

ACTIVITIES REPORT FOR THE SEPTEMBER QUARTER 2025

Dome Gold Mines Limited (“Dome” or “Company”) (ASX code: DME) is pleased to report activities at its industrial sand-magnetite-heavy mineral Sigatoka project and the Nadroga copper-gold and Ono Island gold-silver projects in Fiji for the period ended 30 September 2025.

Highlights

- **Desilting Program Status**
- **Update on the Sigatoka Feasibility Study**
- **Meeting with the Minister of Lands and Resources**

DESILTING PROGRAM STATUS

The commencement of the Government’s Emergency Desilting Program of the Sigatoka River for which Dome’s wholly owned subsidiary Magma has been selected as contractor continues to be delayed due to objections to dredging by the Jubaniwai Yaubula Committee, a group set-up to advise iTaukei landowner groups how to benefit from resource development projects.

As desilting is a government initiative for flood prevention with many other benefits for Sigatoka residents, the Company must now await negotiations to be completed by the Ministries involved and those who object to the program. There is also strong local support for the project as evidenced by the large number of signatures collected on a petition and therefore Dome is confident that there will be a resolution and is ready to commence work when the true community position is established.

SIGATOKA (SPL1495)

Feasibility Study Progress

During the September quarter the geotechnical drilling program on the Kulukulu South area was completed (see plates 1, 2 and 3). Samples collected from the program were sent for laboratory analysis in New Zealand. The Geotech sample analysis and report are required information is essential for final engineering design of the sand processing plant and completion of the mine plan. This is a major step toward completion of the feasibility study.

Meeting With Minister of Lands and Resources

On October 8, a meeting was convened by the Honourable Minister Vosarogo of Lands and Resources at which he indicated that the requirement for a full Environmental Impact Assessment (EIA) would no longer apply at the SPL exploration stage replaced by an approved Environmental Management Plan. The full EIA will be undertaken when a mineral deposit has been defined as part of the mining approval process. The Minister also reported that draft 11 of the new Mining Law was in the final stages of review in preparation for presentation to the Cabinet. They were planning to present the document for approval by Parliament in June 2026. A final draft would be circulated to industry later this year.

SPL1495 Expiry and Renewal

The current 3-year term of Special Prospecting Licence (SPL) 1495 expired on April 26, 2025. Renewal documentation has been submitted to the Mineral Resources Department and we understand that renewal for a further 3-year period has been recommended.

NADRAU (SPL1452) PORPHYRY COPPER-GOLD

Dome continues to investigate options to fund the next phase of exploration on SPL1452 where it is proposed to conduct airborne geophysical surveys followed by ground truthing of anomalies. Potential is evident based on previous exploration for discovery of Namosi-like porphyry copper-gold intrusives and/or high-grade gold-silver vein systems analogous to the Tavua and Vatukoula gold mines.

ONO ISLAND (SPL1451) GOLD

No exploration was conducted on SPL1451 during the quarter.

CORPORATE AND ADDITIONAL INFORMATION

Dome Gold Mines Limited (“Dome” or “the Company”) provides this additional information regarding the quarterly activities report for the quarter ended 30 September 2025.

During the quarter, the subsidiaries of Dome Gold Mines Ltd participated in meetings of the Mining and Quarry Council under the Fiji Commerce and Employers Federation (FCEF) as part of its ongoing regulatory and stakeholder engagement with the Ministry of Mineral Resources and other industry representatives. The Company’s attendance ensured continued alignment and support of transparent policy development and responsible resource management.

During the Quarter the Company expended \$297K on exploration and related activities. The majority was spent on exploration activities at the Sigatoka Project in Fiji, which is wholly owned by Dome. Approximately \$294K was spent on Sigatoka FS program, which includes Fiji office operations, consultants’ fees, pilot plant processing and other travel related costs. The balance was expended on license renewal fees, sundry exploration and tenement, accounting and administration related costs. No expenditure was incurred during the Quarter on mining production and development activities.

Payments to related parties of the entity and their associates for operating and investing activities during the June 2025 quarter totaled \$48K, which were directors’ fees and superannuation guarantee. As at 30 September 2025 Dome held \$314K in cash.

For further information about Dome and its Fijian projects, please refer to the Company’s website www.domegoldmines.com.au or contact the Company at (02) 8203 5620.

This quarterly report has been approved by the Board of Dome Gold Mines Ltd.

Chairman

Competent Persons Statement

The information in this Quarterly Report that relates to Exploration Results is based on information compiled by John V McCarthy. Mr McCarthy is the non-executive Chairman of the Company and a Member of the Australasian Institute of Mining and Metallurgy and has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activities which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr McCarthy, through his family superannuation fund, holds shares in the Company and is paid fixed directors fees for his services. He consents to the inclusion in this Quarterly Report of the matters based on his information in the form and context in which it appears.

No Material Changes

The Company confirms it is not aware of any new information or data that materially affects the information included in this quarterly activities report and that all material assumptions and technical parameters underpinning the exploration activities in this market announcement continue to apply and have not materially changed.

ABOUT DOME

Dome is an Australian mining company that listed on the ASX on the 22 October 2013. The Company is focussed on gold, copper and iron and industrial sands in Fiji, where it holds three highly prospective exploration tenements. Dome's objective is to become a major force in the mining industry of Fiji by the discovery and development of mineral resources within its Fijian tenements.

Sigatoka is a heavy mineral sand project containing abundant magnetite. Drilling to establish an initial resource estimate for the project has been completed, and final stages of a definitive feasibility study are now underway. Commencement of production at Sigatoka by conventional sand mining and wet processing is anticipated.

Dome's other projects are the Ono Island epithermal gold project, where an initial exploration diamond drilling was completed in early July 2018, and the Nadrau project, where additional exploration programs for copper-gold porphyry deposits are warranted.

Dome's Board and Management team has a high level of experience in Fiji, and the Company has been actively exploring in Fiji since 2008.
