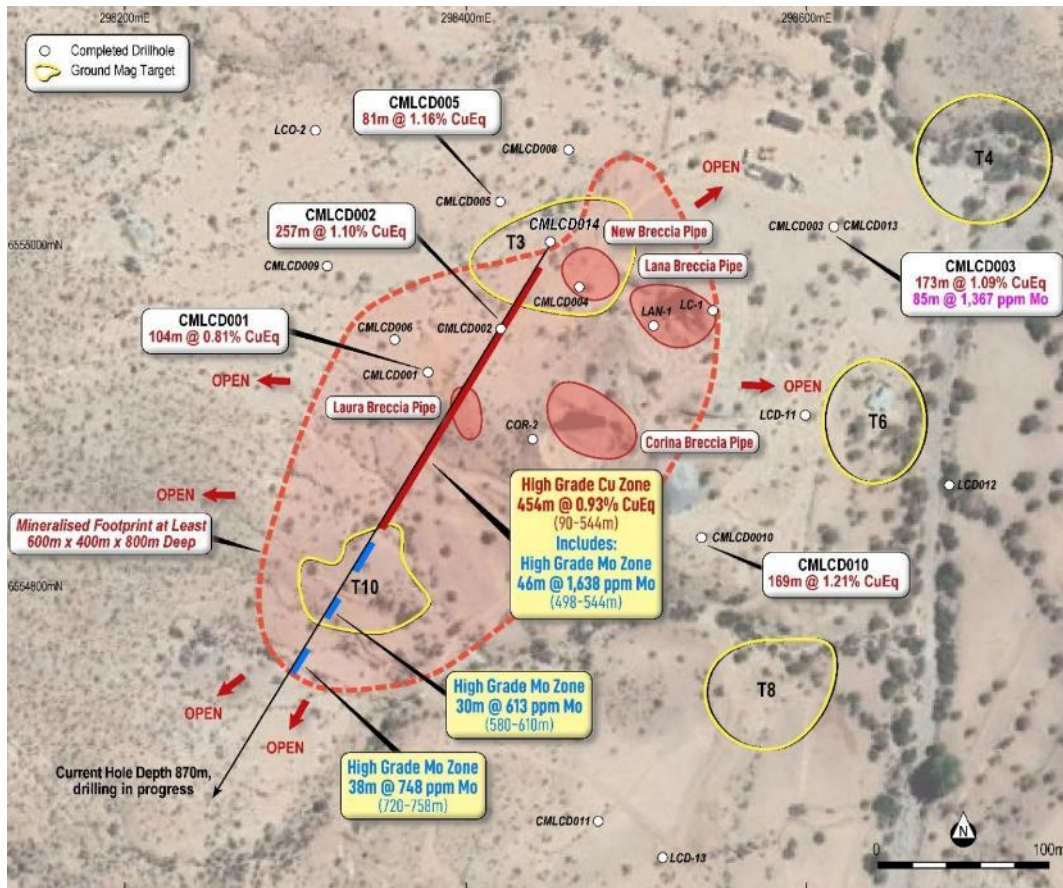

Figure 2: Plan view of the Lana Corina Prospect area, highlighting the outcropping copper discovery^{5, 7, 8, 9, 10, 11, 16}

Vista Montana

Vista Montana is located approximately 3km along strike from the Lana Corina discovery, forming part of a potentially large, potentially linked mineralised system¹⁵. Results from the latest round of surface sampling confirm a well-defined copper porphyry target, exhibiting typical zoned alteration and associated geochemical zonation commonly associated with copper-bearing porphyry intrusions. The core of the porphyry target at surface, measures approximately 250m by 250m and is interpreted to represent a “finger” of a larger, buried intrusive identified through geophysical surveying (refer to Figure 3 and 4).

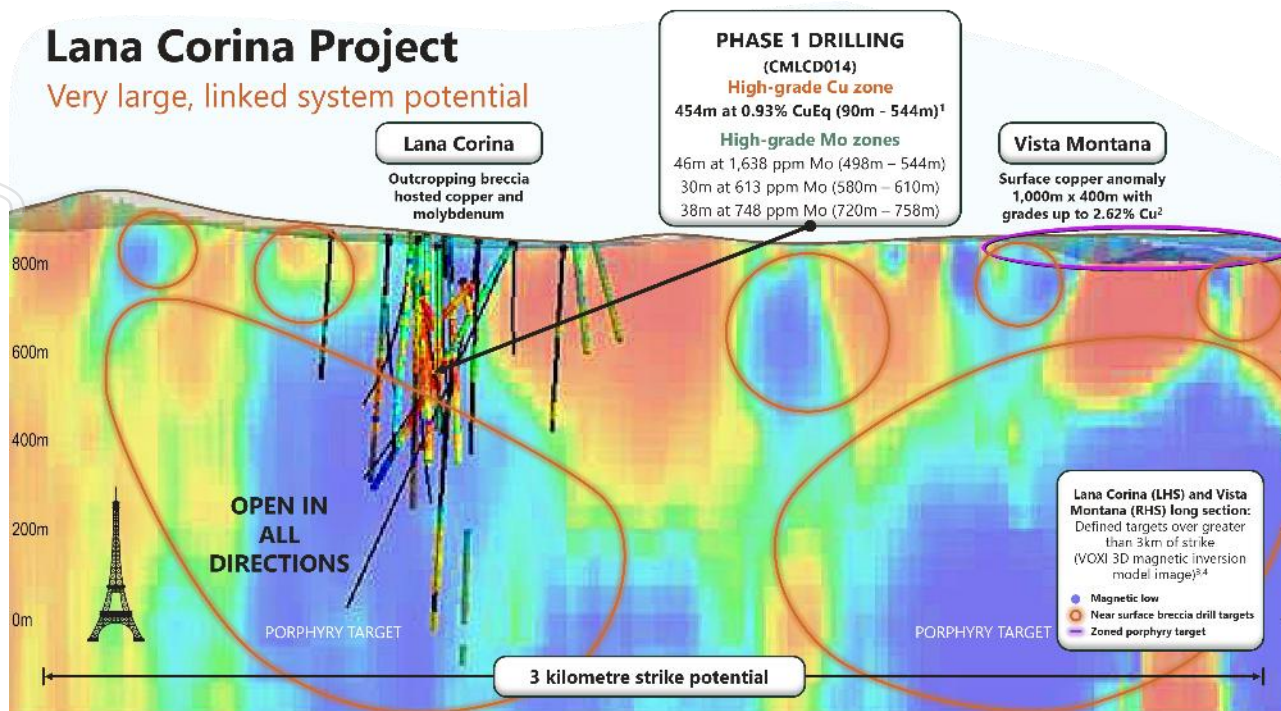

Figure 4: Lana Corina and Vista Montana mineralised trend and location of the Vista Montana zoned porphyry target above a larger interpreted porphyry target. Image of inverted magnetics ^{6, 12, 13, 14}.

A diamond drilling program has been planned to commence following the completion of drilling at the Fortuna Project.

Due to the proximity of the small settlement of Soruco, located approximately 750m northwest of the Vista Montana target area, the Company is in the process of negotiating a long-term access agreement with the Soruco community to facilitate both the initial drilling and future exploration programs at Vista Montana. It is expected that an access agreement will be finalised during Q3 2025.

FORTUNA PROJECT

The Fortuna Project is located approximately 25km north of the Company’s Lana Corina Project, hosting numerous historical small-scale workings that targeted near-surface, high-grade mineralisation.

La Florida Prospect

The La Florida Prospect has been identified as a high-priority drill target and exhibits strong similarities to the lithologies and alteration styles observed at the Company’s Lana Corina discovery, indicating significant potential to host similar, porphyry related high-grade copper mineralisation^{14, 15, 16}.

Subsequent to the end of the Quarter, on 7 July 2025, Culpeo announced a maiden diamond drilling program has commenced at La Florida Prospect (Figure 5). The program is initially scheduled for four diamond holes for approximately 1,400m to test the newly defined high priority copper targets.

On 21 July 2025, the Company announced results from a trenching and surface sampling program at La Florida, which revealed multiple new zones of wide, high-grade copper mineralisation, defining a highly prospective corridor over 1.7km in length and 500m in width.

Notable zones of surface copper mineralisation, included:

- 21.00m @ 1.10% Cu (FLO1);
- 6.00m @ 2.31% Cu (FLO26);
- 3.00m @ 2.25% Cu (FLO49);
- 10.00m @ 2.70% Cu (FLO67);
- 30.00m @ 1.00% Cu (FLO70);
- 6.00m @ 1.12% Cu (FLO71); and
- 6.00m @ 1.29% Cu (FLO77).

JUPITER PROJECT

Culpeo announced on 14 April 2025 it had entered into a binding, staged option agreement with Excava Holdings SpA (**Excava**) to acquire up to 100% of the highly prospective Jupiter Project - a strategic acquisition offering large-scale, high-grade copper exposure in the Antofagasta region of Chile. The concession package includes multiple small-scale mines (refer Figure 6) and **two distinct zones of identified copper mineralisation, with surface samples returning grades up to 4.33% Cu and 3.24g/t Au.**

The acquisition is structured as a farm-in style arrangement, whereby Excava has transferred the concessions into a Special Purpose Vehicle (**SPV**). Culpeo will acquire staged interests in the SPV subject to meeting exploration and payment milestones, enabling accelerated ownership, and to ensure operational efficiency and clear delineation of ownership rights.

Financial terms of the acquisition include:

- **Initial Payment:** US\$40,000 within five business days of executing the binding agreement.
- **Year 1:** US\$80,000 on the first anniversary of the execution date.
- **Year 2:** US\$200,000 on the second anniversary.
- **Year 3:** US\$300,000 on the third anniversary, with Culpeo earning a 51% interest in the Project upon completion of 2,000m of drilling.
- **Year 4:** US\$380,000 on the fourth anniversary.
- **Year 5:** US\$1,000,000 on the fifth anniversary, with Culpeo acquiring an additional 29% interest (totalling 80%) upon completing an additional 2,000m of drilling.
- **Feasibility Study:** US\$1,100,000 upon announcing a positive feasibility study under the JORC Code, securing 100% ownership of the Project.

CORPORATE ACTIVITY

Amended Lana Corina Earn-In Schedule

On 28 April 2025, the Company advised that it has agreed to an amended Earn-In Schedule for the acquisition of the Lana Corina Project, Chile (**Lana Corina**) (the **Earn-In Schedule**). This amendment allows Culpeo to retain the option to increase its ownership in Lana Corina to an 80% aggregate interest through a further four staged payments at six-monthly intervals (refer to Table 1), and a right of first refusal to acquire the final 20%, for 100% ownership. Culpeo has sole discretion as to whether the consideration at each remaining stage is settled in shares or cash.

**Table 1:** Amended Lana Corina Project Earn-In Schedule

Stage	Period from original signing	Consideration*	Work Commitment	Stage Interest	Aggregate Interest
	(Months)	(US\$)	Description	(%)	(%)
1	Signing	100,000	N/A	0	0
2	12	150,000	US\$1M expenditure	20	20
3	24	250,000	US\$1M expenditure	30	50
4	36	100,000	N/A	0	50
5	48	750,000	N/A	5	55
6	54	750,000	N/A	10	65
7	60	1,650,000	N/A	5	70
8	66	1,650,000	N/A	10	80

Equity Placement

On 9 May 2025, Culpeo announced a placement comprised of a two-tranche issuance of approximately 303 million new fully paid Ordinary Shares to professional and sophisticated investors, existing Shareholders, and the Culpeo Board at an issue price of \$0.01 per share (**Placement Shares**), raising approximately \$3.02 million (before costs):

- **Tranche 1:** Comprised approximately 32.6 million Placement Shares under ASX Listing Rule 7.1 and approximately 21.7 million Placement Shares under ASX Listing Rule 7.1A; and
- **Tranche 2:** Comprised approximately 248.0 million Placement Shares, including Director participation, approved at a General Meeting of the Company's Shareholders on 3 July 2025.

Participating investors received one (1) free attaching Unlisted Option for every two (2) Placement Shares subscribed for, subject to Shareholder approval at the General Meeting (Attaching Options). The Attaching Options are Unlisted Options and have an exercise price of \$0.0175 and 11 July 2028 expiry. The placement was completed subsequent to the end of the Quarter (refer ASX announcement dated 11 July 2025).

Joint Company Secretary Appointment

Ms Michaela Stanton-Cook was appointed Joint Company Secretary of the Company on 3 July 2025, with Ms Sue Wong to continue in her role as Joint Company Secretary.

Ms Stanton-Cook is a Chartered Secretary with national governance service provider, Source Governance and is experienced in providing company secretarial and corporate advisory services to ASX listed and private companies across various industries. Michaela is a qualified lawyer and member of the Governance Institute of Australia.

Cash Position at Quarter End

During the Quarter, the Company spent A\$0.203 million on exploration activities, primarily focused on sampling programs and assays. At Quarter end, the Company had A\$0.159 million in cash and cash equivalents and zero debt.

Post quarter end, a General Meeting was held on the 3 July 2025 with all resolutions duly passed.

The Company receipted approximately \$2,492,094 before costs, being Tranche 2 of a **A\$3.02 million raise** with proceeds to be directed towards:

- **Lana Corina Project** - up to 4,000m of maiden drilling at Vista Montana prospect and follow up drilling at the Lana Corina Prospect;
- **Fortuna Project** - exploration drilling targeting a porphyry copper-gold system at the La Florida Prospect; and
- **Jupiter Project** - initial exploration activities across priority areas including two copper geochemical anomalies measuring up to 5km by 3km (footprint).

Payments to Related Parties

As outlined in the Appendix 5B for the Quarter ending 30 June 2025 (Sections 6.1 and 6.2), approximately A\$0.158 million in payments were made to related parties and/or their associates, which comprised remuneration for Non-Executive Director fees and Consulting fees.

This announcement has been authorised by the Board of Directors of Culpeo Minerals Limited.

ABOUT CULPEO MINERALS LIMITED

Culpeo Minerals Limited is committed to copper exploration, discovery and development, with strategic assets in Chile, the world's leading copper-producing nation. The Company is focused on high-grade copper systems within Chile's infrastructure-rich Coastal Cordillera.

Culpeo has recently announced a significant copper and molybdenum discovery at the Lana Corina Project and acquired the highly prospective Fortuna and Jupiter copper-gold projects.

The Lana Corina and Fortuna Projects are located in Chile's Coquimbo Region, approximately 350 kilometres north of Santiago, in proximity to the world-class Los Pelambres mine. The Jupiter Project is situated in the Antofagasta Region, renowned for hosting multiple tier-one copper and gold operations, including Escondida, Collahuasi and El Teniente.

These project areas feature substantial outcropping high-grade copper systems, and importantly, they are supported by well-established regional infrastructure, including roads, power transmission lines, water sources and a strong local mining industry- factors critical in enabling cost-effective and efficient development.

The Company is led by a highly experienced board and management team with more than two decades of operational and exploration experience in Chile. Culpeo's objective is to deliver shareholder value through the exploration, acquisition and development of high-grade, near-surface copper systems.

COMPETENT PERSONS' STATEMENTS

The information in this announcement that relates to the Exploration Results and Geophysical Results as listed in the table below is based on, and fairly represents, information and supporting documentation prepared by the Competent Person whose name appears in the same row, who is a Director or shareholder of or independent consultant to the Company and is a Member of the Australasian Institute of Mining and Metallurgy (AusIMM), Australian Institute of Geoscientists (AIG), Australian Society of Exploration Geophysics (ASEG), or a Recognised Professional Organisation (RPO). Each person named in the table below has sufficient experience which is relevant to the style of mineralisation and types of deposits under consideration and to the activity which he has undertaken to quality as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves.

Activity	Competent Person	Membership	Status
Exploration Results (until 31 Oct 2024)	Mr Maxwell Tuesley (Shareholder and former Director)	AusIMM	Member
Exploration Results (after 31 Oct 2024)	Mr Zeffron Reeves (Director and Shareholder)	AIG	Member
Geophysical Results	Mr Nigel Cantwell (Consultant)	AIG and ASEG	Member

The information relating to Exploration Results and Geophysical Results in this announcement or as otherwise noted in this announcement, is available from the Company's website at www.culpeominerals.com.au or on the ASX website www.asx.com.au. The Company confirms that it is not aware of any new information or data that materially affects the Exploration Results and Geophysical Results information included in previous announcements. The Company confirms that the form and context in which the applicable Competent Persons' findings are presented have not been materially modified from the previous announcements.

FORWARD-LOOKING STATEMENTS

This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning Culpeo Minerals Limited's planned exploration program and other statements that are not historical facts. When used in this document, the words such as "could," "plan," "estimate," "expect," "intend," "may", "potential," "should," and similar expressions are forward-looking statements. Although Culpeo Minerals Limited believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties, and no assurance can be given that actual results will be consistent with these forward-looking statements.

Appendix B: Technical Details

Copper Equivalent (**CuEq**) values: Assumed commodity prices for the calculation of **CuEq** is Cu US\$3.00/lb, Au US\$1,700/oz, Mo US\$14/lb and Ag US\$20/oz. Recoveries are assumed from similar deposits: Cu = 85%, Au = 65%, Ag = 65%, Mo = 80%, Cu Eq (%) was calculated using the following formula: $((Cu\% \times Cu \text{ price } 1\% \text{ per tonne} \times Cu \text{ recovery}) + (Au(g/t) \times Au \text{ price per g/t} \times Au \text{ recovery}) + (Mo \text{ ppm} \times Mo \text{ price per g/t} \times Mo \text{ recovery}) + Ag \text{ ppm} \times Ag \text{ price per g/t} \times Ag \text{ recovery}) / (Cu \text{ price } 1\% \text{ per tonne} \times Cu \text{ recovery})$. Cu Eq (%) = Cu (%) + $(0.54 \times Au (g/t)) + (0.00037 \times Mo (ppm)) + (0.0063 \times Ag (ppm))$. It is the Company's opinion that all elements included in the metal equivalents have a reasonable potential to be recovered and sold.
