

## Sept 2025 Quarterly Activities Report

Albion Resources Limited (ASX: ALB) (“Albion” or “the Company”) is pleased to provide the following summary of activities for the quarter ended **30 September 2025**, marking the successful completion of its maiden Reverse Circulation (RC) drilling campaign at the Yandal West Gold Project in Western Australia.

The program **confirmed multiple shallow, high-grade gold zones** within the **Ives Find and Barwidgee areas**, demonstrating the **fertility** of the system and providing a **strong foundation leading into the next drill campaign**.

In parallel, gravity, IP, and pathfinder-geochemistry programs across Yandal West have refined the structural model and identified (post-quarter) new felsic-intrusive and **Bronzewing-style corridors at May Queen**. These datasets are expected to underpin an **expanded pipeline of drilling through late 2025 and early 2026**.

Post-quarter, Albion defined a previously unrecognised multi-kilometre gold corridor at Ives North, with rock-chip samples returning up to 42.1 g/t Au and a coherent 1.5 km × 700 m gold-in-soil anomaly coincident with major structures. The area has **never been drilled** and is now a **priority for heritage clearance and first-pass drilling in early 2026**.

### Quarterly Key Highlights:

#### Yandal West Project (WA)

Total drilling: **57 holes for 4,521 m** completed across Ives Find, Barwidgee and May Queen.<sup>1</sup>

#### Collavilla (Ives Find)

- A **high-grade gold hit of 11 m @ 20.0 g/t Au from 17 m (ALBRC006)** confirmed the presence of shallow, high-grade mineralisation within the Ives Find granite.
- Extensional success: **2 m @ 11.0 g/t Au from 52 m (ALBRC035)** within and **4 m @ 19.2 g/t Au from 55 m (ALBRC018)**.
- Multi-element assays: **Significant silver (to 105 g/t Ag)** and base-metal (Pb + Zn to 0.9%) associations indicate an intrusion-related gold system.
- Albion defined a previously unrecognised multi-kilometre gold corridor at Ives North (post quarter).

#### Barwidgee Prospect

- Confirmation of a west-dipping high-grade structure with a drill intercept of **22 m @ 3.8 g/t Au from 36 m** including 5 m @ 12.6 g/t Au (ALBRC055).
- Mineralisation remains **open along strike and at depth**, coincident with an **IP chargeability anomaly extending ~1 km**.
- Located **~10 km south-west of Yandal Resources' Arrakis discovery**, underscoring regional prospectivity.

#### Geological Targets and May Queen

- **Seventeen new targets identified across the Ives Find granite**, including seven high-priority zones.
- Targets defined through integration of gravity, IP chargeability, geochemistry and structural mapping, highlighting multiple intersections of gold-bearing structures.
- Post-quarter: Gravity and soil surveys delineated a **5 km Bronzewing-style gold-bearing corridor** at May Queen with coincident Au–Bi–W pathfinder trends; **RC drilling scheduled mid-November 2025** subject to heritage clearance.
- Post-quarter: Newly defined **multi-kilometre structural–hydrothermal corridor** along the northern margin of the Ives Granite.

#### Corporate and Capital Structure

- **Cash and Capital Structure:** Albion ended the quarter with **A\$3.8 million** cash and a tight register of **142 million shares on issue**, positioning the Company to fund planned drilling and field programs.

<sup>1</sup> All drill holes have been reported for *full details of drilling techniques, sampling and QAQC are contained in the ASX releases dated 25 Jul, 5 Aug, 25 Sep 2025*.

- **Mongers Lake Transaction** – Completed 13 August 2025 for **A\$1.5 million upfront** (A\$100k cash + 149,784 Capricorn Metals (“CMM”) shares at A\$9.35). These shares were sold at an average effective price of A\$9.85/share, providing additional liquidity for future exploration.
- **Contingent Milestone Payments** – Albion retains up to **A\$1.5 million** linked to CMM’s future resource and development milestones at Mongers Lake.
- **Performance Rights Conversion** – On 18 August 2025, directors and corporate advisor converted, in aggregate, **8 million** share performance rights, on the satisfaction of a 10-day VWAP of **\$0.07/share**, and 2.25 million performance rights that vested at \$0.12/share or greater resulting the Company issuing in total **10.25 million fully-paid shares**.

#### Message from the CEO - Peter Goh

*“This quarter delivered tangible progress on several fronts. Our maiden RC campaign produced multiple high-grade, shallow intercepts across Collavilla and Barwidgee, confirming the fertility of the Yandal West system.*

*The results, together with newly defined gravity and geochemical targets, demonstrate that we’re building a strong pipeline of prospects at May Queen, Ives Find and Barwidgee. Each dataset we collect improves our understanding of the system and positions us to test larger-scale targets with growing confidence.*

*Following the successful sale of Mongers Lake to Capricorn Metals, Albion is well funded to accelerate exploration. With heritage clearances advancing and the next phase of drilling scheduled for mid-November, we’re entering a sustained period of field activity aimed squarely at discovery and project growth.*

#### Outlook for December Quarter:

- Complete a Gradient Array IP survey at May Queen and Ives North.
- Commence drill program and progress evaluation of results.
- Identify priority drill targets at Ives Find May Queen for the drill campaign scheduled to **kick off Mid-Nov**.
- Progress heritage clearance at Ives North and prepare to drill in the **new year 2026**.

#### Yandal West Project (WA):

On 29 January 2025, the Company completed the acquisition of Yandal West Project after receiving the requisite shareholder approvals at the 22 January 2025 shareholder meeting.

The project lies within the Northeastern Goldfields Province of the Yilgarn Craton, in the northern section of the Yandal Greenstone Belt (Figure 1). The Yandal Greenstone Belt is an elongate, fault-bounded, north-northwest-trending belt of Archean mafic rocks and intercalated banded iron formations and felsic volcanoclastic rocks (Figure 2). The belt contains the multi-million-ounce Jundee and Bronzewing gold deposits owned and operated by Northern Star Resources (ASX: NST), as well as Wiluna Gold Mine to the North West (Figure 1). For more information on the project background see ASX ALB announcement 28 November 2024.
