ASX ANNOUNCEMENT

SIMPEC secures contract for Western Harbour Tunnel NSW

Highlights

- **SIMPEC has secured the contract to supply and install the ventilation system for the NSW Government's Western Harbour Tunnel project.**
- **SIMPEC is supplying mechanical installation services for two ventilation systems for the Western Harbour Tunnel project.**
- **The project aligns with SIMPEC's strategy to support Australia's national infrastructure developments.**

WestStar Industrial Limited (Company or WestStar) (ASX: WSI), an Australian industrial services company, operating in the energy, resources, utility and infrastructure sectors, is pleased to report a new contract award, for its wholly owned subsidiary SIMPEC. Valued at circa \$8 million, the award covers the supply and installation of the mechanical packages for two ventilation systems for the NSW Government's Western Harbour Tunnel project. The contract is with ACCIONA.

Our work will commence immediately and is scheduled for completion in mid-2026.

Western Harbour Tunnel (WHT) is a NSW Government major transport infrastructure project that will make it easier, faster and safer to get around Sydney.

By creating a western bypass of the Sydney CBD, WHT will relieve pressure on the Sydney Harbour Bridge, Sydney Harbour Tunnel, Anzac Bridge and Western Distributor corridors to improve transport capacity in and around central Sydney and Sydney Harbour. WHT is an important part of creating an integrated road and public transport network.

As part of the WHT ventilation system work package, SIMPEC is responsible for the partial supply and installation of two tunnel ventilation systems to manage air flow through the tunnel after it opens to traffic.

SIMPEC Managing Director Mark Dimasi noted:

"This contract award marks an important milestone for SIMPEC as we continue to expand our presence on the east coast and strengthen our position within Australia's Infrastructure Sector.

Delivering the ventilation system work package for Western Harbour Tunnel reinforces our strategic direction. We look forward to working closely with ACCIONA and Transport NSW to ensure the successful and safe delivery of this critical component of the project.

I would like to thank ACCIONA for this opportunity."
