 - Q1 sales AUD\$0.0 million down 92% on pcp
- USA**
 - Q1 sales AUD\$0.4 million up 44% on pcp

Melbourne, Australia, October 13, 2025: Immuron Limited (ASX: IMC; NASDAQ: IMRN), an Australian based and globally integrated biopharmaceutical company is pleased to announce continued sales growth (unaudited) of Travelan®, an over-the-counter immune supplement that targets pathogenic bacteria and the toxins they produce in the gastrointestinal (GI) tract.

Continued growth (**+34% on pcp**) in Australia can be contributed to: (1) increased awareness and consideration driven by extensive digital and social media marketing. (2) same store growth as a result of increased promotion and past promotions driving new customers and return customers respectively; (3) growth from new stores within banner groups in which we secured core ranging in FY25; (4) increased South East Asian travel.

Q1 sales in the U.S. increased (**+44% on pcp**) on the back on number of marketing initiatives including: (1) improved Travelan® store on Amazon.com; (2) local U.S. Travelan® Facebook and Instagram pages; (3) increased paid social, influencer and organic social media marketing.

Q1 in Canada is typically the lowest travel period during the year. During FY25 we had a Q1 pipeline fill into over a thousand Canada retail doors on the back of securing listings within key pharmacy and grocery retail groups. Sales are expected to pick up on the back of consumer promotions closer to the end of the calendar year when travel typically picks up. We also anticipate increased pull through from stores as we continue to build Travelan brand awareness within Canada through our in-store educational programs, in-store promotions, and social media marketing.

This release has been authorised by the directors of Immuron Limited.

About Travelan®

Travelan® is an orally administered passive immunotherapy that prophylactically reduces the likelihood of contracting travelers' diarrhea, a digestive tract disorder that is commonly caused by pathogenic bacteria and the toxins they produce. Travelan® is a purified tablet preparation of hyper-immune bovine antibodies and other factors, which when taken with meals bind to diarrhea-causing bacteria and prevent colonization and the pathology associated with traveler's diarrhea. In Australia, Travelan® is a listed medicine on the Australian Register for Therapeutic Goods (AUST L 106709) and is indicated to reduce the risk of Traveler's Diarrhea, reduce the risk of minor gastro-intestinal disorders and is antimicrobial. In Canada, Travelan® is a licensed natural health product (NPN 80046016) and is indicated to reduce the risk of Traveler's Diarrhea. In the U.S., Travelan® is sold as a dietary supplement for digestive tract protection.

About Traveler's diarrhea

Traveler's Diarrhea is a gastrointestinal infection with symptoms that include loose, watery (and occasionally bloody) stools, abdominal cramping, bloating, and fever, Enteropathogenic bacteria are responsible for most cases, with enterotoxigenic *Escherichia coli* (ETEC) playing a dominant causative role.

About Immuron

Immuron Limited (ASX: IMC, NASDAQ: IMRN), is an Australian biopharmaceutical company focused on developing and commercializing orally delivered targeted polyclonal antibodies for the treatment of inflammatory mediated and infectious diseases.
