Capital Raising Presentation  
9 September 2025

ASX:RTR

ersonal use only

This presentation has been prepared by Rumble Resources Limited (Rumble or the Company). It contains general information about the Company's activities current as at the date of the presentation. The information is provided in summary form and does not purport to be complete. This presentation is not to be distributed (nor taken to have been distributed) to any persons in any jurisdictions to whom an offer or solicitation to buy shares in the Company would be unlawful. Any recipient of the presentation should observe any such restrictions on the distribution of this presentation and warrants to the Company that the receipt of the presentation is not unlawful. It should not be considered as an offer or invitation to subscribe for or purchase any securities in the Company or as an inducement to make an offer or invitation with respect to those securities. No agreement to subscribe for securities in the Company will be entered into on the basis of this presentation or any information, opinions or conclusions expressed in the course of this presentation. This presentation is not a prospectus, product disclosure document or other offering document under Australian law or under any other law. It has been prepared for information purposes only. This presentation contains general summary information and does not take into account the investment objectives, financial situation and particular needs of any individual investor. It is not financial product advice and investors should obtain their own independent advice from qualified financial advisors having regard to their objectives, financial situation and needs. Rumble nor any of their related bodies corporate is licensed to provide financial product advice.

This presentation and information, opinions or conclusions expressed in the course of this presentation contains forecasts and forward-looking information. Such forecasts, projections and information are not a guarantee of future performance, involve unknown risks and uncertainties. Actual results and developments will almost certainly differ materially from those expressed or implied. There are a number of risks, both specific to Rumble, and of a general nature which may affect the future operating and financial performance of Rumble, and the value of an investment in Rumble including and not limited to title risk, renewal risk, economic conditions, stock market fluctuations, manganese demand and price movements, timing of access to infrastructure, timing of environmental approvals, regulatory risks, operational risks, reliance on key personnel, reserve estimations, native title risks, foreign currency fluctuations, and mining development, construction and commissioning risk.

You should not act or refrain from acting in reliance on this presentation, or any information, opinions or conclusions expressed in the course of this presentation. This presentation does not purport to be all inclusive or to contain all information which its recipients may require in order to make an informed assessment of the prospects of Rumble. You should conduct your own investigation and perform your own analysis in order to satisfy yourself as to the accuracy and completeness of the information, statements and opinions contained in this presentation before making any investment decision. Recipients of this presentation must undertake their own due diligence and make their own assumptions in respect of the information contained in this presentation and should obtain independent professional advice before making any decision based on the information. No representation or warranty, express or implied, is made in relation to the fairness, accuracy or completeness of the information, opinions and conclusions expressed in the course of this presentation. To the maximum extent permitted by law, no representation, warranty or undertaking, express or implied, is made and, to the maximum extent permitted by law, no responsibility or liability is accepted by the Company or any of its officers, employees, agents or consultant or any other person as to the adequacy, accuracy, completeness or reasonableness of the information in this presentation. To the maximum extent permitted by law, no responsibility for any errors or omissions from this presentation whether arising out of negligence or otherwise is accepted. An investment in the shares of the Company is to be considered highly speculative.

The exploration targets or conceptual exploration targets in this presentation or expressed during the course of this presentation are subject to completion of the necessary feasibility studies, permitting and execution of all necessary infrastructure agreements. This presentation and information, opinions or conclusions expressed in the course of this presentation should be read in conjunction with Rumble's other periodic and continuous disclosure announcements lodged with the ASX, which are available on the Rumble website. They involve risk and uncertainties that could cause actual results to differ from estimated results. Forward-looking statements include, but are not limited to, statements concerning the Company's exploration programs, outlook and target sizes. They include statements preceded by words such as "potential", "target", "scheduled", "planned", "estimate", "possible", "future", "prospective" and similar expressions.

## COMPETENT PERSON STATEMENT

The Exploration Results referenced in this presentation were first announced by the Company in accordance with ASX Listing Rule 5.7 in its announcements dated 11 August 2025, 23 July 2023, 16 April 2025, 4 April 2025, 17 February 2025, 11 December 2024, 28 November 2024, 15 October 2024, 2 September 2024, 6 August 2024, 16 July 2024, 13 March 2024, 21 February 2024, 14 November 2023, 31 October 2023, 24 October 2023, 5<sup>th</sup> October 2023, 17 July 2023, 19 April 2023, 14 March 2023, 16 February 2023, 17 November 2022, 3 November 2022, 29 September 2022, 30 August 2022, 23 August 2022, 18 July 2022, 26 May 2022, 9 March 2022, 21 February 2022, 7 February 2022, 31 January 2022, 21 December 2021, 13 December 2021, 18 November 2021, 10 November 2021, 18 October 2021, 8 July 2021, 2 June 2021, 19 April 2021, 23 February 2021, 17 February 2021, 15 February 2021, 3 February 2021, 28 January 2021, 4 November 2020, 6 October 2020, 20 May 2020, 4 May 2020, 24 April 2020, 17 February 2020, 11 February 2020, 23 January 2020, 26 November 2019, 8 November 2019, 21 November 2019, 21 October 2019, 1 October 2019, 23 August 2019, 22 August 2019, 6 August 2019, 11 July 2019, 1 July 2019, 4 April 2019, 12 March 2019, 12 February 2019, 6 February 2019, 17 December 2018, 27 November 2018, 30 August 2018 and 9 August 2018.

The Updated Mineral Resource Estimate (MRE) for the Western Queen Project referenced in this presentation was announced by the Company in accordance with ASX Listing Rule 5.8 on 23 July 2025 the previous MRE for Western Queen was announced 15 October 2024. The Mineral Resource estimate for the Earahedy Project referenced in this presentation was first announced by the Company in accordance with ASX Listing Rule 5.8 in its announcement dated 19 April 2023. Rumble is not aware of any new information or data that materially affects the information included in the relevant market announcements described above and, in the case of the Mineral Resource estimate, that all material assumptions and technical parameters underpinning the estimate in the relevant market announcement continue to apply and have not materially changed.

# VISION AND MISSION

Become a leading Australian resources company, delivering significant value and growth through resource discoveries and project development in Western Australia.

Enhance shareholder value by identifying and developing mineral assets, with a focus on generating near-term cashflow from Western Queen to internally fund further resource growth through successful exploration.

# WHY INVEST IN RUMBLE?

## WESTERN QUEEN – Gold & Tungsten

- ✓ **Near term cashflow from high-grade gold deposits**
- ✓ **Resource growth potential**
  - Oct 2024 - from 163koz to 287koz Au<sup>1</sup>
  - July 2025 - from 287koz to **370koz Au<sup>2</sup>**
  - Low discovery costs – under \$30/oz
  - Targeting further significant resource growth with next drill program
- ✓ **Tungsten**
  - Maiden resource of 13.2kt WO<sub>3</sub><sup>3</sup>
  - Huge resource growth potential
  - Potential near term co-product revenue stream

## Earaheedy - Base Metals & Silver

- ✓ Globally significant Zn-Pb-Ag discovery
- ✓ **Maiden JORC MRE 2.2Mt Zn, 0.7Mt Pb & 12.6Moz Ag<sup>4</sup>**
  - Looking for a significant development partner

1. Refer Company ASX release dated 15 October 2024  
 2. Refer Company ASX Release dated 23 July 2025  
 3. Refer Company ASX Release dated 8 August 2025  
 4. Refer Company ASX release dated 19 April 2023

ersonal use only

Gold Resources upgraded to **370koz** @**3.1g/t Au<sup>1</sup>**

Maiden tungsten Resources **13.2kt WO<sub>3</sub><sup>2</sup>**

Inferred Resource containing **2.2Mt Zn**  
**0.7Mt Pb**  
**12.6Moz Ag<sup>3</sup>**

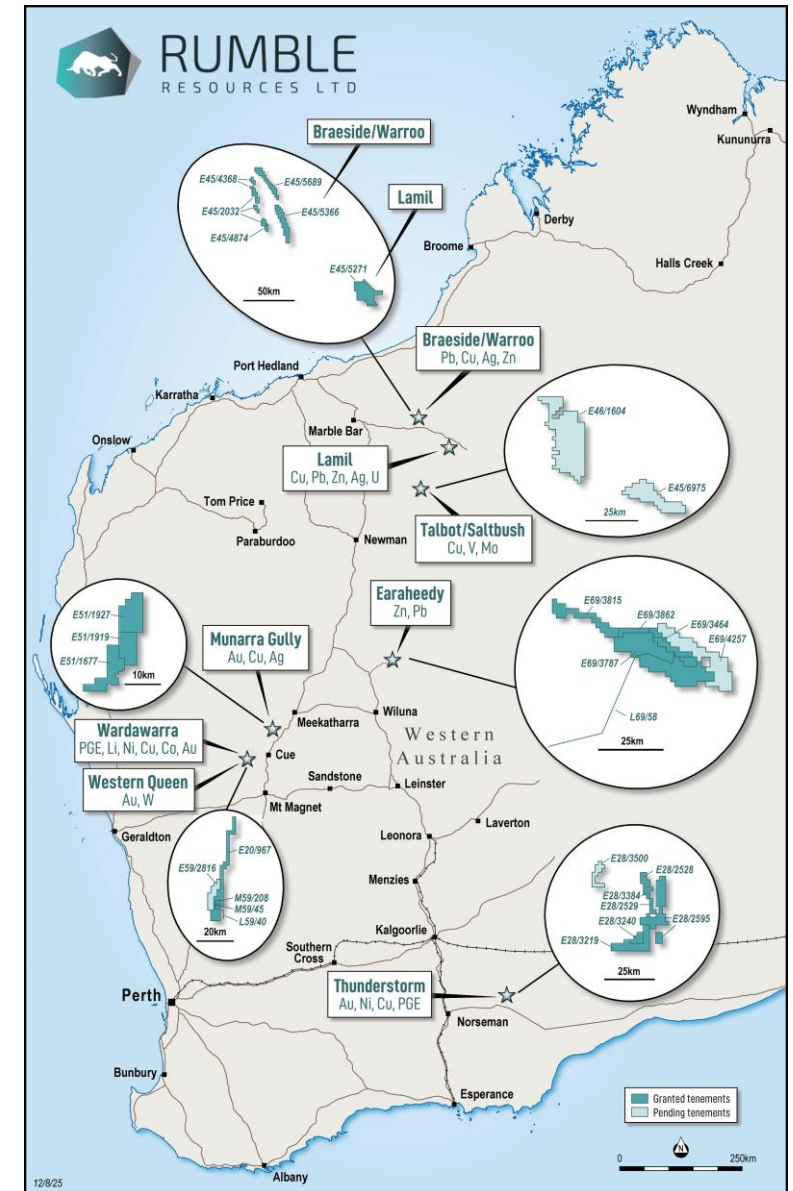

## WESTERN QUEEN – NEAR TERM GOLD PRODUCTION & DISCOVERY POTENTIAL

- Recent significant increase in gold Resources ounces and grade
- Potential to quickly grow the gold resources with extensional drilling
- Near-term gold production option
- Maiden tungsten resource reported with potential to grow resources and add a tungsten revenue stream

## EARAHEEDY – LOOKING FOR A DEVELOPMENT PARTNER

- Potential large-scale, low-cost open pit mining
- Metallurgical testwork confirms +61% Zn+Pb concentrate
- Less than 30% of the 70km host Unconformity Unit tested
- One of the largest zinc sulphide discoveries over the last decade

## OTHER PROJECTS – FRASER RANGE (AU), MUNARRA GULLY (CU/AU) & LAMIL JV (CU)

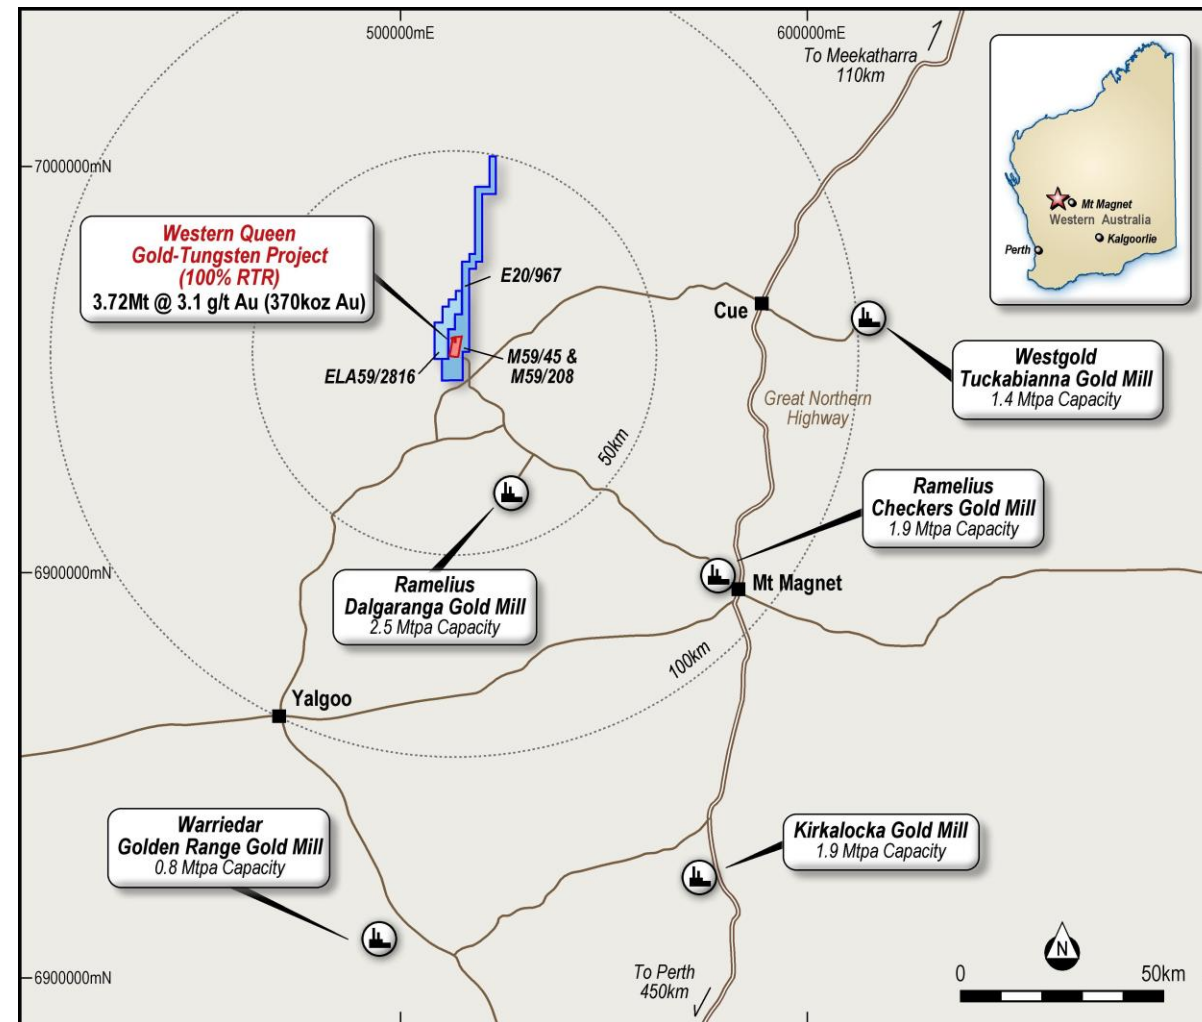

<sup>1</sup> refer Company's ASX Announcement 23 July 2025

<sup>2</sup> refer Company's ASX announcement 11 Aug 2025

<sup>3</sup> refer Company's ASX announcement 19 April 2023

- **Another big increase in the Mineral Resource Estimate (MRE) now 3.72Mt @ 3.1g/t Au for 370,000oz<sup>1</sup> a 53% grade increase**
- **Historical production – 880kt @ 7.6g/t Au for 215koz**
- **Near-term production – open pit and underground options**
- **Well located – 200km radius of 5 gold plants, on granted mining leases**
- **Geology – The Western Queen deposits are associated with a major orogenic shear zone that remains largely untested along strike and at depth**
- **Possible Analogy – Spartan/Ramelius Never Never & Pepper lodes which are 7.76Mt @ 9.32g/t Au for 2.32Moz<sup>2</sup> to a vertical depth of 1,000m**
- **Tungsten – Maiden tungsten resource 13.2kt WO<sub>3</sub><sup>3</sup>**

# WESTERN QUEEN – NEVER NEVER COMPARISON

Western Queen South comparison to Spartan/Ramelius Never Never lode (to scale)

ersonal use only

## WQ South Next Phases

1. Extensional/Growth drilling
2. Infill - Inferred to Indicated

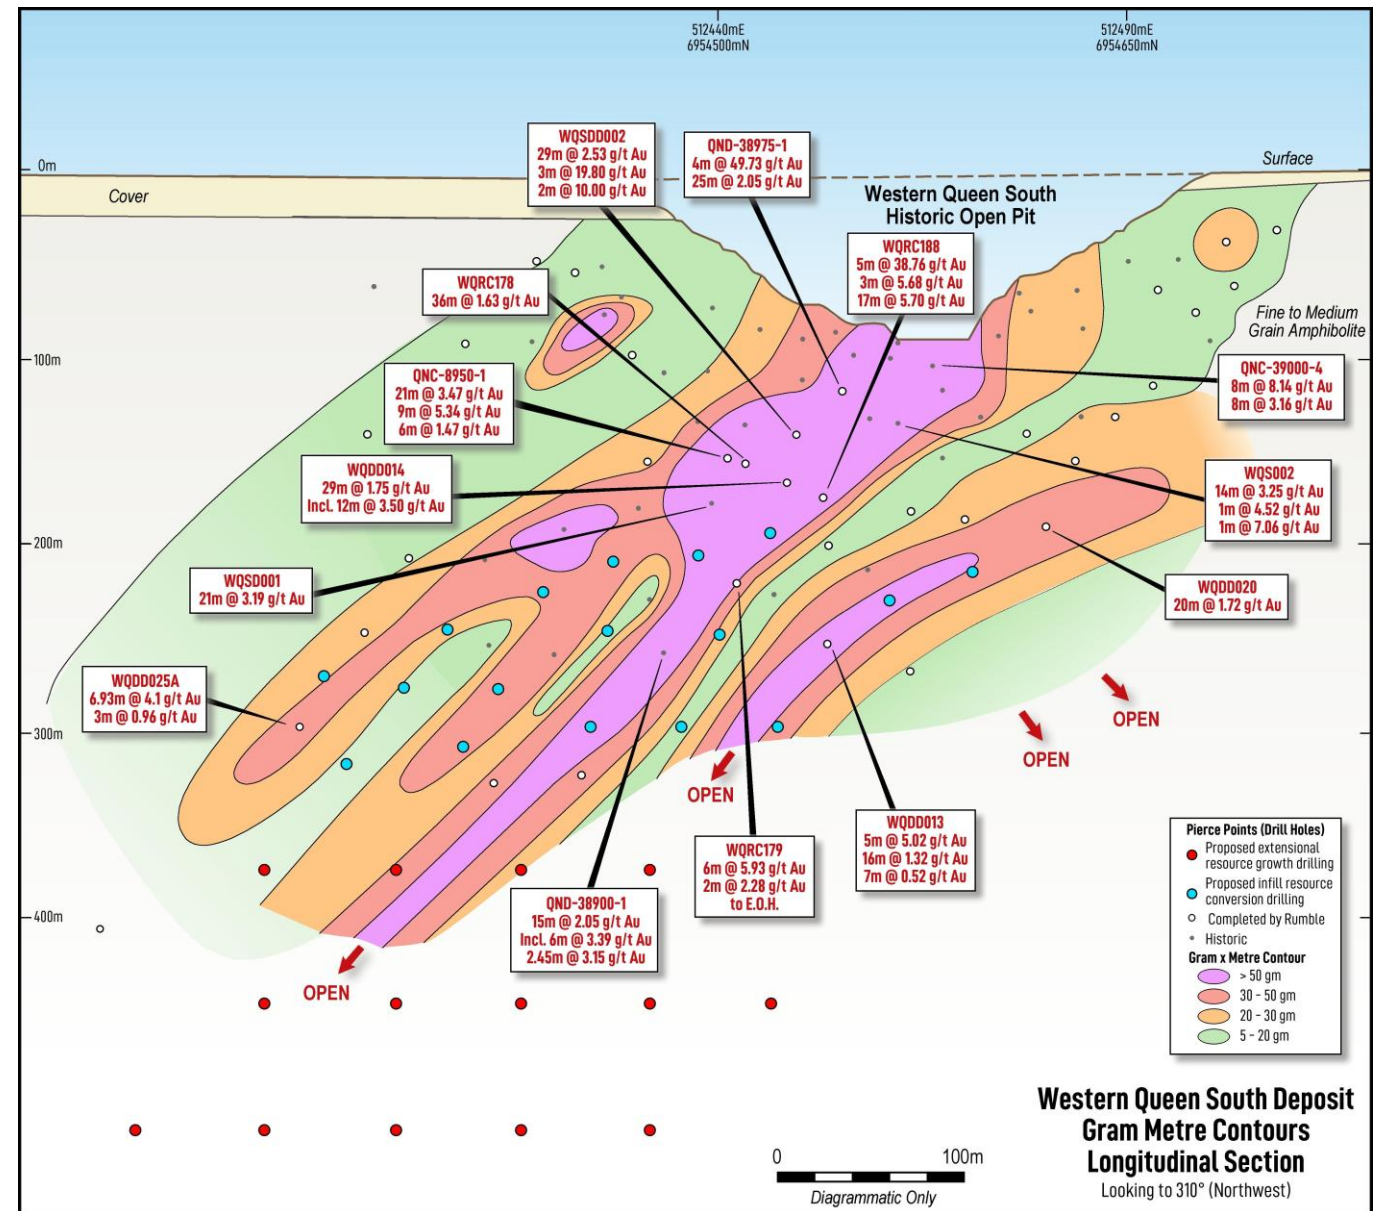

- Red holes = 60x60m extensional/Growth
- Proposed extensional drilling aims to extend mineralisation ~250m down plunge of previous drilling
- Blue holes = 40x40m infill drilling

### Previous High-grade RC/DDH Drill Intercepts

#### Western Queen South Deposit<sup>1,2,3</sup>

- 5m @ 38.76g/t Au from 193m, and
- 17m @ 5.70g/t Au from 221m (WQRC 188)
- 4m @ 49.73 g/t Au from 134m (QND-38975-1)
- 5m @ 17.69 g/t Au from 83m (QNC-8900-1)
- 21m @ 3.47 g/t Au from 141m, and
- 9m @ 5.34g/t Au from 168m (QNC 8950-1)
- 6.93m @ 4.10g/t Au from 362m (WQDD025A)

1. Refer Company ASX release dated 3 February 2021  
 2. Refer Company ASX Release dated 4 November 2019  
 3. Refer Company ASX Release dated 4 June 2025

## WQ Central Next Phases

### 1. Extensional/Growth drilling

### 2. Infill - Inferred to Indicated

- Red holes = 60x60m Extensional/Growth
- Proposed Extensional/Growth drilling aims to extend mineralisation ~200m down plunge of previous drilling
- Blue holes = 40x40m infill drilling

### Previous High-grade RC/DDH Drill Intercepts

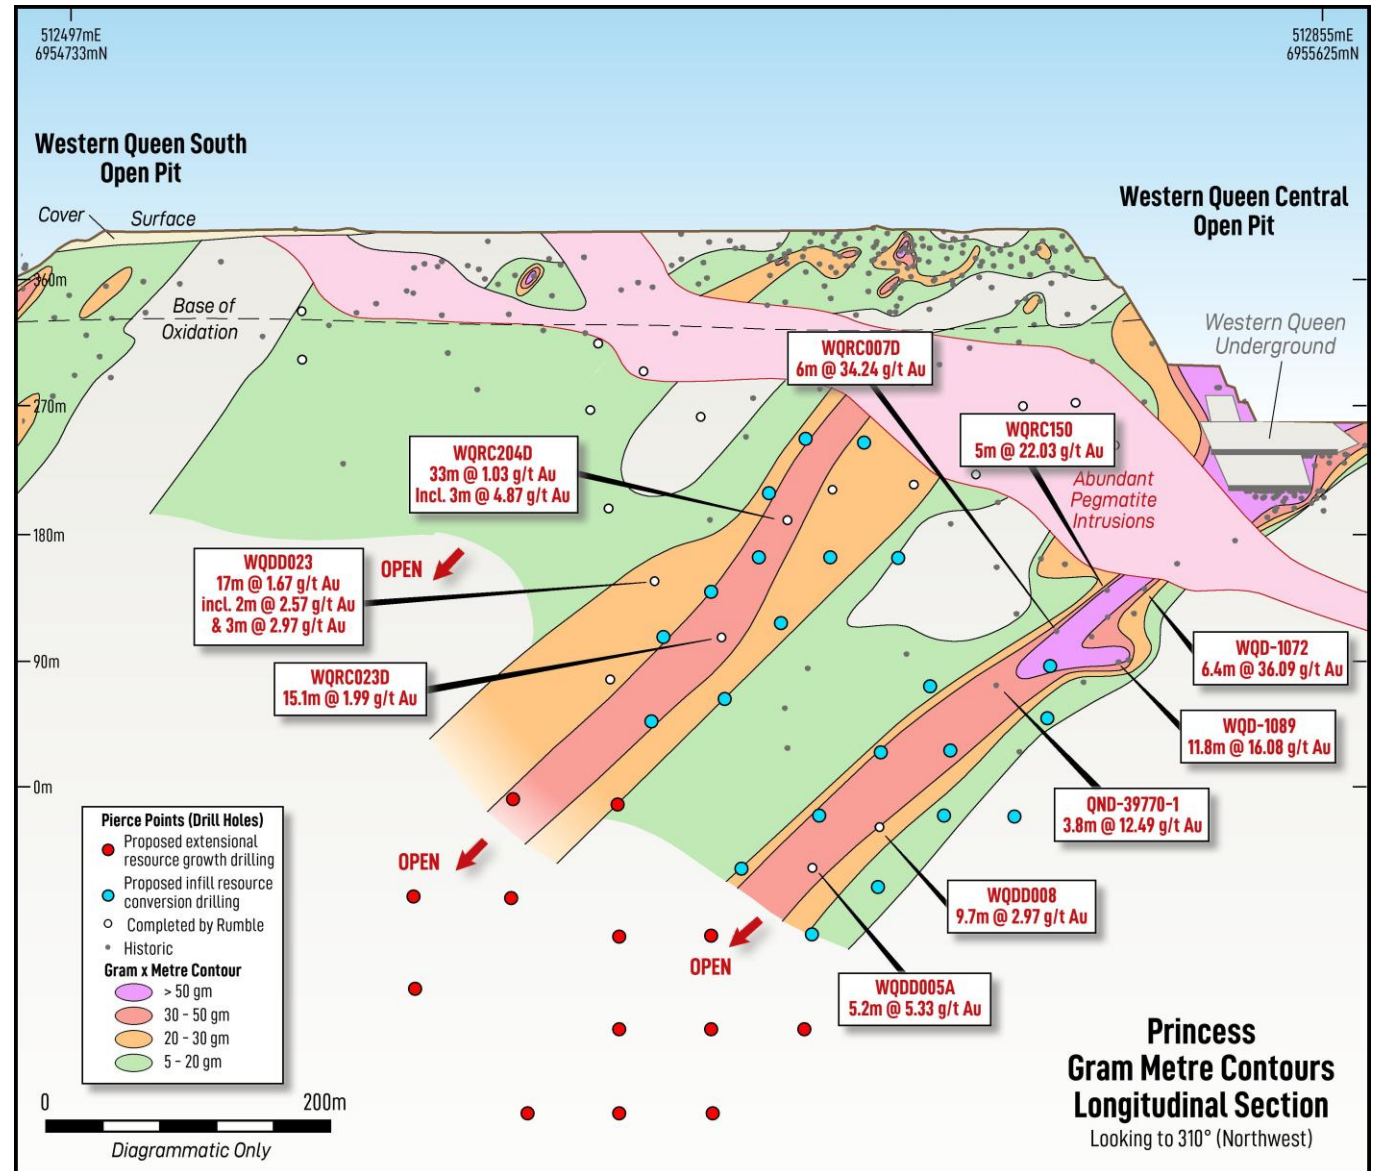

#### Western Queen Central – Down Plunge<sup>1,2,3</sup>

- 6.4m @ 36.09 g/t Au from 305.7m (WQD-1072)
- 6m @ 34.24 g/t Au from 354m (WQRC007D)
- 5m @ 22.03 g/t Au from 280m (WQRC150)
- 11.8m @ 16.08 g/t Au from 340.4m (WQD-1089)

<sup>1</sup> Refer Company ASX release dated 18 February 2020

<sup>2</sup> Refer Company ASX Release dated 4 November 2020

<sup>3</sup> Refer Company ASX Release dated 9 June 2020

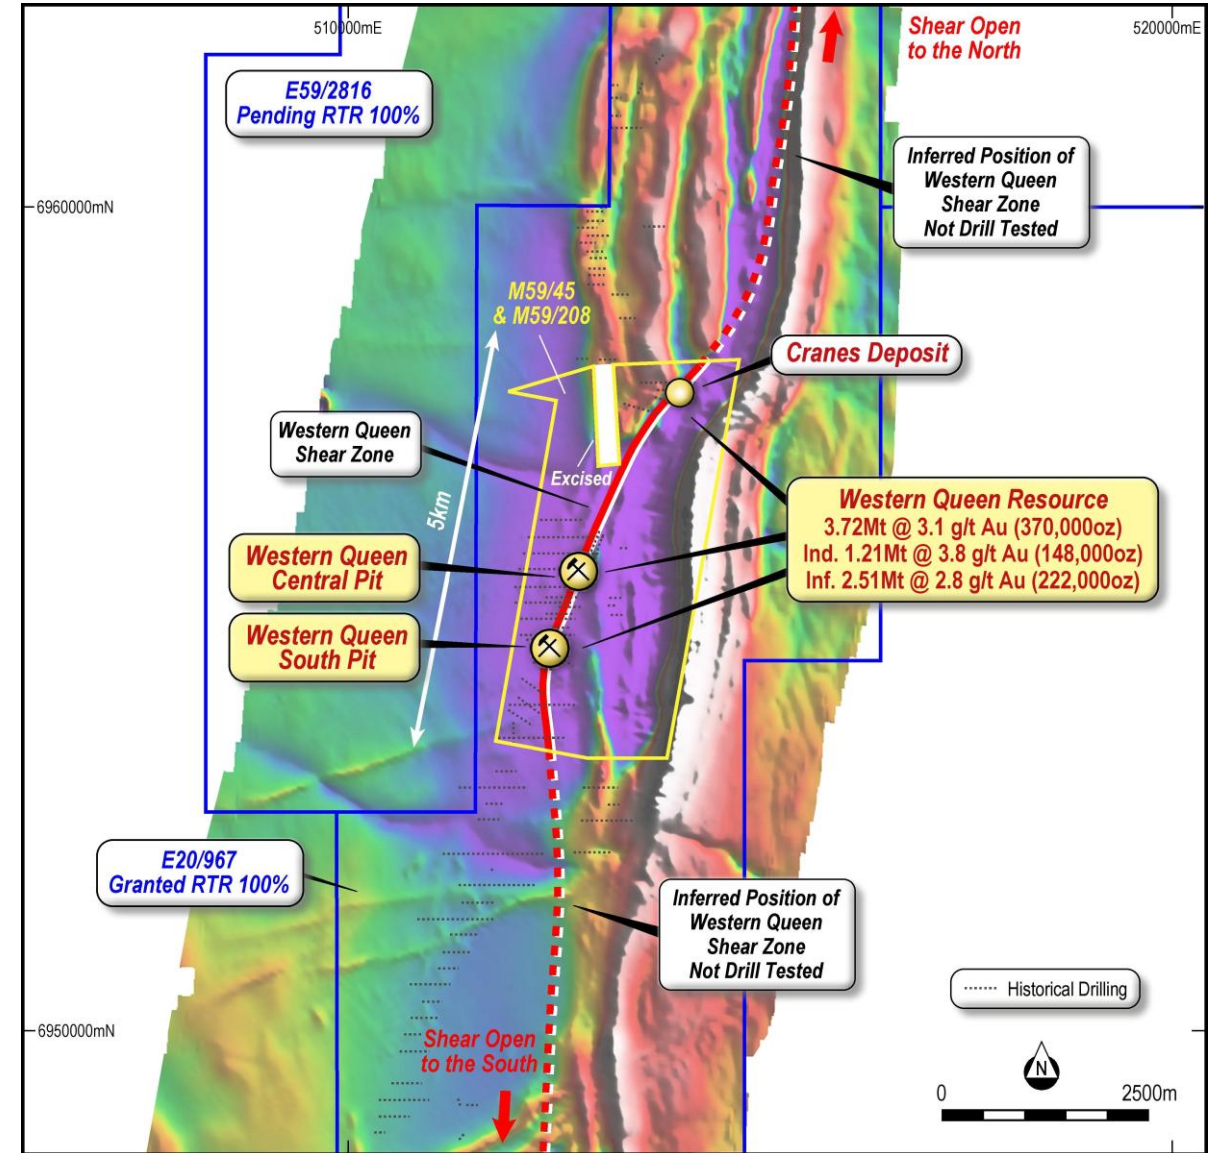

## Gold Targets

### □ On Mining Leases

- **Over the 2km strike** between the Duke and Cranes deposits
  - Limited RAB drilling with an average end of hole depth of less than 20m and only three RC holes
  - Limited historical drilling at Cranes returned intercepts of **14m @ 4.87 g/t Au** from surface and **11m @ 1.85 g/t Au** from surface<sup>1</sup>

### □ Within District

- The regionally significant **Western Queen Shear Zone** has been reinterpreted using detailed airborne magnetics flown by Rumble and **remains untested**

Western Queen Shear Zone Prospectivity over TMI Airborne Magnetics

<sup>1</sup> Refer Company ASX release dated 4 November 2019

# PATHWAY TO PRODUCTION – OPEN PIT &/OR UNDERGROUND

## Open Pits - Term Sheet<sup>1</sup> with Bain Global/MEGA

- **Key terms**
  - Bain & Rumble to collaborate to mine open pits (WQ South, Princess)
  - MEGA to provide mining services
  - Bain to fund up to \$35M in working capital
  - Rumble & Bain share free cash equally after development costs repaid
- **Bain Global Resources LLP**
  - Major Indian mining contractor
- **MEGA Resources**
  - 100% subsidiary of Bain Global, experienced Australian mining team

## Underground

- Internal preliminary scoping study on mining WQ South and Central from underground demonstrates a compelling option
- Plan to release the underground scoping study to market in Dec 25 Qtr

## Ore Tolling/Ore purchase

- Draft ore tolling agreement received
- Terms in line with those used in studies on open pit and underground

## Next steps

- Determine best mine development option – open pits &/or underground
- Obtain all necessary approvals, sign ore tolling or ore sale agreement
- **Production – potentially 2<sup>nd</sup> half CY 2026**

Bain, MEGA & Rumble personnel at Western Queen in November 2024

*Disclaimer: The Company needs to complete scoping studies on the various mining options, execute an ore sale or toll milling agreement, have suitable project financing arranged and receive all necessary approvals before a financial investment decision can be made to commence operations at Western Queen. The Company could be in production during the second half of CY2026 if all necessary approvals and conditions are satisfied and the Board makes the Final Investment Decision to develop the project.*

<sup>1</sup> Refer Company's ASX Announcement 28 November 2024 – Development of Western Queen Gold Project

## Significant Intersections<sup>1 & 2</sup>

WQDD013 intersections:

- **4m @ 4.58% WO<sub>3</sub>**, 0.72g/t Au from 174.85m including
- **2.05m @ 8.71% WO<sub>3</sub>**, 1.38g/t from 176.85m and
- **0.65m @ 18.35% WO<sub>3</sub>**, 2.97g/t Au from 176.85m

MXDD003:

- **11.5m @ 1.46% WO<sub>3</sub>**

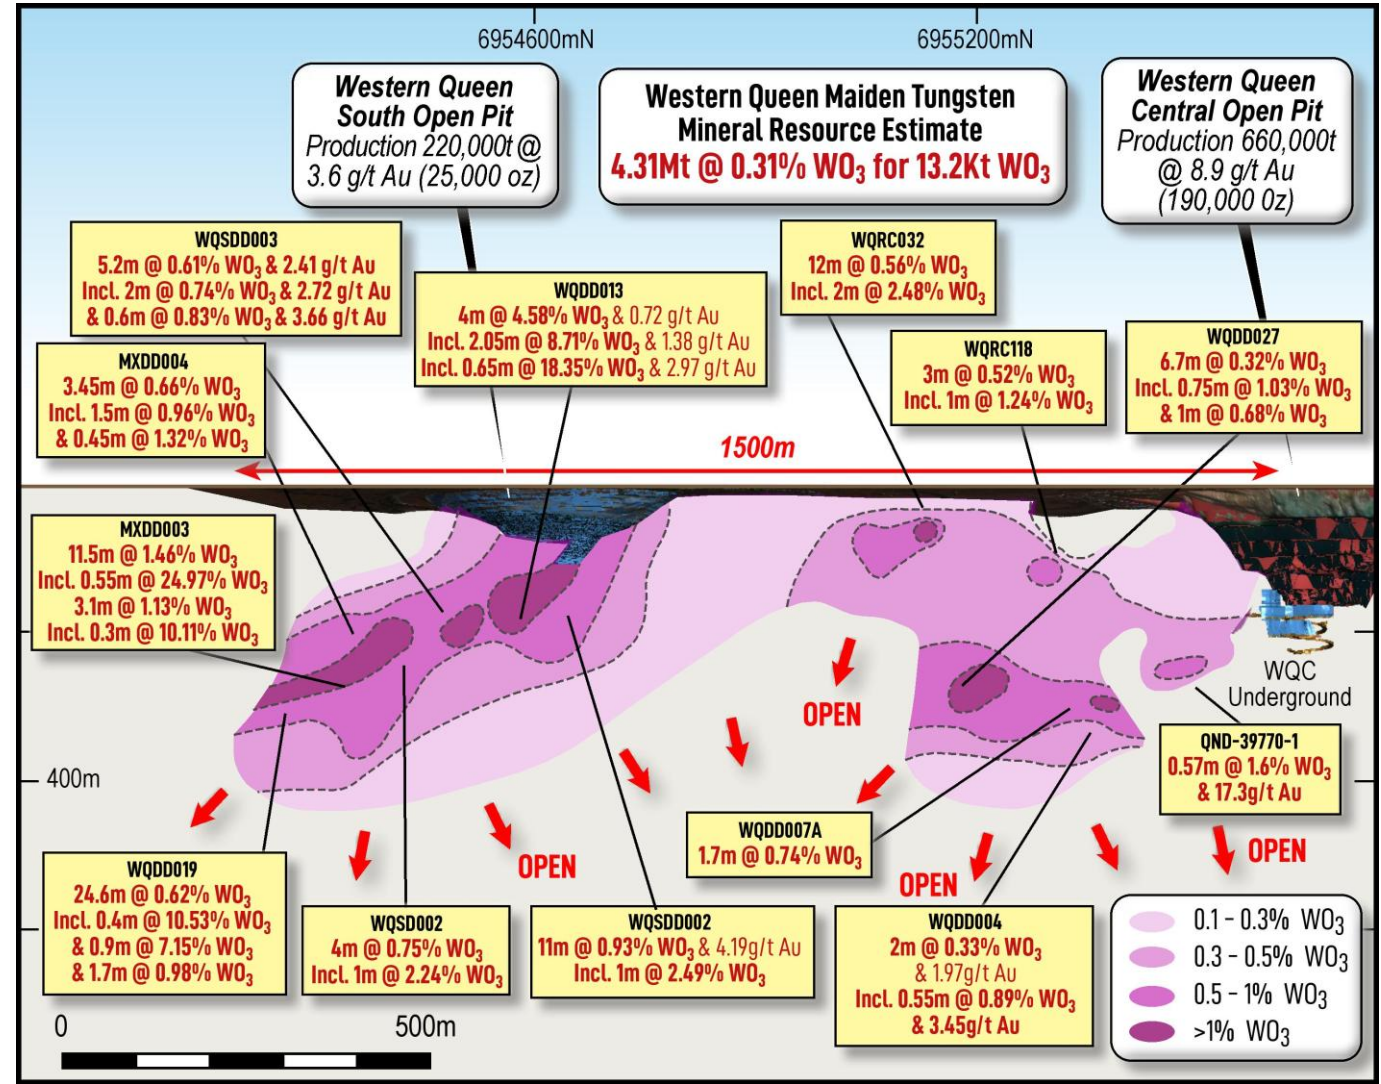

WQDD019:

- **26m @ 0.62% WO<sub>3</sub>**

WQSD002:

- **11m @ 0.93% WO<sub>3</sub>** and 4.19g/t Au

**Higher grade tungsten lodes parallel to defined high-grade gold mineralisation**

1. ASX release dated 6 August 2024 – High-grade Tungsten Discovery at Western Queen

2. ASX released dated 17 February 2025 - High-grade gold and tungsten assays returned from Phase 1 drilling at Western Queen

# TUNGSTEN – MAIDEN RESOURCE – 13.2KT WO<sub>3</sub><sup>1</sup>

Table 1 – Western Queen August 2025 Tungsten Mineral Resource Estimate (0.1% WO<sub>3</sub> Cut-off)

Prospect	Inferred Mineral Resource		
	Tonnage kt	WO <sub>3</sub> %	WO <sub>3</sub> t
WQC	790	0.27	2,200
Princess	810	0.22	1,800
WQS	2,710	0.34	9,200
<b>Total</b>	<b>4,310</b>	<b>0.31</b>	<b>13,200</b>

The maiden resource includes open, higher grade zones, which at a 0.3% WO<sub>3</sub> cutoff result in **1.44Mt @ 0.51% WO<sub>3</sub><sup>1</sup>**

Totals may differ due to rounding, Mineral Resources reported on a dry in-situ basis.

Western Queen maiden resource compared to Almonty’s Sangdong Resources

Table 1-1. Sangdong – Mineral Resources  
As of 28<sup>th</sup> February, 2025 Note 2

WO <sub>3</sub> Cut-Off	Resource Class	Tonnes Kt	WO <sub>3</sub> %	MoS <sub>2</sub> %
0.15%	Indicated	8,029	0.51	0.06
	Inferred	50,686	0.43	0.05

Source: European Commission Study on the Review of the List of Critical Raw Materials

<sup>1</sup> refer Company’s ASX Announcement 11 August 2025

<sup>2</sup> refer Almonty Industries Inc. release 3 July 2025

## Maiden Sulphide, pit constrained, inferred Mineral Resource Estimate (MRE)

- **94Mt @ 3.1% Zn+Pb and 4.1g/t Ag (at a 2% Zn+Pb cutoff) for 2.2Mt Zinc, 0.7Mt Lead and 12.6Moz Silver of contained metal**
- Large scale, low-cost open pit mining proposition in premier mining jurisdiction
- One of the largest zinc sulphide discoveries globally over the last decade

## Metallurgical testwork confirms

- High recoveries and bulk concentrate spec. (+60% Zn+Pb) suitable for ISP smelters
- HydroFloat™ works – rejects 30% of the waste and should lead to lower plant capex & opex

## Project optionality

- The pit constrained MRE hosts a **41Mt higher-grade component** >3% Zn+Pb cut-off

## Exceptional resource growth and discovery potential

- **Deposits remain open with less than 30%** of the now 70km host Unconformity Unit effectively drill tested
- Excellent potential to locate further **near-surface high grade areas** i.e. **Mato, Kalitan, Colorado zones**
- **High grade MVT deposit targets** in fertile underlying carbonate formations remain **untested**

<sup>1</sup> refer Company's ASX Announcement 19 April 2023

# GLOBALY SIGNIFICANT PIT CONSTRAINED MAIDEN RESOURCE<sup>1</sup>

**Table A: Maiden Inferred Mineral Resource tabulation for the Earraheedy Project.**

Cut off Zn+Pb %	Inferred – Chinook					Inferred – Tonka and Navajoh					Inferred Total				
	Tonnes	Zn+Pb	Zn	Pb	Ag	Tonnes	Zn+Pb	Zn	Pb	Ag	Tonnes	Zn+Pb	Zn	Pb	Ag
	Mt	%	%	%	g/t	Mt	%	%	%	g/t	Mt	%	%	%	g/t
0.5	334	1.3	0.9	0.4	2.3	128	1.5	1.2	0.2	1.9	462	1.3	1.0	0.3	2.2
1.0	135	2.1	1.5	0.6	3.4	59	2.3	2.0	0.4	2.6	194	2.2	1.6	0.5	3.1
<b>2.0</b>	<b>63</b>	<b>3.0</b>	<b>2.1</b>	<b>0.8</b>	<b>4.6</b>	<b>31</b>	<b>3.3</b>	<b>2.8</b>	<b>0.5</b>	<b>3.4</b>	<b>94</b>	<b>3.1</b>	<b>2.4</b>	<b>0.7</b>	<b>4.2</b>
2.5	39	3.4	2.4	0.9	5.2	25	3.5	3.0	0.5	3.6	65	3.4	2.6	0.8	4.5
3.0	24	3.8	2.7	1.1	5.7	17	3.9	3.3	0.6	3.8	41	3.8	3.0	0.9	4.9
4.0	7	4.7	3.3	1.5	6.8	5	4.9	4.1	0.8	4.3	12	4.8	3.6	1.2	5.7

**Footnote:** Inferred Mineral Resource is constrained within optimised pit shells and tabulated above at different economic Zn+Pb% cut offs.

# EXCEPTIONAL RESOURCE GROWTH POTENTIAL

- Inferred resources constrained to closer spaced drilling **with potential to significantly grow resources with infill and extension drilling**
- **Exceptional resource expansion** with deposits open in all directions
- Mineralisation intersected in broader spaced drilling outside of inferred resource areas **highlights the potential for near term resource growth**
- Potential to **discover high-grade MVT and fault related resources** beneath existing resource area in underlying carbonate formations

## Thunderstorm - Au

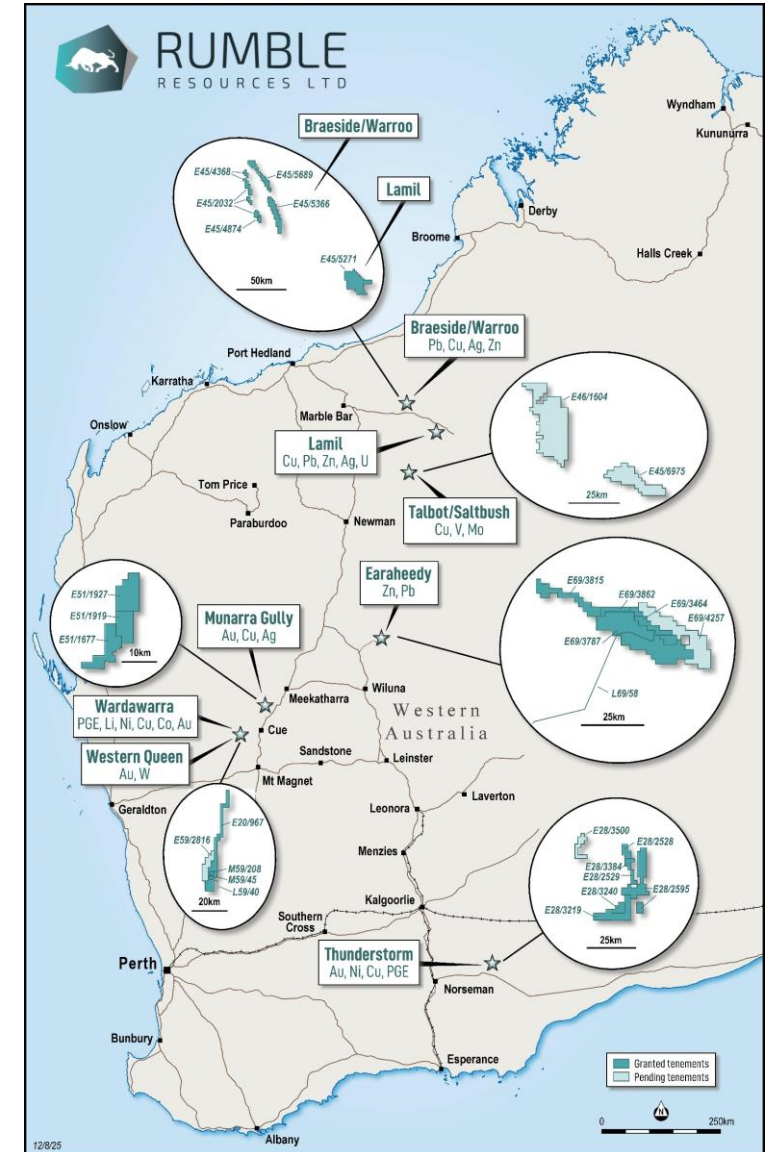

- Potential to host major palaeochannel/basement gold deposits
- Near surface high-grade intersections:
  - **16m @ 6.69g/t Au from 42m**
  - **6m @ 9.15g/t Au from 48m**
- 10,000m aircore and RC drill program being planned for FY26

## Earaheedy – base metals & Ag

- Globally significant Zn-Pb-Ag discovery
- **Maiden Resource 2.2Mt Zn, 0.7Mt Pb & 12.6Moz Ag**
- Looking for a development partner

## Other Projects

- Munarra Gully – prospective for Au, Cu, Ag
- Lamil – Cu

# FRASER RANGE – THUNDERSTORM GOLD PROJECT

## Acquisition

- Rumble has acquired the remaining 70% from IGO
- 3 tenements – E28/2528, 2595, 2529
- \$300k in Rumble stock & 1.05% NSR

## Gazelle Discovery

- Prior wide spaced AC drilling on 1,500m traverses returned high-grade paleo channel gold mineralisation in 2019 including:
  - 16m @ 6.69g/t Au from 42m**
  - 6m @ 9.15g/t Au from 48m

## Pion Discovery

- 4m @ 3.80g/t Au from 86m
- Gold anomalism in 6 holes over 1.2km area

## Why we like Thunderstorm

- Gazelle and Pion have similar characteristics to the palaeochannel/placer gold deposits of Higginsville and Kanowna
- Shallow gold mineralisation with high-grade zones at Gazelle point to a potential proximal high-grade basement source

## Next steps

- AC infill drill program at Gazelle being planned

Thunderstorm Project Location & AC Drill Results

# PROPOSED NEWS FLOW – INDICATIVE TIMETABLE<sup>1</sup>

	Sept 2025	Oct	Nov	Dec	Jan 2026
<b>Western Queen Resource Growth</b> <ul style="list-style-type: none"> <li>• Extensional &amp; infill drilling</li> </ul>					
<b>Western Queen gold pathway to production</b> <ul style="list-style-type: none"> <li>• Ore purchase/tolling Agreement</li> <li>• Govt Approvals (open pit)</li> <li>• Dewater pit</li> <li>• Targeting gold production</li> </ul>					
	2 <sup>nd</sup> half CY26				
<b>Tungsten</b> <ul style="list-style-type: none"> <li>• Met test work</li> <li>• Scoping study</li> </ul>					
<b>Earaheedy</b> <ul style="list-style-type: none"> <li>• Internal Scoping Study</li> <li>• Seek development partner</li> </ul>					

<sup>1</sup>Priorities and dates for Western Queen could change due to exploration success and/or events outside of the Company's control

## POSITIONED FOR CASHFLOW & FUTURE RESOURCE GROWTH

Driving value through exploration success and key milestone achievements to enhance shareholder returns.

### Western Queen Au & WO<sub>3</sub>

- Aim to grow gold resources with extensional drilling
- Infill drilling to increase confidence ahead of proposed mining activities
- Grow the tungsten resource and determine route to cashflow

### Earaheedy Zn,Pb,Ag

- Complete the internal scoping study
- Seek a development partner

### Other Projects Au, Cu, PGMs

- Drill Thunderstorm Au targets
- Continue to build a Cu-Au exploration portfolio
- Advance other projects via JVs/partnerships/other forms of collaboration

### Recognition of True Value

- Gold production to fund dividend stream and resource growth at Western Queen
- Add tungsten revenue stream
- Unlock value of Earraheedy

# INDICATIVE OFFER TIMETABLE

Event	Date (2025)
Trading resumes, Announcement of Capital Raising	Tuesday, 9 September 2025
Entitlement Offer Record Date (7:00pm AEST)	Friday, 12 September 2025
Settlement of new shares issued under Tranche One of the Placement	Friday, 12 September 2025
Allotment and trading of new shares issued under Tranche One of the Placement	Monday, 15 September 2025
Entitlement Offer opens and Offer Booklet dispatched	Tuesday, 16 September 2025
Entitlement Offer closes (5:00pm AEST)	Friday, 26 September 2025
Announcement of results of Entitlement Offer	Wednesday, 1 October 2025
Issue of new shares under the Entitlement Offer	Friday, 3 October 2025
Normal trading of new shares under the Entitlement Offer	Tuesday, 7 October 2025
EGM to approve issue of new shares under Tranche Two of the Placement	Expected to be in or around October 2025
Settlement of new shares under Tranche Two of the Placement	Expected to be in or around October 2025
Allotment and trading of new shares issued under Tranche Two of the Placement	Expected to be in or around October 2025

*Disclaimer: The above dates are indicative only and may change without notice. The Company, in consultation with the Joint Lead Managers, reserves the right to vary the times and dates of the Offer including to close the Offer early, extend the Offer or to accept late applications, either generally or in particular cases, without notification. Applications received under the Offer are irrevocable and may not be varied or withdrawn except as required by law. All references to time are to Australian Eastern Standard Time ("AEST").*

# SUMMARY OF KEY RISKS

This section identifies the areas that the directors regard as the major risks associated with an investment in the Company. Investors should be aware that an investment in the Company involves many risks, many of which are outside of the control of the Company and its directors. There are numerous widespread risks associated with investing in any form of business, with investing in the exploration, development and mining industry, and with investing in the share market generally. There is also a range of specific risks associated with the Company's business. The following is a non-exhaustive summary of some of the major risk factors which potential investors need to be aware of.

Risk	Description
<p><b>Additional requirements for capital</b></p>	<p>The future capital requirements of the Company will depend on many factors including the results of future exploration and mine development activities. The Company believes its available cash and resources following the Offer should be adequate to fund its obligations in respect of its exploration and pre-development activities and other objectives as disclosed in this presentation. Additional funding will likely be required to develop Western Queen or for other projects.</p> <p>Additional funding may be raised by the Company via the issue of equity or debt or a combination of debt and equity or asset sales. Any additional equity financing will dilute shareholders, and debt financing, if available, may involve restrictions on financing and operating activities.</p> <p>If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its programs or enter joint venture arrangements to reduce expenditure, and this could have a material adverse effect on the Company's activities. Unfavourable market conditions may adversely affect the Company's ability to raise additional funding regardless of the Company's performance.</p>
<p><b>Budget risk</b></p>	<p>The exploration costs of the Company are based on certain assumptions with respect to the mining and timing of exploration. By their nature, these estimates and assumptions are subject to uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions.</p>
<p><b>Exploration risk</b></p>	<p>Mineral exploration by its nature is a high-risk activity and there can be no guarantee of exploration success on the Company's projects. There can be no assurance that exploration of the tenements, or any other tenements that may be acquired in the future, will result in the discovery of an economic deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited. Further, exploration involves certain operating hazards, such as failure and or breakdown of equipment, adverse geological, seismic, and geotechnical conditions, access to water, industrial accidents, labour disputes, adverse weather conditions, pollution and other environmental hazards and risks. The Company's activities may also be delayed by shortages in the availability of personnel (see personnel and operating costs risks below) and equipment shortages such as drilling rigs and mining equipment.</p>
<p><b>Resources risk</b></p>	<p>The Company has released a Mineral Resource Estimate Upgrade for the Western Queen Gold Project in July 2025, a Maiden Resource Estimate for the Western Queen Tungsten Resource in August 2025 and the Maiden Resource Estimate for the Earahedy Zinc, Lead, Silver Project in April 2023. No assurance can be given that the Mineral Resource estimates will result in Ore Reserves that will be commercially viable and economically exploited.</p> <p>Mineral Resource estimates are prepared in accordance with the JORC Code (2012 Edition) and are expressions of judgement based on knowledge, experience and industry practice. Estimates that are valid when made may change significantly when new information becomes available, which could in turn affect the Company's mining plans and ultimately its financial performance and value. In addition, commodity price fluctuations, as well as increased production costs or reduced throughput and/or recovery rates, may render Ore Reserves and Mineral Resources uneconomic and so may materially affect any such estimates.</p>

# SUMMARY OF KEY RISKS

This section identifies the areas that the directors regard as the major risks associated with an investment in the Company. Investors should be aware that an investment in the Company involves many risks, many of which are outside of the control of the Company and its directors. There are numerous widespread risks associated with investing in any form of business, with investing in the exploration, development and mining industry, and with investing in the share market generally. There is also a range of specific risks associated with the Company's business. The following is a non-exhaustive summary of some of the major risk factors which potential investors need to be aware of.

Risk	Description
Metallurgical risk	<p>For gold, silver, base metals and tungsten the mineral recoveries are dependent upon the metallurgical process, and by its nature contain elements of significant risk such as identifying a metallurgical process through test work to produce a saleable product, developing an economic process route to produce a saleable product, and changes in mineralogy in the ore deposit can result in inconsistent ore grades and recovery rates affecting the economic viability of the project.</p>
Development and mining risk	<p>Ultimate and continuous success of the Company's activities is dependent on numerous factors including:</p> <ul style="list-style-type: none"> <li>(a) for the Western Queen Gold Project securing an ore sale or ore toll milling agreement with a local processing plant;</li> <li>(b) for the Earahedy Project and Western Queen Tungsten Project metallurgical recoveries, mineral processing outcomes and metal concentrate payabilities;</li> <li>(c) the development of economically recoverable Ore Reserves;</li> <li>(d) access to adequate capital to fund and develop its projects;</li> <li>(e) construction of efficient development and production infrastructure within capital expenditure budgets;</li> <li>(f) securing and maintaining title to interests;</li> <li>(g) obtaining regulatory consents and approvals necessary for the conduct of mineral exploration, development and production; and</li> <li>(h) retention of appropriately skilled and experienced employees, contractors, and consultants.</li> </ul> <p>The Company's operations may be delayed or prevented because of factors beyond the Company's control including adverse weather conditions, environmental hazards, industrial accidents and disputes, technical failures, fires and other accidents, unusual or unexpected geological conditions, mechanical difficulties or a shortage of technical expertise or equipment.</p> <p>There may be difficulties with obtaining government and/or third-party approvals, operational difficulties encountered with construction, extraction and production activities, unexpected shortages or increases in the price of consumables, plant and equipment, cost overruns or lack of access to required levels of funding.</p> <p>The occurrence of any of these circumstances could result in the Company not realising its operational or development plans or such plans costing more than expected or taking longer to realise than planned. Any of these outcomes could have an adverse effect on the Company's financial and operational performance.</p>
Personnel and Operating Costs	<p>The Western Australian (WA) resource economy is currently very active. The skilled labour pool (management, technical and blue collar) is relatively inelastic. There is a high demand in WA for skilled workers from competing operators. Tightening of the labour market due to a shortage of skilled labour, combined with a high industry turnover rate and growing number of competing employers for skilled labour, may inhibit the Company's and/or its contractors the ability to identify, retain and employ the skilled workers required for its operations. The Company may be exposed to increased labour costs in markets where the demand for labour is strong. A shortage of skilled labour may delay, or halt planned development, limit the Company's ability to grow its operations or lead to a decline in productivity.</p>

# SUMMARY OF KEY RISKS

This section identifies the areas that the directors regard as the major risks associated with an investment in the Company. Investors should be aware that an investment in the Company involves many risks, many of which are outside of the control of the Company and its directors. There are numerous widespread risks associated with investing in any form of business, with investing in the exploration, development and mining industry, and with investing in the share market generally. There is also a range of specific risks associated with the Company's business. The following is a non-exhaustive summary of some of the major risk factors which potential investors need to be aware of.

Risk	Description
<p><b>Access to infrastructure risk</b></p>	<p>Mining, processing, development, and exploration activities depend, to a significant degree, on adequate infrastructure. In the course of developing future mines, the Company may need to construct and/or update existing infrastructure, which includes permanent water supplies, dewatering, tailings storage facilities, power, maintenance facilities and logistics services and access roads. Reliable roads, bridges, power sources and water supply are important determinants which affect capital and operating costs. Unusual or infrequent weather phenomena, sabotage, government or other interference in the maintenance or provision of such infrastructure could materially adversely affect the Company's operations, financial condition, and results of operations. Any such issues arising in respect of the supporting infrastructure or on the Company's sites could materially adversely affect the Company's results of operations or financial condition. Furthermore, any failure or unavailability of the Company's operational infrastructure (for example, through equipment failure or disruption to its transportation arrangements) could materially adverse its exploration activities or development of a mine or project.</p>
<p><b>Tenure risk</b></p>	<p>Interests in tenements in Australia are governed by state legislation and are evidenced by the granting of licenses or leases. Each license or lease is for a specific term and has annual expenditure and reporting commitments, together with other conditions requiring compliance. The Company could lose its title to or its interest in one or more of the tenements in which it has an interest if license conditions are not met or if insufficient funds are available to meet the minimum expenditure commitments.</p> <p>The Company's tenements, and other tenements in which the Company may acquire an interest, will be subject to renewal, which is usually at the discretion of the relevant authority. If a tenement is not renewed the Company may lose the opportunity to discover mineralisation and develop that tenement. The Company cannot guarantee that any of its tenement applications will be granted, or that tenements in which it presently has an interest will be renewed beyond their current expiry date.</p>
<p><b>Approval risk</b></p>	<p>The Company will be reliant on heritage, environmental and other approvals in Western Australia to enable it to proceed with the exploration and development of any of its tenements or the granting of its tenement applications. There is no guarantee that the required approvals will be granted, and failure by the Company to obtain the relevant approvals, or any delay in the award or transfer of the approvals, may materially and adversely affect the Company's ability to proceed with its proposed exploration and development programs.</p>
<p><b>Native title</b></p>	<p>Many of the areas the subject of the Company's tenements or tenement applications, are subject in whole or part to native title determinations, or claims made by native title parties, and may contain aboriginal heritage sites. The ability of the Company to undertake exploration or development operations on such tenements may be delayed or prohibited in the event that applicable consents cannot be obtained from the relevant native title parties</p>
<p><b>Payment obligations</b></p>	<p>Pursuant to the licences comprising the Company's projects, the Company will become subject to payment and other obligations. In particular, licence holders are required to expend the funds necessary to meet the minimum work commitments attaching to the tenements. Failure to meet these work commitments may render the licence liable to be cancelled or its size reduced. Further, if any contractual obligations are not complied with when due, in addition to any other remedies that may be available to other parties, this could result in dilution or forfeiture of the Company's interest in its projects.</p>

# SUMMARY OF KEY RISKS

This section identifies the areas that the directors regard as the major risks associated with an investment in the Company. Investors should be aware that an investment in the Company involves many risks, many of which are outside of the control of the Company and its directors. There are numerous widespread risks associated with investing in any form of business, with investing in the exploration, development and mining industry, and with investing in the share market generally. There is also a range of specific risks associated with the Company's business. The following is a non-exhaustive summary of some of the major risk factors which potential investors need to be aware of.

Risk	Description
Commodity price volatility	If the Company moves into mineral production, the revenue it will derive through the sale of commodities exposes the potential income of the Company to price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company including the international supply and demand for commodities, currency exchange rates, the quality of the minerals produced, actions taken by governments, forward selling activities and other macroeconomic factors.
Environmental risks	Mineral extraction and processing is an industry that has become subject to increasing environmental responsibility and liability. Future legislation and regulations or environmental regulations applying to mining operations may impose significant environmental obligations on the Company. The Company intends to conduct its activities in a responsible manner which minimises its impact on the environment, and in accordance with applicable laws.
Climate change risk	<p>Climate change is a risk the Company has considered, particularly related to its operations in the mining industry. The climate change risks particularly attributable to the Company include:</p> <ul style="list-style-type: none"> <li>(a) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences; and</li> <li>(b) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns.</li> </ul> <p>All these risks associated with climate change may significantly change the industry in which the Company operates.</p>
Key personnel risk	The responsibility of overseeing the day-to-day operations and the Company's strategic management depends substantially on its senior management and key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment. One of the Company's key objectives is to continue to build its team with a focus on internal resourcing and nurturing an inclusive and growth orientated culture.
Joint venture risk	The Company is party to several joint venture and earn-in agreements with third parties. There is a risk that the financial failure or default of the counterparties to such agreements may adversely affect the operations and performance of the Company or its interest in these projects. As is the case in all earn in and joint venture arrangements, there is a risk that joint venture partners may default in their obligations or not act in the best interests of the joint venture, which in either case could result in an adverse effect on the interests and prospects of the Company.

# SUMMARY OF KEY RISKS

This section identifies the areas that the directors regard as the major risks associated with an investment in the Company. Investors should be aware that an investment in the Company involves many risks, many of which are outside of the control of the Company and its directors. There are numerous widespread risks associated with investing in any form of business, with investing in the exploration, development and mining industry, and with investing in the share market generally. There is also a range of specific risks associated with the Company's business. The following is a non-exhaustive summary of some of the major risk factors which potential investors need to be aware of.

Risk	Description
Other projects	The Company's primary focus is to bring the Western Queen Gold Project into production in the shortest possible timeframe. The Company has disclosed it is seeking a development partner for Earahedy and continues to review opportunities for its other regional projects (i.e., Fraser Range, Braeside, Warroo, Munarra Gully and Lamil). The Company cautions that it continues to assess the opportunities available to it in respect of these projects and has not entered into any agreements with third parties (whether binding or otherwise) in this respect. The Directors will continue to assess the opportunities available and caution that there can be no certainty as to how the Company may progress with these projects. Any potential transaction may result in transaction costs and the divergence of management time and attention.
Insurance risk	The Company insures its operations in accordance with industry practice. However, in certain circumstances, the Company's insurance may not be available or of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company. In addition, there is a risk that an insurer defaults in the payment of a legitimate claim by the Company.
Occupational health and safety risk	Mining and exploration activities have inherent risks and hazards. The Company is committed to providing a safe and healthy workplace and environment for its personnel, contractors, and visitors. The Company provides appropriate instructions, equipment, preventative measures, first aid information, medical facilities and training to all stakeholders through its occupational health and safety management systems. A serious site safety incident may expose the Company to significant penalties and the Company may be liable for compensation to the injured personnel. These liabilities may not be covered through the Company's insurance policies or, if they are covered, may exceed the Company's policy limits or be subject to significant deductibles. Also, any claim under the Company's insurance policies could increase the Company's future costs of insurance. Accordingly, any liabilities for workplace accidents could have a material adverse impact on the Company's liquidity and financial results. It is not possible to anticipate the effect on the Company's business from any changes to workplace occupational health and safety legislation or directions or necessitated by a concern for the health of the workforce. Such changes may have an adverse impact on the financial performance and/or financial position of the Company.
New projects and acquisitions	The Company may make acquisitions of new resource projects in the future. The maintenance of a pipeline of discovery opportunities to complement the Company's existing portfolio remains a key aspect of the Company's business. There can be no guarantee that any new project acquisition will eventuate from these pursuits, or that any acquisitions will result in a return for shareholders. Such acquisitions may result in use of the Company's cash resources and issuances of equity securities that might involve a dilution to shareholders. The Directors will use their expertise and experience in the sector to assess the value of potential projects that have characteristics that are likely to provide returns for shareholders.
Third party risk	The Company will rely significantly on strategic relationships with other entities and also on a good relationship with regulatory and government departments and other interest holders. The Company will also rely on third parties to provide essential contracting services. The Company is focused on continuing to build trust with the key stakeholders which includes landowners, indigenous peoples, local communities and governing organisations. There can however be no assurance that its existing relationships will continue to be maintained or that new ones will be successfully formed. The Company could be adversely affected by changes to such relationships or difficulties in forming new ones.

ersonal use only

# SUMMARY OF KEY RISKS

This section identifies the areas that the directors regard as the major risks associated with an investment in the Company. Investors should be aware that an investment in the Company involves many risks, many of which are outside of the control of the Company and its directors. There are numerous widespread risks associated with investing in any form of business, with investing in the exploration, development and mining industry, and with investing in the share market generally. There is also a range of specific risks associated with the Company's business. The following is a non-exhaustive summary of some of the major risk factors which potential investors need to be aware of.

Risk	Description
<b>Pandemic risk</b>	Supply chain disruptions resulting from pandemics such as COVID-19 and measures implemented by governments around the world to limit the transmission of such viruses may adversely affect the Company's operations, financial position, prospects, and ability to raise capital. Travel bans may also lead to shortages of skilled personnel. Further outbreaks of COVID-19 or other pandemics and the implementation of travel restrictions may also have the potential to restrict access to the Company's projects.
<b>Competition</b>	The Company will compete with other companies, including major mining companies in Australia and internationally. Some of these companies will have greater financial and other resources than the Company and, as a result, may be in a better position to compete for future business opportunities. There can be no assurance that the Company can compete effectively with these companies.
<b>Taxation</b>	The acquisition and disposal of shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring shares from a taxation point of view and generally. To the maximum extent permitted by law, the Company, its officers and each of their respective advisers accept no liability and responsibility with respect to the taxation consequences of applying for shares under the Offer.
<b>Securities investments and share market conditions</b>	There are risks associated with any securities investment. The prices at which the securities trade may fluctuate in response to numerous factors. Furthermore, the stock market, and in particular the market for exploration and mining companies may experience extreme price and volume fluctuations that may be unrelated or disproportionate to the operating performance of such companies. These factors may materially adversely affect the market price of the securities of the Company regardless of the Company's operational performance. Neither the Company nor the Directors warrant the future performance of the Company, or any return of an investment in the Company.
<b>Force majeure</b>	The Company's projects now or in the future may be adversely affected by risks outside the control of the Company, including fires, labour rest, civil disorder, war, subversive activities or sabotage, floods, pandemics, explosions or other catastrophes, epidemics, or quarantine restrictions.
<b>Economic risk</b>	Changes in both Australian and world economic conditions may adversely affect the financial performance of the Company. Factors such as inflation, currency fluctuations, interest rates, industrial disruption and economic growth may impact on future operations and earnings.

# SUMMARY OF KEY RISKS

This section identifies the areas that the directors regard as the major risks associated with an investment in the Company. Investors should be aware that an investment in the Company involves many risks, many of which are outside of the control of the Company and its directors. There are numerous widespread risks associated with investing in any form of business, with investing in the exploration, development and mining industry, and with investing in the share market generally. There is also a range of specific risks associated with the Company's business. The following is a non-exhaustive summary of some of the major risk factors which potential investors need to be aware of.

Risk	Description
Government and legal risk	Changes in government, monetary policies, taxation and other laws can have a significant impact on the Company's assets, operations and ultimately the financial performance of the Company and its shares. Such changes are likely to be beyond the control of the Company and may affect industry profitability as well as the Company's capacity to explore and mine. The Company is not aware of any reviews or changes that would affect its current or proposed interests in tenements. However, changes in political and community attitudes on matters such as taxation, competition policy and environmental issues may bring about reviews and possibly changes in government policies. There is a risk that such changes may affect the Company's exploration and/or development plans or its rights and obligations in respect of the tenements in which it holds interests. Any such government action may also require increased capital or operating expenditures and could prevent or delay certain operations by the Company.
Litigation risk	The Company is exposed to possible litigation risks including native title claims, tenure disputes, environmental claims, royalty disputes, other contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position. The Company is not currently engaged in any material litigation.
Speculative investment	The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of its Shares. The Shares to be issued pursuant to the Offer carry no guarantee with respect to the payment of dividends, returns of capital, or the market value of those Shares. Potential investors should consider that the investment in the Company is highly speculative and should consult their professional advisers before deciding whether to apply for shares pursuant to the Offer.

# FOREIGN SELLING RESTRICTIONS

This document does not constitute an offer of new ordinary shares (“New Shares”) of the Company in any jurisdiction in which it would be unlawful. In particular, this document may not be distributed to any person, and the New Shares may not be offered or sold, in any country outside Australia except to the extent permitted below.

Jurisdiction	Description
Singapore	<p>This document and any other materials relating to the New Shares have not been, and will not be, lodged or registered as a prospectus in Singapore with the Monetary Authority of Singapore. Accordingly, this document and any other document or materials in connection with the offer or sale, or invitation for subscription or purchase, of New Shares, may not be issued, circulated or distributed, nor may the New Shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore except pursuant to and in accordance with exemptions in Subdivision (4) Division 1, Part 13 of the Securities and Futures Act 2001 of Singapore (the “SFA”) or another exemption under the SFA.</p> <p>This document has been given to you on the basis that you are an “institutional investor” or an “accredited investor” (as such terms are defined in the SFA). If you are not such an investor, please return this document immediately. You may not forward or circulate this document to any other person in Singapore.</p> <p>Any offer is not made to you with a view to the New Shares being subsequently offered for sale to any other party in Singapore. On-sale restrictions in Singapore may be applicable to investors who acquire New Shares. As such, investors are advised to acquaint themselves with the SFA provisions relating to resale restrictions in Singapore and comply accordingly.</p>
United Kingdom	<p>Neither this document nor any other document relating to the offer has been delivered for approval to the Financial Conduct Authority in the United Kingdom and no prospectus (within the meaning of section 85 of the Financial Services and Markets Act 2000, as amended (“FSMA”)) has been published or is intended to be published in respect of the New Shares.</p> <p>The New Shares may not be offered or sold in the United Kingdom by means of this document or any other document, except in circumstances that do not require the publication of a prospectus under section 86(1) of the FSMA. This document is issued on a confidential basis in the United Kingdom to “qualified investors” within the meaning of Article 2(e) of the UK Prospectus Regulation. This document may not be distributed or reproduced, in whole or in part, nor may its contents be disclosed by recipients, to any other person in the United Kingdom.</p> <p>Any invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) received in connection with the issue or sale of the New Shares has only been communicated or caused to be communicated and will only be communicated or caused to be communicated in the United Kingdom in circumstances in which section 21(1) of the FSMA does not apply to the Company.</p> <p>In the United Kingdom, this document is being distributed only to, and is directed at, persons (i) who have professional experience in matters relating to investments falling within Article 19(5) (investment professionals) of the Financial Services and Markets Act 2000 (Financial Promotions) Order 2005 (“FPO”), (ii) who fall within the categories of persons referred to in Article 49(2)(a) to (d) (high net worth companies, unincorporated associations, etc.) of the FPO or (iii) to whom it may otherwise be lawfully communicated (“relevant persons”). The investment to which this document relates is available only to relevant persons. Any person who is not a relevant person should not act or rely on this document.</p>
