From the beginning of 2024, the Korsnäs rare earth elements (**REE**) project in Finland has been significantly advanced. Frustratingly, the Company's market capitalisation has not reflected the Company's progress. For context, a selection of ASX announcements, which are available from www.asx.com.au, is set out below:

- 13 February 2024 - Korsnäs tailings storage facility (TSF) - drilling commenced
- 13 March 2024 - Korsnäs TSF - drilling completed
- 13 May 2024 - Excellent Korsnäs TSF assays (-29% NdPr¹:TREO² ratio enrichment)
- 20 June 2024 - Korsnäs TSF Exploration Target
- 2 July 2024 - Concentrate stockpile sampling
- 4 July 2024 - Further high grade REE hard rock assays
- 12 August 2024 - Korsnäs diamond core drilling commenced
- 10 September 2024 - EU REMHub funding granted for Korsnäs
- 11 September 2024 - Stockpile assays (-31% NdPr)
- 19 September 2024 - Drilling and metallurgy update
- 30 September 2024 - Drilling returns 15 metres @ 1.8% TREO
- 16 October 2024 - Drilling returns 5.1% TREO intercept
- 4 December 2024 - Korsnäs maiden REE Inferred Resource Estimate
- 7, 20 & 27 February 2025 - High grade assay results from Korsnäs
- 22 April 2025 - 90% increase in Korsnäs REE Resource
- 7 May 2025 - Korsnäs metallurgical update
- 3 & 28 July 2025 - Metallurgical test work program with CORE Resources
- 15 August 2025 - Metallurgical test work program with ANSTO Minerals

This selection of announcements gives an insight into the significant advancement of the Korsnäs project which is now one of the most developed REE projects in the European Union (EU).

KEY RECENT ACHIEVEMENTS

Resource and Targets

In December 2024, we delivered a maiden Korsnäs JORC (2012) Inferred Resource Estimate (**MRE**), followed in April 2025 with a 90% increase in the MRE which now stands at 13.5 million tonnes (**Mt**) at 1.02% TREO (0.5% cut-off).

¹ NdPr = neodymium-praseodymium which are valuable strong magnet REEs.

² TREO = Total Rare Earth Oxides which is the sum of La₂O₃, CeO₂, Pr₆O₁₁, Nd₂O₃, Sm₂O₃, Eu₂O₃, Gd₂O₃, Tb₄O₇, Dy₂O₃, Ho₂O₃, Er₂O₃, Tm₂O₃, Yb₂O₃, Lu₂O₃ and Y₂O₃.

On top of the MRE, the Company reported a hard rock Exploration Target of 9 Mt to 11 Mt at 0.9% to 1.1% TREO to guide further growth drilling.

For compliance purposes, it has to be noted that the potential quantity and grade of this Exploration Target is conceptual in nature. There has been insufficient exploration and metallurgical test work to estimate a Mineral Resource, and it is uncertain whether further exploration will result in the estimation of a Mineral Resource.

The Company confirms that it is not aware of any new information or data that materially affects the exploration results or reported MRE as set out above, and that that all material assumptions and technical parameters underpinning the MRE continue to apply and have not materially changed.

Drilling and Geology

Since August 2024, hard rock diamond core drilling has confirmed geological continuity and returned multiple high grade REE intercepts.

In early 2025 work we have completed highlighted zones with elevated heavy rare earths, notably dysprosium and terbium, strengthening the case for a balanced product mix alongside light REEs.

TSF and Historic Materials

TSF drilling was completed in March 2024, with assays indicating strong magnet REE enrichment ratio of ~29% NdPr:TREO and supporting the publication of a TSF Exploration Target in June 2024. Work on historic materials, including the lanthanide concentrate stockpile (LnCS), returned ~31% NdPr:TREO enrichment, providing optionality for near term test work and flowsheet development.

Metallurgy

Bulk samples have been secured, and flotation optimisation is commencing with Core Resources in Australia to produce upgraded concentrates for downstream testing. A complementary hydrometallurgical program has also been prepared with ANSTO Minerals (the Minerals business of the Australian Nuclear Science and Technology Organisation a nationally recognised, government backed Australian research organisation). The initial scope covers pre-leach screening, acid-bake variability and leach optimisation, along with waste characterisation.

Funding and Project Portfolio

External financial and technical support through the European Union funded REMHub initiative has helped accelerate metallurgical and study activities.

We expanded the Jokikangas project tenement package in January 2025 and have identified additional prospectivity in Slovakia, where historic core observations and follow up concepts point to further copper-gold mineralisation opportunities.

It would be remiss of me not to mention that your Company also holds 100% of a suite of exploration projects in Slovakia which remain highly prospective and, by any means, are very underexplored by modern methods.

JURISDICTION, LOCATION, INFRASTRUCTURE and WORKFORCE ADVANTAGES

Finland is currently rated by the Fraser Institute Annual Survey of Mining Companies as the #1 jurisdiction in the world for investment based on the Investment Attractiveness Index.

Prospech benefits from strong national and local government settings. The Korsnäs municipality has formally supported our exploration activities to date.

Korsnäs sits within the established industrial region around Vaasa on Finland's west coast (approximately 50 kilometres by road). The project benefits from sealed road access, regional air services via Vaasa airport and nearby seaports. The Port of Vaasa handles general cargo and the sheltered deep sea Port of Kaskinen specialises in bulk and chemical cargo.

Power and people are strengths of the region. Finland's electricity mix is diversified and increasingly low-carbon, with high shares of renewables alongside nuclear. The Vaasa area hosts the largest energy-technology cluster in the Nordics (Energy Vaasa), supported by multiple universities and applied sciences institutions that supply engineering and technical talent.

Downstream optionality exists within Europe's supply chain. Within the EU, commercial rare earth separation and refining facilities operate at Sillamäe in Estonia, providing a potential processing pathway accessible from Korsnäs via existing road and sea routes.

NEXT STEPS

We encourage Eligible Shareholders to support your Company and participate in the Entitlement Issue which has been structured in a way that is most equitable. The Offer to Eligible Shareholders is in a ratio proportionate each Eligible Shareholder's existing shareholding and is renounceable, meaning that the Entitlement can be traded on the ASX.

The underwritten \$600,000 will ensure that the Company has funds to advance the important next steps, particularly metallurgical test work and extensional drilling designed to define an increased resource estimate, and in doing so, hopefully enhance the market recognition and valuation of the Company's projects.

Any additional funds raised in excess of the underwritten amount of \$600,000 will further strengthen the Company's balance sheet and improve the Company's position to accelerate its operational programs.

Directors will be participating, in full or in part, in the Offer and collectively will subscribe for approximately \$170,000 worth of Entitlement.

RISKS

While we ask Eligible Shareholders to consider this opportunity, please read this Prospectus carefully and be aware of the risks of this investment. It is appropriate that I should mention that there are significant risks involved in investing in any junior mining exploration company such as Prospech. Prospech's projects are at an early stage of development and there are no guarantees that exploration or metallurgical test work results will be positive.

I refer you to section 6 of this Prospectus for further details of the risks associated with an investment in this Offer.

If you have any questions about how to participate, please contact Prospech on +61 (02) 9300 3333 or info@prospech.com.au.

On behalf of the Board, I thank you for your continued support.

Thomas J. Mann

Chairman

5.5 Effect on control

The effect of the Offers on control of the Company will vary with the level of Entitlements taken up by Eligible Shareholders and the number of Shortfall Shares placed in the Shortfall Offer.

The Company, in consultation with the Underwriter, will ensure that the Entitlement Offer (including the equitable dispersion of any Shortfall Securities) complies with the provisions of Chapter 6 of the *Corporations Act 2001 (Cth)* and is otherwise consistent with the policy guidelines contained in ASIC Regulatory Guide 6 and Takeovers Panel Guidance Note 17.

No Shareholder may acquire a relevant interest in 20% or more of the Company's Shares following the Offers.

5.6 Dilution

Shareholders who do not participate in the Entitlement Offer will have their holdings diluted by up to 22.2%, assuming full subscription under the Entitlement Offer.

6 RISK FACTORS

This section identifies the major risks the Board has identified regarding an investment in the Company.

The New Shares offered under this Prospectus should be considered as highly speculative and an investment in the Company is not risk free.

The Company's business is subject to risk factors, both specific to its business activities, and risks of a general nature. Individually, or in combination, these might affect the future operating performance of the Company and the value of an investment in the Company.

There can be no guarantee that the Company will achieve its stated objectives or that any forward looking statements will be achieved. An investment in the Company should be considered in light of relevant risks, both general and specific. Each of the risks set out below could, if it eventuates, have a material adverse impact on the Company's prospects, and the market price of the Shares.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

Before deciding to invest in the Company, potential investors should:

- (a) read the entire Prospectus;
- (b) consider the assumptions underlying any forward looking statements;
- (c) review these factors in light of their personal circumstances; and
- (d) seek professional advice from their accountant, stockbroker, lawyer or other professional adviser before deciding whether to invest.

6.2 Risk specific to the Offer

- (a) Early stage exploration

The Company's projects are early stage exploration projects, which carry significant exploration risk.

- (b) Limited metallurgical test work

The metallurgical test work on the Company's Korsnäs project is at an early stage and there is no guarantee that the metallurgical test work results will be positive.

- (c) Future funding

Funds raised from the Offer will be used for the purposes mentioned under section 5.2 of the Prospectus. Whilst the Company believes that this amount will be sufficient to carry out certain exploration and development activities, additional funding will be required to continue both existing and proposed activities. Raising additional capital may be dilutive to existing Shareholders.

- (d) Ability to continue as a going concern

The Company's Financial Report for the year ended 31 December 2024 (Financial Report) includes a note on the financial condition of the Company and the possible existence of a material uncertainty about the Company's ability to continue as a going concern which includes the following disclosures.

For the year ended 31 December 2024 the Group has incurred a loss of \$1,820,276 and has accumulated losses of \$8,162,986 as at 31 December 2024. The Group used \$942,640 of cash in operations, in addition to \$1,674,114 of cash in investing activities which includes exploration and evaluation expenditure. It had cash on hand of \$795,730 at 31 December 2024.

Management have prepared cash flow projections for the period from 1 January 2025 to 31 March 2026 that indicate the Group is able to continue as a going concern. These cash flow projections assume the Group continues substantial exploration activities in the areas of interest and that additional funding from Shareholders or other parties will be obtained.

While the Group has successfully raised additional funding in the current year and in prior years, the availability of additional funds is inherently uncertain until secured.

As a result of the uncertainty associated with raising additional funds, there is a material uncertainty that may cast significant doubt upon the Group's ability to continue as a going concern and therefore may not be able to realise its assets and extinguish its liabilities in the normal course of business and at the amounts stated in the consolidated financial report.

To assist with short term liquidity, the Directors and related parties have provided a commitment to not require payment of amounts owing by the Group of \$371,964 until the Group has sufficient funds available to enable payment without adversely impacting the ability of the Group to continue as a going concern.

In addition, based on unaudited management accounts, the Company recorded a net loss of \$537,617 and a net outflow from operating activities of \$480,286 in addition to \$692,460 of cash in investing activities including exploration and evaluation expenditure for the half year ended 30 June 2025. As at 30 June 2025, it had \$552,553 cash on hand.

The Company has successfully raised additional funding in prior years, however, such fundraising is inherently uncertain until secured.

These conditions give rise to a material uncertainty that may cast doubt upon the Group's ability to continue as a going concern. The ongoing operations of the Group are dependent upon the Group raising additional funding from shareholders or other parties or reducing discretionary expenditure in line with available funding.

In the event that the Group does not obtain additional funding, the achievement of which is inherently uncertain, or reduce expenditure in line with available funding it may not be able to continue its operations as a going concern and therefore may not be able to realise its assets, including capitalised exploration and evaluation expenditure of \$9,713,028, and extinguish its liabilities in the ordinary course of operations and at the amounts stated in the consolidated financial report.

Funds raised from the Offer will be used for the purposes mentioned under section 5.2 of this Prospectus. Whilst the Company believes that the Underwritten Amount will be sufficient to carry out certain research and development activities, additional funding will be required to continue both existing and proposed research activities. Raising additional capital may be dilutive to existing Shareholders.

(e) Dilution

Shareholders who do not take up their Entitlement will have their holding in the Company diluted. Details of dilution are set out in section 5.6 above.

6.3 Company and industry risks

The risks outlined below are specific to the Company's operations and to the mining exploration and development industry in which the Company operates.

(a) Exploration risk

Mining exploration and development is a high-risk undertaking. The success of the Company depends on the delineation of economically recoverable Ore Reserves, access to required development capital, movement in the price of commodities, securing and maintaining title to the Company's exploration and mining tenements and obtaining all consents and approvals necessary for the conduct of its exploration activities.

Exploration of the Company's projects may be unsuccessful, resulting in a reduction of the value of those projects and diminution in the cash reserves of the Company. The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that cost estimates and underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.

No assurance can be given that further exploration work will be successful or that a commercial mining operation will eventuate.

(b) Development risk

The Company has reported a Mineral Resource estimate, however, beyond a Mineral Resource estimate, the ultimate success and financial viability of the Company depends on the successful metallurgical test work results and the delineation of economically recoverable Ore Reserves, design and construction of efficient mining and processing facilities and competent operational and managerial performance.

There is no assurance that interests held by the Company, or any other projects that may be acquired by the Company in the future, will result in the discovery and delineation of an economic deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be profitably exploited.

The development of a commercial mining operation is also dependent on the Company's ability to obtain necessary titles and governmental and other regulatory approvals.

(c) Risk of operating in other countries

The Company's exploration licences are located in Finland and Slovakia. The Company's operations are therefore subject to the laws and regulations of Finland and Slovakia and any change in legislation could have an adverse effect on the Company.

Exploration, development and mining activities may be affected by political stability and changes to government regulations relating to the mining industry and foreign investment. Adverse changes in these regulations may negatively affect the Company's growth plans and strategy and operations may also be affected by changes to mining laws, environmental laws, income and other taxes and exchange controls.

(d) Environmental risks

The Company is subject to a number of laws and regulations regarding the protection of the environment. These laws and regulations set various standards regulating certain aspects of health and environmental quality and provide for penalties and other liabilities for the violation of such standards and establish, in certain circumstances, obligations to remediate current and former facilities and locations where operations are or were conducted. Significant liability could be imposed on the Company for damages, clean-up costs, or penalties and the Company's social licence may be questioned in the event of certain discharges into the environment, environmental damage caused by previous occupiers or non-compliance with environmental laws or regulations. The Company proposes to minimise these risks by conducting its activities in an environmentally responsible manner, in accordance with applicable laws and regulations and where possible, by carrying appropriate insurance coverage.

(e) Commodity prices

Commodity prices, including rare earth elements, gold, silver and other metals can fluctuate rapidly and are affected by numerous factors beyond the control of the Company. These factors include world demand for commodities, production cost levels, macroeconomic factors such as expectations regarding inflation, interest rates and global and regional demand for, and supply of, commodities as well as general global economic conditions.

These factors may have an adverse effect on the Company's activities as well as the Company's ability to fund those activities.

(f) Future capital needs and additional funding

The Company may have difficulty in obtaining future equity or debt funding to support exploration programs, evaluation and development of its tenements.

The Company's ability to raise further equity or debt, or to divest all or part of its interest in a tenement, and the terms of such transactions, will vary according to a number of factors, including the success of exploration results and the future development of the tenements, stock market conditions and prices for commodities.

Should it subsequently be established that a mining production operation is technically, environmentally and economically viable, the Company will require additional financing to establish mining operations and production facilities. The Company may not be able to raise the additional finances that may be required for future activities. Commodity prices, environmental regulations, environmental rehabilitation or restitution obligations, revenues, taxes, transportation costs, capital expenditures, operating expenses and technical aspects are all factors which will impact on the amount of additional capital that may be required.

Additional financing may also not be available on terms acceptable to the Company, or at all. Significantly, any additional equity financing or the exercising of Options, may dilute your existing shareholdings; and debt financing, if available, may restrict financing and future activities. If the Company fails to obtain additional financing, as needed, it may have to reduce the scope of its operations or anticipated expansion of its operations, forfeit its interest in some or all of its tenements, incur financial penalties and/ or reduce or terminate its operations.

(g) Reliance on key personnel and consultants

The Company's success largely depends on the core competencies of its Directors, management and third party consultants and their familiarisation with, and ability to operate in, the mining exploration and development industry. The financial performance of the Company and the value of an investment in the Company partly depend on the ability of the Company to retain these key personnel and consultants.

(h) Speculative nature of investment

The risk factors described above, and other risks factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Shares. There is no guarantee that the Shares offered under this Prospectus will provide a return on capital, payment of dividends or increases in the market value of those Shares.

Prospective investors should consider that an investment in the Company is highly speculative. Before deciding whether to subscribe for Shares under this Prospectus you should

read this Prospectus in its entirety and consider all factors, taking into account your objectives, financial situation and needs.

6.4 General investment risks

The risks outlined below are some of the general risks that may affect an investment in the Company.

(a) Securities investments and share market conditions

There are risks associated with any securities investment. The prices at which the securities trade may fluctuate in response to a number of factors.

Furthermore, the stock market, and in particular the market for biotechnology companies may experience extreme price and volume fluctuations that may be unrelated or disproportionate to the operating performance of such companies. These factors may materially adversely affect the market price of the securities of the Company regardless of the Company's operational performance. Neither the Company nor the Directors warrant the future performance of the Company, or any return of an investment in the Company.

(b) Liquidity risk

The market for the Company's Shares may be illiquid. As a consequence investors may be unable to readily exit or realise their investment.

(c) Economic risk

Changes in both Australia and world economic conditions may adversely affect the financial performance of the Company. Factors such as inflation, currency fluctuations, interest rates, industrial disruption and economic growth may impact on future operations and earnings. The Company's possible revenues and price of its securities can be affected by these factors which are beyond the control of the Company and its Directors.

(d) Future funding

Funds raised from the Offer will be used for the purposes mentioned under section 5.2 of the Prospectus. Whilst the Company believes that this amount will be sufficient to continue activities, additional funding will be required to continue both existing and proposed activities. Raising additional capital may be dilutive to existing Shareholders.

Any potential investor should be aware that subscribing for Shares involves various risks. The Shares to be issued pursuant to the Offer carry no guarantees with respect to the payment of dividends, return of capital or market value. The success of the Company is dependent on exploration success and the completion of technical studies that demonstrate the economic viability of its exploration assets. An investment in the Company should therefore be considered speculative in nature.

If you have more than one shareholding and consequently receive more than one Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those shareholdings only use the Customer Reference Number specific to that shareholding as set

out in the applicable Entitlement and Acceptance Form. Do not use the same Customer Reference Number for more than one of your shareholdings. This can result in your application monies being applied to your Entitlement in respect of only one of your shareholdings (with the result that any application in respect of your remaining shareholdings will not be recognised as valid).

The Company shall not be responsible for any postal or delivery delays or delay in the receipt of the BPAY payment.

By making a payment in respect of an Application by BPAY, you will be deemed to have represented that you are an Eligible Shareholder. In addition, you will also be deemed to have represented and warranted on behalf of yourself or each person on whose account you are acting that the law in your place of residence and/or where you have been given the Prospectus, does not prohibit you from being given the Prospectus and that you:

- (a) agree to be bound by the terms of the Offer;

- (g) acknowledge that the New Shares have not, and will not be, registered under the securities laws in any other jurisdictions outside Australia and New Zealand and accordingly, the New Shares may not be offered, sold or otherwise transferred except in accordance with an available exemption from, or in a transaction not subject to, the registration requirements of applicable securities laws in particular the US Securities Act.

The Entitlement and Acceptance Form does not need to be signed to be a valid application. An Application will be deemed to have been accepted by the Company upon the issue of the New Shares.

If payment of the application monies is for the wrong amount, it will still be treated as a valid application for New Shares. The Directors' decision whether to treat an acceptance as valid and how to construe, amend or complete an application is final. Any payment in excess of Entitlement will be treated as an application for Shortfall Shares.

Other investors who are not Eligible Shareholders may apply for Shortfall Shares using the Shortfall Application Form attached to this Prospectus. Persons outside Australia doing so represent to the Company that they can apply for Shortfall Shares in circumstances which do not require the offer for Shortfall Shares or this Prospectus to be registered.

It is possible that there may be no Shortfall Shares available for issue.

Subject to the above, the Directors reserve the right at their absolute discretion and subject to the Corporations Act and Listing Rules, to:

- (a) issue Shortfall Shares at their discretion by applying a policy of allocating Shortfall Shares in a manner that is in the Company's best interests; and
- (b) to reject any application for Shortfall Shares or to issue a lesser number of Shortfall Shares than that applied for.

It is an express term of the Shortfall Offer that applicants for Shortfall Shares will be bound to accept a lesser number of Shortfall Shares allocated to them than applied for. If a lesser number is allocated, excess application money will be refunded without interest as soon as practicable after the Closing Date.

8.7 New Zealand Shareholders

The Offer contained in this Prospectus to Eligible Shareholders with registered addresses in New Zealand is made in reliance on the Securities Act (Overseas Companies) Exemption Notice 2013 (New Zealand). Members of the public in New Zealand who are not existing Shareholders on the Record Date are not entitled to apply for any New Shares. This Prospectus has not been registered, filed or approved by any New Zealand regulatory authority. This Prospectus is not an investment statement or prospectus under New Zealand law and is not required to, and may not, contain all the information that an investment statement or prospectus under New Zealand law is required to contain.

8.8 Treatment of Ineligible Shareholders

Given the small number of Ineligible Shareholders and the cost of complying with applicable regulations outside Australia and New Zealand, the Company has decided that it would be unreasonable to extend the Offer to Ineligible Shareholders. The Prospectus will not be sent to those Shareholders.

This Prospectus does not constitute an offer of securities in any jurisdiction where, or to any person to whom, it would not be lawful to issue the Prospectus or make the Offer. No action has been taken to register or qualify the New Shares or the Offer or otherwise to permit an offering of the New Shares in any jurisdiction other than as set out in this section.

This document is not for publication or distribution, directly or indirectly, in or into the United States of America (including its territories and possessions, any state of the US and the District of Columbia). This document is not an offer of securities for sale into the United States or to, or for the account or benefit of, US Persons. The securities referred to herein have not been and will not be registered under the US Securities Act, and may not be offered or sold in the United States or to, or for the account or benefit of, US Persons. No public offering of securities is being made in the United States.

Recipients may not send or otherwise distribute this Prospectus or the Entitlement and Acceptance Form to any person outside Australia or New Zealand (other than to Eligible Shareholders).

To comply with Listing Rule 7.7.1, the Company has appointed the Lead Manager to arrange for the sale of Entitlement that would have been available for Ineligible Shareholders, with the net proceeds (if any) to be paid to Ineligible Shareholders.

8.9 Beneficial holders, nominees, trustees and custodians

The foreign selling restrictions under the Offer summarised in section 8.8 of this Prospectus apply to the underlying beneficial holder. Nominees, trustees and custodians must not apply on behalf of any beneficial holder that would not itself be an Eligible Shareholder. Shareholders who are nominees, trustees or custodians are advised to seek independent advice as to how they should proceed. Shareholders who hold Shares on behalf of persons whose registered address is not in Australia or New Zealand are responsible for ensuring that applying for New Shares does not breach securities laws in the relevant overseas jurisdictions.

Nominees and custodians that hold Shares should note that the Offer is available only to Eligible Shareholders. The Company is not required to determine whether or not any registered holder is acting as a nominee or the identity or residence of any beneficial owners of securities. If any nominee or custodian is acting on behalf of a foreign person, that holder,

in dealing with its beneficiary, will need to assess whether indirect participation by the beneficiary in the Offer is compatible with applicable foreign laws.

8.10 Allotment and application money

New Shares will be issued only after all application money has been received and ASX has granted permission for the New Shares and New Options to be quoted. It is expected that New Shares will be issued on 1 October 2025 and normal trading of the New Shares on ASX is expected to commence on 2 October 2025.

All application monies will be deposited into a separate bank account of the Company and held in trust for Applicants until the Shares are issued or application monies returned. Any interest that accrues will be retained by the Company and will not be paid to Applicants.

8.11 Quotation

The Company will apply to ASX within 7 days after the date of this Prospectus for quotation of the securities offered by this Prospectus on ASX. If ASX does not grant permission for the quotation of the securities offered under this Prospectus within 3 months after the date of this Prospectus, or such longer period as modified by ASIC, none of the securities offered by this Prospectus will be allotted or issued. In these circumstances, all Applications will be dealt with in accordance with the Corporations Act including the return of all application monies without interest.

A decision by ASX to grant official quotation of the New Shares is not to be taken in any way as an indication of ASX's view as to the merits of the Company or of the New Shares.

Quotation, if granted, of the New Shares offered by this Prospectus will commence as soon as practicable after statements of holdings of the New Shares are dispatched.

8.12 Market prices of Existing Shares on ASX

The highest and lowest market sale price of the Existing Shares, which are on the same terms and conditions as the New Shares being offered under this Prospectus, during the 3 months immediately preceding the lodgement of this Prospectus with the ASIC, and the last market sale price on the date before the lodgement date of this Prospectus, are set out below.

	3 month high	3 month low	Last market sale price
Price (\$)	\$0.024	\$0.014	\$0.018
Date	1 August 2025	8 July 2025	29 August 2025

8.13 CHESS

The Company participates in the Clearing House Electronic Subregister System (**CHESS**). CHESS is operated by ASX Settlement Pty Ltd (**ASPL**), a wholly owned subsidiary of ASX.

Under CHESS, the Company does not issue certificates to investors. Instead, security holders will receive a statement of their holdings in the Company, including New Shares issued under this Prospectus. If an investor is broker sponsored, ASPL will send a CHESS statement.

The CHESSE statement will set out the number of New Shares issued under this Prospectus, provide details of your holder identification number and give the participation identification number of the sponsor.

If you are registered on the issuer sponsored sub register, your statement will be dispatched by the Company's share registrar and will contain the number of New Shares issued to you under this Prospectus and your security holder reference number.

A CHESSE statement or issuer sponsored statement will routinely be sent to Shareholders at the end of any calendar month during which the balance of their shareholding changes. Shareholders may request a statement at any other time, however, a charge may be made for additional statements.

8.14 Taxation and duty implications

The Directors do not consider that it is appropriate to give Shareholders advice regarding the taxation consequences of the Company conducting the Offer or Shareholders applying for New Shares under this Prospectus, as it is not possible to provide a comprehensive summary of the possible taxation positions of Shareholders. The Company, its advisers and officers, do not accept any responsibility or liability for any taxation consequences to Shareholders in the Offer. Shareholders should, therefore, consult their own professional tax adviser in connection with the taxation implications of the Offer.

No brokerage or stamp duty is payable by Applicants in respect of Applications for New Shares under this Prospectus.

8.15 Privacy

The Company collects information about each Applicant provided on an Entitlement and Acceptance Form for the purposes of processing the Application and administering the Applicant's security holding in the Company.

By making an Application, each Applicant agrees that the Company may use the information provided by an Applicant on the Entitlement and Acceptance Form for the purposes set out in this privacy disclosure statement and may disclose it for those purposes to the Share Registry, the Company's related body corporates, agents, contractors and third party service providers, including mailing houses and professional advisers, and to ASX and regulatory authorities.

The Corporations Act requires the Company to include information about the Shareholder (including name, address and details of the Shares held) in its public register. The information contained in the Company's public register must remain there even if that person ceases to be a Shareholder. Information contained in the Company's register is also used to facilitate distribution payments and corporate communications (including the Company's financial results, annual reports and other information that the Company may wish to communicate to its security holders) and compliance by the Company with legal and regulatory requirements.

If you do not provide the information required on the Entitlement and Acceptance Form, the Company may not be able to accept or process your Application. An Applicant has the right to gain access to the information that the Company holds about that person subject to certain exceptions under law. A fee may be charged for access. Such requests must be made in writing to the Company's registered office.

9 RIGHTS AND LIABILITIES ATTACHING TO SECURITIES

9.1 Rights and liability attaching to Shares

Full details of the rights and liabilities attaching to the Shares are:

- (a) detailed in the Constitution, a copy of which can be inspected, free of charge, at the registered office of the Company during normal business hours; and
- (b) in certain circumstances, regulated by the Corporations Act, the Listing Rules and the general law.

The following is a summary of the more significant rights and liabilities attaching to the Shares. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

(a) Voting rights

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at a general meeting of members every member has one vote on a show of hands and one vote per Share on a poll. Voting may be in person or by proxy, attorney or representative.

(b) Dividends

Except as otherwise required by the Corporations Act and to the terms on which shares are on issue and the rights and restrictions attaching to shares, the Directors may from time to time:

- (i) declare dividends (whether final or interim) to be paid to members on such terms, including the amount and the time for and the method of payment, as the Directors think fit; or
- (ii) determine that a dividend is payable, fix the amount and time for payment.

(c) Future issues of securities

Subject to the Corporations Act and the Listing Rules, the Directors may issue, grant options over, or otherwise dispose of unissued shares in the Company at the times and on the terms that the Directors think proper and a share may be issued with preferential or special rights.

(d) Transfer of Shares

A shareholder may transfer Shares by a market transfer in accordance with any computerised or electronic system established or recognised by ASX for the purpose of facilitating transfers in Shares or by an instrument in writing in a form approved by ASX or the Board.

(e) Meetings and notices

Each shareholder is entitled to receive notice of, and to attend, general meetings for the Company and to receive all notices, accounts and other documents required to be sent to shareholders under the Constitution, the Corporations Act or the Listing Rules.

Shareholders may requisition meetings in accordance with the Corporations Act.

(f) Liquidation rights

The Company has one class of shares on issue, ordinary shares. Each ordinary Share ranks equally in the event of liquidation.

(g) Variation of rights

Subject to the Corporations Act and Listing Rules, the rights attached to the Shares may be varied in accordance with the Corporations Act.

(h) Election of directors

At every annual general meeting one third of the Directors (rounded up to the nearest whole number) must retire from office. Any Director who would have held office for more than 3 years if that Director remains in office until the next general meeting must retire. These retirement rules do not apply to certain appointments including the managing director.

(i) Indemnities

To the extent permitted by law the Company must indemnify each past and present Director and secretary against any liability incurred by that person as an officer of the Company and any legal costs incurred in defending an action in respect of such liability.

(j) Winding up

Subject to the Corporations Act, the ASX Listing Rules and any rights or restrictions attached to a class of shares, on a winding up of the Company any surplus must be divided among the shareholders of the Company.

(k) Shareholder liability

As the Shares offered under the Prospectus are fully paid Shares, they are not subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

(l) Alteration to the Constitution

The Constitution can only be amended by a special resolution passed by at least three quarters of shareholders present and voting at the general meeting. At least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

(m) Listing Rules

If the Company is admitted to trading on the Official List, then despite anything in the Constitution, if the Listing Rules prohibit an act being done, the act must not be done. Nothing in the Constitution prevents an act being done that the Listing Rules require to be done. If the Listing Rules require an act to be done or not to be done, authority is given for that act to be done or not to be done (as the case may be). If the Listing Rules require the Constitution to contain a provision and it does not contain such a provision, the Constitution is deemed to contain that provision. If the Listing Rules require the Constitution not to contain a provision and it contains such a provision, the Constitution is deemed not to contain that provision. If a provision of the Constitution is or becomes inconsistent with the Listing

Rules, the Constitution is deemed not to contain that provision to the extent of the inconsistency.

(d) Exercise Period

Options are exercisable at the end of each calendar quarter at any time on or prior to the Expiry Date (**Exercise Period**).

(e) Notice of Exercise

Options may be exercised during the Exercise Period by notice in writing to the Company in the manner specified on the Option certificates (**Notice of Exercise**) and payment of the Exercise Price for each Option being exercised in Australian currency by electronic funds transfer or other means of payment acceptable to the Company.

(f) Exercise Date

A Notice of Exercise is only effective on and from the later of the date of receipt of the Notice of Exercise and the date of receipt of the payment of the Exercise Price for each Option being exercised in cleared funds (**Exercise Date**).

(g) Timing of issue of Shares on exercise

Within 5 Business Days after the Exercise Date, the Company will:

- (i) issue the number of Shares required under these terms and conditions in respect of the number of Options specified in the Notice of Exercise and for which cleared funds have been received by the Company; and
- (ii) if admitted to the official list of ASX at the time, apply for official quotation on ASX of Shares issued pursuant to the exercise of the Options.

(h) Shares issued on exercise

Shares issued on exercise of the Options rank equally with the then issued shares of the Company.

(i) Reconstruction of capital

If at any time the issued capital of the Company is reconstructed, all rights of an Optionholder are to be changed in a manner consistent with the Corporations Act and the ASX Listing Rules at the time of the reconstruction.

(j) Participation in new issues

There are no participation rights or entitlements inherent in the Options, and holders will not be entitled to participate in new issues of capital offered to Shareholders during the currency of the Options without exercising the Options.

(k) Change in exercise price

10 ADDITIONAL INFORMATION

10.1 Continuous disclosure obligations

The Company is a 'disclosing entity' (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Company's securities. The New Shares which will be issued pursuant to this Prospectus are in the same class of Shares that have been quoted on the Official List during the 12 months prior to the issue of this Prospectus.

This Prospectus is a "transaction specific prospectus" to which the special content rules under section 713 of the Corporations Act apply. That provision allows the issue of a more concise prospectus in relation to an offer of securities in a class which has been continuously quoted by ASX in the three months prior to the date of the prospectus. In general terms "transaction specific prospectuses" are only required to contain information in relation to the effect of the issue of New Shares on the Company and the rights attaching to the New Shares. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the period from lodgement of the Company's annual financial statements of the Company for the financial year ended 31 December 2024 to the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

The Company confirms that, to the extent to which it is reasonable for investors and their professional advisers to expect to find the information in this Prospectus, there is no information:

- (a) that has been excluded from a continuous disclosure notice in accordance with ASX Listing Rules; and
- (b) is information that investors and their professional advisers would reasonably require for the purpose of making an informed assessment of:
 - (i) the assets and liabilities, financial position and performance, profits and losses and prospects of the Company; and
 - (ii) the rights and liabilities attaching to New Shares.

Information that is already in the public domain has not been reported in this Prospectus other than that which is considered necessary to make this Prospectus complete.

The Company, as a disclosing entity under the Corporations Act states that:

- (a) it is subject to regular reporting and disclosure obligations;
- (b) copies of documents lodged with the ASIC in relation to the Company (not being documents referred to in section 1274(2)(a) of the Corporations Act) may be obtained from, or inspected at, the offices of the ASIC; and
- (c) it will provide a copy of each of the following documents, free of charge, to any person on request between the date of issue of this Prospectus and the Closing Date:
 - (i) the annual financial statements of the Company for the financial year ended 31 December 2024 being the last financial statements for a financial year, of the Company lodged with the ASIC before the issue of this Prospectus;
 - (ii) any half-year financial report lodged with ASIC by the Company after the lodgement of that annual report and before the lodgement of this Prospectus; and
 - (iii) any continuous disclosure notices given by the Company after the lodgement of the financial statements referred to in paragraph (i) and before the lodgement of this Prospectus with ASIC.

Copies of all documents lodged with the ASIC in relation to the Company can be obtained free of charge from the Company's registered office during normal office hours or from asx.com.au.
