

ASX release

29 October 2025

Medibank sets new ambition in health

Medibank will today host a health immersion for investors, outlining its areas of focus and long-term ambitions for accelerating its growth as a health company.

It will showcase Medibank's continuing customer focus and how this approach creates customer and shareholder value, strengthens the business and drives meaningful change across Australia's health system.

It's a strategy driven by the needs of its customers and patients, and the greater role Medibank is playing in supporting their health and wellbeing.

FY30 aspirations

By connecting the different parts of our business, we can deliver more than the sum of our parts, providing more of what our customers want and strengthening our health insurance business while growing as a health company.

It details a new aspiration for the Medibank Health segment. We aim to significantly increase Medibank Health segment earnings to at least \$200 million by FY30.

We have also affirmed today that through the delivery of this growth in health, this will support our efforts as we aim to grow policyholder market share each year in a disciplined way, to at least 26.8% by FY30.

And it also details how Medibank aims to double the number of people we engage with in their health and wellbeing to around 10 million by FY30.

Medibank CEO David Koczkar said:

"Australia's healthcare system is one of the best in the world, but it is under pressure and urgently needs meaningful transformation to ensure we can keep up with the increasing needs in the community.

"It's time for the health system to shift from treatment to prevention, from hospital to community, from analogue to digital and from generic to personalised care.

"Investing in technology and connecting health is critical to accelerate this momentum.

"These four big shifts are essential to drive the health transition and to sustain the world leading health outcomes we all experience today.

"Medibank has been driving the health transition. Over the last decade, we have invested more than \$300 million to grow as a health company.

"We will remain focused on delivering for our customers and long-term value for our shareholders by accelerating our growth strategy, and today we have set out some very clear milestones alongside a new ambition.

“For almost 50 years, Medibank has been a cornerstone of Australian health, supporting millions of people to live healthier lives and helping shape better health outcomes nationwide.

“We will continue to advocate for our customers to give them more choice and control in their health and to drive the health transition this country needs. And we continue to strengthen our relationship with like-minded partners who are up for the challenge of meeting the changing needs of the community.

“At a time when we are focused on finding productivity gains as a nation, we have to challenge the old ways to meet the changing needs of the community. Our focus on accelerating the health transition will drive this.

“We are a trusted health partner to more than 4.2 million customers, a strong, growing business and we are excited about the future of health and our role in it.”

Targeting growth across four key health segments

Medibank will detail its focus across four key health segments which are set to deliver greater value for customers and drive long-term growth, across both public and private systems.

Wellbeing – encompasses programs and services that support customers’ health and wellbeing needs when people want to “be better” and to help build engagement. We aim to scale our leadership through Live Better – one of the largest health and wellbeing rewards programs in Australia, corporate health, and financial wellbeing offerings.

Primary care – incorporates general practice, clinician directed preventative programs, and virtual primary care services. We will help people “stay better” and navigate the health system, making primary care more accessible to more people through our Ampliar Health network by integrating virtual and in-person services and by providing proactive care and better care navigation through multi-disciplinary teams to better meet patients’ needs.

Community and acute care – including community and home care, acute home health and ambulatory care such as short stay hospitals – helping people “get better” and supporting patients to receive healthcare where and when they want it through our Ampliar Health network.

Health insurance – our core business, serving more than 4.2 million residents and non-residents in which we will continue to invest in delivering value, choice and control through our dual brands and differentiated products, for both resident and non-resident customers, supported by our investments in health and our broad network of partners.

Medibank’s existing scale, clinical expertise, track record in health innovation across these segments provide a strong platform to accelerate our strategy and meet the growing needs of customers and the community.

Increasing long-term ambitions

Medibank has set new aspirations to guide its next phase of growth.

The presentation includes some FY28 milestones that drive performance across three new FY30 aspirations and includes a reconciliation of the Medibank Health segment FY25 revenue and gross profit.

FY30 aspirations

Empowered by Australia's healthiest workplace

Medibank Health earnings

Medibank aims to significantly increase Medibank Health segment earnings

From: **\$76.7m** (FY25)
To: **> \$200m**

Resident PHI market share

Medibank aims to grow policyholder market share each year in a disciplined way

From: **26.5%** (FY25)
To: **> 26.8%**

Health engagement

Medibank aims to double the number of people we engage with in their health and wellbeing

From: **c. 5m** (FY25)
To: **c. 10m**

Health immersion

2025

Investor presentation
29 October 2025

Acknowledgment of Country

Medibank acknowledges Aboriginal and Torres Strait Islander peoples as the First Peoples of this nation.

We proudly recognise Elders past, present and emerging as the Traditional Owners and Custodians of the lands on which we work and live.

We're committed to supporting self-determination and envision a future where all Australians embrace Aboriginal and Torres Strait Islander histories, cultures and rights as a central part of our national identity.

Setting new ambitions as we accelerate growth

Today we will showcase how Medibank is positioned to lead and continue to grow as a health company

This means we aim to:

Grow earnings

Strengthen our business

Transform health

enabling shareholder value creation

FY30 aspirations

Empowered by Australia's healthiest workplace

Australia's health system

David Koczkar
Chief Executive Officer

Overview of Australia's healthcare system

A dual model providing accessibility and choice

Key strengths

- National priority: 9.9% of GDP on healthcare¹ vs OECD average (9.2%)²
- Global leadership: ranked top 3 globally in 2021 by the Commonwealth Fund for health outcomes³
- Highly skilled workforce: strong medical education and training standards
- Universal coverage with choice: public Medicare complements high private insurance uptake

Funding

Public system (\$142.2b)⁴

Private system (\$71.3b)⁴

Commonwealth / State Gov

Government-funded system (e.g., Medicare) that contributes to the cost of health services for Australian residents

Health Insurance

Private insurance that offers shorter waitlists, choice of doctor and covers items not funded by Medicare

Consumers

Out-of-pocket expenditure from consumers

Corporates

Health spending funded by non-government sources

c. 23.4 million Australians are enrolled in Medicare⁵

54.9% of the Australian population have some form of private health insurance⁶

Service coverage

Public system

Residential private system

Non-residential private system

General practice

Ancillary services

Limited⁷

Referred outpatient care

Public hospital care

Private hospital care

Limited⁸

Model

Offers affordable and accessible healthcare to all Australians

Complementary to Medicare covering a wider range of services

Covers all medically necessary health services during a non-resident's time in Australia

(1) Source: AIHW, Health expenditure 2024 (2) Source: OECD, Health at a glance 2023. (3) Source: Commonwealth Fund report 2021. (4) Source: AIHW, Health Expenditure Australia 2022-23 (5) Source: AIHW 2023. (6) Source: APRA, quarterly private health insurance statistics to Dec 2024 (7) Medicare provides only limited ancillary coverage through targeted programs such as the Child Dental Benefits Schedule and GP-led chronic disease or mental health care plans (8) If you are admitted as a private patient in a private hospital, Medicare still subsidises the physician services that are listed in the MBS

The need for change in Australia's health system

Rising consumer expectations are outpacing a system that remains slow to innovate

The shifting health demands of consumers

Ageing population

By 2053, 21% of Australians will be 65+ and 4.2% will be 85+, doubling today's representation and significantly increasing demand for community care and health services¹

Chronic disease

1 in 2 Australians live with a chronic condition which contributes to more than 1 in 3 potentially preventable hospitalisations²

Mental health

4.3m Australians experience a mental health condition annually (1 in 5), with the highest prevalence among young adults – 39%, and anxiety alone impacting 17%³

Digital shift

88% of Australians see a role for technology in managing health, and 48% of providers believe its potential remains underutilised⁴

Existing pressures impact the ability to meet consumer needs

Private hospital oversupply

Private hospital bed utilisation has fallen from 86% in 2010 to c.64% in 2025⁵

Public system pressure

Emergency departments: 31% wait 8+ hours for a patient bed⁶
Elective surgery: 265-day median wait time for knee replacement⁷

Affordable care

A 4% annual rise in out-of-pocket costs will see Australians paying \$72 more than the median cost in 2023, with total costs projected to double by 2030⁸

Workforce challenges

Australia is short approximately 2,400 full-time equivalent (FTE) GPs as of 2025. This is projected to grow to 8,900 by 2048⁹

Australia's health transition

Four system shifts essential to drive the health transition

Traditional model

Treatment

Reactive and episodic care focused on treating illness

Hospital

Default, high-cost setting for treatment

Analogue

Paper based and face to face

Generic

One-size-fits-all approach

New focus

Prevention

Proactive and preventative care

Community

Shift to lower cost, quality community-based care models

Digital

Connected and technology enabled virtual first care models, supporting face to face consults

Personalised

Tailored care to each person's unique health profile

Global case studies in health

Andrew Wilson
Chief Medical Officer

Shift 1: from treatment to prevention

South Africa redefined primary care with prevention-focused teams and integrated screening

Case for change

Increased awareness and demand due to rising burden of long-term disease on public health

Shifts

Policy: Shifted away from a hospital-centric, curative model to strengthen cost-effective primary care

Funding reform: National Health Insurance (NHI) introduced a universal pool covering prevention, treatment, and rehabilitation, with funding share for primary care rising from 30% to 32% (2016–2021)¹

Technology: Leveraged digital tools (e.g. mHealth, telemedicine) for risk factor tracking and patient engagement that enables the shift toward prevention

Health outcomes

Life expectancy rose from ~54 to 66+ years (2006–2023)² through strong infectious disease and public health programs

Primary care strengthened via 3,500+ upgraded clinics with community outreach teams providing immunisation, antenatal care, and long-term disease monitoring

Lessons for Australia

- **Bridge funding** for transition from hospital-centric care toward prevention and community-based services to make prevention financially sustainable
- **Prevention care** embeds in community-based delivery model through primary health networks, primary care networks, and allied-health integration to address chronic disease prevention
- **Modern care delivery** with multi-disciplined teams (MDT), integrated screening, and digital enablers for proactive management

(1) Source: UNICEF – Budget brief series 2022. (2) Source: Macrotrends – South Africa Life Expectancy World Bank

Shift 2: from hospital to community

Singapore transitioned to community-based care, expanding telehealth and prevention-focused funding

Case for change

Rapidly ageing population (1 in 4 Singaporeans will be 65+ by 2030)¹ with strong preference for home-based care

Shifts

Policy: Recognised unsustainable hospital-centric system and launched *Three Beyonds* reform to expand community-based care

Funding reform: Shifted from fee-for-service to capitation model and A\$4b committed under *Age Well SG²* to expand subsidies for long-term care and ageing-in-place services

Technology: Leveraged telehealth, remote patient monitoring, and integrated health IT to extend care beyond hospitals, enabling ageing-in-place and seamless provider coordination

Health outcomes

Reduced hospital pressure through transition care and hospital-in-the-home models, allowing more patients to be supported in the community

Expanded community and preventive care with growing networks of clinics and hospitals under *Healthier Singapore* (>1m residents enrolled by 2025)³

Lessons for Australia

- **Shift toward blended payment models** that reward prevention and long-term care management
- **Integrated community care** with transitional, community, and hospital in the home services to reduce hospital demand
- Strengthen **digital integration and community infrastructure** to support ageing at home and proactive health engagement

(1) Source: MOH - Whitepaper on Healthier SG. (2) Source: MOH - Enhancing preventative health and aged care. (3) Source: BMC - Insights into Singapore's national strategy for primary care reform: physician attitudes, facilitators and barriers to healthier SG

Shift 3: from analogue to digital

Sweden integrated virtual care into the public system to enable equitable, scalable digital access

Case for change

Digitally literate population (90%)¹ and strong demand for convenience with COVID normalising telehealth

Shifts

Policy: Patient choice reforms allowed private digital providers (e.g. Kry) to bill public funds at a lower flat rate

Funding reform: National guidance to standardise pricing for digital consults and expanded value-based models to omni-channel digital providers

Technology: Universal e-prescriptions (nearly 100%)², and Bank ID enabled instant, secure script issuance and identity verification

Health outcomes

Expanded access and convenience as digital consults more than doubled, accounting for ~11% of GP appointments¹ (whilst digital-native clinic such as Kry is up to 50%)⁴, and delivering faster, high-satisfaction care

Improved efficiency and equity with more non-urgent and follow-up cases managed online, easing in-person demand³

Lessons for Australia

- **Digital foundations:** National roll out of e-scripts, My Health Record, and Digital ID to scale virtual care
- **Equitable access:** Align Medicare rebates so patient costs are consistent across digital and in-person visits
- **Sustainable funding:** Open public funding to private telehealth providers and grow value-based models that reward outcomes across care settings

(4) Kry presentation

Shift 4: from generic to personalised

UK is embedding genomics, data, and innovation into the NHS to deliver more personalised care

Case for change

Patients increasingly expect personalised, proactive care, with nearly half wanting more involvement in decisions

Shifts

Policy: The NHS Long Term Plan and *Universal Personalised Care*¹ framework embedded personalisation across diagnostics, treatment, prevention, and care management underpinned by Integrated Neighbourhood Teams health service model

Funding reform: Introduced innovation and value-based funding – from fast-tracking novel therapies to personalised care budgets that reward outcomes and patient-centred care

Technology: Advances in genomics, data, and digital infrastructure enabled routine sequencing, precision drugs, and personalised care

Health outcomes

Sequencing as part of routine care provided **actionable diagnoses** in ~18.5% of rare disease cases², guiding care and avoiding ineffective treatments

~110k people have Personal Health Budget (PHB) today³, and early evaluations showed **average annual savings of -£3,100 per person**³, alongside improved quality of life and reduced unplanned care use

Lessons for Australia

- **Embed personalised care as a standard practice** through team-based models and national policy integration
- **Align funding with outcomes** via consumer-direct budgets, value-based contracts, and access to precision therapies
- **Invest in digital and genomic care** to enable early diagnosis, tailored treatment, and better long-term care management

Technology's role in the health transition

Felicia Trewin

Group Lead – Data & Technology

Shift 1: from treatment to prevention

AI-driven diagnostics and predictive analytics enabling earlier risk detection and personalised insights

Technology themes

Early risk detection: AI could help identify emerging health risks before symptoms appear, enabling timely intervention

Personalised prevention: Data-driven analytics tailor programs to each patient to help prevent illness and disease progression

Seamless patient experience: Continuous data sharing enables coordinated, proactive care across the continuum

Thematic examples¹

OpenUp and iPractice collaborate to form a continuum between preventive support and clinical care. Through this model, individuals transitioning out of treatment can often be granted (or may be eligible for) a period of OpenUp access to help maintain gains and reduce relapse risk. The partnership leverages outcome tracking, usage data, and personalised insights to inform follow-up support, enabling earlier intervention when warning signs emerge and smoothing the shift from recovery to long-term mental wellness

Everlab combines advanced diagnostics with AI analysis to detect early disease markers and deliver clinician-guided prevention plans

(1) All examples referenced here are thematic illustrations drawn from publicly available information sources (e.g. company websites). Medibank has no formal affiliation or commercial relationship with the entities mentioned, with the exception of *Heidi*, which is part of our partnership ecosystem. Medibank is not endorsing nor recommending any entity, system, or platform referenced in this slide

Shift 2: from hospital to community

Edge computing, smart home systems, and wearable biosensors supporting real-time monitoring, early intervention, and safe ageing-in-place

Technology themes

Personalised care: Data from home sensors and wearables create individual baselines, allowing care teams to tailor interventions and empower patients to self-manage in-home health requirements

Resource efficiency: Centralised monitoring and smart alerts reduce unnecessary in-person visits, freeing hospital capacity and easing clinician workload

Empowering patients to remain in home: Smart environments promote independence with remote care monitoring, shifting care delivery confidently from hospitals to the home

Thematic examples¹

SHINESeniors program uses smart home sensors to track seniors' daily activity and automatically alert caregivers when risk patterns change, enabling early detection of health decline and supporting ageing-in-place through timely community intervention

HartWacht is a remote cardiac monitoring program in which patients measure blood pressure, ECG, and rhythm at home via a compact device and mobile app. Data is reviewed centrally, and only flagged anomalies are escalated to cardiologists – enabling early intervention and reducing unnecessary in-clinic visits

(1) All examples referenced here are thematic illustrations drawn from publicly available information sources (e.g. company websites) Medibank has no formal affiliation or commercial relationship with the entities mentioned, with the exception of *Heidi*, which is part of our partnership ecosystem Medibank is not endorsing nor recommending any entity, system, or platform referenced in this slide

Shift 3: from analogue to digital

Digital identity, interoperable health data, virtual assistants, and ambient AI enabling secure, intelligent, and connected care

Technology themes

Seamless data flow: Unified digital identity and Fast Healthcare Interoperability Resources (FHIR)-enabled interoperability give clinicians instant, secure access to patient histories - improving care coordination and reducing duplication

Connected care: Real-time data sharing and augmented reality/ virtual reality consultations enable coordinated, continuous care across hospitals and community settings

Streamlined automation: Real-time transcription and documentation reduce clinician workload, cut administrative errors, and allow more face-to-face care, improving both clinical accuracy and patient experience

Thematic examples¹

RHAPSODY

Rhapsody provides a platform that connects different healthcare systems so patient data can flow seamlessly between hospitals, clinics, and digital apps, enabling faster, safer, and more coordinated care

heidi

Heidi Health provides AI tools that automate clinical documentation and streamline workflows for clinicians – reducing admin burden and freeing up time for patient care

(1) All examples referenced here are thematic illustrations drawn from publicly available information sources (e.g. company websites). Medibank has no formal affiliation or commercial relationship with the entities mentioned, with the exception of *Heidi*, which is part of our partnership ecosystem. Medibank is not endorsing nor recommending any entity, system, or platform referenced in this slide

Shift 4: from generic to personalised

Advances in genomics, pharmacogenomics, and digital triage enabling precision medicine and orchestrated, individualised interventions

Technology themes

Data-driven precision care: Digital triage and orchestration tools integrate clinical and genetic data to guide patients to the right care early and enable truly personalised treatment pathways

Proactive risk prevention: Gene testing identifies inherited risks, supporting earlier screening and targeted lifestyle or medical interventions

Personalised prescribing: Pharmacogenomic insights match the right drug and dose to each patient, improving efficacy and reducing adverse reactions

Thematic examples¹

Clinical Architecture together with ProgressRx (developed under the NHS) translates genetic testing into actionable prescribing guidance. It helps general practitioners tailor medications based on patients' individual genetic profiles, with the goal of reducing adverse drug reactions and improving treatment safety and efficacy

Ochre Bio uses genomics and AI to develop precision RNA therapies that aim to improve liver health and prevent disease progression before transplantation is needed

(1) All examples referenced here are thematic illustrations drawn from publicly available information sources (e.g. company websites). Medibank has no formal affiliation or commercial relationship with the entities mentioned, with the exception of *Heidi*, which is part of our partnership ecosystem. Medibank is not endorsing nor recommending any entity, system, or platform referenced in this slide

Data, digital & technology
Integrating in-clinic, home and virtual settings with streamlined experience

Australia's health system is world leading but under pressure

- Rising demand from ageing population, chronic disease, and mental health needs
- Misaligned capacity and lack of innovation drives inefficiencies and rising costs

Four system shifts that are essential to drive the health transition

- From treatment to prevention, hospital to community, analogue to digital, and generic to personalised care
- Shifts unlock opportunities for growth of lower-cost, technology-enabled quality health and wellbeing services

Global evidence indicates these shifts deliver results

- South Africa, Singapore, Sweden, and the UK demonstrate measurable outcomes
- Funding reforms and integrated models underpin success internationally

Technology is an accelerator of change

- AI, remote patient monitoring, and end-to-end digital health platforms enable scalable, connected care
- Virtual-first models improve access, efficiency, and clinician productivity

Medibank is positioned to lead and continue to grow as a health company

- Focused on four health segments that support each other to deliver greater customer value and long-term growth
- Established capability and clinical expertise create a foundation for growth
- Aiming to create customer and shareholder value, strengthen our business and drive meaningful change in health

Wellbeing

Milosh Milisavljevic

Group Lead – Chief Customer Officer

Wellbeing overview

We are well positioned across multiple high potential segments

Segment opportunity

- Total FY25 segment size: \$113b (\$31b in Everyday Wellbeing, \$1.3b in Corporate Health and \$80b in Financial Wellbeing)¹
- Segment opportunity increasing due to growing demand for:
 - **Health and wellbeing solutions** (inc. everyday wellbeing) driven by rising prevalence of chronic conditions²
 - **Tailored workplace health solutions**, driven by productivity pressures and new psychosocial safety requirements
 - **Multi-category insurers** driven by customers seeking greater convenience, simplicity, and value (e.g. bundles and discounts)

Estimated opportunity size in wellbeing³ \$b

% Estimated FY25-30 CAGR

Everyday Wellbeing⁴

Corporate Health

Financial Wellbeing⁵

Strategic fit

Builds frequent, meaningful engagement across our customers' health journey

Strengthens differentiation through multi-category offerings

Drives retention through greater value to PHI and corporate customers

Proactively addresses rising health care costs

Creates new earnings streams and synergy-driven growth

Our strengths

Strong and trusted brands

Large and engaged PHI customer base

Large corporate base

Demonstrated ability to launch and scale rapidly

Track record of delivering leading customer value propositions in multiple wellbeing categories

(1) Calculated from IBISWorld reports and internal analysis (2) Source: ABS, National Health Survey 2023. (3) Opportunity size = portion of the total segment that can be served by our products and services, adjusted to reflect MPL's projected customer reach, calculated from IBISWorld reports and internal analysis (4) The Everyday Wellbeing opportunity size only includes verticals where MPL actively participates: H&W products, Wellbeing Guidance and primary prevention. Exclude fitness, gym and lifestyle (5) Financial wellbeing opportunity size only considers commission revenues, estimated using individual product commission rates weighted by market product mix

Our current wellbeing offering

Supporting healthier lives through everyday wellbeing, workplace solutions and financial wellbeing

Everyday wellbeing

Live Better is one of the largest health and wellbeing rewards programs in Australia

Using the Live Better app, Medibank customers can:

- **Gain personalised health insights** via assessments that identify individual health needs and risk factors
- **Track daily healthy habits** like movement, nutrition, and mindfulness
- **Earn Live Better points** by staying engaged in wellbeing activities (incl. engaging with partners)
- **Redeem points for rewards** to encourage lasting healthy behaviour (incl. through a marketplace of partners)
- **Access everyday prevention programs** for a range of issues (e.g. back pain, sleep, stress problems, gut health)

Corporate health

Corporate Health Cover

Health & Wellbeing Strategy

Workplace Health Services

Medibank Workplace Wellbeing complements our corporate PHI offerings with integrated and tailored health and wellbeing solutions for organisations

Through Medibank Workplace Wellbeing, organisations can access:

- **Data led insights** to inform tailored health and wellbeing strategies and programs delivery
- **Health services and programs** including EAP, virtual GP, and workforce health insights
- **Preventative services** such as onsite and virtual health checks, skin checks, flu vaccinations, and expert-led sessions

Financial wellbeing

10% off ahm travel insurance

From unwinding by a pool or seeking adventure on the slopes, ahm has cover options to suit different types.

(1) Everyday prevention enrolments: Enrolments in self-paced digital health programs supporting prevention, recovery, and wellbeing across physical, mental, and chronic health needs

We're building a connected wellbeing ecosystem that not only strengthens our core business, but is a major platform for growth

- Extends relevance beyond PHI through everyday wellbeing, workplace solutions, and financial wellbeing
- Strong foundations already driving engagement, retention, and new revenue streams
- Demonstrates value of our core platforms, beyond traditional wellbeing and loyalty

Wellbeing is a large and growing segment where Medibank has demonstrated strong foundations and growth, with upside both in the customer base and beyond this

- Large and growing segment, with the prevalence of chronic conditions, workplace health expectations and consumer preference for choice and convenience driving demand
- Our trusted brand, scale, and proven capability to launch and scale rapidly underpin our ability to win

Clear roadmap to amplify growth and deepen customer value

- Evolve Live Better into a full marketplace and expand access beyond PHI customers
- Scale workplace health solutions through integrated propositions and reimagined EAP
- Activate corporate clients with bespoke B2C financial wellbeing offers and reposition ahm as a multi-category provider of insurance products

We aim to transform how Australians experience and engage with health and wellbeing

- Create simpler, more connected experiences that make health and wellbeing part of everyday life
- Enable personalised, proactive support that meets people where they are – at home, at work, and in the community

Amplar Health

Primary care

Robert Read

Group Lead – Amplar Health

Primary care overview

Large segment with growing demand for prevention and proactive, personalised care

Segment opportunity

- FY25 primary care segment size: c.\$70b¹
- Strong segment opportunity due to growing demand for:
 - **General practice**, the most utilised primary care service. c.84% population saw a GP in FY24; \$12.2b spent on 163m Medicare consults in FY25¹
 - **GP services** skewed towards older demographic 85+ average 17 visits per annum versus 3.5 average visits per annum for teens¹
 - Out-of-pockets increased 4.6% in the last 12 months²
 - **Consumer trends** driving demand for **prevention** and **convenient access** outside of the clinic
 - **Government reforms** will expand access, promote multidisciplinary care teams and develop health data infrastructure

Estimated opportunity size in primary care (\$b)

% Estimated FY25-30 CAGR

General practice³

Clinical prevention⁴

Strategic fit

Scale to shape the gateway into the health system

Focus on proactive and preventative health

Preference for 24/7 virtual access from trusted provider

High volume of consumers engaged in health

Creates new earnings streams

Our strengths

Trusted brands

Established national clinic footprint

Trusted partnerships in health

2,000+ multidisciplinary health professionals

Virtual care coordination and delivery

Delivering customer value

- **Proactive health checks and prevention** programs to identify risks early and help keep people well
- **Eases pressure on government and the health system** through earlier identification and better health experiences
- **Embedded in general practice** and community services to build a resilient, proactive system

- **24/7 access for eligible customers** via channels that match their preferences
- **Multi-channel offerings** including virtual and in-clinic health interactions, enabling consumers to maintain contact with their GP
- **Continuity of care is vital** for managing chronic conditions and preventing hospitalisations

- **One of Australia's largest networks** across GPs, nurses, psychologists, physiotherapists and allied health
- **National scale** with +2,000 health professionals across 105 clinics
- Allows health professionals to work to their **top of scope of practice**, improving care delivery and workforce satisfaction

Synergies

- **Supports customer retention** by offering comprehensive healthcare services that go beyond traditional PHI
- **Grows lifetime customer value** by extending cover touchpoints beyond PHI into integrated primary care delivered in the community
- **Aim to deliver better health experiences** and reduce avoidable hospital admissions – keeping customers well at lower costs

(1) Clinical prevention services include clinician-led health checks and preventative programs (e.g. Better Knee, Better Me, Better Hip). (2) Virtual health interactions include health concierge and 24/7 nursing and mental health triage

Opportunities to accelerate growth

We have a clear strategy to deliver greater customer value and long-term growth

Strategy pillars	Clinical prevention	Multi-channel offerings	Multidisciplinary teams															
Objective	Grow proactive health	Increase proportion of virtual consults	Localise capability across the care continuum															
Opportunities	<ul style="list-style-type: none"> • Strengthen customer health navigation and coordination for better patient journeys • Launch personalised programs and services for prevention and mental health • Design and roll out integrated propositions to attract and retain Medibank and ahm customers and non-customers • Scale national network through organic and inorganic growth 	<ul style="list-style-type: none"> • Implement integrated care pathways combining digital, in-clinic and in-home services • Continuity of customer experience across triage, navigation, and virtual consults • Deploy workflow tools and analytics to enable data-driven decision-making for clinicians working at top of scope of practice • Integrate digital and physical channels to enable connected care across longitudinal relationships 	<ul style="list-style-type: none"> • With GP as a gateway, scale treatment pathways across the care continuum, delivering physical and mental healthcare virtually and in-person, in the convenience of the consumer's home • Expand access to programs for health promotion, disease prevention, and proactive, personalised care models supported by multidisciplinary Ampliar Health Locals teams • Build trust through local presence making care more accessible and relevant

(1) Clinical prevention services include clinician-led health checks and preventative programs (e.g. Better Knee, Better Me, Better Hip)

‘Staying better’ starts with accessible, affordable and proactive primary care

- Building Australia’s leading multi-channel, multidisciplinary primary care network, targeting 7m GP consults per annum in FY28
- Accelerating the shift from episodic, condition-focused care to personalised interventions in clinical prevention, delivered in-clinic, in-home and 24/7 from virtual / digital channels

Connecting multi-channels to a continuum of care across acuity

- Meeting customer preference for choice and control with access, advice and support across channels
- With general practice as a gateway, establishing multidisciplinary pathways from prevention to palliation, delivered virtually or in-person, across physical and mental programs, in-clinic and in-home

National scale delivering a localised experience

- Designing digital capabilities for a seamless, localised consumer experience and more efficient clinical workflows and systems
- Embedding multidisciplinary teams within local communities (Amplar Health Locals) to make care feel more familiar, accessible and relevant

Driving system reform

- Funding innovative pilots and personalised models of care, with robust evaluation
- Partnering with funders and governments to help shape the future of general practice and primary care

Morning tea break

Community and acute

Robert Read

Group Lead – Amplar Health

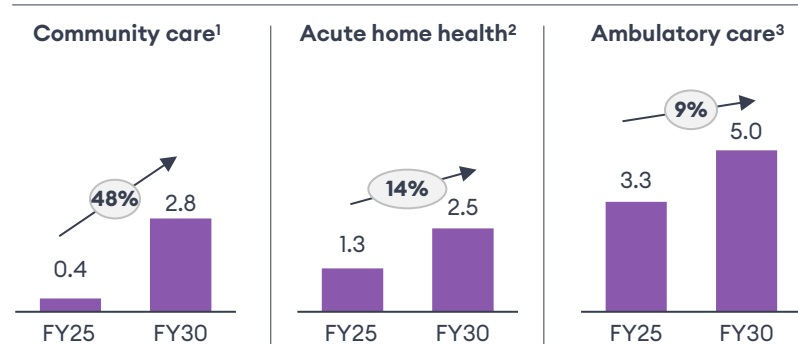

Community and acute overview

The chronic disease burden is accelerating demand beyond the health system's scalable capacity

Segment opportunity

- Total FY25 segment size: \$0.4b community¹, \$1.3b acute home health², \$3.3b ambulatory care³
- Demand drivers:
 - **High growth cohorts:** 60k-80k Australians turning 80 each year for the next two decades – 3x historic average⁴
 - **Chronic disease and ageing:** c.40% of health spend by Australians 65+, projected to reach \$270b by 2035⁴
 - **Capacity pressure:** Hospital and aged care bed constraints create opportunity for safe, higher acuity care at home, aligned to consumers preference
 - **Funding models under reform** supporting out-of-hospital care

Estimated opportunity size in community and acute \$b % Estimated FY25-30 CAGR

Strategic fit

National platform to accelerate health transition (virtual, in-home)

Differentiated value proposition for 65+ population

Creates new earnings streams across public commissioning and PHI

Focus on preventative health to reduce avoidable admissions

Our strengths

Established credibility in delivering government services

National network of allied nurses

Innovation and incubation of new health services

Virtual delivery platform

Trusted partnerships in health

(1) Estimated expenditure using sources: Portfolio budget statements 2025-26 (clinical service funding), Support at home program handbook 2024; AIHW: Private hospital spending by funding source and internal analysis. (2) Estimated expenditure using sources: Support at home program handbook 2024; Medical Journal of Australia, Hospital in the home 2020; AIHW: Private hospital spending by funding source. Our progress and our strengths

Easing persistent hospital capacity constraints on beds and workforce with personalised care models delivered closer to home

	Community care	Acute home health	Ambulatory care
	FY23-25 CAGR		FY23-25 CAGR
FY25 key results	107k visits¹ 17%	24k admissions² 13%	7 operational ambulatory care centres⁴ +5
Delivering customer value	<ul style="list-style-type: none"> • Delivering 24/7 virtual nursing for early intervention, advice, care planning and prescribing by virtual nurse practitioners • Establishing high acuity homecare delivered in consumer's home and funded by Commonwealth • Early intervention via remote patient monitoring and virtual nurse access, reducing unplanned hospital admissions • Supporting preventative models– medication management, chronic conditions, e.g. COPD, diabetes, and heart failure 	<ul style="list-style-type: none"> • Hospital-level care at home with 24/7 remote patient monitoring, a virtual control centre and in-home specialised clinical teams • First of its kind standalone healthcare service to achieve national accreditation under National Safety and Quality Health Service (NSQHS) Standards • Transitioning from high acuity settings into hotels (24/7 transition care) or directly to home to alleviate public hospital bed block 	<ul style="list-style-type: none"> • Enabling consumers to return home sooner – short stay mental health and surgical models of care to catalyse adoption of these models by other hospitals • Providing choice for consumers and a better patient experience compared with traditional in-hospital feedback • Demonstrating innovative no out-of-pocket cost models where applicable
Synergies	<ul style="list-style-type: none"> • 177,000 hospital bed days saved³ in FY25 • National footprint expansion via three new Ambulatory care centres, accelerating the shift towards innovative models of care • Reduction in emergency department presentations and unplanned hospital admissions through bedside point of care solutions for residents in residential aged care homes 		

(1) Community care visits include nursing and allied health visits in the home. (2) Acute home health admissions includes private and publicly funded hospital and rehab in the home services. (3) Bed days saved through Medibank clinician-led homecare programs delivered by or for Medibank and Amplat Health. (4) as at 30 June 2025

Opportunities to accelerate growth

Accelerating funder, patient and specialist preferences toward care delivered in the community and the home

Strategy pillars	Community care	Acute home health	Ambulatory care												
Objective	Improve proactive and personalised care into the home	Increase the volume of high acuity care delivered outside hospitals	Shorten length of hospital stays ¹												
Opportunities	<ul style="list-style-type: none"> • Integrate wearable devices and sensors with predictive analytics to trigger tailored interventions • Segment populations by location, condition, risk level, and social determinants to personalise care pathways and align in-home workforce capacity • Upskill community health workers, nurses, and allied health professionals in chronic disease management and digital tools • Support flexible roles and career pathways to retain talent in community settings • Scale clinical homecare nationally with local teams 	<ul style="list-style-type: none"> • Continue to expand beyond the current 200+ DRGs/ conditions delivered under the Amplar Health Home Hospital • Enhance interoperability between hospital, primary care, and community systems • Deploy real-time patient monitoring with AI alerts, and secure communication platforms • Create flexible staffing models for mobile care teams and virtual consults • Work with State governments to permanently fund new models of care delivered closer to home 	<ul style="list-style-type: none"> • Tailor care pathways based on acuity, comorbidities, and social support • Shift suitable acute care episodes (e.g. infusions, wound care, diagnostics) from inpatient to ambulatory settings • Equip consumers with education and digital tools to self-manage outside of hospital • Use patient reported outcomes to personalise ambulatory plans 												
FY25-28 milestones	<table border="1"> <thead> <tr> <th></th> <th>From</th> <th>To</th> </tr> </thead> <tbody> <tr> <td>Community care visits c. 45% growth in the number of visits across Amplar Health network</td> <td>107k</td> <td>155k</td> </tr> </tbody> </table>		From	To	Community care visits c. 45% growth in the number of visits across Amplar Health network	107k	155k	<table border="1"> <thead> <tr> <th></th> <th>From</th> <th>To</th> </tr> </thead> <tbody> <tr> <td>Acute home health admissions² c. 12% increase in number of admissions, not including opportunities with other funders</td> <td>24k</td> <td>>27k</td> </tr> </tbody> </table>		From	To	Acute home health admissions² c. 12% increase in number of admissions, not including opportunities with other funders	24k	>27k	<p>Joint venture hospital investments to break even in FY28³</p>
	From	To													
Community care visits c. 45% growth in the number of visits across Amplar Health network	107k	155k													
	From	To													
Acute home health admissions² c. 12% increase in number of admissions, not including opportunities with other funders	24k	>27k													

(1) Where clinically appropriate. (2) Acute home health admissions includes private and publicly funded hospital and rehab in the home services. (3) This milestone refers to joint venture hospital investments held at 29 October 2025

'Getting better' starts with our personalised models of care delivered virtually and in people's home

- Acute care delivered virtually in a hotel or the customer's home, with high NPS and a reduction in public hospital bed block
- In-patient mental health and surgical care, that support patients in the community, improving patient experiences and reducing readmissions

Scaling across the continuum of care

- Expanding multi-channel referral pathways and multidisciplinary treatment pathways across the acuity continuum
- Rapidly scaling acute care in the home, as public hospitals have increasingly insufficient capacity to meet demand from the chronic disease profile of an ageing population

Integrated data flows and analytics to enable clinical care at home

- Building our health data and digital capabilities to support improved clinical decision making, quality and consistency
- Deploying remote patient monitoring to enable our clinicians to monitor patients at home remotely, in real time

Demonstrating pathways to blend funding models

- Partnering across Federal, State and private health insurance funders to accelerate the health transition with innovative models of care at scale

Investing in this segment is accelerating the health transition to more sustainable community-based models of care at scale

Creating shareholder value

Mark Rogers

Group Lead – Chief Financial Officer and Group Strategy

Value creation opportunity

We see value creation opportunities across three separate, but interconnected lenses

Grow Medibank health earnings

+

Strengthen our business

+

Transform health

=

Value creation

- Strong growth prospects across all segments
 - Provide more services to meet more needs of Medibank customers
 - Participation in segments with typically less government and regulatory intervention than PHI
 - Capital light organic growth
-
- Drive our differentiation strategy – supporting PHI customer growth
 - Proactively address rising health costs by supporting:
 - Reduced claims incidence due to better chronic disease management
 - Manages claims complexity by reducing disease progression
 - Lower healthcare costs through a shift to lower cost, personalised care settings
 - Enable health services across the continuum of care
-
- Drive change to strengthen Australia’s public and private systems
 - Change results in broader opportunities for services to the public
 - Support a resource constrained system

Value drivers of Medibank Health

Earnings growth are driven by customer growth with cost benefits from scale, efficiency and innovation

(1) Wellbeing includes Financial Wellbeing commissions which have a 100% gross margin. (2) Everyday prevention enrolments: Enrolments in self-paced digital health programs supporting prevention, recovery, and wellbeing across physical, mental, and chronic health needs (3) Clinical prevention services include clinician-led health checks and preventative programs (e.g. Better Knee, Better Me, Better Hip). (4) Virtual health interactions include health concierge and 24/7 nursing and mental health triage. (5) Community care visits include nursing and allied health visits in the home. (6) Acute home health admissions includes private and publicly funded hospital and rehab in the home services. (6) MPL customers receiving no gap total joint replacements procedures as a proportion of all total joint replacement procedures

Aiming to grow Medibank Health earnings to at least \$200m by FY30

We expect to grow organically and inorganically and execute with strong capital discipline

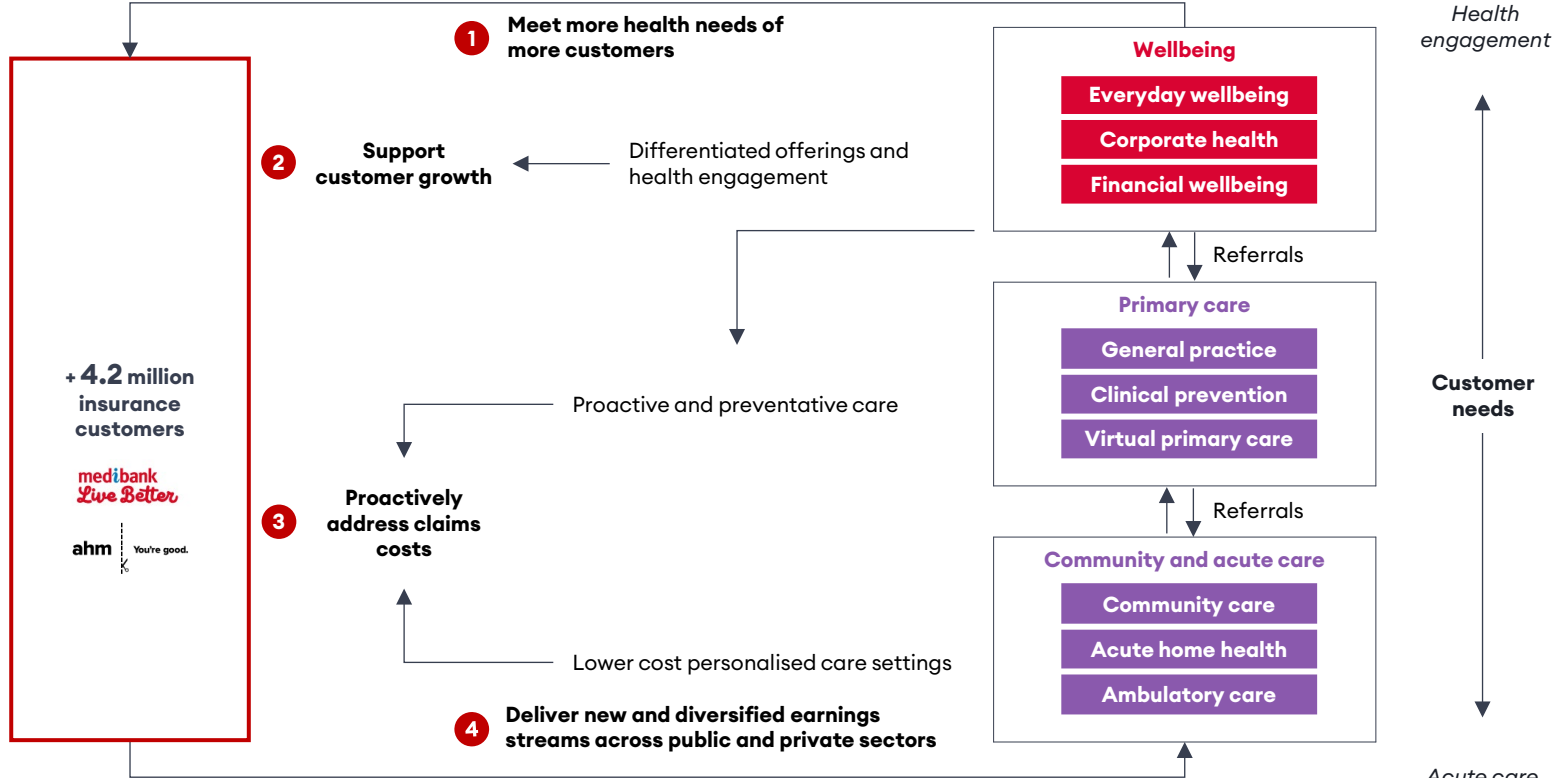

Growth potential	Organic	<ul style="list-style-type: none"> Focus on volume growth, new products and services Diversifying sources of funding including across private and public funders
	Inorganic (M&A and partnerships)	<ul style="list-style-type: none"> Target investment that add scale, capability and expand geographic coverage Accelerate and reduce risk in execution Current areas of focus include expanding primary care footprint and virtual capabilities ,and broadening participation in corporate health
	Synergies	<ul style="list-style-type: none"> Support customer growth and address claims costs Meet more customer health needs and deliver diversified and new earnings streams
Capital discipline		<ul style="list-style-type: none"> Deliver an appropriate standalone return on capital and synergies to the business Capital employed of c.\$450m expected to grow to c.\$700m¹ by FY30 Capacity and willingness to deploy additional unallocated and Tier 2 capital Further investment to accelerate delivery and uplift aspirations
ROIC		<ul style="list-style-type: none"> Current Medibank Health ROIC of c.10% (vs. 8.5% cost of capital)² Significant ROIC uplift opportunity from achieving Medibank Health earnings aspirations

(1) Includes \$150m - \$250m FY24-26 M&A target. (2) ROIC and cost of capital are presented on a post-tax basis and net of non-controlling interests

Synergies create a stronger and more resilient business

Bi-directional opportunities between health and private health insurance¹

Grow earnings +
 Strengthen our business +
 Transform health = Value creation

⁽¹⁾ Referrals by health practitioners are based on clinical judgment. Ampliar Health services a range of customers and funders. Medibank also engages with a broad network of healthcare providers

Examples of value creation opportunities

Supporting the delivery incremental PHI value of c. 5% of current PHI operating profit by FY30

	Live Better	Homecare	Prevention
FY25 - FY28 Milestone	Live Better rewards participants increasing from 0.9m to 1.2m	Acute Home Health ³ enrolments increasing from 24k to 27k	Clinical prevention services increasing from 33k to 45k
Time horizon	Current (FY25+)	Emerging (FY27+)	Long-term (FY30+)
Synergy benefits – today’s examples	<p>PHI lapse rate reduction: c25% improvement in lapse rate¹</p> <p>PHI joins increase: 6% annual increase in overall Medibank joins</p>	<p>Cost per admission reduction: \$5.2k saved per enrolment (average in-hospital care costs \$9k compared to \$3.8k for homecare)⁴</p> <p>Bed days saved: 86k bed days saved</p>	<p>Reduced hospital admissions and elective surgeries decreasing hospital benefit outlay by \$2k per person (net savings are then lower based on the cost to deliver the program)⁶</p> <p>Bed days saved: 57k bed days saved</p>
FY30 incremental earnings benefit	c. \$6.2m	c. \$8.7m	c. \$6m - \$7.5m
Customer value	Redemption value of our highly engaged redeemers: \$650²	Customer savings from at home care: \$520⁵	Value of prevention services and avoided out of pockets: \$4.6K⁷

(1) For engaged Live Better members. (2) Redemptions value our 10k highest redeeming members. (3) All homecare enrolments which include Medibank, ahm and other funders. Average for RITH and HITH. Overall savings are only realised if it is a substitutive visit (as in it replaces existing hospital care). (4) A portion of these admissions are additive vs substitutive reducing the overall saving. (5) Based on hospital out of pockets saved plus travel costs. (6) Subset of prevention programs used for illustrative impact: CareFirst, Care Point, Better Knee Better Me, Type 2 Diabetes. (7) Includes costs of prevention services and avoided surgery out of pockets

Our ambitions in health play a key role as we aspire to grow PHI market share to at least 26.8% by FY30 and we are prepared to invest further in our PHI business to increase this aspiration where this makes commercial sense

We see value creation opportunities in health across three separate, but connected lenses

We aim to grow Medibank Health earnings to at least \$200m by FY30 through a combination of organic and inorganic growth

We remain disciplined in capital allocation, with capital employed in Medibank Health expected to increase to c. \$700m, and we have the willingness and capacity to invest further to increase our earnings aspiration

We are focused on differentiation by increasing our role in our customers' health and driving the health transition, positioning us to deliver incremental PHI value of c. 5% of current PHI operating profit by FY30

Accelerating Australia's health transition

David Koczkar
Chief Executive Officer

Strategic shifts for better health

Health transition

From treatment to prevention

From hospital to community

From analogue to digital

From generic to personalised

Shared ambition

Increased health productivity

Improved health equity

Customer health outcomes

Better provider experience

Better patient experiences

Medibank: a growing and differentiated health company

Empowering our teams to create the best health and wellbeing for Australia

Deepening relationships with customers

- Deliver exceptional customer experience
- Personalised service via community hubs
- Technology and AI enablement
- Strong risk management and governance

Delivering more value, choice and control

- Differentiated products and services
- Empower customers to manage their health
- Greater options for when and where customers receive care

Supporting whole of health needs

- Proactive and personalised
- Platform connecting consumer needs with health services
- Tailored across the customer lifecycle

Driving change in the health system

- Focus on better ways of providing care
- Investments catalyse change
- Partnerships foster innovation and drive wide uptake
- Advocate for reform to sustain the system

Drives shareholder value by:

Supporting customer growth

Proactively addressing claims costs

Meeting more health needs of more customers

Delivering new and diversified earnings streams

Creating a stronger and more resilient business

Sustainable growth

Setting new ambitions as we accelerate growth

Medibank is positioned to lead and continue to grow as a health company

This means we aim to:

Grow earnings

Strengthen our business

Transform health

enabling shareholder value creation

FY30 aspirations

Empowered by Australia's healthiest workplace

Medibank Health earnings

Medibank aims to significantly increase Medibank Health segment earnings

From: **\$76.7m** (FY25)
To: **> \$200m**

Resident PHI market share

Medibank aims to grow policyholder market share each year in a disciplined way

From: **26.5%** (FY25)
To: **> 26.8%**

Health engagement

Medibank aims to double the number of people we engage with in their health and wellbeing

From: **c. 5m** (FY25)
To: **c. 10m**

Australia's health system faces growing complexity which requires meaningful system-wide transformation

We're well positioned to lead this transition — backed by a clear strategy, deep capability, and a strong capital position

We have strong foundations across growing segments in health

Our strategy delivers value creation by growing earnings, strengthening our core business and transforming health

We have a shared ambition to deliver customer health outcomes by focusing on four key pillars — increased health productivity, improved health equity, better provider experience, and better patient experiences

General & Summary Information

The information contained in this presentation is general information about Medibank Private Limited (“MPL”) and / or its related bodies corporate (together, “MPL Group”) and their activities current as at the date of the presentation. The information is given in summary form and does not purport to be complete. It is intended to be read in conjunction with the verbal presentation delivered on the date of the presentation and MPL’s other periodic and continuous disclosure announcements lodged with the ASX or released on MPL’s website, including without limitation its Appendix 4E and Financial Report for the financial year ended 30 June 2025 and its Annual Report 2025, which are available at www.medibank.com.au.

Not advice

The information contained in this presentation is not investment, legal, tax or other advice and has been prepared without taking into account the investment objectives, financial situation or particular needs of any particular person. You should make your own assessment and seek independent professional advice in connection with any investment decision. Past performance information in this presentation is given for illustrative purposes only. It is not, and should not be relied upon as, an indication of future performance.

To the extent permitted by law, no responsibility for any loss arising in any way from anyone acting or refraining from acting as a result of this information is accepted by MPL or any of its related bodies corporate. No representation or warranty, express or implied, is made by any person, including MPL, and its related bodies corporate, their respective directors, officers, employees, professional advisors and agents (“Related Parties”) as to the fairness, accuracy, completeness, reliability or correctness of the information, opinions and conclusions contained in this presentation, including any forward-looking statements.

Forward-looking statements

This presentation contains certain forward-looking statements with respect to the financial condition, results of operations and business of the MPL Group and certain plans and objectives of the management of MPL. Forward-looking statements can be identified by the use of forward-looking terminology, including without limitation the terms “believes”, “estimates”, “anticipates”, “expects”, “predicts”, “intends”, “plans”, “goals”, “targets”, “aims”, “outlook”, “aspiration”, “guidance”, “forecasts”, “continue”, “may”, “will”, “would”, “could” or “should” or, in each case, their negative or other variations or comparable terminology. Statements about market and industry trends are also forward-looking statements.

These forward-looking statements are provided as a general guide only and are not guarantees or predictions of future performance. They are based on information, expectations and assumptions known to MPL as at the date of this presentation regarding MPL’s present and future business strategies and the future political, regulatory and economic environment in which MPL will operate.

MPL believes the expectations reflected in these forward-looking statements are reasonable as at the date of this presentation, but acknowledge they involve known and unknown risks, uncertainties and other factors, many of which are beyond the control of MPL, which may cause the actual results or performance of MPL to be materially different from the results or performance expressed or implied by such forward-looking statements. These factors include general economic conditions in Australia, exchange rates, the market environment in which MPL operates and inherent regulatory risks in MPL’s business, and those set out on slides 3, 7, 25, 28, 32, 34, 35, 38, 40, 43-48 and 52.

You are therefore cautioned not to place undue reliance on any forward-looking statements regarding our belief, intent or expectations with respect to the MPL Group’s businesses, market conditions and/or results of operations.

No representation or warranty is made by any legal or natural person in relation to the accuracy, likelihood of achievement or reasonableness of any of these forward-looking statements, forecasts, prospects or results (express or implied). MPL and its Related Parties assume no obligation to update any forward-looking statement and to the full extent permitted by law, MPL and its Related Parties disclaim any obligation or undertaking to release any updates or revisions to information to reflect any change in any of the information contained in this presentation (including but not limited to any assumptions or expectations set out in the presentation).

Financial data and rounding

Unless stated otherwise, all figures in the presentation are in Australian dollars. Some figures, amounts, percentages, estimates, calculations of value and fractions are subject to rounding. Accordingly, the actual calculations of these figures may differ from figures set out in this presentation. Further, some balances subject to rounding may not add consistently throughout this presentation.

No offer or sale

The distribution of this presentation, including in jurisdictions outside Australia, may be restricted by law. Any person who receives this presentation must seek advice on and observe any such restrictions. Nothing in this presentation constitutes an offer or invitation to issue or sell securities, or a recommendation to subscribe for or acquire securities, by or on behalf of MPL, its related bodies corporate or any other person in any jurisdiction including where it is unlawful to do so. This presentation is not and does not constitute an offer to sell or the solicitation, invitation or recommendation to purchase any securities in the United States and neither this presentation nor anything contained herein shall form the basis of any contract or commitment. This presentation may not be distributed or released, directly or indirectly, in the United States.

Abbreviations and acronyms used throughout the presentation may be found in the glossary.

Glossary

Term	Definition
Acute home health	Short-term clinical care delivered at or closer to home under medical or clinical governance (e.g. hospital in the home), including monitoring, nursing, allied health, with defined escalation pathways
AI	Artificial intelligence
Ambulatory care	Same-day clinical services delivered in outpatient or community settings (including telehealth), like specialist consultations, diagnostics, infusions, and minor procedures
Amplar Health network	Network of services provided by either Amplar Health or Myhealth. Includes primary care, prevention, virtual health, homecare and hospital services
APRA	Australian Prudential Regulation Authority
Bed days saved	The number of treatments delivered during an episode of care, representing days that would otherwise require a hospital bed. Applies to eligible patients, regardless of Medibank membership
bps	Basis points (1.0% = 100 bps)
CAGR	Compound annual growth rate
Clinical prevention services	Clinician-led services designed to help assess risk and manage health conditions. Includes health checks, screening, immunisation, risk-factor management and evidence-based preventative programs. Excludes acute care services. Eligibility criteria may apply.
Community Care	Non-hospital health and support services delivered in community settings (home, clinic, local facilities), to maintain health and independence and prevent hospitalisation, including nursing, allied health, personal care and coordination
Everyday prevention enrolments	Self-paced digital health programs supporting prevention, recovery, and wellbeing across physical, mental, and chronic health needs
Financial wellbeing policies	Financial Wellbeing policies include car and home insurance, income protection and life insurance, pet insurance and travel insurance
FY	Financial year ended/ending 30 June
Health engagement	Health engagement includes services such as Live Better rewards and health services such as homecare, no gap, clinician-led prevention programs and virtual health
Health Insurance	Includes both resident and non-resident

Term	Definition
JV	Joint venture
Live Better or Live Better rewards program	A Medibank program to inspire people to lead a healthier and happier lifestyle, with tools and rewards (for eligible members) to motivate people
MBS	Medicare benefits schedule
MER	Management expense ratio. Calculated as management expenses divided by revenue
Multidisciplinary care	Coordinated healthcare delivery approach involving professionals from multiple clinical disciplines who collectively contribute to the assessment, planning, and management of patient care
PHI	Private health insurance
M&A	Mergers and acquisitions
Non-resident PHI	Overseas visitor, working visa and student health covers
OECD	Organisation for Economic Co-operation and Development
Policyholder	The primary person who is insured under a private health insurance policy (other than in relation to overseas students or visitors), who is not a dependent child, and who is responsible for paying the premium
Resident PHI	Hospital and/or extras cover under a complying health insurance product
ROIC	Return on invested capital
Virtual health interactions	Includes health concierge and 24/7 nursing and mental health triage provided by the Amplar Health network
