

MARKET RELEASE

23 September 2025

Investor Day Presentation

Sydney, Australia – Nuix ('the Company', ASX: NXL) attaches the presentation materials for the investor stream at today's XLR8/25 conference.

Nuix Chief Executive Officer Jonathan Rubinsztein commented:

"Nuix's strategic positioning is unique in the market, anchored by processing capabilities that have been refined over 25 years. The Nuix Neo Platform and the Deep Learning Framework we've built upon this foundation, isn't just a technological advancement - it's the strategic cornerstone for our next phases of growth, enabling us to unlock new use cases and opportunities for our customers.

What sets Nuix apart is our holistic approach to AI. We understand that quality data processing is fundamental to everything that follows. Our powerful processing combined with our cognitive AI capabilities provide the critical foundation - they enrich, analyse, interpret, score, and filter data at scale. The processing and curation of this data set is so important - this ensures that when the data is promoted to human review or fed into generative AI processes, it has been properly processed and understood. In short: quality in, quality out.

We're not just applying this thinking to our products - we're living it through our HB² initiative. Importantly, we're using Nuix itself as an incubator for exciting new initiatives. Our legal team's contract analysis project is a perfect example - demonstrating how we can partner with internal or external teams to develop new, commercially viable opportunities.

Our FY26 product roadmap is comprehensive. From enhanced AI capabilities and BYO AI to new solutions for regulators and horizontal workflows, from improved user experiences to flexible deployment options - we're building the foundation for expanded customer use cases and stronger commercial outcomes.

The future of Nuix is bright, built on this foundation of excellence in data processing, analysis and a holistic approach to AI. We're excited about the momentum we're building and look forward to continuing to deliver value for our customers and shareholders.”
