

ASX Announcement

27 October 2025

ISO 27001 Certification Update

Energy One Limited (“the Company”) is pleased to announce that it has successfully completed the final audit towards achieving the standard of **ISO/IEC 27001: Information security, cybersecurity and privacy protection**.

Pending successful completion of some final wrap-up activities, the independent auditors will then recommend that the Company be awarded full certification. The certificate is then expected to be awarded within 1 month.

As shareholders are aware from the Company’s full year results presentation, ISO27001 is widely regarded as the *gold standard* of information security and an increasingly essential certification for tier-1 software and service providers. This development represents the culmination of nearly 2 years of effort and an investment of \$2M+, by the Company. Further, ISO certification will be a key enabler to realising EOL’s strategic aspirations and continued revenue growth.

Energy One’s CEO, Shaun Ankers, commented: “Our customers operate in a critical industry and we are a mission-critical supplier to their operations. They expect that their data security and system integrity will be serviced at the highest levels available. An ISO27001 certification gives them even more confidence that Energy One is a trusted partner for all their needs, now and in the future.”

“Information security is a matter of national importance, with market expectations evolving rapidly. It is increasingly apparent that customers will insist vendors are certified with ISO27001 as a prerequisite for being considered a suitable supplier.”

“We also expect that the certification will serve as a key differentiator from vendors who have not attained this standard. It enhances our credibility with large and global customers, and further extends our commercial moat, given the significant time, investment and rigour required to achieve certification.”

The Company does not expect the above announcement to have a material short-term effect on the current (FY26) published commentary or trajectory but anticipates longer term financial and other strategic benefits are likely to be forthcoming.
