3. DETAILS OF THE OFFER

3.1 The Offer

On 9 September 2025, the Company announced:

- (a) it had received firm commitments from institutional and sophisticated investors (**Placement Participants**) to subscribe for 280,000,000 Shares (**Placement Shares**) at \$0.025 per Share to raise \$7 million (**Placement**); and
- (b) its intention to undertake the Offer,

The Offer is being made as a non-renounceable entitlement offer of 1 New Share for every 12 Shares held by Eligible Shareholders registered at the Record Date at an issue price of \$0.025 per Share. Fractional entitlements will be rounded up to the nearest whole number.

Based on the capital structure of the Company as set out in Section 3.7 of this Offer Document, a maximum of approximately 79,241,681 Shares will be issued pursuant to this Offer to raise up to approximately \$1,981,042.

As at the date of this Offer Document, the Company has 18,000,000 Options and 10,000,000 Performance Rights on issue. Please refer to section 3.7 of this Offer Document for information on the exercise price and expiry date of the Options on issue.

All of the Shares offered under this Offer Document will rank equally with the Shares on issue at the date of this Offer Document.

The Directors may at any time decide to withdraw this Offer Document and the offer of Shares made under this Offer Document in which case the Company will return all Application monies (without interest) within 28 days of giving such notice of withdrawal.

3.2 The Placement

The Placement will comprise a two-tranche placement, comprising:

- (a) **Tranche One:** to raise approximately \$5.0 million, within the Company's existing placement capacity under ASX Listing Rules 7.1 and 7.1A; and
- (b) **Tranche Two:** to raise approximately \$2.0 million, including from certain directors of the Company, subject to Shareholder approval at an Extraordinary General Meeting (**EGM**) of the Company expected to be held in October 2025.

Placement Participants are not eligible to participate in the Offer as the Placement Shares will be issued after the Record Date.

The Directors of the Company (or their nominees) have committed to subscribe for Shares under Tranche Two of the Placement for an aggregate of \$0.26 million, subject to Shareholder approval for the purposes of ASX Listing Rule 10.11 at the EGM.

3.3 Use of Funds

Completion of the Offer will result in an increase in cash in hand of up to approximately \$1,981,042 (before the payment of costs associated with the Offer).

The Company intends to apply the funds raised under the Placement and Offer (**Capital Raising**) as follows:

Items of Expenditure	\$
Western Queen gold extensional and infill drilling, mining studies and pre-development activities	7,000,000
Western Queen tungsten metallurgical work and other projects	1,100,000
General working capital & expenses of the Offer ^{1,2}	881,042
Total	8,981,042

Note:

1. Funds allocated to working capital will be used for administration expenses of the Company, including administration fees, Director's remuneration and other administration and obligatory overheads.
2. Expenses of the Offer comprise ASX, share registry, legal and broker costs. The Joint Lead Managers have been engaged to act as lead managers and book runners to the Placement and shall receive: (a) a management fee of 6% of the total value of capital raised under the Placement (excluding the total value of capital raised from investors introduced by the Company under the Placement); and (b) a management fee of 2% of the total value of capital raised from investors introduced by the Company under the Placement. As such, the expenses of the Offer will vary depending on the ultimate fees payable to the Joint Lead Managers. The figure in the table assumes that the Joint Lead Managers receive a 6% fee on 100% of the Placement.

The above table is a statement of the Board's current intentions as at the date of this Offer Document. However, Shareholders should note that, as with any budget, the allocation of funds set out in the above table may change depending on a number of factors, including the outcome of operational and development activities, regulatory developments, market and general economic conditions and environmental factors. In light of this, the Board reserves the right to alter the way the funds are applied.

On completion of the Capital Raising (assuming the Offer is fully subscribed), the Board believes the Company will have sufficient working capital to fund its obligations in respect of its exploration and development activities and other objectives as disclosed in the presentation released to the ASX on 9 September 2025. Additional funding will likely be required to complete further feasibility studies and other development costs for the Western Queen Project or for other projects.

In the event the Offer is not fully subscribed, operational objectives can be modified, which may result in delay or substantial changes to the Company's future plans. In this event (and after accounting for associated Offer costs) it is likely that the Company will scale back the remaining items from the above table, on a pro-rata basis.

3.10 Effect of the Offer on control and voting power in the Company

Based on publicly available information as at the date of this Offer Document, those persons which (together with their associates) have a relevant interest in 5% or more of the Shares on issue are set out below:

Substantial holder	Shares	Voting Power as at the date of this Offer document (%)	Entitlement	\$
Bain Resources Holdings Ltd	50,000,000	5.33%	4,166,667	\$104,167

Notes:

1. The voting power in the table is prior to settlement of the Offer.

The potential effect that the issue of the Shares under the Offer will have on the control of the Company is as follows:

- (a) if all eligible shareholders take up their entitlements under the Offer, the issue of Shares under the Offer will have no effect on the control of the Company and all shareholders will hold the same percentage interest in the Company, subject only to changes resulting from ineligible shareholders being unable to participate in the Offer;

- (b) in the more likely event that there is a shortfall, eligible shareholders who do not subscribe for their full entitlement of Shares under the Offer and ineligible shareholders unable to participate in the Offer will be diluted relative to those shareholders who subscribe for some or all of their entitlement as shown by the table in section 3.8; and
- (c) in respect of any shortfall, eligible shareholders (other than related parties) will be entitled to top-up their shareholding, by subscribing for Additional Shares to be issued from the shortfall pool (**Shortfall Offer**). However, the Company will only issue such Shares pursuant to an application received where the Directors are satisfied, in their discretion, that the issue of the Shares will not increase the applicant's voting power above 19.9%. Having regard to the number of Shares to be issued under the Offer, even if a substantial shortfall eventuated, a participant in the Shortfall Offer would not be in a position to exercise any substantive control in the Company.

3.11 Market Price of Shares

The Company is a disclosing entity for the purposes of the Corporations Act and its Shares are enhanced disclosure securities quoted on ASX.

The highest, lowest and last market sale prices of the Shares on ASX during the three months immediately preceding the date of release of this Offer Document and the respective dates of those sales were:

	(\$)	Date
Highest	\$0.037	4 September 2025
Lowest	\$0.022	30 June 2025
Last	\$0.031	15 September 2025

3.12 Opening and Closing Dates

The Offer opens on the Opening Date, being 16 September 2025, and closes on the Closing Date, being 5:00pm (AEST) on 26 September 2025 (or such other dates as the Directors in their discretion shall determine subject to the ASX Listing Rules). The Company will accept Entitlement and Acceptance Forms until the Closing Date or such other date as the Directors in their absolute discretion shall determine, subject to the ASX Listing Rules.

3.13 Issue and dispatch

Shares issued pursuant to the Offer will be issued in accordance with the ASX Listing Rules and the indicative timetable set out in Section 3.4 of this Offer Document. Shares issued pursuant to the Shortfall Offer will be issued on a progressive basis.

Pending the issue of the Shares or payment of refunds pursuant to this Offer Document, all Application monies will be held by the Registry in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest by completing and returning the Entitlement and Acceptance Form.

The expected dates for issue of New Shares offered by this Offer Document and

dispatch of holding statements is expected to occur on the dates specified in the Timetable set out in Section 3.4 of this Offer Document.

It is the responsibility of Applicants to determine the allocation prior to trading in the New Shares. Applicants who sell New Shares before they receive their holding statements will do so at their own risk.

3.14 ASX listing

Application for official quotation by ASX of the New Shares offered pursuant to this Offer Document will be made.

The fact that ASX may grant official quotation to the New Shares is not to be taken in any way as an indication of the merits of the Company or the New Shares now offered for subscription.

3.15 CHESS

The Company is a participant in CHESS, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHESS will be issuer sponsored by the Company. Because the sub-registers are electronic, ownership of securities can be transferred without having to rely upon paper documentation.

Electronic registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with a statement (similar to a bank account statement) that sets out the number of New Shares allotted to them under this Offer Document. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHESS and issuer sponsorship.

Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

3.16 Risk Factors

An investment in New Shares should be regarded as speculative. In addition to the general risks applicable to all investments in listed securities, there are specific risks associated with an investment in the Company which are non-exhaustive. Please refer to Section 5 of this Offer Document for further details.

3.17 Taxation implications

The Directors do not consider it appropriate to give Shareholders advice regarding the taxation consequences of subscribing for New Shares under this Offer Document. The Company, its advisers and its officers do not accept any responsibility or liability for any such taxation consequences to Shareholders.

Shareholders should consult their professional tax adviser in connection with subscribing for New Shares under this Offer Document.

3.18 Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) for the purposes of the Corporations Act and its Shares are enhanced disclosure securities quoted on ASX and, as such, the Company is subject to regular reporting and disclosure obligations under the Corporations Act and the Listing Rules.

4.4 Shortfall Offer

Any Entitlement not taken up pursuant to the Offer will form the Shortfall Offer.

The Shortfall Offer is a separate offer made pursuant to this Offer Document and will remain open for up to three months following the Closing Date. The issue price for each Share to be issued under the Shortfall Offer shall be \$0.025 being the price at which Shares have been offered under the Offer.

No Applicant under the Shortfall Offer has any assurance of being allocated all or any Shares applied for. The allocation of Shortfall Shares by Directors will be influenced by the following factors:

- (a) number of shares bid for by particular Applicants;
- (b) the timeliness of the bid by particular Applicants;
- (c) the Company's desire to expand its spread of institutional shareholders;
- (d) the size and type of funds under management of particular Applicants;

- For personal use only
- (e) overall anticipated level of demand under the Offer;
 - (f) the likelihood that particular Applicants will:
 - (i) be long-term Shareholders;
 - (ii) support the Company's share price post the Offer by purchasing Shares on-market;
 - (iii) support future funding rounds if and when required; and
 - (g) any factors other than those described above that the Company and its brokers consider appropriate.

Having regard to the allocation policy outlined above, the Board presently intends to allocate Shortfall Shares as follows:

- (a) to Eligible Shareholders (other than related parties and other persons referred to in Listing Rule 10.11) who apply for an excess of their full Entitlement, so long as the issue of Shortfall Shares to that Eligible Shareholder would not take their voting power to in excess of 19.99%; and then
- (b) to the extent there remains any residual shortfall, the Directors will use reasonable endeavours to procure subscriptions for the shortfall Shares from sophisticated, professional and other exempt investors under section 708 of the Corporations Act, within three months of the Closing Date, with the allocation of such shortfall Shares to be determined by the Company.

Allocations under the Shortfall Offer will also be managed to ensure that no Shareholder goes above the 20% threshold imposed by section 606 of the Corporations Act.

The Company will not be liable to any person not allocated Shares or not allocated the full amount applied for.

5. RISK FACTORS

5.1 Introduction

The Shares offered under this Offer Document should be considered speculative because of the nature of the Company's business.

There are numerous risk factors involved with the Company's business. Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, but some are outside the control of the Company and cannot be mitigated. Accordingly, an investment in the Company carries no guarantee with respect to the payment of dividends, return of capital or price at which securities will trade.

The following is a summary of the more material matters to be considered. However, this summary is not exhaustive and potential investors should examine the contents of this Offer Document in its entirety and consult their professional advisors before deciding whether to apply for the New Shares.

5.2 Key investment risks

Potential investors should be aware that subscribing for Shares in the Company involves a number of risks. Prospective investors should read this Offer Document in its entirety before deciding whether to apply for Shares under this Offer Document.

These risks together with other general risks applicable to all investments in listed securities not specifically referred to, may affect the value of the Shares in the future. Accordingly, an investment in the Company should be considered highly speculative. Investors should consider consulting their professional advisers before deciding whether to apply for Shares pursuant to this Offer Document.

(a) Additional requirements for capital

The future capital requirements of the Company will depend on many factors including the results of future exploration and mine development activities. The Company believes its available cash and resources following the Offer should be adequate to fund its obligations in respect of its exploration and pre-development activities and other objectives as disclosed in this presentation. Additional funding will likely be required to develop Western Queen or for other projects.

Additional funding may be raised by the Company via the issue of equity or debt or a combination of debt and equity or asset sales. Any additional equity financing will dilute shareholders, and debt financing, if available, may involve restrictions on financing and operating activities.

If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its programs or enter joint venture arrangements to reduce expenditure, and this could have a material adverse effect on the Company's activities. Unfavourable market conditions may adversely affect the Company's ability to raise additional funding regardless of the Company's performance.

(b) **Budget risk**

The exploration costs of the Company are based on certain assumptions with respect to the mining and timing of exploration. By their nature, these estimates and assumptions are subject to uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions.

(c) **Exploration Risk**

Mineral exploration by its nature is a high-risk activity and there can be no guarantee of exploration success on the Company's projects. There can be no assurance that exploration of the tenements, or any other tenements that may be acquired in the future, will result in the discovery of an economic deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited. Further, exploration involves certain operating hazards, such as failure and or breakdown of equipment, adverse geological, seismic, and geotechnical conditions, access to water, industrial accidents, labour disputes, adverse weather conditions, pollution and other environmental hazards and risks. The Company's activities may also be delayed by shortages in the availability of personnel (see personnel and operating costs risks below) and equipment shortages such as drilling rigs and mining equipment.

(d) **Resources risk**

The Company has released a Mineral Resource Estimate Upgrade for the Western Queen Gold Project in July 2025, a Maiden Resource Estimate for the Western Queen Tungsten Resource in August 2025 and the Maiden Resource Estimate for the Earraheedy Zinc, Lead, Silver Project in April 2023. No assurance can be given that the Mineral Resource estimates will result in Ore Reserves that will be commercially viable and economically exploited.

Mineral Resource estimates are prepared in accordance with the JORC Code (2012 Edition) and are expressions of judgement based on knowledge, experience and industry practice. Estimates that are valid when made may change significantly when new information becomes available, which could in turn affect the Company's mining plans and ultimately its financial performance and value. In addition, commodity price fluctuations, as well as increased production costs or reduced throughput and/or recovery rates, may render Ore Reserves and Mineral Resources uneconomic and so may materially affect any such estimates.

(e) **Metallurgical risk**

For gold, silver, base metals and tungsten the mineral recoveries are dependent upon the metallurgical process, and by its nature contain elements of significant risk such as identifying a metallurgical process through test work to produce a saleable product, developing an economic process route to produce a saleable product, and changes in mineralogy in the ore deposit can result in inconsistent ore grades and recovery rates affecting the economic viability of the project.

(f) **Development and mining risk**

Ultimate and continuous success of the Company's activities is dependent on numerous factors including:

- (i) for the Western Queen Gold Project securing an ore sale or ore toll milling agreement with a local processing plant;
- (ii) for the Earraheedy Project and Western Queen Tungsten Project metallurgical recoveries, mineral processing outcomes and metal concentrate payabilities;
- (iii) the development of economically recoverable Ore Reserves;
- (iv) access to adequate capital to fund and develop its projects;
- (v) construction of efficient development and production infrastructure within capital expenditure budgets;
- (vi) securing and maintaining title to interests;
- (vii) obtaining regulatory consents and approvals necessary for the conduct of mineral exploration, development and production; and;
- (viii) retention of appropriately skilled and experienced employees, contractors, and consultants.

The Company's operations may be delayed or prevented because of factors beyond the Company's control including adverse weather conditions, environmental hazards, industrial accidents and disputes, technical failures, fires and other accidents, unusual or unexpected geological conditions, mechanical difficulties or a shortage of technical expertise or equipment.

There may be difficulties with obtaining government and/or third-party approvals, operational difficulties encountered with construction, extraction and production activities, unexpected shortages or increases in the price of consumables, plant and equipment, cost overruns or lack of access to required levels of funding.

The occurrence of any of these circumstances could result in the Company not realising its operational or development plans or such plans costing more than expected or taking longer to realise than planned. Any of these outcomes could have an adverse effect on the Company's financial and operational performance.

(g) **Personnel and Operating Costs**

The Western Australian (WA) resource economy is currently very active. The skilled labour pool (management, technical and blue collar) is relatively inelastic. There is a high demand in WA for skilled workers from competing operators. Tightening of the labour market due to a shortage of skilled labour, combined with a high industry turnover rate and growing number of competing employers for skilled labour, may inhibit the Company's and/or its contractors the ability to identify, retain and employ the skilled workers required for its operations. The Company may be exposed to increased labour costs in markets where the demand for

labour is strong. A shortage of skilled labour may delay, or halt planned development, limit the Company's ability to grow its operations or lead to a decline in productivity.

(h) **Access to infrastructure risk**

Mining, processing, development, and exploration activities depend, to a significant degree, on adequate infrastructure. In the course of developing future mines, the Company may need to construct and/or update existing infrastructure, which includes permanent water supplies, dewatering, tailings storage facilities, power, maintenance facilities and logistics services and access roads. Reliable roads, bridges, power sources and water supply are important determinants which affect capital and operating costs. Unusual or infrequent weather phenomena, sabotage, government or other interference in the maintenance or provision of such infrastructure could materially adversely affect the Company's operations, financial condition, and results of operations. Any such issues arising in respect of the supporting infrastructure or on the Company's sites could materially adversely affect the Company's results of operations or financial condition. Furthermore, any failure or unavailability of the Company's operational infrastructure (for example, through equipment failure or disruption to its transportation arrangements) could materially adverse its exploration activities or development of a mine or project.

(i) **Tenure risk**

Interests in tenements in Australia are governed by state legislation and are evidenced by the granting of licenses or leases. Each license or lease is for a specific term and has annual expenditure and reporting commitments, together with other conditions requiring compliance. The Company could lose its title to or its interest in one or more of the tenements in which it has an interest if license conditions are not met or if insufficient funds are available to meet the minimum expenditure commitments.

The Company's tenements, and other tenements in which the Company may acquire an interest, will be subject to renewal, which is usually at the discretion of the relevant authority. If a tenement is not renewed the Company may lose the opportunity to discover mineralisation and develop that tenement. The Company cannot guarantee that any of its tenement applications will be granted, or that tenements in which it presently has an interest will be renewed beyond their current expiry date.

(j) **Approval risk**

The Company will be reliant on heritage, environmental and other approvals in Western Australia to enable it to proceed with the exploration and development of any of its tenements or the granting of its tenement applications. There is no guarantee that the required approvals will be granted, and failure by the Company to obtain the relevant approvals, or any delay in the award or transfer of the approvals, may materially and adversely affect the Company's ability to proceed with its proposed exploration and development programs.

(k) **Native title**

Many of the areas the subject of the Company's tenements or tenement applications, are subject in whole or part to native title determinations, or claims made by native title parties, and may contain aboriginal heritage sites. The ability of the Company to undertake exploration or development operations on such tenements may be delayed or prohibited in the event that applicable consents cannot be obtained from the relevant native title parties.

(l) **Payment obligations**

Pursuant to the licences comprising the Company's projects, the Company will become subject to payment and other obligations. In particular, licence holders are required to expend the funds necessary to meet the minimum work commitments attaching to the tenements. Failure to meet these work commitments may render the licence liable to be cancelled or its size reduced. Further, if any contractual obligations are not complied with when due, in addition to any other remedies that may be available to other parties, this could result in dilution or forfeiture of the Company's interest in its projects.

(m) **Commodity price volatility**

If the Company moves into mineral production, the revenue it will derive through the sale of commodities exposes the potential income of the Company to price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company including the international supply and demand for commodities, currency exchange rates, the quality of the minerals produced, actions taken by governments, forward selling activities and other macroeconomic factors.

(n) **Environmental risks**

Mineral extraction and processing is an industry that has become subject to increasing environmental responsibility and liability. Future legislation and regulations or environmental regulations applying to mining operations may impose significant environmental obligations on the Company. The Company intends to conduct its activities in a responsible manner which minimises its impact on the environment, and in accordance with applicable laws.

(o) **Climate change risk**

Climate change is a risk the Company has considered, particularly related to its operations in the mining industry. The climate change risks particularly attributable to the Company include:

- (i) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not

be impacted by these occurrences; and

- (ii) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns.

All these risks associated with climate change may significantly change the industry in which the Company operates.

(p) **Key personnel risk**

The responsibility of overseeing the day-to-day operations and the Company's strategic management depends substantially on its senior management and key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment. One of the Company's key objectives is to continue to build its team with a focus on internal resourcing and nurturing an inclusive and growth orientated culture.

(q) **Joint venture risk**

The Company is party to several joint venture and earn-in agreements with third parties. There is a risk that the financial failure or default of the counterparties to such agreements may adversely affect the operations and performance of the Company or its interest in these projects. As is the case in all earn in and joint venture arrangements, there is a risk that joint venture partners may default in their obligations or not act in the best interests of the joint venture, which in either case could result in an adverse effect on the interests and prospects of the Company.

(r) **Other projects**

The Company's primary focus is to bring the Western Queen Gold Project into production in the shortest possible timeframe. The Company has disclosed it is seeking a development partner for Earacheedy and continues to review opportunities for its other regional projects (i.e., Fraser Range, Braeside, Warroo, Munarra Gully and Lamill). The Company cautions that it continues to assess the opportunities available to it in respect of these projects and has not entered into any agreements with third parties (whether binding or otherwise) in this respect. The Directors will continue to assess the opportunities available and caution that there can be no certainty as to how the Company may progress with these projects. Any potential transaction may result in transaction costs and the divergence of management time and attention.

(s) **Insurance risk**

The Company insures its operations in accordance with industry practice. However, in certain circumstances, the Company's insurance may not be available or of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company. In addition, there is a risk that an insurer defaults in the payment of a legitimate claim by the Company.

(t) **Occupational health and safety risk**

Mining and exploration activities have inherent risks and hazards. The Company is committed to providing a safe and healthy workplace and environment for its personnel, contractors, and visitors. The Company provides appropriate instructions, equipment, preventative measures, first aid information, medical facilities and training to all stakeholders through its occupational health and safety management systems. A serious site safety incident may expose the Company to significant penalties and the Company may be liable for compensation to the injured personnel. These liabilities may not be covered through the Company's insurance policies or, if they are covered, may exceed the Company's policy limits or be subject to significant deductibles. Also, any claim under the Company's insurance policies could increase the Company's future costs of insurance. Accordingly, any liabilities for workplace accidents could have a material adverse impact on the Company's liquidity and financial results. It is not possible to anticipate the effect on the Company's business from any changes to workplace occupational health and safety legislation or directions or necessitated by a concern for the health of the workforce. Such changes may have an adverse impact on the financial performance and/or financial position of the Company.

(u) **New projects and acquisitions**

The Company may make acquisitions of new resource projects in the future. The maintenance of a pipeline of discovery opportunities to complement the Company's existing portfolio remains a key aspect of the Company's business. There can be no guarantee that any new project acquisition will eventuate from these pursuits, or that any acquisitions will result in a return for shareholders. Such acquisitions may result in use of the Company's cash resources and issuances of equity securities that might involve a dilution to shareholders. The Directors will use their expertise and experience in the sector to assess the value of potential projects that have characteristics that are likely to provide returns for shareholders.

(v) **Third party risk**

The Company will rely significantly on strategic relationships with other entities and also on a good relationship with regulatory and government departments and other interest holders. The Company will also rely on third parties to provide essential contracting services. The Company is focused on continuing to build trust with the key stakeholders which includes landowners, indigenous peoples, local communities and governing organisations. There can however be no assurance that its existing relationships will continue to be maintained or that new ones will be successfully formed. The Company could be adversely affected by changes to such relationships or difficulties in forming new ones.

(w) **Competition**

The Company will compete with other companies, including major mining companies in Australia and internationally. Some of these companies will have greater financial and other resources than the Company and, as a result, may be in a better position to compete for future business opportunities. There can be no assurance that the Company can compete effectively with these companies.

(x) **Taxation**

The acquisition and disposal of shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring shares from a taxation point of view and generally. To the maximum extent permitted by law, the Company, its officers and each of their respective advisers accept no liability and responsibility with respect to the taxation consequences of applying for shares under the Offer.

(y) **Litigation risk**

The Company is exposed to possible litigation risks including native title claims, tenure disputes, environmental claims, royalty disputes, other contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position. The Company is not currently engaged in any material litigation.

5.3 General Risks

(a) **Economic Risk**

Changes in both Australian and world economic conditions may adversely affect the financial performance of the Company. Factors such as inflation, currency fluctuations, interest rates, industrial disruption and economic growth may impact on future operations and earnings.

(b) **Securities Investments and share market conditions**

There are risks associated with any securities investment. The prices at which the securities trade may fluctuate in response to numerous factors. Furthermore, the stock market, and in particular the market for exploration and mining companies may experience extreme price and volume fluctuations that may be unrelated or disproportionate to the operating performance of such companies. These factors may materially adversely affect the market price of the securities of the Company regardless of the Company's operational performance. Neither the Company nor the Directors warrant the future performance of the Company, or any return of an investment in the Company.

(c) **Change in government policy and legislation**

Changes in government, monetary policies, taxation and other laws can have a significant impact on the Company's assets, operations and ultimately the financial performance of the Company and its shares. Such changes are likely to be beyond the control of the Company and may affect industry profitability as well as the Company's capacity to explore and mine. The Company is not aware of any reviews or changes that would affect its current or proposed interests in tenements. However, changes in political and community attitudes on matters such as taxation, competition policy and environmental issues may bring about reviews and possibly changes in government policies. There is a risk that such changes may affect the Company's exploration and/or development plans or its rights and obligations in respect of the tenements in which it holds interests. Any such government action may

also require increased capital or operating expenditures and could prevent or delay certain operations by the Company.

(d) **Pandemic risk**

Supply chain disruptions resulting from pandemics such as COVID-19 and measures implemented by governments around the world to limit the transmission of such viruses may adversely affect the Company's operations, financial position, prospects, and ability to raise capital. Travel bans may also lead to shortages of skilled personnel. Further outbreaks of COVID-19 or other pandemics and the implementation of travel restrictions may also have the potential to restrict access to the Company's project.

(e) **Force majeure**

The Company's projects now or in the future may be adversely affected by risks outside the control of the Company, including fires, labour rest, civil disorder, war, subversive activities or sabotage, floods, pandemics, explosions or other catastrophes, epidemics, or quarantine restrictions.

5.4 Investment Speculative

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the securities offered under this Offer Document. Therefore, the securities to be issued pursuant to this Offer Document carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those securities.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for securities pursuant to this Offer Document.
