3. Details of the Entitlement Offer

3.1 Overview of the Entitlement Offer

The Company proposes to raise up to approximately \$1,272,443 under the Entitlement Offer through the issue of approximately 424,147,527 New Shares. Under the Entitlement Offer, the Company is offering Eligible Shareholders the opportunity to subscribe for one (1) New Shares for every 2 existing Shares held at the Record Date, at the Issue Price of \$0.003 per New Share (**Entitlement Offer**).

The Issue Price represents a discount of approximately 50% to the Company's closing price of Shares on Monday, 20 October 2025 of \$0.006, being the last trading day prior to the announcement of the Entitlement Offer and a 38.8% discount to the Company's 10-day VWAP on the ASX of \$0.004.

Where fractions arise in the calculation of an Entitlement, they have been rounded up to the next whole number of New Share.

The Entitlement Offer also comprises a shortfall facility under which New Shares attributable to Entitlements:

- (a) not taken up by Eligible Shareholders; and
- (b) that would have been offered to Ineligible Shareholders if they had been entitled to participate in the Entitlement Offer,

will be offered to Eligible Shareholders that have accepted their Entitlement in full (**Shortfall Facility**). The allocation policy for Shortfall Shares under the Shortfall Facility is described in Section 3.3. Any offer of Shares not issued under the Entitlement Offer and the Shortfall Facility may be placed to new professional and sophisticated investors by the Board of the Company in accordance with the ASX Listing Rules within 3 months of the Closing Date.

Please refer to the Investor Presentation accompanying the Offer Booklet for further information regarding the purpose of the Entitlement Offer and proposed use of net proceeds, as well as the key risks associated with an investment in Clara Resources. You should also consider the ASX announcements and other publicly available information about the Company at www.asx.com.au and <http://www.clararesources.com.au> (including announcements which may be made by the Company after publication of this Offer Booklet).

3.2 Eligible Shareholders

This Offer Booklet contains an offer of New Shares to Eligible Shareholders. Eligible Shareholders are those holders of Shares who:

- (a) are registered as a holder of Shares on the Record Date;
- (b) have a registered address in Australia or New Zealand;
- (c) are not in the United States and are not a person (including a nominee or custodian) acting for the account or benefit of a person in the United States (to the extent such

person holds Shares for the account or benefit of such person in the United States); and

- (d) are eligible under all applicable laws to receive an offer under the Entitlement Offer without any requirement for a prospectus or similar disclosure document to be lodged or registered.

Shareholders that are not Eligible Shareholders are **Ineligible Shareholders**. The Company reserves the right to determine whether a Shareholder is an Eligible Shareholder or an Ineligible Shareholder.

The Company has determined that it is unreasonable to extend to Ineligible Shareholders the opportunity to participate in the Entitlement Offer because of the limited expected take-up from these holders and the cost of complying with the applicable regulations in jurisdictions outside Australia and New Zealand.

The Entitlements of Eligible Shareholders who also hold options to acquire Shares or convertible notes will be calculated on the basis of the number of Shares they hold on the Record Date, disregarding any options or convertible notes which have not been exercised or converted before that time.

3.3 Shortfall Facility

A Shortfall Facility will allow Eligible Shareholders that have fully subscribed for their Entitlements under the Entitlement Offer to subscribe for additional New Shares in excess of their Entitlement (**Shortfall Shares**). Eligible Shareholders can apply for Shortfall Shares by completing the relevant part of the Entitlement and Acceptance Form, or through BPAY®. Refer to Section 4.3 for further details.

Any Shortfall Shares will be limited to the extent there are sufficient New Shares from Eligible Shareholders who do not take up their full Entitlements or from New Shares that would have been offered to Ineligible Shareholders if they had been entitled to participate in the Entitlement Offer.

There is no guarantee that those Eligible Shareholders will receive the number of Shortfall Shares applied for. The Company's decision on the number of New Shares and Shortfall Shares to be allocated to you will be final.

In the event of a scale back, the difference between the Application Monies received, and the number of New Shares allocated to you multiplied by the Issue Price, will be refunded by the Company, without interest, following allotment, as required by the Corporations Act.

3.4 Shortfall Facility allocation policy

Unless otherwise determined by the Company, the Company proposes to allocate Shortfall Shares according to the following priority (subject to the Board's discretion detailed below):

- (a) firstly, to any Eligible Shareholders that have fully subscribed for their Entitlement under the Entitlement Offer and subscribe for Shortfall Shares in excess of their Entitlement. If there are insufficient Shortfall Shares to satisfy applications by Eligible Shareholders, such applications will be scaled back on a pro rata basis;

- (b) secondly, the Underwriter will seek to place the Shortfall Shares with third party investors via a shortfall book build process; and
- (c) lastly, any remaining Shortfall Shares will be subscribed for by the Underwriters, which may include any sub-underwriter with which the Underwriters have entered into sub-underwriting arrangements.

This shortfall allocation policy has been structured to allow each Eligible Shareholder to apply to participate in priority to third parties and to seek to disperse the Shortfall Shares across a potentially broad number of Eligible Shareholders (if Shortfall Shares are applied for through the Shortfall Facility). The Company reserves the right to issue, at its sole discretion, to an Eligible Shareholder who has applied for Shortfall Shares a lesser number of Shortfall Shares than the number applied for (or no Shortfall Shares), issue part or all of the Shortfall Shares to new investors, reject an application or not proceed with the issuing of the Shortfall Shares or part thereof.

In the event it is necessary to scale back applications for Shortfall Shares by Eligible Shareholders, then the scale back will be on a pro rata basis, based on the Entitlements of Eligible Shareholders

The Directors are not entitled to participate in the Shortfall Facility without Shareholder approval under Listing Rul 10.11.

No Shortfall Shares will be issued to an applicant if doing so would, to the extent of the knowledge of the Company, result in a breach of the ASX Listing Rules or the restrictions on obtaining or increasing voting power under Chapter 6 of the Corporations Act, or would be otherwise contrary to the Corporations Act or ASX Listing Rules.

3.5 Ranking of New Shares

New Shares issued under the Entitlement Offer will rank equally with existing Shares.

3.6 Effect of the Entitlement Offer capital structure

(a) Share capital

The proposed capital structure of the Company following the issue of the New Shares in connection with the Offer will be as follows:

Maximum total number of Shares on issue on completion of the Placement and the Entitlement Offer (assuming full subscription)	1,272,442,581

² These figures are approximate only and are subject to rounding.

The final number of New Shares to be issued under the Offer is subject to the rounding of Entitlements.

3.7 Use of funds

A summary of the proposed use of funds of both the Placement and the Entitlement Offer is set out in the table below:

The Board reserves the right to alter the way funds are applied on this basis and otherwise having regard to their fiduciary duties.

3.8 Directors' interests

The relevant interest of each of the Directors in Shares as at the date of this Offer Booklet, together with their Entitlement under the Entitlement Offer are set out below:

Richard Willson	9,579,824	1.29	5,471,503

Note 1: Shares are held either directly or via related entities of each director.

3.9 Impact of the Offer on your Shareholding and Possible Dilutive Effect

The Placement will have a dilutionary effect on all Shareholders of approximately 12.38% of all shareholder interests in the Company.

For personal use only

The dilutionary effect of the Entitlement Offer on your shareholding will depend on whether you are an Eligible Shareholder and if so, whether you elect to subscribe for some or all of your Entitlement.

If an Eligible Shareholder does not take up its entitlement under the Offer or a shareholder is an Ineligible Shareholder, the shareholder will suffer a further dilution (in addition to the dilution by reason of the Placement noted above) of up to approximately 33.33% of its interest in the Company assuming the Offer is fully subscribed.

3.10 **Withdrawal of Entitlement Offer**

The Board reserves the right to withdraw all or part of the Entitlement Offer at any time before the issue of New Shares, in which case the Company will refund Application Money without payment of interest in accordance with the Corporations Act.

3.11 **No cooling off rights**

Cooling off rights do not apply to a subscription for New Shares under the Entitlement Offer. You cannot withdraw your application or payment once it has been accepted, except as allowed by law.

3.12 **Minimum subscription**

There is no minimum subscription for the Entitlement Offer.

3.13 **Rounding of Entitlements**

Where fractions arise in the calculation of Entitlements, they will be rounded up to the nearest whole number of New Shares.

3.14 **Opening and Closing Date for applications**

The Entitlement Offer opens for acceptances on the Opening Date and all Entitlement and Acceptance Forms and payments of Application Money must be received by no later than 5.00pm (AEDT) on the Closing Date, subject to the Company varying the Closing Date in accordance with the ASX Listing Rules.

3.15 **Quotation of New Shares and Admission of New Shares to trading on ASX**

The Company intends to apply within seven (7) days of the date of the Closing Date of the Offer to the ASX for the New Shares issued pursuant to the Offer to be granted official quotation by ASX.

Should the New Shares not be granted official quotation on the ASX within 3 months after the date of this Booklet, none of the New Shares offered under this Booklet will be issued and all Application Monies will be refunded without interest to Applicants within the time prescribed by the Corporations Act.

3.16 Allotment of New Shares

It is expected that allotment of the New Shares will take place as soon as practicable after the Closing Date. It is expected that the New Shares will be allotted no later than the date specified in the Timetable. However, if the Closing Date is extended, the date for allotment may also be extended.

No allotment of New Shares will be made until permission is granted for their quotation by ASX.

Holding statements for New Shares issued under the Entitlement Offer will be mailed in accordance with the ASX Listing Rules and timetable at the commencement of this Offer Booklet as soon as practicable after their issue.

If you are paying for your New Shares by BPAY®, please refer to your personalised instructions on your Entitlement and Acceptance Form. You can only make a payment via BPAY® if you are the holder of an account with an Australian financial institution that supports BPAY® transactions. Please note that should you choose to pay by BPAY®:

- (a) you do not need to complete or return the Entitlement and Acceptance Form but are taken to have made the declarations on that personalised Entitlement and Acceptance Form;
- (b) amounts received by the Company in excess of the Issue Price multiplied by your Entitlement (**Excess Amount**) may be treated as an application to apply for as many Additional Shares as your Excess Amount will pay for in full; and
- (c) if you do not pay for your full Entitlement, you are deemed to have taken up your Entitlement in respect of such whole number of New Shares as is covered in full by your Application Money.

When completing your BPAY® payment, please make sure to use the specific Biller Code and unique reference number provided on your personalised Entitlement and Acceptance Form. If you receive more than one personalised Entitlement and Acceptance Form (i.e. where you have multiple holdings), please only use the reference number specific to the Entitlement on that form. - (b) if you do not pay for your full Entitlement, you are deemed to have taken up your Entitlement in respect of such whole number of New Shares as is covered in full by your Application Money.

Please note that your bank and the receiving bank may apply fees or charges to any transfer and any conversion to Australian dollars from a foreign currency will impact the amount of Australian dollars received by the Company.

When completing your EFT, please make sure to use the unique reference number provided on your personalised Entitlement and Acceptance Form. If you receive more than one personalised Entitlement and Acceptance Form (i.e. where you have multiple holdings), please only use the reference number specific to the Entitlement on that form. If you inadvertently use the same reference number for more than one of your Entitlements, you will be deemed to have applied only for New Shares on the Entitlement to which the reference number applies.

General

You should be aware that your own financial institution may implement earlier cut-off times with regard to electronic payment, and you should therefore take this into consideration when making payment. It is your responsibility to ensure that funds submitted through BPAY ® or EFT are received by **5.00pm (AEDT) on the Closing Date**.

Excess Application Money that is not sufficient to subscribe for a number of New Shares multiplied by the Issue Price will be refunded to you except where that amount is less than \$2.00, in which case it will be retained by the Company. The method by which you receive the refund will be at the discretion of the Company. No interest will be paid to Eligible Shareholders on any Application Money received or refunded.

- (c) agree that if in the future you decide to sell or otherwise transfer the New Shares you will only do so in regular transactions on ASX where neither you nor any person acting on your behalf knows, or has reason to know, that the sale has been pre-arranged with, or that the purchaser is, in the United States;
- (d) agree to provide (and direct your nominee and custodian to provide) any requested substantiation of your eligibility to participate in the Entitlement Offer and of your holding of Shares on the Record Date;

- (f) have not and will not send any materials relating to the Entitlement Offer to any person in the United States, or is acting for the account or benefit of a person in the United States.

4.6 **No trading of Entitlements**

The rights to New Shares under the Offer are non-renounceable. Accordingly, there will be no trading of rights on the ASX, and you may not dispose of your rights to subscribe for New Shares under the Offer to any other party. If you do not take up your Entitlement to New Shares under the Offer by the Closing Date, the Offer to you will lapse.

4.7 If you do not wish to accept all or any part of your Entitlement

To the extent you do not accept all or any part of your Entitlement, it will lapse. Any New Shares that you would have otherwise been entitled to under the Entitlement Offer (or New Shares that relate to the portion of your Entitlement that has not been accepted) may be offered as Shortfall Shares. Any offer of Shares not issued under the Entitlement Offer and the Shortfall Facility may be placed to new professional and sophisticated investors by the Board of the Company in accordance with the ASX Listing Rules.

If you do not take up your Entitlement, those Entitlements that you do not take up will lapse and you will not receive any payment or value for them.

5. Important information for Shareholders

5.1 Underwriting Agreement

The Company has entered into an underwriting agreement with the Underwriter, who has agreed to fully underwrite the Entitlement Offer (**Underwriting Agreement**).

The Underwriter is obligated to subscribe for the number of Shortfall Shares remaining after the allocation of the Shortfall Shares under the Shortfall Facility (**Underwritten Shares**).

Pursuant to the Underwriting Agreement, the Company has agreed to pay the Underwriter the following fees:

- (a) an underwriting fee of 7% of the amount payable in connection with the Underwritten Shares (excluding GST);
- (b) all external transaction fees (being the fees that the Underwriter agrees to pay to investors as consideration for entry into binding sub-underwriting or firm commitment arrangements in respect of the Entitlement Offer).

The Company must also issue to the Underwriter 135,000,000 options over Shares in the Company, exercisable at \$0.0045 and expiring four years from the date of issue.

The Company must also pay or reimburse the Underwriter for costs it has reasonably incurred in respect of the Entitlement Offer.

Subject to certain exceptions, the Company has agreed to indemnify the Underwriter, its affiliates and related bodies corporate (as that expression is defined in the Corporations Act), and their respective directors, officers and employees (each an **Indemnified Party**) against all losses suffered or incurred by an Indemnified Party, directly or indirectly, or claims made against an Indemnified Party, arising out of or in connection with (amongst other things) the Entitlement Offer and Underwriting Agreement.

As is customary with these types of arrangements, the Underwriting Agreement contains representations and warranties and indemnities in favour of the Underwriter. The Underwriter may also, in certain circumstances, terminate its obligations under the Underwriting Agreement on the occurrence of certain termination events (in some circumstances, having regard to the materiality of the relevant event). The termination events of the Underwriter have been summarised below:

- (c) the Entitlement Offer is withdrawn by the Company;
- (d) the Company is required to correct defective disclosure;
- (e) there is a statement in the Offer Booklet or related documents that is misleading or deceptive or likely to mislead or deceive;
- (f) a director or senior manager of the Company is charged with an indictable offence;
- (g) the Company is prevented from allotting shares pursuant to the Entitlement Offer;

- (u) the Company alters its capital structure in any manner not contemplated by the Offer Document; or
- (v) any person is appointed under any legislation in respect of companies to investigate the affairs of the Company.

5.2 Lead Manager Mandate

The Company has also entered into corporate advisory (manager) mandate with Cerberus Investments Pty Ltd ACN 107 652 737 trading as Cerberus Advisory (**Lead Manager**) in relation to the Placement and the Entitlement Offer. Under the mandate, the following additional fees will be payable by the Company to the Lead Manager (excluding GST):

- (a) in relation to the Placement:
- (i) \$25,000 as a management fee on the Placement; and
 - (ii) a six percent selling fee on the gross amount received by the Company under the Placement (to be passed through to the sole participant of the Placement), being \$18,900,
- which amounts may be satisfied by the issue of Shares to the Lead Manager (or its nominee) at the same price per Shares as under the Entitlement Offer, subject to approvals, where required; and
- (b) in relation to the Entitlement Offer, the Company will issue to the Lead Manager (or its nominee) 25,448,852 options to subscribe for Shares in the Company following the issues contemplated by the Entitlement Offer, which will have a term of four years and a strike price of \$0.0045.

5.3 Substantial holders and Directors' interests in Securities

As at the date of this Offer Booklet, the Company has the following substantial holders (based on both the Placement to the Placée completing and having regard to the substantial holder notices that have been provided to the Company and released to the ASX and information from the Share Registry):

Substantial holders of the Company	Number of Shares	Voting Power
Noble Investments Superannuation Fund Pty Ltd and its associates	121,666,666	14.34%
Peter Fitzgerald and his associates	61,531,561	8.28%
Peter Westerhuis and his associates	46,756,434	6.29%
Treasury Services Group Pty Ltd and its associates	41,666,666	5.61%

5.4 Effect on Control

The potential effect that the Entitlement Offer will have on the control of the Company and the consequences of that effect will depend on a number of factors, including investor demand, participation by existing shareholdings and the extent to which Shortfall Shares are available and ultimately taken up by the Underwriter pursuant to the Underwriting Agreement (in accordance with the shortfall allocation policy detailed in Section 3.4).

Following the Placement and the Entitlement Offer and upon completion of the underwriting pursuant to the Underwriting Agreement, the voting power in the Company held by:

- (a) the Underwriter could increase from the current level of nil up to a maximum of 33.33%;

- (b) Noble Investments Superannuation Fund Pty Ltd and its associates could decrease from its post-Placement level of 14.34% to a maximum of 9.56% (depending on Placee of participation in the Entitlement Offer);
- (c) Peter Fitzgerald and his associates could decrease from the current level of 8.28% to a maximum of 4.84% (depending on Mr Fitzgerald's level of participation in the Entitlement Offer);
- (d) Peter Westerhuis and his associates could decrease from the current level of 6.29% to a minimum of 3.67% (depending on Mr Westerhuis' level of participation in the Entitlement Offer); and
- (e) Treasury Services Group Pty Ltd and its associates could decrease from the current level of 5.61% to up to a maximum of 3.27%.

No forecast is made on whether the Underwriters' voting power in the Company will otherwise change in the future, whether pursuant to other acquisitions or disposals of Shares or otherwise (for example relying on any other applicable items in section 611 of the Corporations Act).

The following tables show the indicative number of Shares to be held by, and the approximate indicative voting power in the Company of, the Underwriter upon completion of the Placement and the Entitlement Offer and the underwriting, under certain pro forma scenarios:

	Underwriter	
	Shares	Voting power (%)
Date of this document	Nil	Nil
Following completion of the Placement	Nil]	Nil
Following completion of the Entitlement Offer		
Fully subscribed	Nil	Nil
75% subscribed by other shareholders and investors	106,036,882	8.33
50% subscribed by other shareholders and investors	212,073,764	16.67
25% subscribed by other shareholders and investors	318,110,645	25.00
Underwritten shares only	424,147,527	33.33

In aggregate, the Entitlements of the substantial Shareholders above represent approximately 33.15% of the maximum appropriate Entitlement offer raising of A\$1.272 million.

The potential effect which the issue of New Shares pursuant to the Entitlement Offer (including the Shortfall Shares) will have on the control of the Company is as follows:

- For personal use only
- (a) all Eligible Shareholders will be diluted by the Placement by 12.38%;
 - (b) if all Eligible Shareholders take up their entitlements under the Entitlement Offer, the New Shares issued under the Entitlement Offer will have no further effect on the control of the Company and all Shareholders will hold the same percentage interest in the Company, subject only to the Placement;
 - (c) in the more likely event that there is a shortfall in the Entitlement Offer, Eligible Shareholders who do not subscribe for their full Entitlement of New Shares under the Entitlement Offer will be diluted relative to those Eligible Shareholders who subscribe for some or all of their Entitlement, and will be diluted by any take up of Shortfall Shares. This dilution will be in addition to the dilution caused by the Placement.

Consequently, the potential consequences of the effect which the issue of New Shares pursuant to the Entitlement Offer may have on the control of the Company is that the Underwriter may increase its respective abilities to influence the composition of the Board and the Company's management and strategic direction and to impact the outcome of resolutions of Shareholders.

For example, the Underwriter may have the ability to prevent a special resolution from being passed by the Company (such resolution requiring at least 75% of the votes cast by members entitled to vote on the resolution) and may have the de facto ability to pass ordinary resolutions of the Shareholders, or to prevent ordinary resolutions from being passed, given that less than 100% of the Shareholders are expected to vote at any general meeting.

Control will ultimately be affected by the level of applications under the Entitlement offer. The final percentage interests held by Shareholders of the Company are dependent on, among other things, the extent to which Eligible Shareholders take up their Entitlements.

With the exception of the issue of Shortfall Shares to the Underwriter pursuant to the Underwriting Agreement, no Shortfall Shares will be issued to an Eligible Shareholder if, in the view of the Directors, to do so would increase that Eligible Shareholder's voting power in the Company from less than 20% to above 20%. Additionally, the Directors reserve the right to refuse to approve a particular issue of Shortfall Shares if (without limitation) such issue would, in the view of the Directors, result in a breach of the ASX Listing Rules, the Corporations Act, FATA or any other applicable law.

The information in this Section 5.4 is the Company's estimates only, based on the information available to it. Actual outcomes may vary.

5.5 Potential Dilution Effect

If you do not participate in the Entitlement Offer, your holdings in the Company will be diluted as a result of the Entitlement Offer (compared with your position before the Entitlement Offer), after the issue of New Shares under the Entitlement Offer.

The following are examples of how any dilution may impact you if you do not participate in the Entitlement Offer, assuming the maximum number of New Shares are issued:

Example Shareholder	Holdings as at Record Date	% as at Record Date (after the Placement)	Entitlements Under the Entitlement Offer (subject to rounding)	Holdings if Entitlement not taken up	% if the maximum number of New Shares is issued pursuant to the Entitlement Offer (subject to rounding) ¹
	100,000,000	11.79	50,000,000	100,000,000	7.86

Note:

1. The dilutionary effect shown in the table assumes that any Entitlements not taken up are dealt with as Shortfall Shares or taken up by the Underwriter pursuant to the Underwriting Agreement.

5.6 No prospectus or product disclosure statement and not investment advice

The Entitlement Offer complies with the requirements of section 708AA of the Corporations Act as modified by ASIC Corporations (Non-Traditional Rights Issues) Instrument 2016/84. Accordingly, neither this Offer Booklet nor the Entitlement and Acceptance Form are required to be lodged or registered with ASIC.

It is also not investment advice and does not take into account your investment objectives, financial situation, tax position and particular needs. Before deciding whether to apply for New Shares, you should consider whether they are a suitable investment for you in light of your personal circumstances (including financial and taxation issues) and seek professional guidance before deciding whether to invest.

5.7 Shareholders outside Australia

(a) General restrictions

This Offer Booklet and accompanying Entitlement and Acceptance Form is only an offer to persons (including individuals and corporate entities) with registered addresses in Australia or New Zealand (**Eligible Shareholders**). The Offer is not extended to, and no New Shares are offered or will be issued to, persons who do not meet the requirements in this section.

This Offer Booklet and accompanying Entitlement and Acceptance Form do not constitute an offer of New Shares in any jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer. In particular, this Offer Booklet may not be distributed to any person, and the New Shares may not be offered or sold, in any country outside Australia except to the extent permitted below.

The distribution of this Offer Booklet in jurisdictions outside Australia and New Zealand may be restricted by law and therefore persons who come into possession of this document outside Australia and New Zealand should seek advice on and observe any such restrictions. A failure to comply with these restrictions may constitute a violation of applicable securities laws.

It is the responsibility of any applicant to ensure compliance with any laws of the country relevant to their application. Return of a duly completed Entitlement and Acceptance Form and/or payment of Application Money will be taken by the Company to constitute a representation that there has been no breach of such laws and that the applicant is physically present in Australia and New Zealand.

(b) **New Zealand**

The New Shares are not being offered to the public within New Zealand other than to existing shareholders of the Company with registered addresses in New Zealand to whom the offer of these securities is being made in reliance on the Financial Markets Conduct (Incidental Offers) Exemption Notice 2016.

This Offer Booklet has been prepared in compliance with Australian law and has not been registered, filed with or approved by any New Zealand regulatory authority under the Financial Markets Conduct Act 2013. This Offer Booklet is not a product disclosure statement under New Zealand law and is not required to, and may not, contain all the information that a product disclosure statement under New Zealand law is required to contain.

(c) **Ineligible Holders**

The Company has determined pursuant to ASX Listing Rule 7.7.1 that it would be unreasonable on this occasion to extend the Offer to Ineligible Holders having regard to the number of Ineligible Holders, the number and value of securities held by Ineligible Holders and the costs of complying with the legal and regulatory requirements which would apply to an offer of securities to Ineligible Holders in those jurisdictions.

5.8 **Rights issue exception not available**

No nominee has been appointed for Ineligible Shareholders under section 615 of the Corporations Act and, as such, Eligible Shareholders will not be able to rely on the exception for entitlement issues set out in item 10 of Section 611 of the Corporations Act. Accordingly, when an Eligible Shareholder applies for some or all of their Entitlement, they must have regard to section 606 of the Corporations Act. Eligible Shareholders who may be at risk of exceeding the 20% voting power threshold in Section 606 as a result of acceptance of the Offer should seek professional advice before completing and returning the Entitlement Offer and Acceptance Form. The Company will not allocate any securities where it has reasonable grounds to believe that such allocation would breach section 606 of the Corporations Act.

5.9 **Notice to nominees and custodians**

The Company is not required to determine whether or not any registered holder is acting as a nominee or the identity or residence of any beneficial owners of securities. Where any nominee or custodian is acting on behalf of a foreign person, that holder, in dealing with its beneficiary, may only participate on behalf of beneficiaries who are resident in Australia and New Zealand. Any person in the United States with a holding through a nominee may not participate in the Entitlement Offer. Nominees and custodians may not distribute any part of this Offer Booklet in the United States or in any other country outside of Australia and New Zealand.

5.10 Continuous disclosure

The Company is a 'disclosing entity' under the Corporations Act and is subject to regular reporting and disclosure obligations under the Corporations Act and the ASX Listing Rules, including the preparation of annual reports and half-yearly reports.

The Company is required to notify the ASX of information about specific events and matters as they arise for the purposes of the ASX making that information available to the stock markets conducted by the ASX. In particular, the Company has an obligation under the ASX Listing Rules (subject to certain exceptions) to notify the ASX immediately of any information which it is or becomes aware which a reasonable person would expect to have a material effect on the price value of its Shares. That information is available to the public from the ASX.

5.11 Information excluded from continuous disclosure notices

There is no information which has been excluded from a continuous disclosure notice in accordance with the Listing Rules other than as is set out in this Offer Booklet.

5.12 Taxation consequences

The taxation consequences of any investment in New Shares will depend upon your particular circumstances. Potential investors must make their own enquiries concerning the taxation consequences of an investment in the Company. Applicants should consult their tax adviser for advice applicable to their individual needs and circumstances.

5.13 Privacy

If you complete an Entitlement and Acceptance Form and apply for New Shares, you will be providing personal information to the Company, its agents, contractors and third-party service providers. The Company, its agents, contractors and third-party service providers will collect, hold and use that information to assess your acceptance, carry out administration of your shareholding, service your needs as a Shareholder and facilitate corporate communications.

The information may also be used from time to time and disclosed to persons inspecting the register, bidders for your securities in the context of takeovers, regulatory bodies, including the Australian Taxation Office, print service providers, mail houses and the Share Registry.

Failure to provide the required personal information may mean that your acceptance is not able to be processed efficiently, if at all.

You may request access to your personal information held by (or on behalf of) the Company and by the Share Registry. You can request access to, or the updating of, your personal information by telephoning or writing to the Company or the Share Registry using the details shown in the Corporate Directory.

The collection, maintenance and disclosure of certain personal information is governed by legislation including the *Privacy Act 1988* (Cth) and the Corporations Act.

5.14 Future performance and forward-looking statements

This document contains certain forward-looking statements with respect to the financial condition, results of operations, projects and business of the Company. These forward-looking statements involve known and unknown risks, uncertainties and other factors which are

subject to change without notice. The Company gives no assurance that the anticipated results, performance or achievements expressed or implied in those forward-looking statements will be achieved.

Forward looking statements are provided as a general guide only and there can be no assurance that actual outcomes will not differ materially from these statements. Except as required by law, and only to the extent so required, no person warrants or guarantees the future performance of the Company or any return on any investment made pursuant to this Entitlement Offer.

5.15 **Past performance**

Past Share price performance provides no guarantee or guidance as to future Share price performance. Past performance information given in this Offer Booklet is provided for illustrative purposes only and should not be relied upon as (and is not) an indication of future performance. The historical information in this Offer Booklet is, or is based upon information that has been released to the market. For further information, please see past announcements released to the ASX.

5.16 **Risks**

Please consult with your stockbroker, accountant or other suitably qualified independent professional adviser if you have any queries or are uncertain about any aspect of the Entitlement Offer.

In addition to the general risks applicable to all investments in listed securities, there are specific risks associated with an investment in the Company, which are described in Section 6.

5.17 **Disclaimer of representations**

No person is authorised to give any information or make any representation in connection with the Entitlement Offer, which is not contained in this Offer Booklet. Any information or representation not contained in this Offer Booklet may not be relied on as having been authorised by the Company in connection with the Entitlement Offer. Except as required by law, and only to the extent so required:

- (a) none of the Company, or any person, warrants or guarantees the future performance of the Company or any return on any investment made pursuant to the information contained in this Offer Booklet; and
- (b) the Company, its officers, employees and advisers disclaim all liability that may otherwise arise due to the Offer Booklet being inaccurate or incomplete in any respect.

5.18 **Authorisation and disclaimers**

This Offer Booklet is issued by, and is the sole responsibility of the Company.

None of the parties referred to in the Corporate Directory of the Offer Booklet (other than the Company), has:

- (a) authorised or caused the issue of this Offer Booklet; or

- (b) made or authorised the making of any statement that is included in this Offer Booklet or any statement on which a statement in this Offer Booklet is based.

To the maximum extent permitted by law, each of the parties referred to in the Corporate Directory of this Offer Booklet (other than the Company) expressly disclaims and takes no responsibility for any statements in or omissions from this Offer Booklet.

5.19 **Governing law**

This Offer Booklet, the Entitlement Offer and the contracts formed on acceptance of applications are governed by the laws applicable in Queensland, Australia.

5.20 **Interpretation**

For the avoidance of doubt, any capitalised words and expressions used in this Offer Booklet that have not otherwise been defined in the body of this Offer Booklet have the meanings given in Section 7.

A reference to time in this Offer Booklet is to the local time in Sydney, New South Wales, Australia, unless otherwise stated. All financial amounts in this Offer Booklet are expressed in Australian dollars, unless otherwise stated.

5.21 **No handling fees**

There will be no handling fees payable to brokers for Entitlement and Acceptance Forms lodged by them on behalf of Eligible Shareholders.

6. **Risks**

There are risks involved with participating in the Offer and holding Shares in Clara Resources Australia Limited (the "**Company**", "**Clara**", "**we**" or "**us**"). Certain risks are specific to an investment in the Company and others are specific to investing in and holding securities. The occurrence of these risks may have an adverse impact on the Group's business, results of operations, financial condition and the price of Clara's securities.

The risks detailed below may change after the date of this document and other risks relevant to the Company and its subsidiaries (the "**Group**") and the Shares may emerge which may have an adverse impact on the Group and the price of the Shares.

The risks set out in this section are not exhaustive. Other risks may materially affect the future performance of the Group and the price of the Shares. Additional risks and uncertainties not presently known to management or that management currently believe not to be material may also affect the Company's business. Accordingly, no assurances or guarantees of future performance, profitability, distributions, or returns of capital are given by Clara or any other person.

Risks relating to Clara may impact Clara, its business, financial position and performance as well as the businesses, financial position and performance of its subsidiaries which, in turn impacts Clara. Accordingly, a reference to a risk impacting Clara, should be taken to be a reference to a risk which may also impact its subsidiaries.

6.1 Share Market Risk

The market price of listed securities can be expected to rise and fall in accordance with general market conditions and factors specifically affecting the Australian resources sector and exploration companies in particular. The New Shares carry no guarantee in respect of profitability, dividends, return on capital, or the price at which they may trade on the ASX.

There are a number of factors (both national and international) that may affect the share market price and neither the Company nor its Directors have control of those factors.

6.2 General Economic Conditions

Changes in the general economic climate in which the Company operates may adversely affect the financial performance of the Company. Factors that may contribute to that economic climate include the general level of economic activity, interest rates, inflation, supply and demand, industrial disruption and other economic factors. The price of commodities will also be of particular relevance to the Company. These factors are beyond the control of the Company and the Company cannot, with any degree of certainty, predict how they will impact on the Company.

6.3 Share Price Fluctuations

The market price of the Company's securities will be subject to varied and often unpredictable influences in the share market. Both domestic and world economic conditions may affect the performance of the Company. Factors such as the level of industrial production, inflation and interest rates impact all commodity prices.

6.4 Legislative Change

Changes in government regulations and policies may adversely affect the financial performance or the current and proposed operations generally of the Company.

6.5 Unforeseen Expenses

While the Company is not aware of any expenses that may need to be incurred that have not been taken into account, if such expenses were subsequently incurred, the expenditure proposals of the Company may be adversely affected.

6.6 Not taking up Entitlement Offer

Entitlements cannot be traded on ASX or privately transferred. If eligible retail shareholders do not take up all or part of their available entitlements, individuals' percentage shareholding in Clara will be diluted (in addition to the dilution which will take place as a result of the Placement). In addition, investors may have their investment diluted by future capital raisings by Clara.

6.7 Current and future sources of funding

- (a) The Company's ability to effectively implement its business strategy over time may depend in part on its ability to raise additional funds. There can be no assurance that any such equity or debt funding will be available to the Company on favourable terms or at all. If adequate funds are not available on acceptable terms, the Company may

not be able to take advantage of opportunities or otherwise respond to competitive pressures.

- (b) Although the Directors believe that on completion of the Entitlement Offer the Company will have sufficient working capital to carry out its short-term business objectives, there can be no assurance that such objectives can be met without further financing or, if additional financing is necessary, that financing can be obtained on favourable terms or at all. Further, if additional funds are raised by issuing equity securities, this may result in dilution for some or all of the Shareholders.
- (c) The Company's ability to raise further funding to meet both its development and capital expenditure requirements, depends upon a number of different factors. The Company's ability to raise further equity financing is very sensitive to negative market sentiment. Accordingly, there is no guarantee that the Company will be able to secure additional funding on terms favourable to the Company. If the Company is unable to obtain additional financing as required, it will be unable to continue to fund its existing projects, or take advantage of opportunities as they arise. Further, without additional funding the Company may not have sufficient working capital to be able to meet day to day expenses as and when needed.

6.8 Environmental Regulations and Risks

National and local environmental laws and regulations affect nearly all of the operations of the Company. These laws and regulations set various standards regulating certain aspects of health and environmental quality, provide for penalties and other liabilities for the violation of such standards and establish, in certain circumstances, obligations to remediate current and former facilities and locations where operations are or were conducted. The Company will minimise the potential impact of these laws and regulations by taking steps to ensure compliance occurs and, where possible, by carrying appropriate insurance. Significant liability could be imposed on the Company for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous owners of properties acquired by the Company or non-compliance with environmental laws or regulations.

6.9 Insurance Arrangements

The Company intends to maintain insurance within ranges of coverage the Company believes to be consistent with industry practice and having regard to the nature of activities being conducted. No assurance however, can be given that the Company will be able to obtain such insurance coverage at reasonable rates or that any coverage it arranges will be adequate and available to cover any such claims.

6.10 Exploration and Evaluation Risks

Investors should understand that mineral exploration and development can potentially be high risk undertakings. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited. The circumstances in which a mineral deposit becomes or remains commercially viable depend on a number of factors. These include the particular attributes of the deposit, such as size, grade and proximity to infrastructure, as well as Clara successfully obtaining all necessary consents and approvals and the successful design, construction and operation of extracting, processing and transportation facilities. A combination of these factors may result in projects not being developed, or operations becoming unprofitable. Delays or difficulties in obtaining relevant approvals, or obtaining

conditional or limited approvals, may interfere with the Company's operations which could materially impact the business, financial position and performance of the Company.

6.11 Technical Studies Risk

Subject to the results of exploration and testing programs to be undertaken, the Company may progressively undertake a number of studies relating to its projects, particularly with respect to the Ashford Coking Coal Project. Any studies will be completed within parameters designed to determine the economic feasibility of a project within certain limits. There can be no guarantee that any of the studies will confirm the economic viability of the Company's projects, including the Ashford Coking Coal Project. Even if a study confirms the economic viability of the Ashford Coking Coal Project, there can be no guarantee the Company will be able to raise the development funding, or that the project will be successfully brought into production as assumed or within the estimated parameters once production commences.

6.12 Mine Development Risk

- (a) Future development of a mining operation at the Ashford Coking Coal Project or any of Clara's other current or future projects is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services.
- (b) If the Company discovers an economically viable mineral deposit that it intends to develop, it will, among other things, require various approvals, licences and tenements before it will be able to mine the deposit. There is no guarantee that the Company will be able to obtain all required approvals, licences and tenements. To the extent that required authorisations are not obtained or are delayed, the Company's operational and financial performance may be materially adversely affected.
- (c) If Clara commences production, its operations may be disrupted by a variety of risks and hazards which are beyond its control, including environmental hazards, industrial accidents, technical failures, labour disputes, unusual or unexpected rock formations, flooding and extended interruptions due to inclement or hazardous weather conditions and fires, explosions, pandemics or accidents.
- (d) The risks outlined above mean that there can be no assurances as to the future development of a mining operation in relation to the Ashford Coking Coal Project (or other future projects) or that Clara will achieve commercial viability through the development or mining of any its projects.

6.13 Geology and Coal Quality

There is risk associated with potential variation in the Ashford Coking Coal Project run-of mine (ROM) tonnes, coal quality and strip ratio based on the limitations of the scoping study stage geological model. Further exploration work is required to increase geological confidence, upgrading of resource classification and detailed mine design during the next phase of study. The Ashford Coking Coal Project raw coal quality in may be different to the forecast

expectations, impacting design of the plant, yield, ash and the coking/thermal ratio. Further analysis of raw coal data from additional boreholes in specifically selected locations is required, including comprehensive testing to further confirm coal quality. There is no certainty further exploration and analysis will confirm the assumptions in the scoping study.

6.14 **Commodity Prices**

The Company's prospects will be influenced from time to time by the prevailing short-term prices of the commodities targeted in its exploration programs, in this case, the price of hard coking coal (HCC). HCC prices fluctuate and are affected by factors including supply and demand, hedge activities associated with commodity markets, the costs of production and general global economic and financial market conditions. These factors may cause volatility which in turn, may affect the viability of the Company's projects, including the Ashford Coking Coal Project. The events relating to the Russia/Ukraine war have had an impact on global demand for the Company's target commodities. It is difficult if not impossible to accurately predict the direction of those markets in the short or medium terms.

6.15 **Tenement Risks**

The rights to resource tenements carry with them various obligations which the holder is required to comply with in order to ensure the continued good standing of the tenement and, specifically, obligations in regard to minimum expenditure levels and responsibilities in respect of the environment and safety. Failure to observe these requirements could prejudice the right to maintain title to a given area and result in government action to forfeit a permit or permits.

There is no guarantee that current or future exploration permit applications or existing permit renewals will be granted, that they will be granted without undue delay, or that the holder of the mineral tenements can economically comply with any conditions imposed on any granted exploration permits.

6.16 **Land Access Risk**

Land access is critical for exploration and evaluation to succeed. In all cases the acquisition of prospective tenements is a competitive business, in which proprietary knowledge or information is critical and the ability to negotiate satisfactory commercial arrangements with other parties is often essential. Access to land for exploration purposes can be affected by land ownership, including private (freehold) land, pastoral lease and regulatory requirements within the jurisdictions where the Company, its subsidiaries or companies it holds interests in operate.

6.17 **Native Title and Heritage Risk**

The *Native Title Act 1993* (Cth) recognises certain rights of indigenous Australians over land where those rights have not been extinguished. These rights, where they exist, may impact on the ability of the Company to carry out exploration and in future, mining activities, or obtain exploration or mining licences in Australia. In applying for licences over crown land, the Company must observe the provisions of Native Title legislation. There are also laws of the States and Territories which impose duties of care which require persons, including the Company, to take all reasonable and practical measures to avoid damaging or destroying Aboriginal cultural heritage. In carrying out exploration and/or mining operations, the Company must observe Native Title legislation (where applicable), Aboriginal heritage legislation and

heritage legislation which protects sites and objects of significance, and these may delay or impact adversely on the Company's operations in Australia.

6.18 Title Risk

The exploration and prospecting permits and claims in which either the Company, its subsidiaries or companies it holds interests in has now, or may, in the future, acquire an interest, are subject to applicable local laws and regulations. There is no guarantee that any such claims, applications or conversions in which the Company, its subsidiaries or companies it holds interests in has a current or potential interest will be granted. All of the projects in which the Company, its subsidiaries or companies it holds interests in has an interest will be subject to application for claim renewal from time to time. Renewal of the term of each claim is subject to applicable legislation. If the claim is not renewed for any reason, the Company may suffer significant damage through loss of the opportunity to develop and discover any mineral resources on that claim.

6.19 Contractual and Joint Venture Bank

The Company's ability to efficiently conduct its operations in a number of respects depends upon a third party product and service providers and contracts have, in some circumstances, been entered into by the Company and its subsidiaries in this regard. As in any contractual relationship the ability for the Company to ultimately receive benefits from these contracts are dependent upon the relevant third party complying with its contractual obligations. To the extent that such third parties default in their obligations, it may be necessary for the Company to enforce its rights under any of the contracts and pursue legal action. Such legal action may be costly, and no guarantee can be given by the Company that a legal remedy will ultimately be granted on appropriate terms. The Company may wish to develop its projects or future projects through joint venture arrangements. Any joint ventures entered into by, or interests in joint ventures assigned to the Company, could be affected by the failure or default of any of the joint venture participants. Additionally, failure by contractors to perform in accordance with required timelines, may expose any project in which the Company its subsidiaries or companies it has an interest, to risk of forfeiture under applicable laws.

6.20 Operational Risks and Costs

Prosperity for the Company will depend largely upon an efficient and successful implementation of all the aspects of exploration, developments, business activities and management of commercial factors. Exploration has been and will continue to be hampered on occasions by unforeseen weather events, accidents, unforeseen cost changes, environmental considerations, natural events and other incidents beyond the control of the Company. By its nature, the business of exploration is a highly speculative endeavour and involves significant risks. The Company's performance depends on the successful exploration and/or acquisition of resources or reserves, competent operational management and efficient financial management. Further, the nature of exploration can sometimes result in industrial accidents and other incidents beyond the control of the Company. There can be no assurances that the Company's exploration programs, will result in the discovery of a satisfactory resource. Even if a resource is identified, there is no guarantee that it will be viable for economic exploitation. Ultimate success depends on the discovery and delineation of economically recoverable mineral resources, establishment of efficient exploration operations, obtaining necessary titles and access to projects, as well as government and other regulatory approvals. The exploration and mining activities of the Company may be affected by a number of factors, including but not limited to geological conditions, seasonal weather

patterns, technical difficulties and failures, continued availability of the necessary technical equipment, plant and appropriately skilled and experienced technicians, adverse changes in government policy or legislation and access to the required level of funding.

If the Company decides to develop and commission a mine, the operations of the Company including mining and processing may be affected by a range of factors. These include failure to achieve the predicted grades and quality in exploration, mining and processing, technical difficulties encountered in commissioning and operating plant and equipment, mechanical failure, metallurgical problems which affect extraction rates and costs, adverse weather conditions, industrial and environmental accidents, industrial disputes, unexpected shortages or increase in the costs of consumables, spare parts, plant and equipment.

6.21 **Climate Change Risk**

The operations and activities of Clara are subject to changes to local or international compliance regulations related to climate change mitigation efforts, specific taxation or penalties for carbon emissions or environmental damage and other possible restraints on industry that may further impact the Company. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences. Climate change may also cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns, incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.

6.22 **Management Actions**

The Directors of the Company will, to the best of their knowledge, experience and ability (in conjunction with their management) endeavour to anticipate, identify and manage the risks inherent in the activities of the Company, but without assuming any personal liability for same, with the aim of eliminating, avoiding and mitigating the impact of risks on the performance of the Company and its Securities. However, there is no assurance that the Directors will be able to successfully avoid circumstances giving rise to an adverse effect on the assets, operations and ultimately the financial performance of the Company and the market price of its securities.

6.23 **International Conflicts Risk**

The ongoing military conflict between Russia and Ukraine, and recent conflict in Israel and Gaza, are having a material effect on the global economy. These hostilities have created uncertainty for capital markets around the world, and this uncertainty may lead to adverse consequences for the Company's business operations. Measures taken by governments around the world to end these conflicts (such as imposing tariffs on Russian exports and other economic sanctions) may cause disruptions to the Company's supply chains and adversely impact commodity prices.

6.24 **Government Policy**

Changes in relevant taxation, interest rates, other legal, legislative and administrative regimes, and Government policies in Australia or any other jurisdiction in which the Company, its subsidiaries or companies it holds interests in undertakes or may undertake operations, may have an adverse effect on the assets, operations and ultimately the financial performance of the Company. These factors may ultimately affect the financial performance of the Company

and the market price of its securities. In addition to the normal level of income tax imposed on all industries, the Company its subsidiaries or companies it holds interests in may be required to pay government royalties, indirect taxes, GST and other imposts which generally relate to revenue or cash flows. Industry profitability can be affected by changes in government taxation policies. Changing attitudes to environmental, land care, cultural heritage and indigenous land rights' issues, together with the nature of the political process, provide the possibility for future policy changes. There is a risk that such changes may affect the Company's, its subsidiaries or companies it holds interests in exploration plans or, indeed, its rights and/or obligations with respect to the tenements.

6.25 **Reliance on Key Personnel**

The Company's progress in pursuing its exploration and evaluation programmes within the time frames and within the costs structure as currently envisaged could be dramatically influenced by the loss of existing key personnel or a failure to secure and retain additional key personnel as the Company's exploration programme develops. The resulting impact from such loss would be dependent upon the quality and timing of the employee's replacement. Although the key personnel of the Company have a considerable amount of experience and have previously been successful in their pursuits of acquiring, exploring, evaluating and operating resource projects, there is no guarantee or assurance that they will be successful in their objectives. Shareholders should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for the New Shares
