

## CONCRETE SLAB POURED AT SUBANTANDO FERTILIZER PLANT

Minbos Resources Limited (ASX:MNB) (“Minbos” or the “Company”) is pleased to announce a key construction milestone in the development of its Subantando Fertilizer Plant in Angola, with the successful pouring of concrete for the plant’s main structural slab (Fig.1).

Figure 1 – Subantando Fertilizer Plant, located in Cabinda, Angola – concrete pour for the slab underway.

This achievement marks a significant step forward in the construction schedule and reflects the continued momentum of the Cabinda Phosphate Project as the Company progresses towards commissioning and production.

### Key Highlights:

- Main concrete slab for the process equipment poured at Subantando Fertilizer Plant.
- Civil works across the remainder of site continue to progress in a timely manner.
- Construction activities supported by strong collaboration between local contractors, project engineers, and Minbos site teams.

8<sup>th</sup> August 2025

**ASX ANNOUNCEMENT**

- Structural works are now in a position to commence once funding for phase 2 is finalised, including fabrication and erection of the steel framework and installation of plant equipment.

**Minbos Managing Director Lindsay Reed commented:**

*“This is a major milestone for our Subantando Fertilizer Plant and a proud moment for our team in Angola. With the slab in place, the project enters an exciting phase of vertical construction as we move closer to delivering Angola’s first locally produced phosphate fertilizer.*

*This achievement demonstrates our commitment to building a world-class fertilizer facility that will support Angola’s agricultural transformation.”*

Minbos remains focused on completing construction in line with its development schedule, with first production targeted for 2026.

Further updates on construction progress and project milestones will be provided in due course.

**About Minbos:** Minbos is developing a nutrient business in Angola establishing customer relationships with distributors and food aggregators and providing education to commercial and family farmers through extension services. The Cabinda Phosphate Project will supply the Primeiro product to address the phosphate deficiency in Angolan soils. The Fertiafrica partnership will supply granulated Primeiro+ products (NPKS). The Capanda Green Ammonia project will produce nitrogen for the Primeiro+ products. Minbos aims to link Angolan farmers with inputs and markets to make Agriculture bigger than Oil.
