

RC Drilling Commences Across Arrakis

- A **~2,000m RC drilling program** has commenced across the **Arrakis Prospect**.
- The program will include six to ten RC holes **below recent air-core intercepts** that define the **more than 2.2km mineralised Arrakis trend**, including:
 - **11m @ 2.1 g/t Au^{*1}** from 90m in **25IWBAC023**, including
 - **7m @ 3.1 g/t Au** from 92m.
 - **12m @ 1.1g/t Au^{*1}** from 45m in **25IWBAC032**.
 - **12m @ 0.5 g/t Au^{*1}** from 70m to **EOH** in **25IWBAC032**.
 - **11m @ 1.4 g/t Au^{*1}** from 71m in **25IWBAC044**, including
 - **6m @ 2.3 g/t Au** from 72m.
 - **22m @ 0.5g/t Au^{*1}** from 75m in **25IWBAC099**, including
 - **7m @ 1.2 g/t Au** from 75m.
 - **5m @ 0.7 g/t Au^{*1}** from 112m to **EOH** in **25IWBAC052**.

**1: Previously released air-core drilling results see ASX releases dated 10 July 2025, 31 July 2025 & 18 August 2025.*

- The anticipated **completion time for the RC program is 10-16 days**, with assays expected within 5-7 weeks.
- The results from the **remaining 14 holes** from the large-scale Caladan air-core program are expected in the coming weeks.
- **Heritage surveys to clear 200m spaced lines across the Arrakis Prospect** are scheduled to commence in the next week.

target area. The RC drilling program follows a string of broad-spaced air-core drilling intercepts that have defined the **more than 2.2km striking mineralised Arrakis structure** (see ASX releases **10 July 2025, 31 July 2025 & 18 August 2025**). The **6 to 10 hole RC program** aims to **test the fresh rock positions** below recent air-core intercepts (see **Figure 1**) to confirm mineralisation continuity within fresh rock and **define the geometry of the host structures**. The completion time for the RC program is 10-16 days, and assays are expected within 5-7 weeks.

The **Caladan** target area, including the **Arrakis Prospect** (*within E 53/1843, E 53/2304, E 53/2192 and E 53/1882*), is part of the broader **Ironstone Well-Barwidgee Gold Project** (see **Figure 6**), located **60km south** of the **Jundee** mining complex (**ASX: NST**), and **18km north of the recent Siona discovery**, within the Yandal Greenstone Belt.

Looking Ahead

The Company maintains a robust cash position and a very active exploration schedule for the second half of 2025. Notable near-term activities and news flow include;

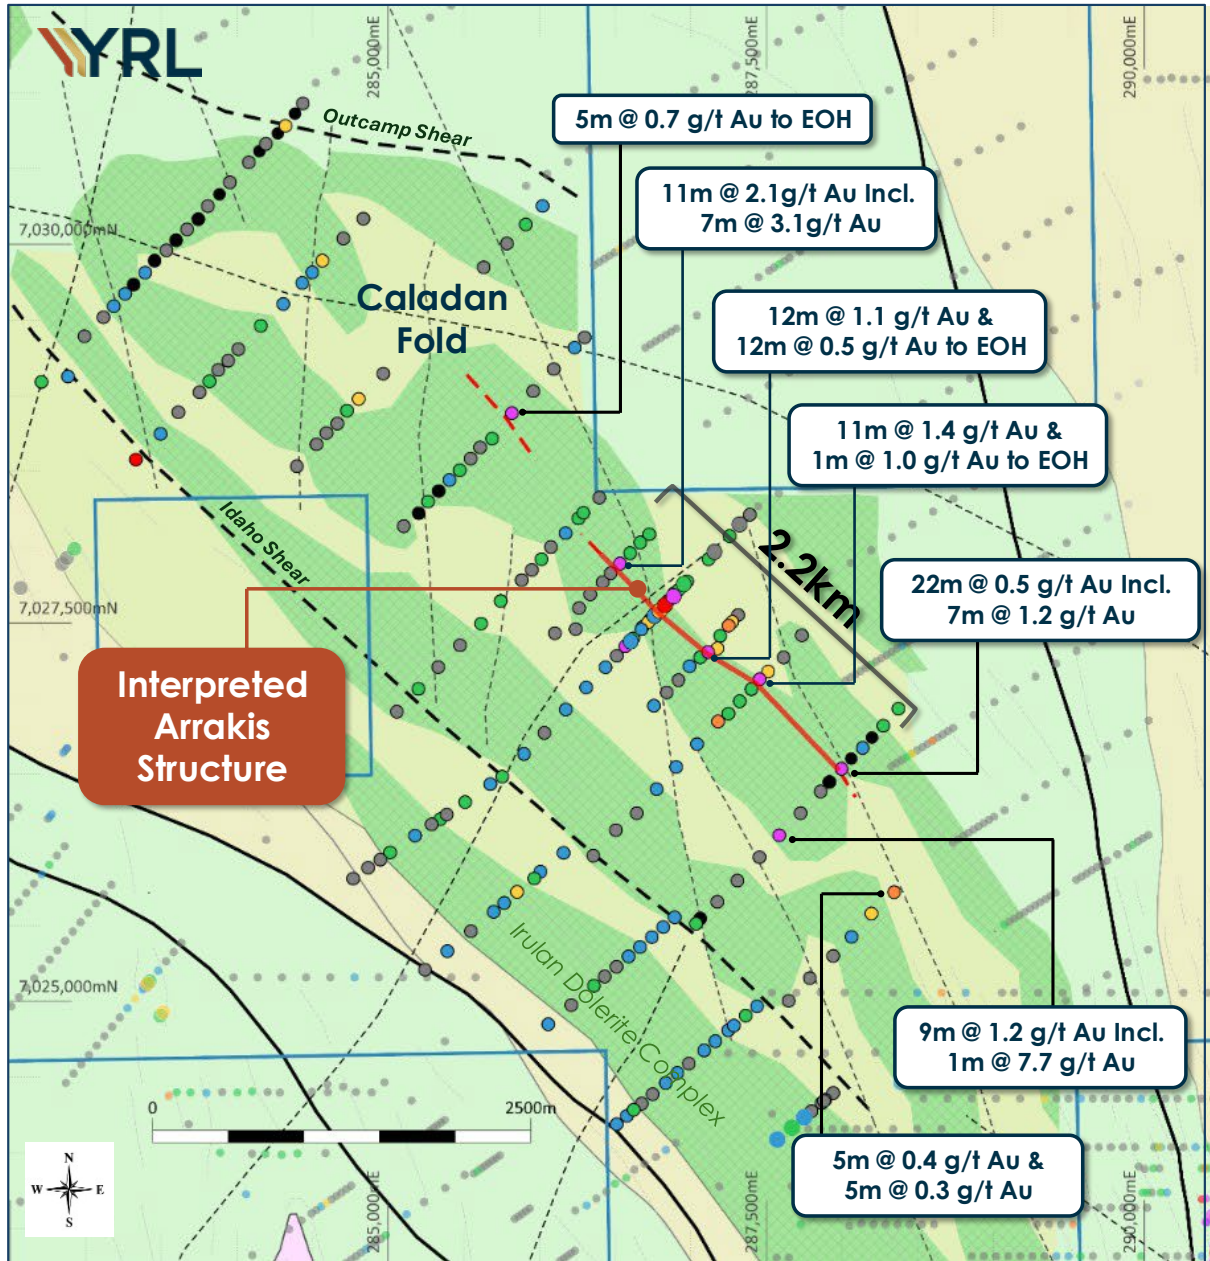

1. **Results** from the remaining **14 holes** from the **large-scale Caladan AC program** are anticipated over the coming weeks;
2. **The completion of RC drilling across the Arrakis Prospect** within 10-16 days;
3. **Heritage surveys** to clear closer spaced lines across the **Caladan target area**, including the **Arrakis Prospect**, are scheduled for **late August and September**;
4. **RC drilling results** from the **Arrakis Prospect** are expected in **5-7 weeks**;
5. The **second phase of AC and RC drilling** will commence after the August heritage survey;
6. First results from **AC drilling** across the **New England Granite target area** are anticipated in the coming weeks;
7. **Completion and settlement** of the Gordons Gold Project **Tenement Sale Agreement** for a total consideration of **A\$2.81m** in cash and Horizon Minerals (**ASX: HRZ**) Shares in the coming months.

Figure 1: A collar plan over the Caladan target area, showing simplified bedrock geology interpretation across the Caladan and northern Irulan target areas (interpretation based on bottom-of-hole geology). The locations of effective historic drilling (>20m depth, excluding all Eagle Mining and Hunter Resources RAB drilling from 1995) and all Yandal drilling are plotted. Collars are thematically coloured by max Au (g/t) in the hole. Please note that **collars coloured black represent holes that have been drilled, with assays yet to be received.**

About Yandal Resources Limited

Yandal Resources has a portfolio of advanced gold exploration projects in the highly prospective Yandal Greenstone Belts of Western Australia.

Competent Person Statement

The information in this document related to Exploration Targets and Exploration Results, geology and data compilation is based on information reviewed or compiled by Mr Christopher Oorschot, a Competent Person who is a Member of The Australasian Institute Geoscientists. Mr Oorschot is the Managing Director of the Company, is a full-time employee and holds shares and options in the Company. Mr Oorschot has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Oorschot consents to the inclusion in this announcement of the matters based on this information in the form and context in which it appears.

The information in this announcement that relates to the Flushing Meadows, Mt McClure and Gordons Dam Mineral Resource Estimates is based on information compiled and generated by Andrew Bewsher, an employee of BM Geological Services Pty Ltd ("BMGS"). Both Andrew Bewsher and BMGS hold shares in the company. BMGS consents to the inclusion, form and context of the relevant information herein as derived from the original resource reports. Mr Bewsher has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which is being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the JORC 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'.

YRL confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement. The Company confirms that the form and context in which

the Competent Person's findings are presented have not been materially modified from the original market announcement.

Forward Looking Statements

This document may contain certain forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning Yandal Resources Limited's (Yandal's) current expectations, estimates and projections about the industry in which Yandal operates, and beliefs and assumptions regarding Yandal's future performance. When used in this document, words such as "anticipate", "could", "plan", "estimate", "expects", "seeks", "intends", "may", "potential", "should", and similar expressions are forward-looking statements. Although Yandal believes that its expectations reflected in these forward-looking statements are reasonable, such statements are subject to known and unknown risks, uncertainties and other factors, some of which are beyond the control of Yandal and no assurance can be given that actual results will be consistent with these forward-looking statements. Drilling results presented indicate geological potential for mineralisation but there can be no certainty that these results will eventually form part of a Mineral Resource Estimate.
