

Talga commences trading on OTCQX in U.S.

Battery materials and technology company Talga Group Ltd (“**Talga**” or “**the Company**”) is pleased to announce it has commenced trading on the OTCQX® Best Market in the U.S. under the ticker TLGRF.

Talga commenced trading on the OTCQX on Friday 1 August 2025, graduating from the lower-level Pink® market in the United States.

Talga will also continue to trade on the ASX.

The OTCQX quotation is anticipated to boost trading liquidity and market visibility in the United States and enhance Talga’s access to the large pools of capital managed by U.S. institutional and individual investors.

The OTCQX provides efficient, real-time access for institutional and retail investors in North America to trade Talga shares, offering them exposure to the critical raw materials and battery sectors.

OTC trading is non-dilutive to existing Talga shareholders as no new shares are being issued to enable trading on the OTCQX and the OTC imposes no additional compliance or regulatory standards on the Company as it is already ASX-listed.

Talga qualified for admittance to OTCQX after demonstrating it meets the high financial standards, best-practice corporate governance and compliance with applicable securities laws.

Talga Group CEO, Martin Phillips, commented: *“Joining the OTCQX will provide North American investors with a more convenient way to trade Talga shares and broaden our exposure to the larger U.S. investment community. We recently announced our U.S. patent for graphite battery anode which supports our goal of expansion of our operations in the future. We are very pleased that U.S. investors will now have access to timely information and news to assist in the analysis, valuation and trade of our securities at a pivotal time for graphite anode supply chains.”*

Talga also trades over the counter on the Börse Frankfurt under ticker TGX, which continues to support exposure to the European market.

Authorised for release by the Board of Directors of Talga Group Ltd.
