Improving retail sales momentum throughout FY25, particularly in 2H and 4Q of FY25, supports cautiously optimistic sales outlook for FY26

MOMENTUM OF RETAIL SALES GROWTH ACCELERATED FROM 2Q FY25 ONWARDS

- Improved rate of retail sales growth likely reflects confluence of:
 - Population growth
 - Strong employment market
 - Accumulated benefit of income tax reductions, effective 1 July 2024
 - Federal Government initiatives to reduce impact of higher cost of living
 - 75 bps reduction in RBA's official cash rate in 2025 to date, with expectations of further cuts, and
 - Vicinity's enhanced portfolio via acquisitions, divestments, retail remixing and developments

TOTAL PORTFOLIO RETAIL SALES UP +2.8% IN FY25

- Strengthening from +2.0% (1H) to +3.8% (2H)
- Specialty and mini major retail sales improved to +3.7% in FY25
- Strong performance from mini majors reflects the success of high-performing specialty retailers expanding into larger-format, flagship stores

- Sales momentum accelerated in 2H to 4.7%, with growth rising from 3.1% (3Q) to 6.0% (4Q)
 - Leisure sales up +13.8% driven by athleisure, video gaming and pop culture trends
 - Jewellery sales up +8.2%, with luxury a key contributor

 - Homewares sales up +6.4% led by electrical and traditional homewares sales

SPECIALTY SALES PRODUCTIVITY INCREASED 2.3%

LEASING

Positive leasing metrics reflect quality asset portfolio and tenant demand, amid tightening retail supply¹ and strengthening retail sales growth

STRONG METRICS REFLECT ENHANCED PORTFOLIO QUALITY AND RETAILER DEMAND

- Achieved a positive leasing spread of +2.5% (FY24: +1.1%)
- Representing 36% of total rent transacted, Apparel & Footwear category achieved +4.1% leasing spread, primarily driven by Chadstone and Outlet centres
- Holdover income has reached a historic low of 2.1%² (Jun-24: 2.7%)
- Occupancy strengthened to 99.5%, despite elevated number of retailer administrations (Jun-24: 99.3%)
- Alongside proactively reducing exposure to high-risk retailers, 78% of administrations in FY25 were re-leased and at favourable spreads
 - Specialty occupancy cost ratio of 14.1% highlights opportunity for continued rent growth (Jun-24: 13.7%, pre-COVID: c.15.0%)

STRATEGIC LEASING SUPPORTS CURRENT AND FUTURE YEAR INCOME GROWTH

- Disciplined approach to negotiating new leases where structure, tenure and value of rent written support current and future income growth
- Average annual rent escalators on completed deals remained strong at +4.8% (FY24: +4.8%)
- Improving portfolio quality and strategic tenant remixing supported the 18% growth in specialty sales productivity delivered since FY19

SPECIALTY OCCUPANCY COST RATIO (OCR) SUPPORTS CONTINUED LEASING TENSION AND RENT GROWTH

Coupled with strong occupancy, Vicinity's OCR highlights potential for continued positive leasing tension and future rent growth

- Portfolio repositioning
- Tightening supply of retail floorspace
- Retailer demand for longer-term leases in larger store formats at equivalent or higher rent per sqm

- **Chadstone:** Completion of major development a catalyst for sales growth acceleration as well as highly productive luxury tenants
- **Outlet Centres:** Strong retailer demand and a tightly held asset category with occupancy at 99.9% in Jun-25, price tension will underpin ongoing rental growth

- **Net corporate overheads** – down 8.3%, driven by disciplined cost management through FY25 and capitalisation of development personnel costs for 49% ownership share of Chatswood Chase
- **Net interest expense** – up 9.6% driven by higher weighted average cost of debt and transaction timing

AUSTRALIAN SHOPPING CENTRES ARE RESILIENT THROUGH CYCLES

Emerging shortage of retail GLA per capita driven by population growth and reduced investment pipeline

NATIONAL SHOPPING CENTRE DEVELOPMENT SUPPLY PIPELINE BY ASSET¹

(new developments and extensions, sqm)

GLA PER CAPITA AND HISTORICAL AND FORECAST RETAIL SALES¹

UNDERSUPPLY OF RETAIL PROPERTY EXPECTED

- Majority of new retail supply is expected in Neighbourhood centres – a segment where Vicinity has limited exposure, reducing potential competitive impact
- Tight planning controls preference existing retail assets or new supply on urban fringes, further constraining central supply
- GLA per capita is 0.66 sqm; forecast to reduce to 0.63 sqm by 2033¹ which reinforces long-term supply-demand imbalance
- Sector benefits from concentrated ownership by large institutions; underpins rational market where new supply is more measured

SHORTAGE OF RETAIL GLA PER CAPITA SUPPORTS EARNINGS RESILIENCE

- Structural undersupply of retail space to create positive price tension, supporting rent growth and increased occupancy
- Retail landlords are increasingly able to curate tenant mixes and retail offerings that maximise retail sales productivity, enhancing asset performance

1. FFO and AFFO are two key metrics Vicinity uses to measure its operating performance. FFO and AFFO are widely accepted measures of real estate operating performance. Statutory net profit is adjusted for fair value movements, certain unrealised and non-cash items, amounts which are capital in nature and other items that are not considered to be in the ordinary course of business to calculate FFO. FFO is further adjusted for investment property maintenance capital and static tenant leasing costs incurred to calculate AFFO. FFO and AFFO are determined with reference to the guidelines published by the Property Council of Australia and are non IFRS measures.
