2. DETAILS OF THE OFFER

2.1 The Offer

The Company is making a pro-rata non-renounceable offer of Loyalty Option to Eligible Shareholders, on the basis of one (1) Loyalty Option for every ten (10) Shares held by Eligible Shareholders at 7:00pm (AEST) on the Record Date. The Loyalty Options are being offered for nil consideration, and will have an exercise price of A\$0.05 and expire at 5:00pm (AEST) on Saturday 14 October 2028, being 3 years from the date of issue of the options issued in connection with the Placement and are otherwise offered on the terms and conditions set out in Section 5.

As at the date of this Prospectus, the Company has on issue 2,267,885,936 Shares, 283,595,646 options (comprising 11,930,661 unquoted options and 271,664,985 options that are intended to be quoted (subject to meeting the ASX's minimum eligibility criteria for quotation)). Please refer to Section 3.1 for more details on the Company's current capital structure.

On the assumption that no options are exercised before 7:00pm (AEST) on the Record Date, the Company proposes to offer approximately 226,788,594 Loyalty Options under the Offer. Where the determination of an Eligible Shareholder's Entitlement to Loyalty Options under the Offer results in a fraction, such fraction will be rounded down to the nearest whole option.

No proceeds will be made from the issue of the Loyalty Options because the Offer is being made for nil consideration; however, proceeds will be raised from the exercise of each Loyalty Option, if and when such Loyalty Option is exercised by the holder of the Loyalty Option.

The issue of Loyalty Options under the Offer is not conditional on Shareholder approval and will not count towards the Company's placement capacity in Listing Rules 7.1 or 7.1A as it falls under an exemption in Listing Rule 7.2. In addition, the issue of Loyalty Options under the Offer to the participating Directors will not require prior Shareholder approval pursuant to Listing Rule 10.11 as it will fall under an exemption in Listing Rule 10.12.

All of the Shares issued upon exercise of the Loyalty Options will rank equally with the Shares on issue at the date of this Prospectus. Please refer to Section 4.1 for further information regarding the rights and liabilities attaching to the Shares.

Pursuant to the ASIC Corporations (Application Form Requirements) Instrument 2017/241, as this is a pro rata bonus issue of options for nil consideration, Eligible Shareholders are not required to apply for Loyalty Options under the Offer and, accordingly, there is no application form attached to this Prospectus for the Offer.

2.2 Eligibility to participate in the Offer

Only Eligible Shareholders are eligible to participate in the Offer. For the purposes of the Offer, Eligible Shareholders are those persons who:

- (i) are registered as a holder of Shares as at 7:00pm (AEST) on the Record Date;
- (ii) have a registered address in a Permitted Jurisdiction; and
- (iii) to the extent that those persons have a registered address in the United States, have returned a duly signed US investor certificate to the Company on or before 7:00pm (AEST) on the Record Date.

There is no general public offer of Loyalty Options under this Prospectus.

2.3 Purpose of the Offer

The purpose of the Offer is to recognise the invaluable support the Company has received from its Shareholders to date, and to reward existing Eligible Shareholders by making a bonus loyalty offer for nil consideration. The Offer is an opportunity for Eligible Shareholders to further

participate in the development of the Company, and will provide the Company with a potential source of additional capital if the Loyalty Options are exercised. No funds will be raised from the issue of the Loyalty Options as they are being offered for nil consideration.

2.4 Purpose of the Prospectus

Section 707(3) of the Corporations Act generally requires that a prospectus is issued in order for a person to whom Securities were issued without disclosure under Part 6D of the Corporations Act to on-sell those Securities within 12 months of the date of their issue. Consequently, the Company has issued this Prospectus for the Offer of Loyalty Options to Eligible Shareholders.

Accordingly, the purpose of this Prospectus is to:

- (i) make the Offer of Loyalty Options to Eligible Shareholders; and
- (ii) ensure that the on-sale of the Loyalty Options and new Shares issued on conversion of the Loyalty Options do not breach section 707(3) of the Corporations Act.

2.5 Use of Funds

The Company will receive \$0.05 for each Loyalty Option exercised. If all Loyalty Options under the Offer are issued and exercised, the Company will receive approximately \$11,339,429 (before costs). There is no certainty that any of the Loyalty Options will be issued or exercised.

Funds raised from the exercise of the Loyalty Options under the Offer are intended to be applied to operating and general corporate expenditure as required to continue progressing multiple activities in relation to Kachi including:

- (i) approval of the Exploitation Environmental Impact Assessment;
- (ii) optimization of the power solution; and
- (iii) the strategic alternative process.

The above is a statement of current intentions at the date of this Prospectus. Intervening events and new circumstances have the potential to affect the manner in which the funds are ultimately applied. The Board reserves the right to alter the way the funds are applied on this basis.

2.6 Transfer of entitlements under the Offer

The Offer is non-renounceable and therefore Eligible Shareholders cannot offer to sell or transfer any of their entitlement to participate in the Offer on ASX or via an off-market transfer (or any other exchange or private transfer).

2.7 Transfer of Options

If and when quoted, the Loyalty Options will be transferrable.

2.8 Issue Date

It is expected that Loyalty Options will be issued in accordance with the dates specified in the Indicative Timetable; however, this is subject to change.

Holding statements for the Loyalty Options issued under the Offer will be mailed as soon as practicable after their issue.

2.9 No Underwriting

The Offer is not underwritten.

2.10 CHES

The Company participates in the Clearing House Electronic Sub-register System, known as CHES. ASX Settlement Pty Limited, a wholly owned subsidiary of ASX, operates CHES in accordance with the Listing Rules and the ASX Settlement Operating Rules.

Under CHES, the Company does not issue certificates to investors. Instead, security holders will receive a statement of their holdings in the Company, including Loyalty Options issued under this Prospectus. If an investor is broker sponsored, ASX Settlement Pty Limited will send you a CHES statement.

The CHES statement will specify the number of Loyalty Options issued under this Prospectus, provide details of your holder identification number, the participant identification number of the sponsor and the terms and conditions applicable to the Loyalty Options.

If you are registered on the issuer sponsored sub-register, your statement will be despatched by Automatic and will contain the number of Loyalty Options issued to you under this Prospectus and your security holder reference number.

A CHES statement or issuer sponsored statement will routinely be sent to holders at the end of any calendar month during which the balance of their holding changes. Option holders may request a statement at any other time; however, a charge may be made for additional statements.

2.11 Custodians, trustees and nominees

Nominees and custodians that hold Shares should note that the Offer is available to Eligible Shareholders. The Company is not required to determine whether or not any registered holder is acting as nominee or the identity or residence of any beneficial owners of Shares. If any nominee or custodian is acting on behalf of a foreign person, that holder, in dealing with its beneficiary, will need to assess whether indirect participation by the beneficiary in the Offer is compatible with applicable foreign laws.

By participating in the Offer, you certify that you are the custodian for the beneficiary.

Nominees and custodians holding Shares on behalf of residents outside Australia, New Zealand, Argentina, Canada (British Columbia province only) and Singapore may not send this Prospectus to persons, or apply for Loyalty Options on behalf of beneficial Shareholders, resident outside those jurisdictions without the consent of the Company. Receipt of this Prospectus will be taken to constitute a representation and warranty that there has been no breach of this restriction or applicable laws

2.12 ASX Quotation

Subject to meeting the ASX's minimum eligibility criteria for quotation, the Company intends to seek quotation of the Loyalty Options, and at such time, the Loyalty Options, once quoted, shall be transferable. If the Loyalty Options do not meet the ASX's eligibility criteria for the quotation of options at the time of issue, the Loyalty Options may remain unquoted and non-transferable until such time as the ASX's minimum eligibility criteria can be met.

If the Loyalty Options meet the ASX's eligibility criteria for the quotation the Company will make an application for quotation with the ASX within 7 days after the date of the Prospectus.

If the ASX does not grant permission for quotation of the Loyalty Options within three (3) months after the date of this Prospectus (or any later date permitted by law), none of the Loyalty Options will be issued and if any have been issued, the issue will be void in accordance with section 723 of the Corporations Act, unless ASIC grants an exemption permitting the issue.

2.13 Rights and liability attaching to Shares and Loyalty Options

The Shares issued on the exercise of the Loyalty Options will be on a fully paid basis and will rank equally in all respects with existing Shares. Full details of the rights and liabilities attaching

to Shares are set out in the Company's Constitution, a copy of which may be downloaded from the Company's website at <https://investorhub.lakeresources.com.au/shareholder-info-and-governance> or is available for inspection at the Company's registered office during normal business hours.

You may also contact the Company's Share Registry on 1300 288 664 (within Australia) or +61 2 9698 5414 (outside Australia) to request a copy of the Company's Constitution. A summary of the important rights attaching to the Shares is contained in Section 4.1 of this Prospectus. The terms and conditions of the Loyalty Options are described in Section 5.

2.14 Acknowledgements

By receiving this Prospectus, a Shareholder will be deemed to acknowledge and agree that such shareholder:

- (i) is a current holder of Shares, with a registered address in a Permitted Jurisdiction;
- (ii) is not in a country or jurisdiction that is not a Permitted Jurisdiction, or acting for the account or benefit of a person that is in a country or jurisdiction that is not a Permitted Jurisdiction;
- (iii) has not sent, and will not send, this Prospectus or any other materials relating to the Offer to any person in the United States or elsewhere outside Australia;
- (iv) understands that the Loyalty Options and the underlying securities have not been, and will not be, registered under the securities laws in any jurisdictions outside of Australia, including the US Securities Act or the securities laws of any state or other jurisdiction of the United States and, accordingly, the Loyalty Options and the underlying securities may not be offered, sold or otherwise transferred except in accordance with an available exemption from, or in a transaction not subject to, the registration requirements of the US Securities Act and any other applicable securities laws; and
- (v) must sign and return a US investor certificate, if it is an Eligible Shareholder in the United States.

2.15 Brokerage and Stamp Duty Costs

No brokerage or stamp duty is payable by Eligible Shareholders on the issue of Loyalty Options under this Prospectus.

2.16 Minimum and Maximum Subscription

There is no minimum subscription under the Offer.

Under the Offer the Company will not issue Loyalty Options in excess of the person's Entitlement to Loyalty Options, which is one (1) free attaching Loyalty Option for every ten (10) Shares held by the Eligible Shareholder at 7:00pm (AEST) on the Record Date.

3. EFFECT OF THE OFFER

3.1 Effect of the Offer on the capital structure of the Company

The principal and immediate effect of the Offer, assuming all Loyalty Options offered under this Prospectus are issued, will be to increase the number of options currently on issue by up to approximately 226,788,594 options. The Company intends to apply for (but cannot guarantee) quotation of the Loyalty Options.

There will be no change to the number of Shares expected to be on issue as at 9:00am (AEST) on 16 October 2025. However, assuming that no further Shares are issued and none of the existing options are converted, the effect of the Offer on the Company's capital structure is set out below:

Shares

Shares on issue at the date of this Prospectus	2,267,885,936
Shares to be issued if all Loyalty Options used under the Offer are exercised ⁽¹⁾	226,788,594
Total Shares⁽¹⁾	2,494,674,530

Options

Existing unquoted options on issue at the date of this Prospectus ⁽¹⁾	11,930,661
Options issued in connection with the Placement	271,664,985
Maximum Loyalty Options available for issue under the Offer ⁽¹⁾	226,788,594
Total options on issue at completion of the Offer⁽¹⁾	510,384,240

Note:

(1) These numbers are indicative only, are subject to rounding and based on the number of Shares on issue as at the date of this Prospectus, assuming all Shares are held by Eligible Shareholders.

3.2 Potential effect on control of the Company

The Company is of the view that the Offer will not affect the control (as defined by section 50AA of the Corporations Act) of the Company. No investor or existing Shareholder will have a Voting Power greater than 8% as a result of the completion of the Offer and the exercise of any Loyalty Options issued under the Offer.

There will be no change to any Shareholders' Voting Power as a result of the issue of Loyalty Options. Where Loyalty Options are exercised into Shares, the Voting Power of the Shareholders who exercise the Loyalty Options will increase. The likelihood of Loyalty Options being exercised is dependent on the price of the Shares from time to time until the Loyalty Options expire.

If all the Loyalty Options are exercised and the underlying Shares issued, the Shares issued on exercise will represent approximately 9% of the Shares on issue following completion of the

Offer (assuming no Shares are issued or convertible Securities exercised or converted into Shares prior to the Record Date).

3.3 Financial effect of the Offer

The Loyalty Options to be issued pursuant to this Prospectus will be issued for nil consideration. Accordingly, there will be no immediate effect on the Company's balance sheet. However, capital will be raised if the Loyalty Options are exercised, which will affect the Company's balance sheet.

If all Loyalty Options are issued and exercised (which is not certain), the Company will receive approximately \$11,339,429 (before costs) in current assets. However, the Company is not able to specify with any certainty the extent of any change to the balance sheet given the uncertainty around the number of Loyalty Options to be ultimately issued, or if and when any of those Loyalty Options will be exercised.

The Company's Annual Report for the financial year ended 30 June 2025 was released to the ASX on 26 September 2025. The Annual Report can be viewed at <https://investorhub.lakeresources.com.au/announcements/7166919>.

6. RISKS

The Loyalty Options offered under this Prospectus are considered speculative due to the inherent risks associated with a listed mining company such as the Company. In addition, there are risks inherent in investing in the share market in general. The business activities of the Company are subject to risks and there are many risks which may impact on the Company's future performance. Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, but many are outside of the control of the Company and cannot be mitigated.

This Section identifies and summarises some of the major risks associated with an investment in the Company however, it is not exhaustive. There may be other risks which the Directors and/or management of the Company are unaware which may impact upon the Company, its operations and/or the value and performance of the Loyalty Options and the Company generally. Prospective investors should carefully consider the following factors in addition to the other information presented in this Prospectus.

6.1 Risks associated with the Company

(a) Nature of the Loyalty Options

The Company will seek quotation of the Loyalty Options therefore, the Loyalty Options will be transferrable following quotation, subject to meeting the ASX's minimum eligibility criteria for quotation (and actually being quoted, which cannot be guaranteed). There is no certainty that Loyalty Options will trade above the exercise price and accordingly there is no certainty that Loyalty Option holders will realise any value from the Loyalty Options. In the event that the Loyalty Options are exercised, this will dilute the holdings of existing Shareholders.

(b) Future Capital Raisings and Financial Risk

Lake's ongoing activities may require substantial further financing, additional to any prior or future capital raisings. Lake will also require additional funding to bring the Kachi into commercial production. Debt financing, if available, may involve restrictive covenants which could limit the Company's operations and business strategy. While the Company believes that additional capital can be obtained, no assurances can be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company, or at all. If the Company is unable to obtain additional financing as needed, it may be required to explore all options available to the Company, including to reduce, delay or suspend operations, in each case which could have a material adverse effect on its activities and which could affect its ability to continue as a going concern. Additionally, if the level of operating expenditure required is higher than expected, the financial position of the Company may be adversely affected. Lake may also experience unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

(c) Equity Market Conditions Risk

Any Shares listed on a stock exchange can experience extreme price and volume fluctuations that are often unrelated to the operating performances of such companies. The market price of Lake's Shares may fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general. General factors that may affect the market price of Lake's Shares include the macroeconomic conditions, investor sentiment, local and international share market conditions, changes in interest rates and the rate of inflation, variations in commodity prices including, but not limited to, lithium prices, the global security situation and the possibility of terrorist disturbances, changes to government regulation, policy or legislation, and changes in exchange rates.

(d) Exploration Risk

Lake's success depends on the delineation of economically mineable reserves and resources, access to required development capital, movement in the price of commodities, securing and maintaining title to Lake's tenements and maintaining all consents and approvals necessary for the conduct of Lake's exploration activities. Exploration on Lake's existing tenements may be

unsuccessful, resulting in a reduction in the value of those tenements, diminution in Lake's cash reserves and possible relinquishment of the tenements. Lake's exploration costs are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect our viability.

(e) **Feasibility and Development Risk**

Lake may not always be able to exploit successful discoveries which may be made in areas in which Lake has an interest. Such exploitation would involve obtaining the necessary licences or clearances from relevant authorities that may require conditions to be satisfied and/or the exercise of discretion by such authorities. It may or may not be possible for such conditions to be satisfied. Further, the decision to proceed with further exploitation may require participation of other companies whose interests and objectives may not be the same as ours. Although a definitive feasibility study on the Kachi project has been produced, there is a risk that the feasibility study and associated technical works will not achieve the results expected or, that the project may not be successfully developed for commercial, financial or other reasons.

(f) **Occupational Health and Safety risk**

Given Lake's exploration activities, it will face the risk of workplace injuries which may result in workers' compensation claims, related claims under applicable law and potential occupational health and safety prosecutions. Further, the production processes used in conducting any future mining activities can be dangerous. Lake has, and intends to maintain, a range of workplace practices, procedures and policies which will seek to provide a safe and healthy working environment for its employees, visitors and the community which will minimise but cannot eliminate this risk.

(g) **Regulatory Risk**

Lake's operations are subject to various laws and plans in the jurisdictions in which we work, including those relating to mining, prospecting, development permitting and licence requirements, industrial relations, environment, land use, royalties, water, native title and cultural heritage, mine safety and occupational health. Approvals, licences and permits required to comply with such rules are subject to the discretion of the applicable government officials. No assurance can be given that the Company will be successful in obtaining such authorisations or maintaining such authorisations in full force and effect without modification or revocation.

To the extent such approvals are required and not obtained or maintained in a timely manner or at all, the Company's operations may be curtailed or prohibited from continuing or proceeding with production and exploration. The Company's business and results of operations could be adversely affected if applications lodged for applicable licences or permits are not granted. Maintenance of the Company's mining and exploration tenements are subject to compliance with certain ongoing and periodic conditions. The inability to meet those conditions may adversely affect the Company's operations, financial position and/or performance.

(h) **Limited Operating History of the Group**

The Company has limited operating history on which it can base an evaluation of its future prospects. If Lake's business model does not prove to be profitable, investors may lose their investment. The Company's historical financial information is of limited value because of our lack of operating history and the emerging nature of our business. Lake's prospects must be considered in the light of the risks, expenses and difficulties frequently encountered by companies in their early stage of development, particularly in the mineral exploration sector, which has a high level of inherent uncertainty.

(i) **Key Personnel**

In formulating its exploration programs, feasibility studies and development strategies, the Company relies, to a significant extent, upon the experience and expertise of its current management. Many of its key personnel are important to attaining the Company's business goals. One or more of these key employees could leave their employment, and this may adversely affect the Company's ability to conduct our business and, accordingly, affect its financial performance and its share price. Recruiting and retaining qualified personnel is important to the Company's success. The number of persons skilled in the exploration and development of mining properties is limited and competition for such persons is strong.

(j) **Litigation Risk**

The Company is exposed to possible litigation risks including, tenure disputes, environmental claims, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, reputation, financial performance and financial position. With the exception of various minor vendor and terminated employee, disputes none of which are material to the Company, the Company is not currently engaged in any litigation or alleged dispute or claim. As a publicly-listed Company, the Company is aware of plaintiff law firms threatening class actions for historical share price volatility, however no such claims have ever been made and nor have any defendants or Shareholder ever been identified or made known to the Company. However, Lake cannot guarantee that any threat of litigation will not result in proceedings being filed or the outcome of any proceeding if a claim is made.

(k) **Force Majeure Risk**

The Company and the Kachi Project may be adversely affected by risks outside our control including labour unrest, civil disorder, war, subversive activities or sabotage, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions now and in the future.

(l) **Resource Estimate Risk**

Resource estimates are expressions of judgement based on knowledge, experience and industry practice. These estimates were appropriate when made but may change significantly when new information becomes available. There are risks associated with such estimates. Resource estimates are necessarily imprecise and depend to some extent on interpretations, which may ultimately prove to be inaccurate and require adjustment. Adjustments to resource estimates could affect Lake's future plans and ultimately its financial performance and value. Lithium price fluctuations, as well as increased production costs or reduced throughput and/or recovery rates, may render resources containing relatively lower grades uneconomic and may materially affect resource estimations.

(m) **Environmental Risk**

The Company's operations and activities are subject to the environmental laws and regulations in the jurisdictions in which it operates. As with most exploration projects and mining operations, Lake's operations and activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. Lake attempts to conduct its operations and activities to the highest standards of environmental obligation, including compliance with all environmental laws and regulations. The Company is unable to predict the effect of additional environmental laws and regulations which may be adopted in the future, including whether any such laws or regulations would materially increase its cost of doing business or affect its operations in any area. There can be no assurances that new environmental laws, regulations or stricter enforcement policies, once implemented, will not oblige Lake to incur significant expenses and undertake significant investments which could have a material adverse effect on its business, financial condition and performance. The Company is subject to and compliant with all aspects of environmental regulation of its exploration and mining activities. Lake is not aware of any environmental law that is not being complied with.

6.2 Availability of Equipment and Contractors

Prior to the COVID-19 pandemic and the 2022 Russian invasion of Ukraine, appropriate goods, materials, supplies and equipment, including drill rigs, were in short supply. There was also high demand for contractors providing other services to the mining industry. The COVID-19 pandemic and the 2022 Russian invasion of Ukraine has only served to exacerbate these issues. Consequently, there is a risk that Lake may not be able to source all the goods, materials, supplies, equipment and contractors to perform required scopes of work to fulfil its proposed activities. There is also a risk that hired contractors may underperform or that equipment may malfunction, either of which may affect the progress of our activities.

6.3 Climate Change Risk

Lake's operations and activities are subject to changes to local or international compliance regulations related to climate change mitigation efforts, specific taxation or penalties for carbon emissions or environmental damage, and other possible restraints on industry that may further impact Lake and its profitability. While Lake will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that Lake will not be impacted by these occurrences. Climate change may also cause certain physical and environmental risks that Lake cannot predict, including events such as increased severity of weather patterns, incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which Lake operates.

6.4 Macro-Economic Risk

Global supply chains constraints, labour unavailability and equipment shortages are material risks to Lake's operations. Supply chain constraints continue to be exacerbated because of various regional conflicts throughout the world.

Hyperinflationary pressures in Argentina for appropriately skilled labour and capital items are being seen across many industries, including mining. While currently lessening, current domestic and international inflation is still a concern, resulting in persisting elevated interest rates globally. These conditions could have material adverse impact to Lake's cost of doing business and financial performance.

Lithium chemicals commodity pricing is a large concern to Lake's business. Economic viability of the Kachi Project and the business as a whole depends in large part on stable and increased lithium chemicals commodity prices. Continued depressed pricing environments could lead to inability of the business to proceed with final investment decisions for the Kachi Project, inability to sell offtake at commercially-reasonable pricing levels or inability to raise capital necessary for continued operation of the business.

6.5 Argentina Political Risk

Lake's operations can be affected by changing political, regulatory and economic environments in the countries in which we operate. The Company's exploration activities are entirely focused in Argentina, which underwent elections in 2023, resulting in material changes to the business and financial climate of the country. While these changes have largely been positive, resulting in improved ability to conduct our business, it is possible that many of the proposed changes may not be fully realised, which could impact our financial performance and ability to develop our projects.

6.6 Argentina Financial Risk

Argentina, the jurisdiction in which the Company focuses its operations, maintains capital controls which have the effect of restricting its access to foreign exchange markets and repatriation of profits. These measures have been implemented and maintained sporadically in Argentina for multiple decades with the most recent implementation occurring in 2019. These controls restrict Lake's ability to convert Argentinian Pesos into U.S. Dollars or other currency and may restrict its ability in the future to export from Argentina profits Lake earns from its operations. Argentina occasionally modifies its capital controls frameworks, any changes to

which, could have a material negative impact on Lake's future operations. For example, capital controls may impact Lake's ability to pay for imports into Argentina in U.S. Dollars or other hard currency. Additionally, Lake's lenders may restrict its ability to use a portion of debt funds for in-country operations. Argentina also maintains a robust import program which restricts importation of certain products Lake may need from the international market. Compliance with Argentina's import restrictions often results in delays and the need to attempt to source needed products locally, either of which could cause delays to Lake's operation.

6.7 Metallurgy and Hydrometallurgy Risk

Lake has completed significant test work on the Kachi Project as reported in the Phase 1 Definitive Feasibility Study and has engaged expert third parties to conduct engineering and testing.

However, metal and/or mineral recoveries are dependent upon the metallurgical process, and by its nature contain elements of significant risk such as identifying a metallurgical process through test work to produce a saleable product, developing an economic process route to produce a saleable product, and changes in mineralogy in the ore deposit can result in inconsistent ore grades and recovery rates affecting the economic viability of the project.

6.8 Volatility of Lithium Price Risk

If the Company achieves success leading to mineral production, the revenue it will derive through the sale of commodities exposes the potential income of the Company to price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company including the international supply and demand for commodities, the quality of the minerals produced, actions taken by governments, forward selling activities and other macroeconomic factors.

6.9 Tenure Risk

Securing and maintaining tenure over mining licences is critical to the future development of the Kachi Project. There is no guarantee that any pending concessions will be granted and, if granted, whether any conditions will be imposed (although the Company is currently not aware of any reasons against the approval). Renewal of titles is made by way of application to the provincial governments. There is no guarantee that a renewal will be automatically granted other than in accordance with the applicable local legislation and whether any conditions will be imposed.

6.10 Third Party Risk

The Company relies and will rely in the future significantly on strategic relationships with other entities, including through its strategic partner and strategic alternatives process, and also on a good relationship with regulatory and provincial governments and other interest holders. The Company will also rely on third parties to provide essential contracting services. There can be no assurance that its existing relationships will continue to be maintained or that new ones will be successfully formed. The Company could be adversely affected by changes to such relationships or difficulties in forming new ones.

6.11 Insurance Risk

Insurance of all risks associated with mineral exploration and production is not always available and, where available, the cost can be high. The Company maintains insurance within a coverage range that it considers to be consistent with industry practice and appropriate for its needs at this time. The occurrence of an event that is uninsurable, not covered, or only partially covered by insurance could have a material adverse effect on the Company's business and financial position.

6.12 Competition

Lake will compete with other companies, including major mining companies in Australia and internationally (including in Argentina). Some of these companies will have greater financial and other resources than Lake and, as a result, may be in a better position to compete for future business opportunities. There can be no assurance that Lake can compete effectively with these companies.

6.13 General risks

(a) Potential for dilution

A shareholder's percentage holding in the Company will be diluted by not participating in the Offer (which will include all retail shareholders and those institutional shareholders who do not participate in the Offer). It is not possible to predict what the value of the Company or its Shares will be following the completion of the Offer and the Directors do not make any representation as to such matters. The historical trading price of the Shares on ASX prior to the date of this Prospectus is not a reliable indicator as to the potential trading price of Shares after completion of the Offer.

(b) General Economic and Investment Risks

As with all stock market investments, there are risks associated with an investment in the Company. The trading price of the Company's Shares may fluctuate with movements in equity capital markets in Australia and internationally, and may also be influenced by a number of factors, some of which are specific to Lake and its operations and some of which may affect listed companies generally. Generally applicable factors that may affect the market price of Shares include: i) general movements in Australian and international securities markets; ii) investor sentiment; iii) Australian and international economic conditions and outlook; iv) changes in interest rates and the rate of inflation; v) changes in government regulation and policies (including in relation to taxation); vi) announcement of new technologies; vii) and geopolitical instability. General economic conditions may also negatively affect the Company's performance and the performance of the Company's Shares. Any protracted slowdown in economic conditions or factors such as movements in inflation or interest rates, the cost and general availability of credit, and industrial disruption may have a negative impact on the Company.

(c) Taxation

The disposal of any newly acquired Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All investors are urged to obtain independent financial advice about the consequences of disposing of any new Shares from a taxation viewpoint and generally. To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of acquiring or disposing of the new Shares under this Offer.

(d) Government and legal Risk

Changes in government, monetary policies, taxation and other laws can have a significant impact on the Company's assets, operations and ultimately the financial performance of the Company and its Shares. Such changes are likely to be beyond the control of the Company and may affect industry profitability as well as the Company's capacity to explore and mine.

The Company is not aware of any reviews or changes that would affect its permits. However, changes in community attitudes on matters such as taxation, competition policy and environmental issues may bring about reviews and possibly changes in government policies. There is a risk that such changes may affect the Company's development plans or its rights and obligations in respect of its permits. Any such government action may also require increased capital or operating expenditures and could prevent or delay certain operations by the Company the future performance of the Company or any return on an investment in the Company.

(e) **Data and cyber security risk**

The integrity, availability and reliability of data within the Company's information technology systems may be subject to intentional or unintentional disruption. Given the level of increasing sophistication and scope of potential cyber-attacks, these attacks may lead to significant breaches of security which could jeopardise the sensitive information and financial transactions of the Company.

(f) **Concluding Comment**

The above list of risk factors ought not to be taken as an exhaustive list of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Loyalty Options or the Shares issued on the exercise of the Loyalty Options.

Investment in the Company must be regarded as highly speculative and neither the Company nor any of its Directors or any other party associated with the preparation of this Prospectus guarantee that any specific objectives of the Company will be achieved or that any particular performance of the Company or of the Loyalty Options, including those offered by this Prospectus, will be achieved.

Each of the parties referred to in this Section do not make, or purport to make, any statement in this Prospectus other than as specified in this Section and to the maximum extent permitted by law, expressly disclaim and take no responsibility for any part of this Prospectus other than the reference to its name or a statement included in this Prospectus with the consent of that party as specified in this Section.

7.9 ASIC Instruments

The Offer is made pursuant to ASIC Corporations (Exposure Period) Instrument 2016/74 which exempts the Company from complying with section 727(3) of the Corporations Act to the extent that this section prohibits the Company from issuing Loyalty Options in the seven-day period after the date of lodgement of the Original Prospectus with ASIC.

The Offer is also made pursuant to ASIC Corporations (Application Form Requirements) Instrument 2017/241 which exempts the Company from complying with section 723(1) of the Corporations Act to the extent that this section only permits an issue of Loyalty Options in response to an application form included in or accompanied by a disclosure document.

The Directors do not consider it appropriate to give Eligible Shareholders advice regarding the taxation consequences of subscribing for Loyalty Options. The Company, its advisers and its officers do not accept any responsibility or liability for any such taxation consequences to Eligible Shareholders. As a result, Eligible Shareholders should consult their professional tax adviser in connection with subscribing for Loyalty Options.
